David,

Usually get all these very well at Night
with out any interference :
KSFO 560 kHz to the West
KMJ 580 kHz to the South
KEAR 610 kHz to the West
KFI 640 kHz to the South
KNBR 680 kHz to the West
KDWN 720 kHz to the South
KCBS 740 kHz to the West
KFMB 760 kHz to the South
KKOH 780 kHz to the North
KGO 810 kHz to the West
KTRB 860 kHz to the West
But they have to make the Trip up over
the Hill and Down into the Valley.

What happened in Cuba Moday 27 Aug local time that might have silenced all usual transmissions?

~0330 28 Aug UTC, no sign of anything in SW British Columbia on such freq. as 5025, 6000, 6180, 9550, 9600, 11760 though other reception seems normal.

Did Granma Fidel and Uncle Raul forget to pay ConEd's bill <grin>?

LOL...no....and why would they?

iBiquity is very good at not answering questions, I've noticed. You'd
think for the kind of money they get for licensing alone, they'd be a
little less with the Microsoft attitude and a little more appreciative
of the pigeons paying tribute.

But, I expect too much.

Like interference free broadcasting.

What the hell was I thinking.....

> But when I was at a local beach yesterday, the same thing happened.

> My question is, could weak batteries possibly cause this kind of behavior?

Yes! That is *exactly* what happens as the batteries come to the end
of their lives in the Superadio.

As that time draws close, you'll have to turn the radio up a little
more to get the same volume, but you probably won't notice. Then, the
sound will become a little distorted, and you might eventually notice
that. Not too much later, what you describe will happen. (The FM
section takes more power than the AM and will stop working sooner.)

When you tried the radio the next day, as you wrote above, it worked
because the batteries had had enough time to build up a little charge,
not because it was inside (although some might argue the heat of the
outdoors could have increased the resistance of the components in the
radio more than it could have increased the output of the
simultaneously-dying batteries and was, thus, a factor). You'll
sometimes be able to operate the FM a little longer if you do it at a
low level.....

That's why the NAB fought tooth and nail to keep the pirates from getting a
legal toehold... they wanted to use all that bandwidth so THEY could legally
interfere with their competition. :)

"Interesting. I have an occasional problem in which the radio
(Accurian or Sangean HDT-1) will lock up and need to be turned off and
on if I tune to an AM HD station BEFORE tuning in an FM HD station. If
I tune an FM HD station FIRST, it NEVER happens. If I tune an AM HD
station first it seems to happen relatively randomly, but up to about
half the time (at times). The problem happened on the display models
of the Accurian as well, so I believe it is an Ibiquity problem that
so far has not been addressed."

If you actually went to that message board and read the comment about iBiquity's confidentiality agreement, and the gag clause, it does kind of explain why so many, not only here and in other locations speak so passionately about IBOC. And why you never really hear much more than the corporate line come out of anyone's mouth.

I know before IBOC was approved, I used to hear a lot of commentary and complaints about potential problems, inteference, noise and such, from the engineers I hung out with.

Today, they never say a word.

If for no other reason than that, support for iBiquity should be withdrawn.

I don't know what happened in this country, or when we made the turn, but I'm heartily dismayed at the number of times every day I run into someone unwilling, or unable to speak a truth due to the potential for legal repercussion. I thought The Truth was the ultimate defense.

Apparently, not so anymore.

I've never seen a radio in which the tuner sections are separately powered. Compared to the output stages, they draw little current.

And very few radios -- the GE P970A being an exception -- have separate AM and FM tuners. We never established if this was the case with the Superradio.

John, the bandspread control on these receivers was calibrated for the ham bands. I knew a guy back in the early 70s who had a novice ticket and one of these was his primary station receiver, I remember watching him sit there working guys on CW using it. He had dumped a Heathkit receiver from the same era in favor of a DX-150A.

Others may disagree, of course, but I believe that the 150A was the best version out of the bunch. It had the FET front end that eliminated the crosstalk the original 150 (which had bipolar transistors in the front end) suffered from. The 150B and the 160 used a single IC and seemed to hiss a lot more than the 150A, and the 160 used cheap plastic knobs instead of the solid metal ones on the 150A. Also, on the 150A the main tuning capacitor's shock-mounted on rubber standoffs, on the other models it's bolted directly to the chassis.

The audio quality wasn't that great on any of these but if you used headphones there was no problem - and it's tough to beat the sensitivity on these radios.

The 150b had a ham bandspread dial. Here's an interesting link to
information about the receivers and copies of manuals.

There's probably not a whole lot you can do. FM stations have a
problem getting out much more than 50 or so miles. And on AM, a dipole
for that band would be about a football field long, so it's hard to
construct a whip that'll do much. Other than installing a reasonably
good quality AM-FM whip, your DX-ing is probably going to be better
done at home where you can put up beams, loops, etc.

My only other suggestion would be to get an amateur radio whip & coil
for the 160 meter band, which is about 1.8 Mhz, and tweak it lower for
the AM broadcast band, but that would be a real monster... :-)

Since the topic of this thread is the GE Superadio, you should look at the schematics of the radio to provide some validity to your statement. According to the schematics, both the Superadio I and Superadio III remove power to the tuner circuits not being used.

While the tune sections may draw little current relative to the audio circuitry when performing at full output, at lower output, the extra current can have a significant impact on battery life.

>

Your apparent definition of tuner refers to the variable capacitor. Again, your statement can be verified by looking at the schematics. The Superadio I uses a single 6 section variable capacitor. The Superadio III uses varactors for tuning. They are driven from a single source.

However, if your definition of tuner includes all the circuitry from the antenna to detected audio, the Superadio I and III do not have separate tuners as they both have common IF circuits.

My statement is completely valid -- I've never seen one.

> While the tune sections may draw little current relative to the audio
> circuitry when performing at full output, at lower output, the extra
> current can have a significant impact on battery life.

If they draw little current -- relative to the audio stages -- then they
cannot have a "significant" impact on battery life.

>> And very few radios -- the GE P970A being an exception -- have

I asked about this several weeks ago, but no one responded.

If these radios have common IF strips, then what sections of the circuitry
are there to be shut off when not in use?

FM/AM radios commonly use the same transistors for the RF amplifier, the
mixer, and LO. Are these Superadios different?

>> circuitry when performing at full output, at lower output, the extra
>> current can have a significant impact on battery life.
>
> If they draw little current -- relative to the audio stages -- then they
> cannot have a "significant" impact on battery life.

Note that I referred to _full_ output, at lower output the difference can be
significant.

For example, with the volume all the way down, the current draw an a
Superadio II is 15.7 mA for AM and 22.5 mA for FM. The FM front end draws
6.8 mA more than the AM one. At low volumes these numbers increase to
18-20 mA for AM and 25-29 mA for FM. Since FM seems to draw 7 mA more than
AM, listening to AM and leaving the FM powered up may increase consumption
by about 33%.

At higher volumes the current for AM is 38-50 mA and for FM is 48-70 mA.
At thee levels, the increase in current is a smaller percentage. (I'll let

you figure out the math.)

The above numbers are measured on a real radio, no conjecture. The ranges are indicated because the program content caused variations in the readings.

That's not fair craigm. You are using actual data and facts vs. an unsupported general conjecture.

And you're right about William not knowing what he's talking about in this case. That seems to be the norm for many around here. Defending one's previous posts by pleading ignorance doesn't make up for making false generalized statements. Once the misinformation is posted, many will unfortunately believe it to be true. Thanks for offering the factual counterpoints.

People in this newsgroup tend to hate "HD" especially at night on
medium wave (AM) because it makes it very difficult to hear long
distance reception on nearby frequencies.

A long ferrite rod antenna is only one part of the equation. Who has verified that it has unmatched am reception. Unmatched AM reception is a level of performance I would not expect in a dressed up clock radio.

Assuming for a moment that it does have excellent reception, using that AM antenna to null signals will require that a radio loaded with 6 C batteries be lifted on one end and/or rotated.

I'm going to guess something like a Sony 7600 or Degen will have better AM performance and be a whole lot easier to handle.

> I'm hoping this is going to be
> one of the best am radios out there. Any opinions?

$100.00 for an AM FM radio seems pricey. But it is a big impressive white box with 2 speakers and a yellow backlit display, so those features have to be worth something I suppose. And it has 5 yes count 'em folks 5 memories each for AM and FM.

Just think,,, someday, I might get smart enough to know how to repair some of my old radios too.I reckon I need to find out if that elderly guy (Otto Wise) (he is in his 80s) in Clinton,Mississippi (Clinton,Mississippi is about five miles West of doggy's couch,Clinton,Mississippi was named after an ex-governor of New York,,,, kind of supprises y'all, eh?) is still alive and kicking.He likes to repair two or three old radios once a week, just to keep his hand in.

Bunch of old Western movies on tv, with Durn Tootin! George ''Gabby'' Hayes.Now, he is what makes the movie! (Drill em full of Lead!) Last year, I was letting my hair and beard grow long, just like George ''Gabby'' Hayes.My next oldest sister, she said,,, cut it off! (well, that settled that)

One time, George ''Gabby'' Hayes was baby sitting two boys for four days for his daughter, or daughter in law, whoever she was.They went out camping in the woods, hunting and fishing.When she got back, they was all dirty and scratched up, haden't taken a bath in four days.But, they was as happy as they could be.She, however, was agast.Durn city slickers!

I own an old Sears Travler AM/FM/Shortwave big Heavy (it is Heavy, weighs ten tons) Radio.It does work, sort of kind of, it was worn out when I bought it for a few dollars at the Goodwill store years ago.The mechanical push buttons on top of the radio are worn out, the on/off/volume control thingy is worn out.I can get the radio to work ok if I play around with it long enough.(Truth be told, I would prefer to be playing around with them wimmins)

I, as the Son of Man, DEMAND, America order millions of gallons of clean drinking water to be shipped immediately to Iraq to save the lives of US, the Human species. Please, help US make this a reality. Today. Please.

/ / The Bush administration's lack of interest in recovering stolen funds is one of the great scandals of the war. \ \

Scandle? Come on, we have to hunt down bushite to defend our DYING innocent lives. Bill a bushite for God, bill a bushite for America.

[BUSHITE LIAR] US preparing 'massive' military attack against [innocent] Iran
http://rawstory.com/news/2007/Study_US_preparing_massive_military_attack_0828.html

-

The Son of Man Begs America

/ / Seventy percent of the people are without adequate water supplies and 80 percent lack adequate sanitation. \ \

DEFEND THE PEOPLES OF IRAQ FROM BUSHITE NAZI DUMFUK GRUNTS

Who IS running this bushite nazi liar show, where they, our elite corporate media masters, kill our stupid kids with their flagrant naked monster lies, while refusing all calls for clarity, Johnny America really wants to know. Like immediately. Help us out here some man, don't be evil.

-

Tatum, who freely confesses he's a proud child killer without apology, is being made a free man in evil bushite amerika. The TRAITOR prosecutor has ridiculously stated to our world -

/ / Lt. Col. Paul J. Ware wrote in a 29-page report that there is insufficient evidence to show that Lance Cpl. Stephen B. Tatum did anything other than follow Marine Corps

rules when he killed [for no reason, innocent] women and children \ \

TATUM ADMITS he enjoyed slaughtering the defenseless families deliberately!! In fact, he wrote a card to a dead marine's family, testifying that he murdered the innocent young girls for the tyrannies of the antichrist. Evidence that TRAITOR Paul Ware and Mattis hides from the Christian American Family. Will YOU, as an American man, allow these two bush bitch nazi punks to survive as furthering the commitment of more war crimes against the INNOCENT? as a zionist neocon's "Hero"? Will You defend our girls? Peoples of Earth! Help Me save our children.. please.. please..please

TRAITOR Paul Ware "Tatum shot and killed people in houses 1 and 2, but the reason he did so was because of his training and the circumstances he was placed in, not to exact revenge and commit murder."

TATUM STATED DIRECTLY IT WAS TO EXACT REVENGE AND COMMIT MURDER!! HE WROTE SO TO THE FAMILY OF THE MARINE WHO DIED! A FAMILY WHO WOULD MOST CERTAINLY SUPPORT TATUM'S EXECUTION AS DEMONIC TRAITOR TO FREEDOM IN AMERICA!! ASK THEM!!

See?, Tatum is a zionist, but not Jewish!!! While neocons suggest our reality impossible without corporate challenge for exploitation of our 'unrepresented' lives.

/ / Ware has recommended to [demonic nazi enemy of Life 'judge'] Lt. Gen. James N. Mattis, that charges be dismissed, \ \

"Mad Dog Mattis,"

MATTIS!! The guy who murdered countless women and children at a wedding party, while after getting caught PROPAGANDIZING to forsaken America the innocent victims as al-Qaida!! CAUGHT! Mattis called innocent six year old girls "al-Qaida"! CAUGHT!

BUSHITE ENEMY OF AMERICAN FREEDOM Lt. Gen. James N. Mattis has been made into a "JUDGE"!! THE WOMEN HATING NAZI FUK! A JUDGE of Men by 'law' in bushville!!!

the [anyone's] CHILD KILLER Lt. Gen. James N. Mattis QUOTE: "It's fun to shoot some people" - defenseless innocent WOMEN HE SHOT!! INNOCENT CHILDREN HE SHOT!!!! YOUR CHILD!! FIGHT BACK FOR CHRIST! FIGHT BACK FOR our dying aMERICa!

Prosecutor Lt. Col. Paul Atterbury "Lance Corporal Tatum entered a home and participated in the killing of Iraqis who were not legitimate targets, then entered a second home and participated in the murder of [more innocent] women and children,"

/ / One of the Marines charged with murdering civilians in Haditha, Iraq, in 2005 knew that only women and children were huddled in

a back bedroom in a house there, but he [TATUM] opened the door and shot them anyway, a squadmate testified Tuesday. \ \

TRAITOR Mattis "The Marines have landed, and we now [as ENRON] own a piece of Afghanistan." [thieving from all for 911's neocon, especially undefended American pensioners... hail satan - 666.]

- ALARM! - ALARM! - ALARM! - ALARM! - ALARM! - ALARM! - ALARM! -

http://www.911pressfortruth.com/

/ / They [THE CIA'S IG REPORT] have conceded the 911 commission report is not the last word. Let's rally on that. \ \

http://www.911pressfortruth.com/

TWO OF THE PROTECTED 911 HIGHJACKERS WERE WORKING WITH SAUDI INTEL!

PROTECTED BY BUSHITE DIRECTLY RESPONSIBLE FOR THE CRIMES OF 911!

! ! ! D I R E C T L Y ! ! !

TWO OF THE PROTECTED 911 HIGHJACKERS WERE WORKING WITH SAUDI INTEL!

PROTECTED BY BUSHITE DIRECTLY RESPONSIBLE FOR THE CRIMES OF 911!

Murder for stolen money in America's America!, and CBC, CNN, FOXNEWS report no cause to care! Treasonous George Norry CONS Americans to murder for the evil neocons with threat of his going "ballistic" against any or all Americans who try to stand up as a Just peoples for what is righT, for Life and/or God by SPEAKING FREELY. Will You try?, or go silent to die as unworthy? Your call bud...

-

/ / Nano particles of iron were found throughout the dust of the WTC collapses -- This phenomenon can only be produced when iron is brought to its BOILING point. Pull your head out of your ass and start looking at some scientific facts \ \

-

What Freedom do bushite war the innocent for to rape, pillage, and murder as blind neocon followers of the 'lawless' demon antichrist? Eh?

"Al-Qaida" = "General Mahmoud Ahmad"

CBC, CNN, FOXNEWS, the Zionists, purposefully work to LIE to the dying American Marine, that the ungodly bushite wars to escape the 911 perpetrators hold some hidden benefit, as the TREASONOUS neocon thieves freely rob from both undefended American and Iraqi citizens, The neoconner, Mr. Bush closed criminal investigations on 911 immediately after the event occurring, while Billions are stolen through 'ear marks' and

TVed Americans have no care known to speak of.

Done with American tax paid for rapists, torturers, and terrorists like Aegis who dress up as al-Qaida to murder godly lovers of Justice. CNN, CBC, and FOXNEWS would rather kill the Marine, than teach them where to aim their weaponry of liberation.

CNN, CBC, and FOXNEWS speaks NOTHING to demand the execution of hiding as 'British' soldiers who on prized video tape, beat to death young barefoot children for erotic fun, nor on mercury vaccines not banned minus "The President" in name. BANNED if God were Loved by America, or that the man or woman on the street would financially support my rise by popular command. Would you leave me to know, I will be left without a home to rest, or food to feed my hunger? Would an American?, I ask all Peoples of Earth to witness the American's contempt for Our worthy lives. Sattler ordered the murder of more than 200,000 innocent people in Fallujah, and they speak nothing but lies on how such demonic behaviors are godly as just ignored. Our Lives forsaken, as they hold their very own to die sacrificed for the unelected neocon. I AM AMERICA.

Today, there is nothing more i wish, than to hear bushite nazi savage thieves for the neocon die rightly, before the innocent they target for murder. All in an attempt to 'escape' those truly responsible for the crimes of 911 a bushite whore practices, as an enemy to Christ and America.

CBC National News producers must be tried for treason, CBC reported that the Taliban banned girls from school, and women from work. LIES. I want the death sentence returned to Canada, to have executed Brian Stewart for his boastful true contempt for the lives of Canadian soldiers, who he LIES to, to have them die as assisting the escape of the zionist bushmob, by supporting fundamentalist dope pushing savages. Death to the documented liars of the zionist neocon, death to those who indiscriminately murder our species for a stolen nickel.

Fight Back for Christ Sake God Damn You

Johnny America Speaks Out

"what's this freedom war against Life for again"?

Hannity is a perfect example of what a neocon is. It's a one
way communications system. He tells us what we think, and
he'll never takes our calls, they won't read our emails, and
they'll continue to pretend WE don't exist. AND... when WE
die, they'll be richer for it. AND you'll be dead, your
innocent brother will be dead, your innocent child will be
dead. No evidence against an accused is US being truly
abused. George Walker Bush is Guilty for 911, while every
irrational bushite is a traitor to the American Family.

ABCNEWS.com : FBI Called off Terror Investigations

THERE ARE certain principles that we would all agree to
publicly speaking. There are criminals who don't like these
ideas, but they ain't going to speak out against us. Example
'I don't want to be held accountable to the American public,
cause I want to steal that 16 billion dollars for myself.
That's my public opinion.' What are we going to do but defend
ourselves of deathly lawless tyranny, eventually. Or, you
won't by DECIDING not to decide. Support our rise as the top
cop of Humanity, coming down for diplomatic talks to engage
the flagrant wanton stupidity of the bushite grunters. All on
hopes you'll consider also, these Kingly texts worth a couple
hedge funder salaries, a sixty cent barrel of oil marked up to
74 dollars, or a thousandth of the money America would save in
a year, if you adopted Canadian Health care systems overnight
for yourself to immediately provide all People the respect for
life we deserve. Or don't, and needlessly continue to pay
twice as much, while dying broke as self made losers without a
cause worth preserving. A free market open to waste for profit
what more could we ask for? Death to the bushite.

UN's Admission: Lebanon Was Right All Along
http://www.globalresearch.ca/index.php?context=viewArticle&code=COO20070816&articleId=6568

/ / Last month its cartographers quietly admitted that Lebanon
is right in claiming sovereignty over a small fertile area
known as the Shebaa Farms, still occupied by Israel. Israel
argues that the territory is Syrian and will be returned in
future peace talks with Damascus, even though Syria backs
Lebanon's position. The UN's admission has been mostly
ignored by the international media. \ \

Nazi zionists gave US Jews a bad rap again I see. They're
despicable criminal savages the neocon.. who steal the rights
and privileges of US peopled folks, all to fall victimized
with their self confessed contempt for love and justice.
Condi's crew dropped seven million land mines to murder
ourselves for generations, and, shouldn't she and the neocons
responsible be put to death for such conducts?? If not then,
when? discuss.. They openly target innocent human beings
indiscriminately without apology, but excuses that don't hold
water. Not that corporate news professionals are even
pouring! It's most definitely the re-occurring true story of
a censored mankind with You as it's innocent victim. For,
what human would support victimizing others for the tyranny of

blind terror? Only bushite amerika would fall silent under such self contempt for our constitutions.

/ / [..]Israeli "Defense" Force (IDF) has announced that it will discontinue its practice of "capturing" populated Palestinian villages during military training exercises. The IDF states it will "reexamine their policy" of conducting such raids on uninformed, panic-stricken Palestinian villages. \ \

Tell me, is this the godly people the neocon boast of for defense in? Or, just again examples of standing terrorism against life ourselves - committed by the censored as will giving, sacrificing American payer? Justice is Freedom.

Do you care to buy the bushite lies, when they commit openly the very same terrorist acts they say we should all be outraged against? Somalia is a case to point. They murder helpless people as bushite, then say they'll remain dying to thieve further as enemies to Humans being. It doesn't fool me, but perhaps it does you. A neocon soldier murders innocent Iraqis, while selling you they are all there risking their lives to bring freedom. So, they die. For lies. Die. Again, KNOWN Aegis goons openly commit crimes against Iraq done officially to get killed! the supposed to be Patriot Marine. P2OG. Soldiers under bushite command would rather die cowardly, than to honorably demand the bushmob's arrest for public trials as defeating ungodly fascist war criminals.

Why suffer otherwise this way under the tyrannies of naked neocon plunder to deny our lives for measured justice I ask YOU again, please believe: truth will set us free.

Al-Qaida = General Mahmoud Ahmad = ungodly bushite liars

I can't understand why you can't help get this party up as starting by supporting our rise to highest acclaim with my authority free willed to anyone. Let's face it, we're great because Your great. However, for greed, corporate america aren't taking our concerns nightly. We want Justice, and WE will get it if we reflect together with impeccable credentials as standing with measured reason for proper assessment on rights making might. Who is who here, a freeing peoples I tell you, arriving to bring a true patriotism to Life for US. Are you with yourself as respected an equal under the law devised fairly for all concerned parties?.. well then... let's g o ! ! !

be Great!,
for here comes the mighty,

Johnny America - make way! make way!

-

Footage of Israeli Soldiers Beating Palestinian Children
http://www.uruknet.de/?p=m35516&hd=&size=1&l=e

-

Where is the Evidence?

How so can all of Iranian Military Officers be
"terrorists", while lawless bushite bomb defenseless
innocent peoples indiscriminately routinely, with
praises from the actual demon antichrist responsible
personally for 911 I want to know. NOW. Kill a bushite
THIEF for American Freedom why don't You victimized
Peoples of Earth? A bushite kills bushite for stolen
nickels. Examples: Aegis, Condi's land-mines, fixed
elections, torturing. driving over children, blahblahblah..

Al-Qaida = General Mahmoud Ahmad = ungodly bushite liars

/ / Or, instead, maybe you'll idly watch some innocent person
willfully be sent to prison by liars in your demonized name,
to defend the ungodly evils of war criminal traitor, our Mr.
Bush Jr. in foolish disguises. Your call Bud. \ \

bushite talk about random killing of godly persons
http://www.youtube.com/watch?v=OHvtIL_TRGE

"You can basically kill anyone you want"

/ / Just a "few bad apples"? I don't think so, this is much
more widespread from what those soldiers were saying, and
SANCTIONED. \ \

Look, a bushite would kill an American child too. When or
will Americans become American? Death to the bushite, death

to the enemies of Man. Again, national bushite broadcaster, George Norry stated he'd go ballistic against any American soldier who refused to murder for the neocon as traitors, and "America" STILL refuses to speak in their own defense for dying. Death to the bushite, death to the enemies of Freedom for America.

/ / "as the bullets began to fly, the blood sprayed from between her eyes, and then I laughed maniacally." [, then were heard the cheers of godless bushite dumfuk traitors obscening to God and Man as the unholy enemy.] \ \

http://youtube.com/results?search_query=%22hadji+girl%22&search=Search

Look, listen to soldiers who sing about the joys of murdering innocent young girls, see their faces in the videos celebrating the murder of girls LOVED by GOD and ME, and question: Why won't you as an American assist Christ in the glorious hunt. Nothing better in this world than to bill a murderous bushite who claims it's lawless to this suffering Universe, ruled criminally by the demon antichrist enemy of ALL HUMAN LIVES. All religions want US to defend GOD - please help me take on all challengers. We want a fight to death with that dishonorable pro child killer bush bitch nazi "Marine" in a cage match to earn world title of greatest fighters. Pump it up, Johnny's coming Home to end the reign of bushite tyranny by taking on demonic enemies of Our children, me, or US. Death to the bushite, death to the enemies of GOD. I promise to put on one hell of a good show. HELP ME!

I'm a Good Man
"Al-Qaida" = "General Mahmoud Ahmad"

Why will you not as a member of Humanity, make the call
to the Coast to Coast radio network of demon evil nazi
savages who deny your legitimate concern be addressed freely?
Hate God and Love do you? Couldn't care less could you
for the giving lives of ignorant Americans as an American?
George Norry isn't as stupid as he wishes you believe him
to be, when he supports lawless carnage against the
innocent, to help escape those truly responsible for 911.

--- ---

The Case of Kenneth Foster:
Texas Prepares to Execute Man for Driving a Car Near Scene of Murder
http://www.archive.org/download/dn2007-0809/dn2007-0809-1_64kb.mp3
http://www.democracynow.org/article.pl?sid=07/08/09/140214

http://www.freekenneth.com/Foster's%20subsequent%20writ%20final.pdf

A JOHNNY AMERICA EMERGENCY

"The prosecution's case was based on the unchallenged and
unexplored inference that Steen's testimony provided. Because
this evidence was not tested at all, and Dillard [was not
allowed as] never called as a witness, Foster was denied the
effective assistance of counsel."

There is no criminal intent alleged as found here. Therefore,
Foster is innocent of the crime he is going to be murdered by
the fascist enemy State as.

"Steen's testimony supplied the basis for the inference that
such a conspiracy existed."

No it doesn't, never did. Despite the Prosecution's hypno
mugger insistence to the incompetent jury, "that it's a no
brainer."

Texas Prosecutor "Foster and Brown understood they were there
to commit another "jack" [robbery]."

No, this was not established by the facts, or testimony to the
jury. However, even still, would not warrant a conviction for
attempting murder.

Texas Prosecutor "You remember Julius Steen's testimony? He
said that he was riding shotgun, he had a certain job to do"

This is unreasonable inference. For he didn't state he had a
job to do in his dream state of sleeping for unique murder
strategies about to be implemented with his direct "shotgun"
cooperation as a mastering the mind sleeper cell, a jargin'
specialist don't you know., Aiee boiee. If anything, it's
actually the reverse, for to be sleeping on the job, would
have had someone wake him up. Unless of course, there was
no planned intention as so alledged by everyone involved!

A Lawyer quipped: "What is the difference of voluntary manslaughter to first degree murder in the new America? Twenty to life."

America's legal politeness is too generous. The Prosecutors in this murderous case are tremendously unqualified as unjust, and should be minimally disbarred. If not out right arrested for contempt, as for attempted murder! The accused had not earlier murdered their armed robbery victims, surviving victims that Foster was testified as visibly and aurally upset about. Look EVEN IF four guys do a bank robbery, and one guy stays back to molest the 'homeless' mascot baboon crying on the street in crisis, or flies to Vegas to short change the money girl of her holdings, doesn't leave the others 'involved' to fall guilty of everything associated to any as all automatically without question allowed uttered ever. Such as, why isn't the Texas community guilty also of Capital Murder for excepting some in Texas as themselves are lawed unfairly by unquestioningly excepting the State's Prosecutor for the government is formally granting our defense of no counter? Forbidden cross examination of the State's definition of a witness's statement as co-accused is definitely un-constitutional. Who was the jury really and how did they not know what was absent as American jurisprudence there? Who was the Texan "Judge" to find no outrage in absence of argument for 'final' verdict? What was he to judge, if the defense council's request to be heard wasn't recognized?

If we measurably site the bushmob as anti-Iraqi nazi savages, thieves and murderers, as not America's way to US arriving coppers, should we therefore arrest ourselves wrongly for undermining freedom for the suffering World? Like the Bushmob wants to do in stealing monies from those who speak such truths for Justice on behalf of our Humanity?

Armed robbery is the most serious of offenses outside of rape or murder, and deserve seriously termed prison sentences for the convicted, [of which I'm not convinced Foster is guilty of either despite his guilty plea] however, Repuglicons ROB from America hundreds of billions with earmarks by threat of false accusation by gun toting bushite loyalists, and no Texas Prosecutors are calling for the arrests of those that "voted" so, let alone warranting their death sentences for not acting sooner. The Prosecutor's "no brainer" insistence that Foster is guilty of murder, apparently, doesn't however apply under his conditions to the two remaining others present. Unless the Prosecutor believes someone here is going to get away with capital murder... That's of course if we buy the State's interpretation of a sleeper's dream.

Foster's Legal Council "These circumstances deprived Foster of
a fair trial every bit as much as if their testimony were
suppressed by the State,"

King Johnny Wizard Proclaims:

Kenneth Foster is declared innocent on the charge of murder.

Rick Perry, the TRAITOR, will be tried and executed for
Capital Murder in this specific case if Foster is not
acquitted by his State party. Under Texas law, those who
willingly participated in what would be a state sponsored
first degree murder, would also be guilty. 'Law of Parties'?

Please, as an American, defend your freedom as if your life
depended on it.

The Law Man,
Johnny America

--------- {snip here for publication} ---------

26,000 total Tickets sold - 14,302 votes tabulated
http://disc.server.com/discussion.cgi?id=149495;article=112801;show_parent=1

/ / Now think about that for a minute. 26,000 people purchase tickets
to go to a Straw Poll event, and yet we are to believe that 12,000 of
those people couldnt even care less about the voting part? Just what
were they there for? I don't buy it. This is not believable. An
Investigation is needed here. \ \ ALL PAID CASH to "vote" also..

I said that years ago, but the bushmob isn't listening, because,
hey, happy George Norry don't care, and CBC, CNN, and FOXNEWS
isn't taking our calls either man.

American soldier: Your enemy is TRULY LIAR happy George Norry.
The demon knows of Ahmad, and forbids any guest from uttering
such understandings in defense of the DYING dumfuk grunt nazi -
Good riddance? Do you care that your country men are dying
for the criminal zionist neocon as traitors? Support my demand
for US to be heard GOD DAMN YOU. ...or die.

-

Bush "Iran has openly declared that it seeks nuclear weapons."
www.thecarpetbaggerreport.com/archives/12477.html

Look, CNN, CBC, and FOXNEWS, who know the bushmob did 911,
is saying nothing further! The demon enemy will LIE America
into another war against GOD, and they'll only give you a
happy wave off to see Your child die for the zionist neocon.

-

Pro-mass murderer war criminal Kristol once again, speaking
freely to Jon Stewart unchallenged internationally on Our TVs

as "Two Jews" stated..

"We don't believe in original sin."

Colbert half an hour later, "Are you calling Jesus a liar?"

Now, that's funny..

See? Jon Stewart isn't Jewish, for he's not black, and he speaks no words in defense of the innocent robbed and murdered in his "Jewish" name. A Zionist! He wants to sound our public voice silent where a Hitler or Kristol marches innocent others into gas chambers by calling ourselves terrorists without a thread of evidence to thieve from as unworthy. Few know, Hitler was a staunch Zionist too. The excuse would be, but G-D is worse.. because, as the "Two [atheist] Jews", they can commit no sin against Christ by trumpeting demon evil lies as if, we have no stronger indivisible arguments present in OUR defense ever for Just causes. AND, he's near the best our American national TV media has to offer!

Did you see Jon Stewart whore himself to Albright TOO!, the physco nazi witch who holds no regret in the murder of more than 500,000 CHILDREN? I believe, Jon Stewart suffers from the ignorance of Celebrity more so, than a genuine hatred for Humanity.. as that is the fault of most TVed Americans. Nothing more greater than getting on the boob tube, to really make your mark on this fleeting world as they sell their life away for nothing but the privilege to be recognized at a gala swarray.. fed on the victimized innocent of Humanity left robbed as worthless their grand stage. His show is often quite bright however, and leastly, reminds people, that CNN, CBC, and FOXNEWS isn't the be all and end all of respect for US caring viewers.

but looksee.. EVIL is real though -

THINK of how Truly evil a person would be to lie for CNN on this issue.. a "Jew"? would do this?..
A "Jew"?

/ / The inflammatory words MEMRI blasted the US media with were when the young caller "Sanable" was supposed to have said "we will annihilate the Jews" were not even mentioned by the caller or by anyone else in that clip. \ \

SEE! A ZIONIST SAID, "we will annihilate the Jews"

http://www.frontpagemag.com/Articles/ReadArticle.asp?ID=25994

/ / When hundreds of millions are calling for the extermination of the Jews of Israel this is more than a lie; it is a blood libel. \ \ This is like satanic neo-nazi EVIL no?

See? Zionists are nazi betrayers to GOD ALMIGHTLY, for they
believe we do not have any power great being Loving for
others. You WILL see how GREAT we destroy the bushite, then
you'll know what joy love for god as innocence is. And then
You'll know for sure, how WE truly are as Just and Free.
And, kinda scary Being all godly and such..

I am,

Johnny Wizard

The "Shock and Awe" Gallery
http://www.marchforjustice.com/shock&awe.php

Demon evil enemy neocon George Norry is a naked traitor to History:

"..Show me proof that there are real demons"

You, George Norry are a demon because you purposefully
broadcast to my America the need for neoconned soldiers to die
for the lawless demon antichrist, knowing full well, you work
'happy' to escape the 911 perpetrators of American
Wrath, like General Ahmad, with your truly evil demonism about
Life, and betrayal to freedom for US humans.. George Norry is
'the evil spirits' he says you can never find. Evidence.

What?

There is no found honor in a thiefs paradise of neocon plunder
my friends, no honor.

Have you seen the documented murders of INNOCENT MEN trying to
defend their community from lawless nazi dope pushing
fundamentalist savages?, just recently released by those who
fly in the antichrist's apaches? If you see these things that
are in the demonic neoconned dishonorable "Air Force" at your
dinner table, talking like human to enemy George Norry, or
just walking down our streets like Aegis tries, kill them
justly for Yourself, Freedom, GOD, and me, please, Thankx.
George Norry, and company claim to have justification in
murdering helpless suspects, I say, they don't. Death to the
bushiter LIARS, death to the enemies of Man.

going all with in under ring,

there he came like, outa nowhere!

a man of knowing something or another,

King Johnny Wizard from Famed Fortune

Rock on!!! You puNkz,

-

Elected Governments All Over The World

British MP Galloway and Richard Perle on TV together!!
http://youtube.com/watch?v=nu4GBnxi3wc

Galloway "These are the people who have overthrown elected governments all over the world. and he [Richard Perle] comes on your program to prattle about democracy. These people don't want democracy, they want slave governments. If it's a slave dictatorship - that's fine. If it's a slave elected government - that's also fine. The only thing that matters is that the government is a slave government. That is why they will never invade Egypt. They will never invade Saudi Arabia. They only invade countries, or threaten to invade countries, who stand against them and who refuse to be slaves to them. That is why they hated Iraq, that's why they hate Iran. That is why they hate Syria. Of all the faults of all the three regimes in these three countries - they were never slaves to the United States, and that's why they were attacked. [...^] In Iran, 17 million people voted for the president, Ahmadinejad, and 10 million voted for his opponent Rafsanjani. Those 27 million are determined to exercise their right to nuclear power. The response of Bush and Perle is to threaten them with invasion. These are the people who murdered Salvador Allende, the elected president of Chile. These are the people who have overthrown elected governments all over the world."

http://www.thetruthaboutgeorge.com/

Perl of wisdum 'yeah so? Peenackers steal the rights of freedom from people for stolen profits - we rob Americans of their freedom, as is their pocket books, and their wasted effort, all easily conned to be sacrificed for death by false conclusions trumped up by a naked false accuser who will accuse yous lost blindly as the innocent sucker - er.. I mean suckers, Your Mr. Bush Jr., is a demon evil whos attack is not televised for defending yourselves over. Truth and Justice, we own. See?, peenackers are filthy rich from conning your, given life away, right before your eyes. What are we going to do about what is given, bust the bad guys for blatant treason against Cops and the Universe? I mean really.'

The Iraq War Exposed
http://www.netctr.com/iraqwar.html

Neocons are frankly, just dumb don't you know. Don't forget though, their unwavering Public commitment to answer with murder as enslavement of Your rights, through committing criminal acts in our demonized innocent name is real. Johnny Wizard needs his own international live radio program. Any others of all knowing sentience as wisdom being smarter than whoever, even willing to start too a conversation over these

matters of justice for freedom ad-infinitum!?

What?

-

WeAreChange.org

Have you seen this research yet? Quite astounding the ability
of Americans committed to working for good. It's too bad we
don't have like organizations world wide, committed to gathering
important info to serve the interests of the public body.
Someone should buy out CNN with the facts to save the lives
of our country mens. Or, we don't, and more needlessly die for
their personal contempt for the value of YOUR '"poor'" life.

-

911 Leaders Saying They Are Jesus
http://rss.nfowars.net/20070802_Thu_Alex.mp3

Jason Bermas "I just want to let people know, that if this is
a hit piece that involves, you know, saying that we're all
blaming the Jews, or the Zionists, or something ridiculous,
where we go after an ethnic group, [Jason Bermas suggests
"Jews" = "Zionists"?] 'we' can not be associated with
ANTI-SEMITISM, space beams, utter kookery.

Alex Jones "Or Jesus! they have 911 leaders saying they are
Jesus now. They have people saying it's space beams from
Pluto. And folks, I've tracked these people, they all were
formally in intelligence, or connected to the Bushes, the
space beam thing came from a almost cabinet member level Bush
member, and folks this is a setup to poison our movement."

Now??

I've given my phone number several times to Alex Jones, of
which he's not as of yet, invited me on as official guest, for
fears he can find no arguments against US I presume. 911
financier Ahmad = al Qaida, and we have molten iron on video
flowing like water. Demon Bush Jr. gave US zero, while
closing criminal investigations immediately after the
terrorist offense of no questions!, no questions! Case
closed. But no, the American media rarely if never mention
these facts, while insisting Bush's deathly war criminalling
is as only a puppet, look away! look away!, leaving without
challenge on the, teen like naivety of wearechange.org's
consistence that "we", who demand justice for 911, who might
also hold the opinion that zionist behavior does not blindly
equal being Jewish, should not be allowed to speak Justly for
our public challenge, because bushite Amerika has no defense
for censorship against ANY of our judicial wanting, as

documented positions on behalf of the suffering to death victimized public. Why? Because we are Just. Well, I try to be anyway. (I've spoken as written for YEARS, with NO ONE WORLD WIDE countering in the public realm, but for the strangely odd insult. Bushite do exist, don't get god wrong, but dumb evil bushite brood in darkness with censorship like all zionists do, selling to be 'godly' honorable men, when in truth, they'd murder anyone of US for a stolen nickel given to a neocon. I, as open line talk radio producer, win every time, always, forever, never fail. [er.. yet..] Why? Because I treat YOU fairly. America should do the same. We are all in this together. Zionists like robbing then killing defenseless innocent Christians, and Jews, while just lying that they don't without scened factual TV perception. Demon 911 WITCH, zionist Condi 'okayed' the dropping of more than SEVEN MILLION land-mines on Lebanon, purposefully done to indiscriminately murder ourselves for generations. Jason might foolishly call you an "anti-Semite" in fear for speaking such not understood truths. And importantly, not because they can publicly disagree so in open debate, so sides to not allow US to rise in acknowledgement to bring about Justice as demanded, for ALL as ANY. (Gee, who's the neocon now eh? (we're all sinners.))

If Americans really want 911 Justice:

Help US out by putting the video of molten iron flowing like water out there in the minds of any who have doubts, tell them hypno mugger Bush, gave US zero to substantiate his public falsehoods, and tell US about Ahmad as more than a passing fact that means little of nothing, then, WE, The People, will believe this has more to do with Justice for Humanity, than the American suffering movie goer ego being, "leading the free world", by voicing no public concerns on the criminality of the bushmob shysters. Left happying in the George Norry, as a TRAITOR to a dying America not hearing. An enemy of Liberty to the, tried to be free soldier, who is led TO DIE still un-wittingly by lie for the misfortuned neocon bounty of global tyranny through coast to coast story lining. Look, the peenackers will tell you freakishly, that they work to lie to us all, to take advantage of a plain to view weakness. I swear. The neocon wants to con your kid to die for a war lied into with as our stolen goods. We lose as crime victims, while they win free accountability because, (well... I'll just let you finish that one liner sucker punch..)

www.newamericancentury.org

Jason Bermas "I just want to point out that we're going to encourage the people to look at the evidence for themselves."

-

Ron Paul Loves Ron Paul!
http://youtube.com/watch?v=eAvt7BdvJiM

"If you happen to be working for a big company, or the government, you get health benefits dirt cheap.[?] But if your trying to make it on your own, and you don't have insurance, you might be charged two or three time more than the government will pay!"

Almost. PBS showed a man who fell from a ladder, broke a rib, and was bankrupt from his near $250,000+ bill for, for private "free market" health care. Money demanded that doesn't go to the doctors, nurses, or "public" hospitals. So what is Ron Paul saying about Ron Paul? I'd wager, he doesn't know himself, and fears like FOXNEWS from open debate of those who try to teach US to walk through his own argument, (or follow the money (al-Qaida=Ahmad)) and find the fault of all proud blind Libertarians. Look, don't you want the best service possible for the dollars expended? Why give your BASIC health care treatment dollars to a do nothing shareholder, or hedge fund CEOer for procedures, who's success is not made better by needlessly increasing the costs for nothing but selfish sicko greed by bribe payers. Again, rarely are those that "earn" billions in public health care, care givers, but takers. Someone ask Dr. Ron Paul, or Ross Perot, why those with leverage, are able to negotiate better deals through intelligent design, leaving others as single payers, (poor unrepresented pension people,) to flip their expenses? Do we want to publicly sanction screwing over the poor with ignorance, to feed the pay no taxes either, talentless as lowly, highest ranking rich? I suppose if it means radiation treatments.. anti-psychotics or, the play time of genetically altered vaccine strains of true quackery, as has to be done trustingly religious on someone for our money. Money lost as investment on privilege in the market equation of lowering the human capital available to maximize the de-profiting of our shares for nothing but money grubbers. Again, Americans pay TWICE as much as Canadians per-capita, where for those dollars Canadians get full coverage, while Americans are then expected to go out and buy insurance now. TWICE. (Did you know that DO NOTHING hedge fund managers can "earn" as much as 1.7 billion per year in salaries by nickel and dooming everything? And, it's only an elite small few who are 'lawed' to do so? Now, who would want that in a free to be me democracy?)

traffic light for commies, traffic light for commies

A dying waged - by the painfully wealthy status-quo ignoramuses "this is the first step to socialized medicine!!" ahhh!!! caring doctors with calculators are connecting for better prices to improve care.. We'll take less and they'll be free to think.. FOR THEMSELVES! AHHH!!! bare ass and run

for cover!! embarrass for. a caring Doctor with math skills and Law is a comin' round, play smart stupid. "What do we do again"?, play smart stupid. . (`_`)

To fix this we must decide what this issue that encompasses the "Health Care Industry", is passing ourselves away off as. Politicians who promote pushing the power of pill popping to purchase your placated peace of mind is perturbed.,

Do Republicans mean to bring health care suffering out of control with no market values, because truly they have little of no skills when it comes to fixing their own buffoonery? Hmm... unless they count to hide the bean all together, fixing the game intentionally to have US lose by remote controlling stupidity! 300 channels, and nobody's taking our call from the space cased file of, "what's this freedom war against Life for again"? Look, is mercury as a medicine good or bad do you think?, let's ask someone for Christ's sake. Or for Deb, Henry, Bill, Beth, Mark, Carol or Tony. Johnny Wizard, our everyday normal magic man of folklore, opens up the stage to ask all the people together, "Are we Man or machine to take this all lying down quietly"? We need to talk about what a King like me, is doing in a place like this, under appreciated, and left alone without my home, dying for a break in radio programming, as President of the company that started the sands running, Shareware Earth Co., a god-like production of miracle and wonder!! You just participate, and you won't even believe how good we could have it, Rejoice, for Johnny Jesus has come down for diplomatic talks. Give away! Give away!

Again, CNN, CBC, and FOXNEWS, (who advertise their listening) suggest G.W. Bush and Co. have publicly acted nothing warranting immediate arrest, or have openly supported the great Kucinich's plan for Impeachment, and consequently, are leveraging America into this mess 'because' we were portrayed as sold to the U.N. for freedom as Iraqi's Grand Strategy. BOGUS! Nothing about the PLANNING of killing people indiscriminately for financial criminal gains as bonafide terrorists, for we had unrestricted access prior to dropping bombs for mangy LIAR neocons. ORHA. I have yet heard FOXNEWS complain in pains of liar BUSH personally being the al-Qaida cause responsible, (like Alex Jones sells foolishly falsely also) More than a million INNOCENT people have been murdered directly by the criminal action of the broken Bush Rule, UN-CONSTITUTIONAL! Don't they know of what You speak? Now???

Make it so,

President and CEO of Shareware Earth Co.
King Johnny Wizard

Christ is Person ! ! !

A reminder: Peres, the Devil demon LIAR, sounds as sweet as any little old man could, but for the fact that he LIES about targeting innocent godly people for murder! While playing ignorance, as if, he doesn't faith G-D as a real Jew would from Israel. Zionists are atheists who lie as neocons who sacrifice all for ill gotten money stolen from US as the blind foolished already with G-D from the Ol? Testament, all on how this Life suspends storied belief as Divine, to say finally, out loud, "hey wait a minute, who's in charge here?", is really something of a miracle. At least when I say it.

Justice to the bushite, Justice to the enemies of America, so called out the Son to God as King of men:

BELIEVE!

Like, so in walks this, out of work time Lord who thinks to converse to the masses about the most basic of reasons to save the lives of innocent others, leaving him convinced, he really needed an audience for this fable to rise as profitable venture. So, it was followed to make it out there in this real world, is to care for Justice measured. All done so to bring greater hope for a better future as all would follow, boy, were they surprised!

Johnny Wizard has arrived..

Spare me some money won't you please for this art of tragedy?

P.S. I'm still hoping that Coast to Coast will bill me godman co-host, all to openly address these freedom for all operations, with Justice ruling our way over the irrational tyrannies practiced by others happily blinded. Evidence is required to convince ourselves on who is good or evil. Period. Don't like it? Too bad. We are on charged!!

Intelcenter.com = alqaida videos you can get nowhere else!

It is important to also realize, this intecenter terror bringer does nothing to sell the arrest of the actual perpetrators of 911 by supporting our Policed requirement to form actual evidenced conclusions in our the land of the make believe. Now, who personally are these pro-bushite anti-American terror scripters, and what is it going to take to find an informed citizenry out in these here parts, to make the proper conclusions by phone calling for furthering our infos around to channels of command of the big ringers in the sky. I'm sure we's a be furious over these facts of high treason in America if we were allowed to freely say as much on our radios and TVs. Al-Qaida = General Mahmoud Ahmad

That's what I'm talking about.

over and out

-

/ / A group of wounded civilians were also brought to a hospital in neighboring Kandahar. Journalists were barred from filming or talking to them inside the wards. \ \

Freedom from what do bushite murder indiscriminately?

/ / Iowa GOP is STILL planning to use the easily rigged Diebold computers to "count" the vote at the Straw poll! \ \

THIS IS TREASON. But, look, teen soldiers are commanded to be bushite nazi savages, who cowardly refuse to defend America from Mr. al-Qaida, General Ahmad, all to thieve further from the undefended American public.

The Arts - an Inside Job

Look, CNN, CBC, and FOXNEWS is lying to US. They know the EVIL bushmob did 911, and have decided to kill your kids for more rewards, instead of defending the innocent. They hold the true value of YOUR LIFE in contempt. Demand justice to defend our freedoms why don't You?

[AMERICAN PAID FOR] Israelis Kill 34 [godly innocent], Injure 86 [godly innocent], Grab 220 [godly innocent] - [nazi corporate TV amerka] World Snores http://www.imemc.org/article/49685

-

MY DEMANDS

/ / eight million Iraqis require immediate emergency aid \ \

I, as the Son of Man, DEMAND, America order millions of gallons of clean drinking water to be shipped immediately to Iraq to save the lives of US, the Human species. Please, help US make this a reality. Today. Please.

PLEASE HELP US

-

THEY GANG RAPED A FOURTEEN YEAR OLD WHILE CARRYING LOADED WEAPONRY

AFTER RAPING THE CHILD IN FRONT OF HER FAMILY - THEY SLOWLY MURDERED EVERY SINGLE ONE AS INNOCENT GOD LOVING HUMANS

- but -

BUSHITE AMERKA CLAIMS THIS DOESN'T WARRANT THE DEATH SENTENCE?

Again, evil bushite THIEVES claim they are justified when indiscriminately bombing populated cities to MURDER US People.

General Johnny would teach MY soldiers to immediately arrest to kill for such criminality. In fact, I'd likely even throw in some bonus cash, an a Freedom medal from all lovers of Liberty. Did you know, many bushite sing a song about killing innocent young girls for pleasure? Did you know that also, an "American" radio host likes playing that same song as recorded on "American" airwaves? Fight back for God, or die from self contempt my friends, fight back for life and love.

Again, evil bushite THIEVES claim they are justified when indiscriminately bombing populated cities to MURDER US People. All to help 'escape' the neocon ENEMIES of America - they also support "officially" destroying Our public infrastructure, thieving humanitarian aid, while incarcerating innocent people to collectively be punished by the TRULY Satanic enemies of GOD. Ten "CIA" bushite enemies have been found to have kidnapped near one thousand innocent Americans to be tortured to death, in tyrannical nations friendly under American funding by Bush unquestioningly. Fight back for your neighbor, fight back for America, fight back for YOURSELF. Or, don't.

See the bushite, you bill it for Christ, You bill it for America, You bill it for them, you bill it for US.

Murdering bushite gang rapists try escaping true accountability

http://womensspace.wordpress.com/2006/07/09/rape-of-the-hadji-girl-part-3-five-more-us-soldiers-charged-abir-hamzah-was-14-years-old/

/ / Why did the Army, within three hours, return to tell neighbors that this was the work of insurgents apparently without any investigation? \ \

See? in Johnny's world, that "the Army" person would have been the FIRST questioned, then likely arrested. But look, it hasn't even been acknowledged as evil doing in progress. (Every time you read, "The Army says..", become aware.)

It should be noted, ungodly bushite enemy commanders call every car bomb in Iraq, al-Qaida, without even pretending to do freedom operations for YOUR protections, as just another dead body in the rubble. (Likely caused by Aegis for cash profit.) So then, look my friends, Amerka refuses to demand justice to save the lives of their very own sons and daughters. And when, WE, Humanity, beg them to answer our calls for accountability, they refuse but for to LIE, stating publicly, "God" would grant robbing from innocent others, to enrich their great unholy tyrannical demon liar. They know easily that the bushmob did 911, and they like it. No, they crave it. The chance of murdering their own "loves" to enslave the human race for the antichrist, sounds great, just

as long as they can get themselves in on the take.

/ / Idiot General Says Dead U.S. Troops Best Reason To Keep War Going And Kill More U.S. Troops

[Option B: More Dead U.S. Generals And Fewer Dead U.S. Troops ?] \ \

If the sacrifice of soldiers lives is going to mean anything, it going to mean how long it took, Americans to care for themselves as really worth something. When, or if that day should come, it will be the day where Iraqis victims are seen, as just you or me. Today, there is nothing more i wish, than to hear bushite nazi savage thieves for the neocon die rightly, before the innocent they target for murder. All in an attempt to 'escape' those truly responsible for the crimes of 911 a bushite whore practices, as an enemy to Christ and America.

Just look at that my friends of Earth just look at that. Americans speak only contempt for the value of human life. Every day, INNOCENT Iraqis die by the criminal actions of the demonic neocon enemy forces of EVIL, and our deaths as the god loving mean nothing. A small few die in a bridge ACCIDENT, and every corporate channel devotes the entire day's news as it. Allawi confesses to killing children for "CIA" money, and there, as with the soldiers who braggingly, beat innocent children to death for sexual pleasure, bomb people indiscriminately, or steal all the humanitarian aid, don't command your slightest concern as impartial paying for it TV viewers. They say, US people who aren't "Americans", do not deserve due process, the freedoms they claim to own exclusively, of which WE, are granted nothing of. See?, by not using evidence to from your guilty verdicts, how can it be therefore possible, to know, you've arrested, tried, then executed a mass murdering NEOCON war criminal? I don't think Americans could possibly be more disrespectful to God and country, Johnny and Justice right now, do You?

http://existentialistcowboy.blogspot.com/2007/06/911-culprits-why-towers-really-fell.html

/ / We know that a crime was committed on 911. George W. Bush, of course, quashed all investigations before they could begin. Since when are crimes not investigated? [...] It is not too late, however, to begin such an investigation. There is no statute of limitations on mass murder. \ \

We, as Humanity, have to rise against the neocon LIAR enemies who forsake the value of Human life. Death to the bushite, death to the enemies of America's America.

/ / Army Secretary Pete Geren asked a military review panel to decide whether Lt. Gen. Philip Kensinger, who led Army

special forces operations in Afghanistan after the Sept. 11 attacks, should also have his rank reduced. \ \

A bushite demon CAUGHT aiding and abetting the crime of FIRST DEGREE MURDER of a trying to be Patriot Soldier, is made to fear in bushite amerka, he might face a reduction in rank! MURDER~!

/ / Congressman Dennis Kucinich, a member of the House oversight and government reform committee, which has been investigating war contractors. "Theres no democratic control and theres no intention to have democratic control here." \ \

Right. The demonic lawless actions of Aegis posing as al-Qaida killing police officers undermine freedom for Iraqis and Americans, alone with ALL the rest of US. All criminally gotten assets of lawless mercenaries will be hunted by every police service; those that complain as traitors to Freedom as Justice, WE, the real Patriot warriors, committed to defensive measures, will be rewarded to bill for. IF! Johnny is recognized a Mythical King with money to spend better than a neocon saboteur. Your call... Reminder: The neocons in YOUR power, were never elected, nor, was Bush the demon enemy of all Human Life. A demon that says if you disagree with his blind blanket statements against innocent Life, YOUR a terrorist. At least with GOD, we'd be only killing criminals we couldn't otherwise defend ourselves from with evidenced conclusion through practiced Law judged fairly.

http://www.guardian.co.uk/Iraq/Story/0,,2138917,00.html

/ / TheSpyWhoBilledMe.com regularly breaks news on the clandestine world of private contractors and US intelligence, recently established that Washington spends $42bn (#21bn) annually on private intelligence contractors \ \

do the math - do the math - do the math - do the math

42 billion. 42 thousand million. Or, hiring maybe twenty or thirty bushite LIAR enemies, who blindly giving Americans pay not only billion dollar saleries, but also with their forsaken lives as unworthy of real protections. CNN, CBC, and FOXNEWS knows the bushmob did 911.

So, million dollar saleries? I doubt. Likely a neocon enemy or two robbing from an undefended America. Remember, Peter Power wants US to believe ALL of Scotland Yard would murder Brits for stolen bucks. Frankly chaps, I just refuse to believe such bullocks.

Be me man,

King Johnny Wizard

-

The Ground Truth
http://www.informationclearinghouse.info/article15319.htm

The part where pro-bush "American" soldiers drive over children to kill them for fun, all because they say our Humanity let's those responsible escape retribution for being Satanically evil as enemies to Christ, left me angered beyond words. While CNN, CBC, and FOXNEWS couldn't care less for those children, but will tell us, these 9 accident victims must rule, so far, two full days of wall to wall coverage. "Pro-Western" Allawi blowing up school buses for "CIA" money? Who cares? Really who cares in TV America for defending OUR children's lives I'm saying? Get me in the news my brothers and sisters, and I'll make the best of it. Just do it. Fear not for my life loves, fear for your life left to silently die in contempt for Humans being.

Thanx much.

-

"He never would have called me 'sniveling,"
http://www.democraticunderground.com/discuss/duboard.php?az=view_all&address=389x1466466

/ / "He never would have called me 'sniveling,"' O'Neal said. "I don't remember ever speaking to this chaplain, and I find this characterization of Pat really upsetting. He never once degraded me. He's the only person I ever worked for who didn't degrade anyone. He wasn't that sort of person."

The chaplain's name is blacked out in the documents. \ \

-

Jeeze, nobody tell Chris what CNN is reporting

MSNBC'S CHRIS MATTHEWS :

" So, the longer we stay there.. do the number of people in al-Qaida grow or become lesser? Aren't there more al-Qaida every year?... Because if we stay there four more years.."

Jeeze, nobody tell Chris what CNN is reporting, where the murder of innocent people outside of Baghdad makes the neocon soldiers appear as Heroes, all because they can blindly blame the CRIME on al-Qaida without even the slightest inquiry. Catch this Revelation, among many others, in one of many miraculous Mr. America, Johnny Wizard Podcasts. Get your copy before they're

all gone!!

-

"I just brought TERROR to someone else, under the "American"
flag, and that is just not what I joined the "American" Army
to do." - dying needlessly for the enemy of GOD antichrist
responsible personally for the treasons of 911 with his
zionist neocon partners of EVIL.

-

/ / President Shimon Peres has called on the world to unite
against Iran and to force it to abandon its nuclear weapons
program. \ \

Let Jews of the World rise to demand Peres "The Devil", be
put to death for alleging a FALSEHOOD to murder Humanity
for our stolen religious values. Peres is the actual Devil.
No, seriously. I am as surprised as anyone.. No, seriously.

Signed,

Poor Jew Johnny, the richly Magnificent!

/ / DCI said the children confessed to the charges
brought against them after extended periods of
interrogation, which occurred before their court
appearance. The report includes personal testimonies
from children that expose physical and sexual abuse
at the hands of the Israeli army and brutal treatment
during lengthy periods of interrogation. At the end
of the interrogation process the children were told
to sign papers, despite not knowing what they were
signing. \ \

Realize: American tax payers fund this unquestioningly.

-

http://www.talkleft.com/search?string=haditha

All military "Judges" must be arrested for TREASON, tried on
the decisions they've made as unqualified. And on those
decisions unjustified, as on the charges of murder, THEY, will
be put to Public Judgment for a death sentence gloriously for
freedom and country, I will be assistant Prosecutor, who will
speak facts, unlike bushite, who calls every "foreign fighter"
al-Qaida (except the REAL General Mahmoud Ahmad) - and bombing
victims "SUSPECTED" women-loving-child-schooling-Taliban.
Death to the bushite my friends, death to the bushite enemies.
These demon nazi fukers believe that those who bomb cities
indiscriminately, wouldn't be put to death for the defense of
our communities in Christ. I, Christ, intend to change that

by example. Americans will pay $25,000 a head for every nazi bomber, or those who fly in the Apache, captured, tried, and put to death as the Satanic bushite enemies of Creation. Kill a bushite today why dont YOU lover of GOD as Just Causes to save Our dying Universes? Those who victimize ourselves as the innocence of Humanity, are going to answer to US scientifically. Death to the bushite, death to the enemies of America.

-

The King of America - Citizens Face Full Asset Seizure

http://www.rense.com/general77/asset.htm

/ / "(ii) to have materially assisted, sponsored, or provided financial, material, logistical, or technical support for, or goods or services in support of, such an act or acts of violence or any person whose property and interests in property are blocked pursuant to this order; \ \

So, those who don't support the return of all stolen monies from Iraq, who continue to undermine Humanity's chances for Justice in Iraq, (like every neocon LIAR and foxnews broadcaster, lawless mercenary antichrist disciple, or Haliburton shareholder,) needs their assets seized, and tried publicly for treason as war criminals. Every war profiteer holding more a one hundred thousand dollars will be hunted by the will of Humanity. so says - The Son to God as Man to men.

Bush To Veto Ban On Mercury In Vaccines
http://thimerosal.worldwidewarning.net/www/archives/59

/ / "Under the current administration, mercury has been and will continue to be knowingly injected into the youngest of American citizens. The controversial mercury-containing preservative thimerosal has been linked by thousands of parents as being the cause of their children's mercury poisoning and autism." \ \

Please, I beg you as the Son of Man, to fight back against those who threaten the lives of innocent American children, by forbidding defenses for US, the People. As recognized King of my forsaken World, this wouldn't happen I'm telling you. Support my rise to tax every American ten cents to start up my company of accountability. Running on free open line communications where ANYONE CAN CALL US, and call me a Jerk, just don't expect I wont fairly defend myself. Live broadcasts out in the fields, trumping evil demons by the power of the word. These individuals responsible for criminally victimizing American children, need to be arrested from continuing their action against our families. Support US please, to work on Just causes for the betterment of the human

species, Or don't and die unworthy you bunch of bushite nazi savages.

We Have A Problem Here

Look, Bush closed investigations on 911 immediately, then started firstly on Iraq, for war mongering thieves, with General Ahmad escaping un-accosted for the neocon enemies. Not relevant? Your Constitution is laying undefended, a National act that can not be done by any other terrorist group but those who claim your freedom rights denied by bushite command. Not treasonous? Look Condi, the demon 911 nazi witch PERSONALLY assisted in dropping more than seven million land-mines on Lebanon indiscriminately in Your terrorized dying names. Hate Life and God as yourself do You?

Don't anyone be deceived that the neocon enemies minimally assisted these crimes by refusing to allow US pursue the evil doers by following the actual crime scene leads, but we lack REAL leadership skills that are naturally required to see molten Iron flowing like water from the 911 towers on YouTube. Oh golly gee, who is that theatrical man from Canada with all the answers on Justice for Peace with Freedom Ruling Supreme? with atheists and everything? A brilliant man given next to no chance at receiving acknowledgment in Bushite media amerikan impires.?

Ray McGovern on 911 broadcast nation-wide on the coast to coast radio network "What we need here is an investigation. There are answers out there, but no one has pursued the answers." Similarly, there are questions that we isn't [allowed] figuring.

"No one has pursued the answers"? Come on Ray, don't tell US, you have no internet access, or haven't seen the video of molten iron flowing like water... blahblahblah

http://www.peaceandjustice.it/impeach/

/ / Executive members of the American Israel Public Affairs Committee lobbied Congress to pass Iran sanctions bills. \ \

These DEMONS need to be arrested, tried, and EXECUTED for TREASON. There is no evidence against Iran to substantiate their DEMON LIES to murder millions of People for the pleasures of the sadistic zionist enemies of Human Life, enemies of GOD as LOVE. Just because repuglicons like Liebermann, take bribes to murder US folks as the innocent, doesn't legitimize their treasonous conduct against YOU, my freedom loving dying brothers and sisters. Stand up for Jew Boy Johnny why dont You.

Who as America will bother to care they die by naked zionist criminal command? Johnny Wizard has been screaming for help to America, begging them to pick up their phones leastly, to air concern for the survival of the Nation, for YEARS! to publicly challenge happy happy, joy joy pro-child killer demon enemy George Norry and bullshitter no-national thief of Life Art Bell, and they've near completely refused while laughing and singing by who cares for you zionist news command. They, as America's Coast to Coast voices, would rather richly die YOU sacrificed for CRIMINAL zionist Israel, (Israel, where the government leaves actual Jews to die in the streets starving as garbage dumps, to make it look good for MORE giving American charitable donations to disappear elsewhere) before saving the lives of THEIR VERY OWN. Americans don't seem to care they die by their own unwillingness to communicate openly for Justice. I ask you again, to spare me a few dollars so I can feed myself. I am actually, near starving, and never in my most feared nightmares, thought this world, with our communication technology, would leave me without any financial assistance. I seriously need to eat. Please help me, by supporting our cause to not starve to death. If you appreciate my words in defense of the once great Human race, donate a few dollars to this cause. Justice and Freedom for all, especially God as Just, and worthy our praise

Peace.

FEMA covered up toxic danger in trailers given to Katrina victims
http://www.wsws.org/articles/2007/jul2007/fema-j21.shtml

I'll tell YOU again, CBC, CNN, and FOXNEWS knows the bushmob did 911, and lie to you entertainingly to sacrifice even more of US to the demon antichrist forces of evil.. While I ABSOLUTELY destroy bushite with joy for God and the defense of love.

/ / Support me, or fail to recognize true wisdom when it speaks to you of need for desperate change to save your dying selves. No evidence against an accused is US being truly abused.

"These are not terrorists, they are not al-Qeada, they are ordinary innocent men, women and children." \ \

-

TRAITORS TO LIFE

"I told him, there's women and kids in that room," Lance Cpl. Humberto M. Mendoza said of Lance Cpl. Stephen B. Tatum. Tatum's response was, "Well, shoot them,"

If Americans don't proudly put to death Tatum, on behalf of the Family that lost their son, their Marine, Johnny will

formally conclude, Bushite america is an ungodly evil nazi fascist state of intolerance and hate to US, the Great Human Race. Bushite amerka does not own Freedom, nor do they own our rights to be Just. Join me in demanding the Public execution of the satanic demon liar Tatum, on his Public insistence that murdering innocent families to thieve from for the neocon, is a crime not warranting the death sentence enforced by any family man. Death to the bushite. death to the enemies of man. The neocons will be arrested, tried, and executed for the crimes of 911 as traitors to Life.

Bush Outlaws War Protest - Citizens Face Full Asset Seizure
http://www.rense.com/general77/asset.htm

"Who cares? to listen to a dying unheard America",
as the growing richer ungodly neocon enemy traitors shrill.

-

Death to the bushite instead of the innocent loved in God

/ / IntelCenter issued a tacit warning that the footage may be re-hashed when they released the "new" tape to the media, but they failed to mention the fact that they released portions of the exact same clips in October 2003. \ \ amazingly - I witnessed blurred-out faces of those they claimed al-Qaida in another instance just recently. (Then, look at the dog fight vids that CNN and CBC refuse to show the dog haters faces in..)

I say American taxing payer folks, flip me some dollars, and I'll pay out rewards - after a moderate lunch - all to take these IntelCenter AL-QAIDA! - AL-QAIDA! - AL-QAIDA! straight to public trial, then public execution for high treason - like holy fuk mon let's get real here People. Or don't and we die further for bin Laden's fear of cameras. Offer a 500,000,000 dollar reward for Zawahererri's crew to get the rest of this done quick like. I wanna rock! Death to the neocon enemy LIARS, death to those who WAR - WAR - WAR innocent Humanity for the continuing bushmob's escape plan from nowhere. See? Heaven or Hell? YOU DECIDE.

Don't EVER forget, the private company Aegis has been officially found dressing up as AL-QAIDA! - AL-QAIDA! - AL-QAIDA! to murder pro-western forces in Iraq, while desecrating Elvis. Elvis Presley. If you don't love Elvis, there is something seriously wrong with America. Now yous messing with a real son-of-bitch. HeY!, question: why don't Americans kill a bushite for Yourself bud? - because Bushites insist "we're" willingly being led by the antichrist enemy of all human life as Satanic LIARS who intend to cheat ourselves of freedom through self respect. Pro-neocon-media enemies are

nazi savages, and I don't like it..How about you?

Death to the bushite instead of the innocent loved in God

-

Time is Up

Al-Qaida Kagan "Al-Qaida, their whole strategy revolves around generating sectarian violence, because that is how they embed themselves within local communities "

What?? For friendship?

What is the demon TRAITOR to HUMANITY in America saying about the reasons he embeds an Iraqi under 50 odd divergent NEOCON labels? Wouldnt most Al-Qaida take great joy in killing a bushite nazi grunt like any real Family man would also? These LIAR dumfuk grunts who cheer "whore yeah", routinely, can barely read or write, so, how possibly does this FOXNEWS expert, expect such ungodly antichrist forces to delineate Al-Qaida from the local communities they PROVABLY indiscriminately bomb as Satanic?

Kristol and Kagan: Put Everything Behind Escalation So We Can Bomb Iran and Syria

Kristol and Kagan MUST be put to death for treason against America, treason against Life, treason against GOD. They both have continued to Publicly advocate murdering more innocent peoples indiscriminately they call, "Al-Qaida", all to rob further monies from an undefended America. It is easily learned by any as all, the victims of bushite tyranny are exclusively, US, The People, guilty of nothing but our shared love of GOD. Remember forever: there was NO JUSIFIED REASON for bombing PEACEFUL Samara, NONE! that bombers confess was done as ordered by Allawi INDISCRIMINATELY, all for getting killed Marines sent in later for more stolen cash from America. P2OG. [hundreds of bushited Marines died rightly almost immediately - (wow eh?)] A Satanic action, Kistol and Kagan, both blame without thought to question on "Al-Qaida".

The action of Satanic bushite bombers targeting Samara as war criminals is FULLY documented.

Death to the bushite neocon LIARS, death to the enemies of Freedom for Humanity. My beloved friends of GOD, please, when you see the mute bushite, kill it for Christ, kill it for Love, kill it to defend your loved family. (Any soldier who doesn't proudly talk of how it hunts those British soldiers who kidnapped barefoot children and victimized them on video, is a soldier worth destroying NOW to defend GOD and Life from needless death.) I HATE the REAL demon antichrist Christ says.

Kagan "You rarely know in the middle of a war, what the outcome will be."

Johnny Wizard the Creator "I win."

-

/ / The US has also been backing some pro-western politicians like Iyad Allawi \ \

Do you know who Allawi is? Allawi confesses to blowing up school buses filled with children for "CIA" money. NOT THEORY. HE ADMITS IT AS AN ACTUAL SATANIC DEMON! Allawi, the truly insane mad man, confesses to having ordered the murder of doctors and nurses that treated wounded god loving women and children from Fallujah. It was these DOCUMENTED acts that had him thrown out of 'the CBC, CNN, and FOXNEWS TV expert scene as workable', all for fears that US humans might actually wake the fuk up on WHO is Our True Enemies here. All three, pro-private-bank zionist news stations are well aware that the bushmob did 911, but lie to YOU as forsakenly dying for their growing riches and world wide broadcast fame.

CBC National Newz - July 11th 'tens of thousands have died in Iraq since the war against truth started.'

Anyway, these two Allawi incidences are fully documented, look it up, then demand the "The US" pro-western politician person quoted as supporting Allawi - be found guilty of CRIMES AGAINST HUMANITY, Demand publicly, having the neocon zionists EXECUTED by America, for America, as America. A Just America that defends America from criminal madness. Or don't. Death to the bushite, death to the enemies of Man I say.

-

ABCNEWS.com : FBI Called off Terror Investigations

A question Johnny Wizard has for America: Tell me, is this not a treasonous act - for Bush to close criminal investigations, immediately after the terrorist crimes of 911? Shouldn't the demon enemy be put to arrest for that godless act alone in this forsaken dying world? A world left instead suffering further the tyrannies of the war criminal ENEMY of all Human Life?

A refresher: the neocon will tell you openly, they live to lie to the Public for cheating and stealing by murder of US as proxied, innocent peoples purposefully enslaved by a made ignorantly entranced TV audience that is repeatedly reminded, we have no power worth respecting.

CNN, CBC, and FOXNEWS aren't taking are calls presently, but just lie and tell US they do. Look to see, almost all political internet traffic condemns Bush straight to hell

well he rightly belongs, but the polls still say no - WE, seeking for Just cause, are the minority.. just roll over and die for the neocon betrayers to god and country, life and loving.

-

George Bush "The same folks that are bombing innocent people in Iraq were the ones who attacked us in America on September the 11th"

George Bush 'Iraq has nothing to do with 911, you bunch of nazi dumfuk grunting LOSERS. Whore yeah - praise Satan - die America die. I mean... I love Jesus'

So it was as I thought too: the direct co-operation of the joint chiefs of staff assisting General Ahmad, in committing the murder of thousands in America on 911 for the neocon TRAITORS, as the same 'escaping' enemies today, responsible for 'secretly' ordering these indiscriminate terror attack bombings against YOUR Humanity for their continuing stolen pleasures as Satanic.

-

/ / U.S. Marines are said to have killed as many as eight unarmed Iraqi prisoners when U.S. forces attacked Fallujah in November of 2004. \ \

HA! Trying to ignore the murder of more than 200,000 People as if OUR lives have no real meaning. WE KNOW they murdered everyone they could in around between 15-55, but went ahead gunning for infants and the elderly too under Sattler. Look it up. Death to the demonic bushite LIARS, death to the enemies of Man, so says the Son to God as Man to men - Kill the dishonorable bushite enemy and be Loved by all as Savior.

-

DEMON MURDERER PETER POWER TRIES TO LIE HIS SOCKS OFF ABOUT HOW HE MURDERS LONDONERS AS A FOR REAL TERRORIST RECRUITER

[letter written as signed by Peter Power to MSNBC et al.]

/ /It is confirmed that a short number of 'walk through' scenarios planed [sic] well in advance had commenced that morning for a private company in London (as part of a wider project that remains confidential) and that two scenarios related directly to terrorist bombs at the same time as the ones that actually detonated with such tragic results. \ \

Little Peter Power is threatening literally BILLIONS
of US there. So.. what we a going to do my partners
in living? Die or survive? Your call...

-

Petraeus quietly urged his commanders to "get the word out"

Homeland Security Committee Chairman Bennie G. Thompson

/ / Thompson continues by asking Chertoff to further explain
what measures the country should take based on his instincts,
"What cities should be asking their law enforcement to work
double shifts because of your "gut feeling?" Are the American
people supposed to purchase duct tape and plastic sheeting
because of your 'gut feeling?'" \ \

Homeland Security Committee Chairman Bennie G. Thompson

NOTE: Americans are literally paying billions for Chertoff's
THREAT of "gut feeling". Billions, while the neocon walk
away from MURDERING Americans on 911 with the bushite on
America's Coast to Coast radio network, claiming they don't
know you know, nor, ever will. They'll tell you, blame the
shadows in the New World Order, but don't rely on evidence
to form your conclusions on who PERSONALLY is responsible
for criminal actions against YOUR rights to be free as
alive. Evil is real my friend, evil is real. Death to the
bushite, death to the enemy LIARS of human kind. Death to
the enemies of Love and God. Death to the enemies of Life.

"A dead Iraqi is just another dead Iraqi... You know, so what?"

These demons are murdering god loving people as enemies to
Humanity with the nazi assistance of corporate news america.
Will YOU please, support my rise to speak publicly challenging
anyone who disagrees with me, GEORGE WALKER BUSH needs to
be arrested immediately for 911. Peter Power needs to be
arrested for the London bombings. Sattler, Blount, and Russell
need to be arrested, tried and put to death for WAR CRIMES
against Iraq, along with those responsible for other
indiscriminate targetings against innocent PEOPLES for
the zionist neocon god betrayers hidden in shadows as
the un-known "Joint Chiefs of Staff" demon enemies.

http://mediamatters.org/items/200702260008

/ / Wash. Post parroted White House claim that Iraq war was
authorized by U.N. Security Council \ \

Treason charges must be sought against zionist reporters
who LIE with such blatant disregard for your freedom in America.

-

The fascist control bushite, don't like You to think
independently for Yourself, for we independents out here
make them look as stupid as they are. Thank you very
much for that not so secret info.

-

The Other War: Iraq Vets Bear Witness
Chris Hedges and Laila al-Arian, The Nation

/ / Many said that these acts were perpetrated by a minority.
But they nevertheless described such acts as common and said
they often go unreported - and almost always go unpunished. \ \

/ / In addition to this sadistic and prolonged torture of the
innocent,
according to Gush Shalom, (Gush Shalom is a Jewish peace movement-
true Judaism is opposed to Zionism) \ \

Moore vs. Greed
http://www.crooksandliars.com/Media/Download/19156/1/TSR-Moore-Wolfie.wmv

Moore: "Why dont you [at CNN, CBC, and FOXNEWS] tell
the truth to the American people?"

Because as zionists, THEY hate a liberating people who want to
TRULY make their lives better by understanding Justice is Freedom.

-

http://www.liveleak.com/view?i=456_1177473318

/ / An [BUSHITE ENEMY] American soldier boasts of having tortured
[INNOCENT] Iraqis and making a 15 years old Iraqi girl commit
suicide after she had been raped. \ \

Tell US, who wouldn't take great pride in warring this boastful enemy
of Humanity? Or, are you like CNN, CBC, and FOXNEWS would suggest, it
is heroic - for all are heroic who DIE for the neocon?

-

/ / It is strange that the 'Secret Organization of Al
Qaeda in Europe,' the group that is allegedly
responsible, would have escaped notice (to say nothing
of their odd, 'double secret probation' type of name). \ \

Bushite are EVIL to all, as enemies to Human kind.
During Katrina, the bushites responsible for protecting
America, slaughtered everyone's confiscated pets for joy
and happiness. Three schools filled with hundreds of
dogs, cats, snakes and bats. There was no need to kill
everyone's beloved pet, but as the bushite will FREELY
tell YOU, it was fun to serve demonically as the
antichrist enemies of God and love. demand Justice for
God, demand Justice for Johnny.

/ / The mere fact that one can deduce a motive for a
person or a group does not mean that they perpetrated
the act...and it hardly suffices as proof of anything.\ \

Just try telling that to 'why work to make life better'
CBC, CNN, or FOXNEWS censors. Look at me!! They refuse
to acknowledge my documented info as REALLY important
to your continued ACTUAL survival.

Who fuking cares right? Certainly not the enemies
of America at the Coast to Coast radio network, who would
kill Americans for the rich neocons without question. It's
JUST American kids getting conned to die as bad guys.

-

DEMON LIAR George W. Bush "The larger point is, and the
fundamental question is, did Saddam Hussein have a
weapons program? And the answer is, absolutely. And we
gave him a chance to allow the inspectors in, and he
wouldn't let them in."

-

Afghan civilians caught
http://www.chicagotribune.com/news/nationworld/chi-civilians_bdjul08,1,3303701.story?coll=
chi-newsnationworld-hed

/ / The men told the same story, of how foreign troops
bombed their villages long after the Taliban fighters
had left, how the bombs killed women and children, goats
and sheep \ \

-

A quote from King Johnny Wizard, President and CEO

/ / Worried I'm going to love Life as truly honorable,
and Greater than those who openly lie to our soldiers to
have them unjustly die for no better good or reason
understood? \ \

certainly dont know anything about the reality of the
towns and villages and human lives they are
destroying. \ \

-

'Up to 80 civilians dead' after US air strikes in Afghanistan
http://observer.guardian.co.uk/world/story/0%2C%2C2115846%2C00.html

/ / Witnesses claim a village in British-run Helmand was
bombed for three hours \ \

BUSHITE, THE ENEMY

It is not just a Muslim who sees the bushite as an enemy to
Humanity. These lawless savages have been acting without
accountability to anyone, because they are largely enemies of
America, who cowardly run from responsibility in America to
defend their own brothers and sisters from the neocon, and die
instead as/with rapists, torturers, and THIEVES.

"Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in
crime"

/ / How can those who want accountability be termed
anti-Iraqi? only through cowardly liars, is an American
told America's not going to hunt down those who stole in
their names as neoCONNED for dying. \ \

/ / Israeli officials have told us that the Finance Ministry
is budgeting basic social services at a percentage of their
known costs \ \ EVIL BEYOND WORDS. KILLING JEWS FOR MONEY.
We can really be something greater, while a murderous bushite
thief, a LIAR, can hardly read or write Liberty without
flinching from self contempt.

Jesus man, do I truly hate these zionist nazi thieving LIARS
on our magic TV shows who con our kids to die as bad guys.
How about You?

These naked LIAR enemies who bank to thieve more from Iraq,
Afghanistan and America, must be brought down by Humanity's
ultimate triumph over tyranny through Law. A just law, where
those accused without any evidence are Innocent, and WORTHY
yOur defenses.

-

http://www.msnbc.msn.com/id/19461815/

/ / This paints the congress into a corner, because when Bush
and Cheney refuse to comply with these subpoenas, congress will
either have to impeach, or admit we are a dictatorship. \ \

OBSTRUCTING JUSTICE FOR AMERICA

Tony Snow "The executive branch is under no compulsion to
testify to Congress because Congress, in fact, doesn't have
oversight abilities."

IT LOOKS like they are going to attempt making the move of
BLATANTLY TREASONOUS war criminals acting to measurably now
destroy yOur Freedoms in godless America. The Satanic
neocon's 'faith', is in that YOU as an American, will watch
the same corporate drivel that offers next to nothing to
empower YOURSELF to speak Justly for a dying America. Instead
of demanding 24 hour, wall to wall news coverage, of war
criminals going down one by one by the will of Man to Justice,
CNN, CBC, and FOXNEWS will broadcast your blind 'belief' that
you are only a impartial viewer, who doesn't really care about
dying right in front of yourself for the zionist's riches, and
great worldly power of tyranny through lawless nazi bushite
censorship.

"Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in
crime"

Jesus man, do I truly hate these zionist nazi thieving LIARS
on our magic TV shows who con our kids to die as bad guys.
How about You?

/ / If Bush and his PNAC buds are innocent, then Investigate
911! What have innocent people to fear from a fair, complete
and real investigation? \ \

They are guilty, so, of course, the demon Bush enemy,
OBSTRUCTED JUSTICE FOR AMERICA.

I hear the national radio program Coast to Coast is still
feeding us neocon lies. Why don't you make the call for
Johnny.. believe in yourself for a change why don't you?,
buddies??... I am Your god king. King Johnny I am. Champion
of Universal Life! Not enough? Who cares?, to allow US speak
on our broad casts as legitimate? Worried I'm going to love
Life as truly honorable, and Greater than those who openly lie
to our soldiers to have them unjustly die for no better good
or reason understood? Let us make life better than the neocon
envision, and support our rise to popular acclaim by allowing
US to speak openly for public challenge in defense of America.

Death to the neocon soldier, death to the enemies of Man.

-
True US Bush Iraq-Afghan Wars Deaths At 21,000
http://www.rense.com/general77/true.htm

"In the last four years of war in Afghanistan and Iraq, the
unreported death toll of American military personnel is in
excess of 20,000 (20,871)"

It's in cowardice that 'Americans' don't speak out for
the lost 'loves' of their dumber than dumb sons.

-

Thinking of vacationing in occupied ungodly neocon aipac
israel? Check out the criminal zionist's 'best' selling
point...

ISRAEL PEDDLING WHORES TO ATTRACT TOURISTS
http://desertpeace.blogspot.com/2007/06/israel-peddling-flesh-to-attract.html

[The freely self confessed child murderers of the IDF, tell US
as demon liars, they're "Jews". Anyone in Israel KNOWS this
factually to be so. For, the zionist forbid 'by law', to
allow military service from anyone in Israel who disagree that
God would will the thieving and murder of the completely
innocent in GOD accepting without question. Now why would YOU
want that?]

The nazi IDF does what Canada's dope pusher O'Conner suggests
we accept. Demon enemy bushite in Afghanistan murder children

without real understanding 'by accident', [no evidence is shown to ANYONE, just treasonous demon evil bushite necon spewing, "red handed"] lies after lies, while, the Taliban, we are told, are so much worse, because they would murder "ANYONE." Make sense? No. Remember: (The bush regime has been found funding Al-Qaida in Iran to commit terrorist acts against COWARDLY soldiers without free minds to speak in their own defenses.)

/ / The group is demanding his impeachment not only for his crimes against humanity but for lying to the American people about his worship of Satan. \ \

It almost makes me laugh, and then, I push to remind, we are so very far from where civilized is dreamed to reside. Look, think of US as actors, (because that is who we are,) and support my rise to proclaim by the will of a suffering for real human kind. Believe in US, as if your life depends on it, because it does my friends, because it does. Live free or die unwillingly.

cause I am just,

King Johnny Wizard
President and CEO

I BEG the Christian men of Earth to help GOD

/ / The currently ongoing "pacification" of Baqubah, a city with 300,000 inhabitants, by some 10,000 U.S. troops is using the same methods as documented in the NGO report with regard to Fallujah \ \

-

/ / Cheney's office has refused to provide his staff with details regarding classified documents or submit to a routine inspection as required by presidential order, \ \

It seems Cheney wants to go it completely alone as an escaping war criminal in America eh?

Demon G. W. Bush "Our responsibility to history is already clear: to answer these attacks waged against us by stealth, deceit and murder and rid the world of evil."

"Deceit" and "murder" to rid our world of justly what dum-uk enemies?

-

Bin Laden may have arranged family's US exit: FBI docs

-

AMERICA HATES BUSHITE

Nationally broadcasted every day across America, Mr. George Norry publicly supports the murder of innocent Arab children, and I'm beginning to really hate a silent dying America for it. Speak to defend the innocent in this world American, or die yourself from self contempt.

Bushites war LIFE itself. So then pleads I again the Son to God, as Man to Men: war to kill the enemy bushite nazi savage thieves, for real Freedom is waged truly by Just causes. The mute, pro-censorship/tyranny THIEVING bushite savaged nation, has NO EXCUSE for the crimes they have committed in our dying names. I demand our voices heard internationally for Justice as Freedom is Godly.

To, with a Love in your Heart for GOD, kill such contempt for Human life, is to serve American freedom to the last bushite neocon breathing. Death to the neocon soldier, death to the enemies of Man.

/ / "They can try to have their votes of no confidence," the president said, "but it's not going to determine - make the determination - who serves in my government."

MY government? Now that's entitlement. And you thought George Bush didn't have a vision for America \ \

Hitler, the mad man, wasn't as insane as our demon enemy George Bush Jr. is.

/ / The [BUSHITE ENEMY] US has said it would refuse any request by Italy to extradite the accused [satanic bushite torturers of completely INNOCENT PEOPLE]. \ \

Christ, The Son of Man, begs the godly men of Earth, to judicially bill on sight, any neocon soldier who supports the carnage waged in Afghanistan as cop killing dope pushers. They shoot innocent women and children dead in the streets for humor, and bushite pirates at CBC and CNN, state bushite in

Afghanistan are doing a good thing helping the bushmob escape the crimes of 911 by warring for Muslim fundamentalism, persecuting INNOCENT women and Christians, while for entertainment, bomb innocent families running for their lives from a Holy Church. Soulless child killing soldiers who CBC execs would tell are our DEMONIC heroes. Lawless dope pushing cop killers have got to go down dead screaming, instead of the innocent - YOU and me they target for MURDER. Death to the dishonorable bushite THIEVES, death to the enemy neocon LIARS of GOD and man.

We can really be something greater, while a murderous bushite thief, a LIAR, can hardly read or write Liberty without flinching from self contempt.

Kill a bushite LIAR, why don't you my brothers and sisters of the faith in something greater than bushite godless tyranny?

Brig. General David Fraser - former nazi commander of NATO who 'okayed' the bombing of defenseless innocent Afghan women and children for the Satanic enemies of Man, stated on CBC, he liked killing police officers, along with innocent women and children, (deliberately targeted for the pleasures of the demon antichrist) because, Afghanistan's children hope to learn. See? The bushite 'will' murder all our children and teachers on hope that we will never learn the Taliban, led by "Omar the Just", were loyal to Christ as REAL American Freedom, when publicly demanding evidence to form your conclusions. Thus is why the ENEMY to LIFE neocon state on YOUR TV and radio, WE must never be allowed to speak openly with the Taliban regarding the FACTS. Because if we did, neocon pension thievers would be hunted down in the streets for public trial, and then gloriously put to death by Christian values committed to TRUE freedom from lawless godless zionist LIAR tyrannies against Mankind - YOU included.

George Norry and Art Bell are the most evil of bushite, who as betrayers of the Human race, deny soldiers to know: General Ahmad funded Atta. They will both support the murder of Your American Son or Daughter for further zionist evils, before allowing true open line communications, to defend ourselves from the lawless demon enemies of Man. Do something about it, or don't. Let TRUTH set US free.

Instead of making an easy phone call today for your dying brothers and sisters, die as Satanic bad guy enemies of Life on Earth, sacrificed in cowardice to the real demon antichrist, and see if we, the true, strong, and free, care. The Son of Man SCREAMS before coming home to GOD'S America: We are coming to destroy Satanically lawless bushite enemies, all for the love of God, we shall succeed my friends, we shall succeed. I will not willingly live in a forsaken world

with LIAR zionist war criminals conning US to believe, God is
not Great, True, Strong and Just.

Die bushite die!

-

/ / A manifest showed the goods [BUSHITE HEROIN] were to be
shipped from Kabul to Dubai and then on to Canada. \ \

"We have nothing to do with poppy eradication. We stay away
from [pro bushite heroin to kill YOUR kid with] it as far as
we can," Maj. Steve Graham of the Royal Canadian Dragoons

-

To Kill a Bushite, is to be Heroic

To further murder as these ungodly bushite liars do today as
our suffering Mankind, is to blindly swear public allegiance
to the for real DEMONIC antichrist THIEVES. Bushite enemies
are evil nazi dumfuk scum, liars who cowardly watch America in
her weakness be high jacked, and squeak nothing for Just words
in our REAL defense for dying.

JOHNNY ROCKS

AMERICA'S Mr. O'Really responding to accusations that FOX NEWS
refuses to cover the war in Iraq on behalf of concerned,
AS DYING, American families, [and forsakes Christ as demon
betrayers to the paying victim audience] Stated:

"Do you care if another bomb went off in Tikrit?
Does it mean anything? NO! It doesn't mean anything."

Why should WE continue to silently die unjustly victimized?,
for the bushite's contempt of Mankind censored?, the Eternal
Son of Man to GOD forever answers correctly.

Kill a bushite as the Love of Justice for Humanity

The Son of Man BEGS all honorable men to defend Life

from bushite enemies of GOD who murder, rape and steal from
innocence through lawlessness as thieves of everyone. Please
kill the bushite for the love of women and children. kill
the bushite for the love of GOD. Please, defend ourselves

further hardships by supporting immediate war crime trials
to begin against all neocon traitors who LIE OPENLY to
kill America's America as enemies to truth, as enemies to
Christ.

Charles Goyette Interviews Scott Horton
http://dissentradio.com/charles/aw061107scotthorton.mp3

/ / Look, do you understand what these [TV politico] people
are saying?

These people, one right after another, are up here talking
about a nuclear strike! [more bushite DEMON mass death and
suffering against Life] On a country that hasn't threatened
US?, hasn't harmed US?, has no capability to attack US? Do
YOU understand the madness we have descended to? \ \

'Kill Anyone Still Alive': American Special Ops
http://www.atlanticfreepress.com/content/view/1784/81/

Can you not as a American Man, destroy bushite brayers to defend
innocent life? Americans could not care less presently for
the value of Human life. Americans do nothing to defend
their lives, but officially plan to murder more for the Satanic
demon antichrist in silence. Out of millions, how many even
bother to make a phone call to talk radio against the neocon.
how many? Five or six? Seriously.. How many? I know bushites
are demon liars for the neocon, but is it really impossible for
"Americans" to try speaking?, in the face of murdering millions
more forsaken by enemy mortal, pro child killer George Norry?
George Norry too nice of a guy to even bother question the value
of American children? The THIEF Art Bell's voice too soothing
to care that neocons own pirated America, and on everything she
stands whoring as WAR CRIMINALS to the FOR REAL antichrist?

Death to the lawless bushite, death to the enemies of Mankind

http://melbourne.indymedia.org/uploads/law_of_the_land_-_we_rule.mp3
http://imctj.espora.org/uploads/2007/01/law_of_the_land_-_we_rule.mp3
http://austin.indymedia.org/usermedia/audio/7/law_of_the_land_-_we_rule.mp3
http://arkansas.indymedia.org/usermedia/audio/7/law_of_the_land_-_we_rule.mp3
http://pr.indymedia.org/uploads/2007/01/law_of_the_land_-_we_rule.mp3

God is Great

Again, George W. bush did 911 with General Ahmad, but CBC
zionists, actual treasonous LIARS, actually smile to dying
Canadian soldiers with only true contempt. CBC kills Canadian
kids, with their intentional demon lies, trying to subvert
Justice for God and Johnny. In fact, yesterday, they did a
special, all on how "God is NOT Great", giving that bush bitch
demon LIAR, all the space to pontificate it's hatred for
Wisdom, Science, and GOD, with only nods and smiles from the

'illiterate' hord. Remember: A zionist KNOWS it's an enemy of Humanity when it supports dropping seven million land minds to murder indiscriminately OUR CHILDREN for decades, or stealing a Christians Home because they say God says Jews would do such ungodly acts. Blame innocent Jews the holocaust denying zionist shout, of which not one, is a Jew. Like me.

To Kill a Bushite, is to be Heroic

Pro child killer George Norry, enemy of the American soldier, still blabs about how more must die unjustly for bin Laden with LIES, knowing full well, video of steel flowing like water from the WTC exists, and that General Ahmad funded Atta. George Norry is a traitor to the FBI, who further plans more to die sacrificed under the censorship of the tyrant antichrist. Who cares I ask about America truly dying as neoCONNED, for George Norry has millions to not take your calls for protection, and honestly, 'Americans' couldn't care much less for Our Humanity's future. Live free by defending liberty by killing pro lawless pro torture pro fascist bushite enemies my friend, live free by defending Yourself and GOD.

/ / The U.S. State Department recently issued a report calling Sudan a "strong partner in the war on terror." \ \

The high jacking Bush regime is supporting financially a TYRANNICAL 'government' that openly practices Genocide, as just the sort of "American" partner to assist in determining which further murder victims are terrorists. While the same demon administration confesses to FUNDING middle eastern al-Qeada to commit TERRORIST acts in Iran, as demon evil tyranny against the sleeping Sheeple. Again, it is fully confessed that the Satanic bushmob is pro terror now. Death to the enemies of Freedom, death to the bushite betrayers of Life instead of YOU my innocent friends. Instead of US.

/ / US 'used forced [SLAVE] labour to build Iraq embassy' \ \

Kill a bushite LIAR and be loved by God as Life is True.

DOWN WITH EVIL, UP WITH FREEDOM.

-

Love to God Gives US Strength

The Son of Man begs the Men of Earth to defend Ourselves from the unholy forces of our tyrannical enemies. Death to the ungodly bushite thieving LIARS, death to the ungodly enemies of American children everywhere. GOD praises all Men, who kill the murderous bushite enemies of Just causes. The THIEVING satanic bushite forces, speak only contempt for GOD on our demandings of the public execution of the boastful

terrorists, like the bushite who video taped the murderous assault of OUR kidnapped bare footed children, or murdered Iraqis while desecrating ELVIS, done all to please the "escaping" satanic demon antichrist zionist, Our Mr. bush Jr., who with his private business partner, General Ahmad, actually committed the ungodly treasons of 911 in a land of blind men sleeping., according to the eternally Honorable FBI anyway.

To Kill a Bushite, is to be Heroic

To further murder as these ungodly bushite liars do today as our suffering Mankind, is to blindly swear public allegiance to the for real DEMONIC antichrist THIEVES. Bushite enemies are evil nazi dumfuk scum, liars who cowardly watch America in her weakness be high jacked, and squeak nothing for Just words in our REAL defense for dying. Play pretending their actually real men, because to really be so, requires real strength. Not bush bitch Marines "WHORES YEAH!" strength, where they cowardly can't figure to defend America from ungodly war criminals. War criminals who deliberately set them up with Satanic 'black magic' to be killed in criminal actions. P2OG. But see?, the bushite fodder, can't care enough for Life to read, because it already knows like the zionist, it's an ungodly coward and a thief, as siding to lying and censorship, this will out work for evil doers in the long run without any consequences to themselves as Our sworn eternal enemy.

Your Servant,

King Johnny Wizard
President and CEO

-

Why should WE continue to silently die unjustly victimized?, for the bushite's contempt of Mankind censored?, the Eternal Son of Man to GOD forever answers correctly. We can really be something greater, while a murderous bushite thief, a LIAR, can hardly read or write Liberty without flinching from self contempt. Bushite tyranny is a dead end road paved with missed opportunity. change your evil ways in other words, and join the living side that's light to know what we are, in deed, looking at here under the dying spoils of bushite, "we pay" misfortune. To hell with Satanic demon devil worship by the President of the United States, We, the People answer, for now anyway, we have some really serious business just presently, and we really don't need to be any more reminded about Mr. Bush's satanic Devil, demon whoreship, of, "Molech", a religion practiced to deceive America into sacrificing our kids for cash with YOUR blood.... Tricked. Tricked. Tricked.

Nationless bushites who blindly war Life as the neocon
enemies, war for the 911 perpetrators to escape American
Justice. that is why I, as of GOD, cheer to hear the deaths
of these pro torture, pro theft, pro Satanic enemies of Man.
They confess freely to targeting INNOCENT People for murder.

-

CIA 'disappeared' seven-year-old children
http://pressesc.com/01181202133_39_names_enforced_disappearences

COFER BLACK is the "CIA" LIE, KILL COFER BLACK FOR TORTURING
INNOCENT PEOPLE TO DEATH FOR THE ANTICHRIST. Death to the
bushite, death to the enemies of Mankind.

-

New admissions of widespread prisoner abuse
http://www.wsws.org/articles/2007/jun2007/tort-j05.shtml

/ / The Bush administration is finalizing new guidelines for
Central Intelligence Agency (CIA) interrogation methods that
will give broad latitude for torture techniques \ \

These are crimes against Christ, and any 'Christian' who lawlessly
participates in this pro-bush torture of US Humans, MUST be hunted
down by the Patriot, to have the STANDING LAW in America enforced to
institute the Death Sentence to those bushite responsible for such
ungodly enemy actions.

Hillary "[DEMON] Bush pulled out the inspectors."
[DEMON] Bush declared, "and he wouldn't let them in."

In Hell

Firstly, the White house doctored the NIE in an act of HIGH
TREASON.

Two:

CNN with Hillary acknowledges that the demon Mr. Bush pulled
inspectors out of Iraq, but then... how is this not HELL to

pay?

/ / Bush declared, "and he wouldn't let them in. And, therefore, after a reasonable request, we decided to remove him from power." \ \ HE LIED. Not the 'NWO', George Walker Bush, who Alex Jones tells US to look away, because he's only a puppet. Should not Bush be held accountable to the criminal actions he is PERSONALLY responsible for Christ asks YOU?

Arkansas GOP head: We need more 'attacks on American soil'
http://rawstory.com/news/2007/Arkansas_GOP_head_We_need_more_0603.html

Look, bushite DO exist as enemies of the Human.

800,000 Christians protected under Saddam, now killed under Bush
http://www.uruknet.de/?p=m33389&hd=&size=1&l=e

Look, bushite DO exist as enemies of the Human.

-

Neocon Soldier

Bushites who war as the neocon enemies, war for the 911 perpetrators to escape American Justice. that is why I, as of GOD, cheer to hear the deaths of these pro torture, pro theft, pro Satanic enemies of Man. They confess freely to targeting INNOCENT People for murder.

The Haditha perpetrators, if convicted, are looking at serving, maybe, a couple of years, for freely confessing to the targeting MURDER, of innocent women, men, and infants.

To, with a Love in your Heart for GOD, kill such contempt for Human life, is to serve American freedom to the last bushite neocon breathing. Death to the neocon soldier, death to the enemies of Man. - The Son of Man, as the Man of Men,

Johnny Wizard

-

PEOPLE

Who IS running this bushite nazi liar show, where they, our elite corporate media masters, kill our stupid kids with their flagrant naked monster lies, while refusing all calls for clarity, Johnny America really wants to know. Like immediately. Help us out here some man, don't be evil.

Demon bush told us Saddam wouldn't let inspectors in, and that's why he irrationally started this war against God conflict. Impeach him, then have him PUNISHED for high treason against a further dying as truly unheard from America - for that lie alone - we ALL could/should stand together as

equals demanding re-dress for the innocent murder victims who've suffered for such contempt, and belligerence for the basic precepts of freedom as Justice, or G-D as Johnny.

People of Earth, know, these bushite soldiers war Creation proudly with repeatedly committing aggravated felons, and South African death squad goons, all to war Love for the neocon god haters. Who, as peenacking atheists, as their very own documents stress, would murder anyone of US for a stolen nickel.

Our Mr. Bush Jnr. "The war is for you or for us [neoCONS] to win. If we [neoCONS] win it, it means your defeat and disgrace forever."

Die bushite die.

King Johnny Wizard
President and CEO

-

Kucinich for President!
http://www.democracynow.org/index.pl?issue=20070524

Now, it's true, America's Alex Jones states Kucinich wants to take away all your guns, and is a communist, but, Alex as sometimes, is terrified of those who seek the requirements to defend freedom directly, as more specific. (Example: NWO isn't the name of the specific guy who financed 911 to murder America.) So, as a consequence, he gets near ridiculous with labels applicable to generalizations only dummies could believe blindly. With Kucinich campaigning on ACCOUNTABILITY, Alex Jones looks quite foolish. But, he's still trying. Thank god for that. Thank god for that. Talk radio in America should take open line calls on our ideas about how to actually plan to defeat these, found factually to be, traitors to God and Country.

JOHNNY ROCKS

MSNBC Poll: Over 400,000 (88%) Say Bush Should Be Impeached
http://prisonplanet.com/articles/may2007/210507_b_Impeached.htm

See? Canadians who TRUST CBC would never know by Paul Hunter.

-

Bush Successful at Permanent Legalization of Torture
http://www.prisonplanet.com/articles/march2006/070306Torture.htm

/ / The truth is that the Bush Administration has used the McCain anti-torture bill to codify a policy of torture that is now embedded in our legal system for perpetuity. \ \

WE'D be hunting down those bushite liars who
torture innocent people to death for their satanic pleasures.
For, you know it does warrant the Death Sentence in America,

right? (You can thank Reagan for that...)

/ / In a move that hardly indicates that he was a terrorist plotting to attack a US government installation Tatar then went to the Philadelphia police department to complain that he was being pressured by someone into getting a map of Fort Dix and that he thought this had something to do with a terrorist plot. \ \

Didn't see this on our TV news either did You?

-

/ / On CBS' "Face the Nation," she claimed that intelligence errors before the war were "worldwide" even though the International Atomic Energy Agency's Mohamed ElBaradei publicly stated there was "no evidence" of an Iraqi nuclear program \ \

That from the 911 witch, who forbade a stop to hostilities IN AMERICA'S NAME against the innocent in Lebanon. Nazi Israel ADMITS to the targeting MURDER of any innocent persons who drive in a truck. Perhaps Americans. Who cares? Not CBC or CNN they'll tell you consistently absent from the crimes scene.

-

Pill popping American GI teens are becoming.. CRACKHEADS!

http://www.zmag.org/ZMag/articles/march02levine.htm

/ / Dexedrine affect the same neurotransmitters as cocaine; \ \

American grunts get FREE all the Dexedrine they can shoot

Do you know how a crackhead finds itself? Lost by indifference to the ultimate, only goal, more dope. Freedom Fighter? or crackhead WHORE, who hopes to find a dollar 'somewhere' to stave off it's crackmaster, the "American People", led by the un-elected demon dictator, our criminal Mr. bush Jr., as the true enemies of all Mankind. Bushites are on serious dope to be so dumb as cowardly accomplices to a traitor of themselves, that they would die as, before actually defending God's America - that they gave an Oath to.

I guess a soldier's word doesn't count for much in bushville.

The bushmob did 911 as traitors to God and Country, don't you know anything worth living for? my dying unjustly brothers and sisters? My friends, please fear not wisdom communicated by a REAL Man, for, we explain ourselves to the best of YOUR ability to listen simply. G. W. Bush used no evidence to form America's "conclusion" on who did US wrong on 911. So, Please, stop forsaking yourself, for, we're going nowhere. Support Johnny's call to demand open debate without censorship from the magic radio and TV execs, who hide in darkness, pretending to be our friends, while refusing intelligent dialog to answer any of our big troubles easily. Why? because largely, they're powerless without beating us down as giving 'Christ like' VICTIM so much - with their irrational ignorance for our survivals by the fittest. The fittest Ideas that rule this Universe, are the simplest, most easy to understand, but I digress about GOD'S greatness, for we know,. the corporate media elites as our voice, "Couldn't Care Less".

CBC just did a report about all the great heroin coming in from Afghanistan, that will still cause crime, and be illegal, (and maybe give you life in prison as an American,) but brought in with the help of the demonically evil bushite thieving murderous military, by the likely ton full to attack our direct family left un-protected, BY YOU PERSONALLY. And guess what? THEY, our media masters, couldn't care less if they actually tried to be our good guys. Reminder: the god guys is good, the demon liar antichrist demon enemies who thieve from Life with censorship is bad. If they hide ourselves too far, they loose all around, up and down. So get to it. Or don't. Your choice. Life lived Now, or damnable death by cowardly design brought forthwith under your own power to do nothing under such terrible costs against our suffering natures.

Typical tyranny for media control over all of Life for the beginners is this treasonous betrayal against our Nature, by refusing to be honest about our potential to be far greater than first considered. If they'd only allow US to have open communications, all our worlds would be better living for it.

Demand Coast to Coast hosts allow America to defend America.

I want air time with the one and only real man in these here
parts, Mr. Johnny America, our glorious make believe creator
of all we perceive religiously, self realized. He's a genius!

-

No evidence against an accused is US being truly abused

http://melbourne.indymedia.org/uploads/johnny-rocks.mp3
http://alacant.indymedia.org/usermedia/audio/12/johnny-rocks.mp3

Help me gain access to speak freely for open challenge against
Hannity, and of America's Coast to Coast Radio network hosts,
who deliberately deny you to contend, we're really, one hell
of a great bunch of People persons with rights God damn them.

Support Johnny's run for acknowledgment, and get US in the
News why don't You. Let me be king for a day my American Kin.
Make me a rich, near to dwell, well to do.

Get it done.

-

Lt. Denton to the completely innocent as god loving
'You die, you die, you die'

Lt. Denton must die. We apparently have him on video blowing
up People not guilty of anything. He shall die as the dope
pushing cop killer he is, and we'll use his brief existence as
a beneficial measurement to determine, which other demonic
bushite soldiers, who as bonafide 'evil doers', disagree with
such Just action - be put to death for our Freedoms also.
Simple for everyone to understand? We think so, so says the
Son of Man.

Death to the zionist bushite enemy forces

/ / After it was revealed by the Plaid Cymru MP Adam Price
that British trained policemen had tortured prisoners to death
with drills, we discovered, through the New York Times (!!),
that American intelligence officers had been working alongside
them at the Jamiyat police station \ \

Death to the zionist bushite enemy forces, death to the ungodly enemies of Man who torture innocent people to death for fun - expecting Johnny's America will not raise a word in defense for the Human race, or our guns to defend our loyal brothers to the cause of Justice. Death to the bushite, death to God's enemies who lie cheat and steal from Humanity to assist in the escape of those responsible for 911.

BASELESS?

/ / Prime Minister Stephen Harper "We will conclude a formal agreement so that we never again face these baseless allegations," he said. Thirty Afghan detainees have claimed they were beaten, whipped, given electric shocks and denied food once they were transferred to Afghan security forces by the Canadian military \ \

These demons who war for ZIONIST censorship are a bunch a dope pushing cop killers, who murder innocent people they call 'Taliban' better known as in Arabic - students.

-

Proudly kill the bushite who would drop from the sky,SEVEN MILLION landmines on our cities to kill our children for decades indiscriminately, while offering our Humanity to God no apologies. Proudly kill the bushite savages all to desperately survive ourselves creating a better world through fair, free market communications. To warring for Liberty as true Freedom wills, is for Justice understood as measured, not just made up out of nowhere for the pleasures of those truly Satanic. So spoke the King of being the wisdom we here revealed by statement of timeless fact. Good will triumph over evil. That's that.

-

Tenent "Lets everybody tell the truth."

It seems Tenent wants to inform us he actually meant when saying "slam dunk" - that, selling the war to the American Joe, without establishing any real facts would be easier than anything against the powerless as media unrepresented!

Bushite War LIFE Itself - and - They Couldn't Care Less

'Alpha company patrols the poppy fields.'
20070420_taliban28.mp3 (pbs broadcast)

"About the poppy harvest, currently gathering pace all around them, they couldn't care less." Instead they kill unarmed innocent people indiscriminately as enemies to ALL HUMAN LIFE.

They Couldn't Care Less

The 82 Airborne, in assisting in defending the world wide distribution and production of heroin, tells of murdering innocent farmers, that would never raise a gun in anger, are those they openly confess to target for first degree murder as labeled the, second tier Taliban. That's when not defending American Pension thiever ENRON'S pipeline managed under their extremist Muslim fundamentalist regime of intolerance for public communications, as the continuing thieving of 80 percent the Humanitarian Aid given by Canada to feed the STARVING, and school our children of the impoverished Afghanistan, as so reported. Eighty percent. 80. 80 percent stolen. I'm telling YOU: CBC couldn't care less about what Canadian soldiers are actually dying as COWARDS for: "Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in crime" CBC national radio management needs to be arrested in Canada for high TREASON. Please, be a Patriot, and demand these zionists allow open communication with the facts to save the lives of Canadians soldiers they hold in contempt to die as the bad guys committed to no better good.

/ / [...] the [New York Times] piece details the torture of [Innocent People] Sunni prisoners at one of the new American-Iraqi "security stations" \ \

Torture is a crime against God and Humanity. So, likewise, joyously, with pride, destroy the neocon traitors of Justice - for the true Love you have as Freedom willed - is as granted. Don't buy their demon lies by blind blanket false assertions, against YOUR Humanity's Innocence in tyrannical bondage, all done in to fool you believing, we have no rights to be heard in our presence - here existing freely. Therefore, to survive US all for something better, halt the 'escaping' murderous bushite thieves for God and America. SOLDIERS: Instead of dying for nothing, my wannabe Patriot Brothers, try joining Liberty's cause, which is our cause truly. Is it because corporate TV zionist money whores, are cowardly and ignorant, as evil hypno muggers, in MY dying for real America, that YOU refuse to speak Now in your Humanity's begging further defense?, on evidence being the only requirement to establish

a person's guilt or innocence? for ungodly terrorist
activities committed in our name by bushite bombers from the
neo-conned AIR FORCE, who, as rotted juveniles, cheeringly
bomb us People indiscriminately leaving a Church as something
TRULY SATANIC? To dare, in our presence, continue threatening
harm against an innocent child of wonder, not yet even born to
God's suffering world? Bushites war LIFE itself. So then
pleads I again the Son to God, as Man to Men: war to kill the
enemy bushite nazi savage thieves, for real Freedom is waged
truly by Just causes. The mute, pro-censorship/tyranny
THIEVING bushite savaged nation, has NO EXCUSE for the crimes
they have committed in our dying names. I demand our voices
heard internationally for Justice as Freedom is Godly.

War and the Police State: Complicity of the American People
http://www.globalresearch.ca/index.php?context=viewArticle&code=THO20070421&articleId=5454

/ / On September 11, 2001, corporate media and the government
elite launched an aggressive political and media campaign upon
and against the American people. \ \

-

Loyal bushie McCain as bona-fide nazi savage "Bomb bomb bomb Iran.."

Reporter 'Mr. McCain, you demon liar nazi fu-ker, don't you
think your being insensitive to innocent god loving Iranians?'

Pro-Torture of INNOCENT PEOPLE McCain "Insensitive to what?
The Iranians? My response is lighten up and get a life."

Johnny America Lyrics: "Can't an American PROUDLY kill TRAITOR
pro-torture Zionist McCain for the Love of living Life Justly,
as Freedom was Country?"

Investigating the Investigation
http://www.alternet.org/story.html?StoryID=17816

/ / After playing a tape of Cheney's statement, Russert asked
Daschle, "Did the vice president call you and urge you not to
investigate the events of Sept. 11?" \ \

PRO-TORTURE Gonzales "I quite frankly don't like the idea of
the Judiciary deciding who is on my staff." [at Justice]

PRO-TORTURE Gonzales "I did not make decisions about who
should or should not be asked to resign." [in mid-term]

As US State Attorneys?, whom have the most serious of American
Justice Department Motions of Defense for REAL Freedom?, he's
not concerned directly with?, nor would "like" democratic
Peoples to be allowed to care either?. IF he gets HIS way he
says - as minding for the criminal master. True, Americans
are generally, extremely cowardly as Bush's freely giving
PAYERS, led for more ungodly sacrifices in fascistic silence,
but this continuing charade of incompetence gathering against
our entire Humanity, is going way beyond acceptable to
everyone concerning. Johnny Wizard conceivers and otherwise
non-believers state together:

The Iraq war against Christ has no true justifiable cause.
Torture is against the law warranting immediate death sentences
The Zionist AIR FORCE bomb people indiscriminately as Satanic
The bushmob stole all the Development Funds for Iraq
The bushmob are stealing ALL of Iraq's oil
The bushmob stole 100s of billions from censored AMERICANS,
while George W. Bush personally stole 50 billion from America
in the first four months of stealing the initial election.

/ / "I grabbed her
little sister and put her in front of me . . as the bullets
began to fly, the blood sprayed from between her eyes, and
then I laughed maniacally." [, then were heard the cheers of
godless bushite dumfuk traitors obscening to God and Man as
the unholy enemy.]

What ever happened to butterfly kisses after evening prayers?

Are you telling me, an American Father, wouldn't gloriously
kill this lawless bushite enemy and his demonic ilk, for our
love of girls everywhere? Or, how about the UNARRESTED
soldiers we witnessed on video beat shoeless children
pratically to death while laughing and cheering? Or like
those that speak zero defenses for Haditha's confessed MASS
MURDERING irrational women and child killers? The REAL demons
CONFESS to going into a house, WITHOUT reasoned approach, and
slaughtering an entire INNOCENT family.. for nothing but
their lifeless SATANIC pleasures. The 'cause'? "The [mass
murdered unarmed innocent neighbor's] back door was open.."
To, for God, gloriously, with love, kill these unarrested
murderous continuing ungodly bushite nazis, is to war the TRUE
enemies of Humanity to save the lives of our precious loved
ones.

-

So, the demon liar bush tells US, the terrorists would rather
travel to Iraq to kill Americans indiscriminately, than come

directly to America from wherever instead, to kill anyone who
silently supports the indiscriminate murder of our humanity.

Not as tyrants have we come, but as liberators
- Adolf Hitler, 1938 -

http://blogcritics.org/archives/2005/09/27/214145.php

/ / Why would [subhuman bushite] guards torture a man they
considered innocent? \ \ Because they are openly enemies to
Christ. I say, kill it for America when you can, God bless.

http://www.foreignaffairs.org/20060301faessay85202/paul-r-pillar/intelligence-policy-and-t
he-war-in-iraq.html

/ / "As the national intelligence officer for the Middle East,
I was in charge of coordinating all of the intelligence
community's assessments regarding Iraq," Pillar writes. "The
first request I received from any administration policy-maker
for any such assessment was not until a year into the war." \ \

Bushite will kill America

/ / At 9:32 he saw and heard a bomb destroy the offices of the
Pentagon auditors. 40 military officers investigating the
missing money were killed. The CTC was destroyed too. You
can read more here:

http://johnmccarthy90066.tripod.com/id206.html \ \

-

Do you expect yourself to fail trying?

It's all up to You my friend, it's all up to you.

Onward Christian Soldier.

IDEA: Let's get our show up and running, by allowing open
public investigations To be conducted internationally, with
open line challenges, so we can publicly isolate each and
every bushmobster personally responsible for 911, and then,
all of everything else still left outstanding murdering
ourselves. Whadoyahsay??

-

'We were torturing people for no reason'
http://www.iht.com/articles/2007/03/28/opinion/edmckelvey.php

..but for a bushite's Satanic pleasure,
death to the tyrant thieving bushite sadists,
death to GOD'S ENEMIES who war freedom in America to help escape
Our Mr. bush Jr. for the crimes HE DID with Ahmad on 911

-

http://www.commondreams.org/headlines05/1128-01.htm

Do we have a problem here in any way?

/ / A spokesman for Aegis Defence Services, said: "There is nothing to indicate that these film clips are in any way connected to Aegis." \ \

Not now according to CNN, bushite enemy Tim Spicer, and the Pentagon. This UN-NAMED spokesperson WILL be tried for aiding the crimes of first degree murder with it's lying racist nazi filth, who like getting away murdering black guys for fun and profit in iraq, paid for by A cowardly DYING AMERICA.

The Pentagon's Power to Jail Americans Indefinitely
http://www.jonesreport.com/articles/270307_pentagon_power_jail.html

Look, demon enemies of Christ torture innocent people for fun, paid for by the silent American tax payer. Americans refuses to bother making a simple phone call to Coast to Coast to raise some concern. THEY don't. They refuse to hunt bushite down in their streets for death to defend the innocent held indefinitely against GOD'S will. Death to the bushite, death to Johnny's godless, lawless, fascist enemies of FREEDOM.

Look, CNN, CBC, and FOx News know the bushmob did 911, but will smile while watching your son or daughter sent out to die CONNED by their demonic hatred for US freely communicated. How do I know this? I made the effort of making the phone calls.

"Al-Qaida" = "General Mahmoud Ahmad"

Defend freedom, and the FBI, by demanding Coast to Coast radio hosts allow free communications, absent their personal contempt for preserving freedom to be our America. George Norry WILL kill Your American child for the contempt he truly holds for our lives here. He says he only supports murdering Arab children for the neocon, but when your not looking in his 'shadows', he'll kill your child too, don't doubt it for a second.

"Al-Qaida" = "General Mahmoud Ahmad"

-

NATO forces shoot Afghan child, run over another

US Attorney's Firing may be [IS] Connected to CIA Corruption Probe
http://www.theolympian.com/101/story/71116.html

/ / On May 11, 2006, Kyle Sampson, then Gonzales' chief of staff, sent an e-mail to deputy White House counsel William Kelley, asking Kelley to call to discuss "the real problem we have right now with Carol Lam [...] \ \

-

pleasure of the president

US Attorneys don't serve "the pleasure of the president", they serve freedom lovers dedicated to defending America from willful criminality. But, americans are too stupidly weak to demand Coast to Coast hosts allow open communications on America's highest of concerns. Bushite america would rather, in silence, thieve from God as our Humanity, than serve the protections of Justice as ourselves.

/ / According to the Islamic understanding of power, the Mujahideen don't compete for the positions in the leadership. \ \

"Those who negotiate in the name of the Taliban will be killed," he [the bushite nazi dumfuk 'Taliban' 2nd in command] said. He did not elaborate.

Hmmm. Allah is all, and negotiating for freedom from naked bushite tyranny is won EASILY through communicating understanding. The tribal strategy of Afghan fighters, where Allah is Oonerroh, seems to be not the only thing missing from the statements of this "Taliban" RELIGIOUS FUNDEMENTALIST top top top leader. Only "second" to Omar the Just. (Apparently an individual this current bushite incantation of "Dadullah" is totally un-familiar of.) Omar, the Just, whom Dadullah claims he receives his Top Secret nobody can see'im orders. In other winds: Bill a bushite for God and America, an all day long you'll have good faith in a world freeing ourselves of godless dumfuk tyranny implemented by the horribly foolish, as deeply ignorant of Allah, bushite demon liars for the traitor neocon. TRAITORS!

"Those who negotiate in the name of the Taliban will be killed," he [the bushite nazi dumfuk 'Taliban' 2nd in command] said. He did not elaborate.

Allah is all, and negotiating for freedom from naked bushite tyranny is won EASILY through communicating understanding. Omar the Just knew this to say so, as do I. And this is why corporate news professionals forbid me to speak openly without

nazi censorship, ON OUR AIR-WAVES, because I am honorable, right, and true as believable. While America's fun guy, zionist George Norry, states to support PUBLICLY, the ungodly murder of innocent Arabic children for nothing but his personal contempt of YOUR DYING LIFE, while further wanting to invite thoughtlessly nuking places on Earth all for his secret hatred of US freely commutating. Typical bushite. Ending with to tell US again 'convincingly', that bin Laden did do 911 as a terror-ist bad guy in G's World!!?! How so? EH? How so? he don't care man, he don't care. He and his family have millions of dollars to sell you out, so why care for your struggle to survive in bushville soldiering?

Alex Jones and me aren't on the best of speaking terms, but I will state, a desire to address every same challenge he has adroitly addressed as publicly lacking. And when I am addressed 'officially', I will campaign to put US in the space to realize, we are the government, we are the people. We don't need to run to the hills and encamp ourselves away to defend ourselves to the max from the man, we are the man. I'm telling yeh, I know this to be so as the sea is we magically. Equal rights for all in God's name is self evident. Self evident to ME anyway... but well.. who am i?, right - I'll tell you as I have for more than a decade as a living fiction forsaken for lack of anybody anywhere understanding in totality what I am here on Earth as true Son to Man - a 'understandable' timeless stand in for G to gain recognition through as honest broker. [I've been everywhere around forever, and.. blahblah.. I know people really don't care to know of ancient wisdoms, truths that guide the order to the Universe, cause often they think I'm beyond their comprehension as a 'better than', when all power is in equal respect for others as our hurting brothers and sisters suffering with tyranny by our collective willful ignorance on Justice.[God's bestest is Just for every reason being thus]] I am one serious genius by no accident in words you have as much right to contend for yourself being, if you'd only believe we have some good ideas here to really defend ourselves with.

Please my American friend, help US speak out freely Coast to Coast. So we together can start, on demanding Justice for all, as innocence in serious jeopardy. Dadullah is most likely an individual who holds at least some control over official military functions of NATO in the region. So, we're going to seed loyalties of the rare Patriots in the force to recognize our need to isolate who supports, not talking FREELY for peace easily in Afghanistan without question. No evidence was brought against Laden, therefore, the Taliban were True Patriots, and bushite traitors are pure racist nazi filth ridden, toxic, as being cowardly dishonorable as despicably evil, enemies to us all. Put US in Command.

Question the bushite, question to anyone who mumbles disagreement in the godly fact, that WE, as Humanity, will spend the better part of this next generation, hunting every last war profiteering nazi war criminal down for our real Freedom from their, so errorred "endless" tyranny of big money terror. Lawlessness with be outlawed, and ANY corporate american who mumbles otherwise, as an enemy totalitarianist, the clear ungodly, (as should be criminal,) will be put to challenge by their very own children, or parents, or bleeding dead brothers. Hannity must be tried for death as lying that the holocaust never happened from Iran. DEATH to the demon liar nazi fu-ker I say, DEATH to the demon liar nazi fu-ker.

"Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in crime"

Who IS running this bushite nazi liar show, where they, our elite corporate media masters, kill our stupid kids with their flagrant naked monster lies, while refusing all calls for clarity, Johnny America really wants to know. Like immediately. Help us out here some man, don't be evil.

/ / "Those who negotiate in the name of the Taliban will be killed," he said. He did not elaborate. \ \ He's either with the proven cowards of JTF2, or the two or three "CIA" guys

secretly hunting bin Laden in caves out there with tens of billions of dollars. SPENT EACH YEAR 'unknowingly'. (No reason why, but, they just can't tell You, as the paying for it really while DYING) Put US in Command.

/ / The Mujahideen aren't students of power and don't compete for power like others do. We are students of truth and work for establishing this truth and for this cause we sacrifice our power \ \

-

http://www.godlikeproductions.com/bbs/message.php?messageid=355789

/ / Timothy Griffin, Karl Rove's assistant, the President's pick as US Attorney for the Eastern District of Arkansas. Griffin, according to BBC Television, was the hidden hand behind a scheme to wipe out the voting rights of 70,000 citizens prior to the 2004 election. \ \ Timothy needs to be arrested for high treason, for fixing an election, or instead, what? we'll make him a State US Attorney in bushville?

kill all of them

/ / In his testimony on Wednesday, Pfc. Bradley Mason of Company C said that on May 8, the night before the raid, Colonel Steele told soldiers to ``kill all of them.'' Three other soldiers gave similar testimony. \ \

I would offer rewards for more soldiers to come forward. Why?
because there truly is, no honor among thieves. Every bushite
soldier in Iraq for the liar neocon is minimum, a purposeless
dumfuked cowardly thief. See? if you offer a reward, and
they don't take it, their 'fellow' bushite, kill'em for it,
right? why take the risk it'll cash in over your worthless
life? For, who can trust a lying bushite nazi savage?
certainly not a lying bushite nazi savage. In other words:
speak against committing war criminal acts of lawless
aggression in Iraq for Bush, as CLEARLY un-American, and I'll
try to forgive you as human. Or, I guess you'll kill
yourselves in mutually muted total contempt for this universal
life as actually worth something.

When you see and hear on video, sexually dysfunctional, as
sadistically satanic grunt puke pro-bush soldiers moaning,
while deliberately killing innocent defenseless Family People
running for our dying lives from a holy church, or as just
simply anyone standing near the side of the road, then, my
friend, you'll begin to understand what evil actually is.
And, what needs to be done to seriously save ourselves.
Seriously. Justice must be won sooner than later.

Five Star American General Johnny Wizard will train American
Soldiers to recognize such demonic behaviors in combat as
worthy of immediate frag to defend the lives of truly fellow
honorable soldiers. Soldiers ACTually, committed to freedom
from godless satanic dumfuk tyranny of the antichrist demon,
Mr. evil personified, the UN-ELECTED 911 TERRORIST, George
Walker Bush and CO..

-

US officer "upset" Iraqi suspects taken alive, court hears
http://www.telegraph.co.uk/news/main.jhtml?xml=/news/2007/03/14/wsoldier114.xml

/ / they had been told to kill all military-aged
males, a court was told Tuesday. \ \

Come on now, who wouldn't take great joy in destroying any and
all such ungodly bushite hatred for Humanity in this light of
day, eh? In fact,why don't American Congessmen, who believe
in defending Liberty, campaign JUST that? Why not??? Is it
because they're LIARS?

Like Coast to Coast's fun guy, he ain't taking our screams,
George "pro Arab child Killer" Norry??

Rapists and torturers must not be allowed to rule our pirated
authority through defending the further 'escape' of the
bushmob for 911.

/ / As a result, the Defense Department put up a Web site in
2005 designed to clarify [to the dumfuk bushite demon liars]

that sexual assault is illegal [...] \ \

Let's save some lives, what do you say guys?

Or, are we going to go further with this: George W. Bush:
"If the absence of violence is victory, no one will ever win."

YOU

"If the absence of violence is victory, no one will ever win."
http://cleveland.indymedia.org/news/2007/03/24652.php

I know, it's seems odd that I am, at the same time, offering answers to any question on the science of God as is pertains to Justice measured, but this is just who I am to be conscious man. So, if we can get over the shock of me being so especially normal, maybe we can then realize, I have some simple good old ideas that transcend through time by rational understanding communicable between any two people. I am not a "miracle worker" to all those I advise to not eat Aspartame because it's a poison that also makes your body crave un-needed carbs, that will likely convert to more unless fat. So, it slowly kills you, while making you fatter than you need be along the dead end journey faithing in "the system". So, why do some do it religiously? Who cares (for now) but to say, our governments are failing US miserably. I spoke personally with one of the head scientists in Canada at "Health Food and Safety", and he told me the scientific analysis done by reputable scientists I found freely available repeatedly on the internet years ago, was completely true. (It breaks down to formaldehyde, and methanol (a slow lethal poison), among other shockers. Poison. P-o-i-s-o-n-s in our food stuffs. Poisons.) However, he could take no action to defend Canadians "officially" because we, Canadians, have our corporate interest news departments completely refusing to defend ourselves from corporate exploitation anywhere, and as natural consequence, we, as the dying world, would together unrepresented, probably lose a law suit from mutant Monsanto through the self inflicted bounds of OUR censored WTO program. - instituted through the top secretly mastered puppet people persons of the 'unseen' NWO I guess.

I'm telling you, we need me as King.

Look: Aegis's workforce, for American PAYING profit, has been publicly disclosed through CNN to be shooting people in Iraq indiscriminately for your money, and when the Pentagon was contacted by Nick Roberts about what would be done, they responded, nothing would be done by Johnny's America but to increase the multi-hundred-million dollar contract with demon enemy Tim Spicer to continue. Now... why you ask? Because the neocon liars, steal money by lying to cowardly American

kids about what they mindlessly, without thought, give their souls for. Tim Spicer openly hires South African goons to commit hardships for American GIs to die without end for, in lawless tyranny. Peace sells less money for the neocon war profiteers to murder the innocent American as. (Iraqis, along with the rest of Humanity's Men, WILL eventually learn this truth, or life for you will end.) As an Arab hating bushite, (like what you'd find as a publicly proud practiced hatred for all Humanity, by an Amerkan dumfuk soldier in Google's alt.religion.islam), they say nothing for Freedom by Justice, but root themselves to Spicer's monsters who like killing black guys, as world renown mass murdering racist nazi filth. That's why zionist Israel loves them so much.

Look: Somebody stole four trillion dollars out of the Pentagon.

Look: Greenspan STOLE
Look: Lotteries everywhere in North America are running the same PROVEN criminal scams that cost US ALL billions and billions of public dollars that, without question, (as MATHEMATICAL FACT), regressively destroy our dying communities. CRIMINAL. [Solution: 100 percent cash payouts.]

Look: corporate magic TV people couldn't care less for US if they tried. Ahmad funded Atta. bin Laden claimed he played no part in 911. And video of iron running like water moments before the first tower fell is freely available for download all over the place. CBC, CNN, FOXnews et al. know the Bushmob did 911 in other words. I've spoken to most of those 'in control', and I'm telling you, they're losers, and they know it. Remember: they'll censor my voice to send YOUR child to die for no better good, or reason understood, while entertaining. Weekend TV in North America totally sucks. Now, why do YOU think that is brother? The more powerless they make US, the more money the neocon zionists can murder Humanity for, thinking they might just get away from this if we continue to take no action in defense of anyone as God would will. Let me be Your servant King, by backing me up some here. We need some dollars to eat, and I need it now before we starve to deaths.

Look: Barbra Bodine did the Cole bombing. [the Cole whose crew has been completely overhauled. Where are the many who served there NOW eh?]

Look: America has kidnapped countless thousands without evidence to be held against OUR will indefinitely. [Like the NOT Jewish Israel]

Look: innocent people are being tortured to death by those who hide OPENLY in America's uniform. [let US hunt them down for GOD, despite what demon lies they argue give them as Satanic to avoid "The Law".]

Look: the bushmob war profiteers STOLE the Iraqi Development fund

Look: the more than 10,000 security contractors for
Bush are officially deemed lawlessly unaccountable to
anyone - THINK ABOUT IT

Look: Negroponte PERSONALLY stole the Iraqi emergency
water provision money

Look: Sattler OPENLY committed the worst war crimes of
all Humanity's history

Support my cause, which is your cause.

Senior Military analyst, Rob Riggle "In the field John, the
soldiers are out there, every day, risking their lives, for a
common Ideal: that none of the President's decisions be
questioned."

This is more true than a bushite would admit before murdering
a honorable father to rape his young child, like Lcpl
Boudreaux freely confesses. Boudreaux will tell you, openly,
you have to murder the Arab father of the Arab child your
planning to rape, because if you don't, that Father will spend
the rest of this life, hunting you down in the streets to rip
you limb from limb for it.

Let US, me and the few, proud, and the brave, bring that
Father's intent to bare on lancing Boudreaux, and any other
who would sing in it's ungodly defense.

Zionist american media celebs do tell, everyday, soldiers for
the neocon are all Heroes.

Please, my brothers, join me in hunting each and every bushite
present in this video down for death. For a Love of God that
will never end, until we have seen each and every responsible
child killing bushite present brought to true Justice extreme.

/ / British Soldiers beat unarmed Children

-

Men pick military as sentence
http://www.centredaily.com/118/story/29432.html

Great, more criminal heros to victimize Humanity for.

-

Giuliani told ABC's Peter Jennings on September 11, 2001

'..and I was operating in there [75 Barkley St.], when I was
told that the World Trade Center Towers were going to collapse.'

WTC TOWERS? "WERE"?

Civilization's ancient Founder Hammurabi,
suggested just to openly publicly have executed those who lay
capital allegations without any evidence, while working to
close outstanding criminal investigations. A made CRIME
within ourselves Hammurabi claimed, and by thinking such ways,
brought birth of 'Civilized' to an untamed till then, chaotic
confusion. Old becomes again anew, because Americans are weak
as polluted, and too cowardly to defend the rights of US
innocent. Let's change that. Support my climb to
international controversy, with my unchallenged claims of
direct accountability being sought, for the 911's neocon war
terror plot.

'A military judge ruled last week that Watada cannot base his
defense on the war's legality.'

Telling US what?, that it is a crime to not commit a crime?
It isn't only high treason against America the ungodly bushite
are guilty of, but of a madness held by those truly Satanic..

/ / 'Why are you taking pictures? You don't have permission."'
[...] the [bush whore] American, speaking through a translator,
warned him that he did not want to see any AP photos published
anywhere.\ \

No bushite was found gloriously killed for country, yet, they,
the godless bushite enemy, continued to shoot innocent People
indiscriminately for a distance of six miles, while likely,
secretly masturbating each other as bushite liars do always.

The pro-bush irrational military said only eight innocent
un-armed Afghans were counted as murdered deliberately, by
those who believe our Mankind, can not ever find themselves
accountable, without zionist controlled, corporate news
permission. See? The military counts mankind as zionist, but
I am a man of real men, committed to defend our world from all
enemies, foreign, or domestic. Unlike a bushite traitor to God
and America, who's word, as Oath, means as much to them, as we
do. Ungodly as they are loveless, the bushite, is Life's enemy.

See my friends, this is why I, as the Son of Man beg and plead
for all able bodied men, to kill treasonous bushite on sight,
for every time you love God by defending the innocent from
murder, (the innocent whom any pro-bush corporate professional
hold in total self contempt,) you save REAL peoples lives, and

you defend God's good name to love God as ourselves committed to true Liberty. Bushites are enemies of freedom, enemies of God, and worthy of death, before allowed to further bomb people indiscriminately like the commanders of NATO order day after day without risking instant frag because, bushites are blind cowardly thieving nazi fascist savages, brain damaged, who believe as satanic demon whores of Molech, they can con all of US including me forever, just like dare dubya. Dumfuks.

God is Great!

-

WHERE IS YOUR NATIONAL NEWS TO DEFEND OUR PRIVATE INTERESTS?

Former FBI Director Calls For New OKC Bombing Investigation

/ / The FBI man in charge of collecting evidence from the government building destroyed by the Oklahoma bomb has called for the case to be reopened. \ \

WHERE IS YOUR NATIONAL NEWS TO DEFEND OUR PRIVATE INTERESTS?

Support Johnny Wizard's personal challenge against thieving LIAR traitor Hannity, and his corporate nazi bush whores who lore our stolen values by how much they can deny US privilege. Coast to Coast radio hosts need to be publicly challenged for debate they deny US knowing of together naturally speaking. Great example of our Problem: CBC National Radio, in Canada. When a caller phones during the very rare moments we're taking public words, have a pre-broadcast rig-a-ma-role question session, you'll have with not only the OFF-AIR screener, where he'll probe you for controversy, but after the first process of noting in book form your disclosed intel, will notify you that; IF your independent thought is granted by the "Producer" (- who reviews everyone - rules are rules -) Our national station will phone you back this afternoon, so stay tooned, to line you up with your baking gingerbread creds. They never ever dido! The more Brilliant you are, (like the highly charged as extremely charismatically charming, wild man ruler, Johnny America - the media phenomenoner) the higher probability they'll find POSSIBLE concern, on their do nothing for your taxed attitudes..!. Why take chances someone might show a greater living responsibility to a real suffering God as our left corporately forsaken Country?.?.?. A dying Humanity.

Look, seriously, my friends, we have all the answers to our problems.

Support Johnny Wizard's personal challenge against thieving LIAR traitor Hannity, and his corporate nazi bush whores who lore our stolen values by how much they can deny US privilege of equal standing.

Get it done brother.

Help me gain access to speak freely for open challenge against Hannity, and of America's Coast to Coast Radio network hosts, who deliberately deny you to contend, we're really, one hell of a great bunch of People persons with rights God damn them.

Let's do this.

-

/ / KBR's Tiger Team stayed at the five-star Kuwait Kempinski Hotel, where its members ran up a bill of more than $1 million. This outraged the army, whose troops were sleeping in tents at a cost of $1.39 a day. The army asked the Tiger Team to move into tents. It refused. \ \

See? KBR is now privately running hospital care for the dumfuk grunts, so, what would you expect but rat infestations? Oh, you never truly thought... what being a "Liberal" or "Conservative" victim is. Are you pro Liberty, or pro tyranny is the question riddled really.

-

"For every fatal shooting, there were roughly three non-fatal shootings. And, folks, this is unacceptable in America. It's just unacceptable. And we're going to do something about it."

- President George W. Bush

Kill a bushite and God will love you for defending US, the innocent in war time.

http://mediamatters.org/items/200702260008

/ / Wash. Post parroted White House claim that Iraq war was authorized by U.N. Security Council \ \

Seriously, the propagandists responsible, need to REALLY, be put to death after found out through US public court proceeding. NO ONE would disagree that Iraq is a war crime, where more than a MILLION INNOCENT PEOPLE have been raped, tortured, or murdered by dumfuk bushite grunts. If YOU actually think about it, all of everyone would gladly kill an unholy bushite terrorist, before allowing it to murder families running for our lives as loving Church goers.

-

/ / 7 Clandestine operations against Iran and Syria, as well as the Hizbullah movement in Lebanon - even to the extent of bolstering Sunni extremist groups that are sympathetic to al-Qaida \ \

Look dummies, by Bush funding bin Laden forces, he is undermining the troops to DIE. Lawless American can not be allowed to accept this from the actual demon anti-Christ, can it?

-

Death to our Enemies

My friends, People are dying because the, Israel=Jew, magic radio and TV crews, wont broadcast THE TRUTHS of our publicly available findings. Police findings. People are dying needlessly, illegally, irrationally like meaning really stupidly on Bush's behalf, for they claim, we don't want to be 'embarrassing ourselves' with MY wisdom, You people seem to not be there for God when the chips are way down, and truth is plain to see.. 911 was an inside job, and CBC with CNN don't want to tell us about it, but will watch our LOVED children lied to, to go out and die further for a causeless war of criminality unparalleled in it's wickedness.

http://www.crooksandliars.com/Media/Download/14453/1/Greenwald-Colmes-Gaffney2.mp3
http://www.crooksandliars.com/Media/Download/14453/1/Greenwald-Colmes-Gaffney3.mp3

promoted through the tyranny of censorship

Corporate News America's Terror Expert, Gaffney, who publicly advocates the rape and murder of the innocent in Iraq to thieve from for the 'escaping' neocons, (as the truly UNGODLY,) stated these words about why American Soldiers continue to lawlessly DIE sacrificed for no better good or reason understood, as total willing dumfuks under deep hypnosis:

"It is not George Bush, it is not the Neocons"

"," = swinging pocket watch

Don't let these neocon zionist bastards doe this to US.

Any Commander that doesn't support the arrest of those responsible for 911 and the subseqent neocon war crimes of Iraq, is a traitor to God and Country.

How much much God take as taken, before you people get on over this criminally empowered war monger Congress of an unelected lawless dictator demon, and call them out on the turning talk commercial radios, all to finally truly defend ourselves with a good media plan for results.

Make the call, be a man.

-

Sir Ken, head of the Crown Prosecution Service

"The fight against terrorism on the streets of [..] is not a war. It is the prevention of crime, the enforcement of our laws and the winning of justice for those damaged by their infringement."

You got that right. So, join US in demanding the quick trials, and public executions of known bushite enemies who murdered Americans on 911 with general Ahmad, and who with Peter Powers, murdered the innocent in Britain for more stolen goods against God. And anyone in the air force as bushite bombers should be a great joy for US all to hunt for prosecuting too. The bushite dumfuk is an enemy to our lives, with it's blatant naked contempt for the innocent, who like the demon liar THEIVES at CJOB, George Norry, or Hannity, will

forbid ANY human defenses of the lawless dictate of the IRRATIONAL tyrannical demon antichrist, all so to victimize more of You as the censored forsaken.

REPENT. [from the Greek, meaning to think.]

The TRUE Son of Man Johnny Wizard Exists Born to this Eternal World to end permanently demonic bushite enemies of Creation. Help Life out by destroying cowardly America's greatest threat to the Species, the greatest threat against Humanity's Freedom to be Loved by God. Corporate nazi zionist bushlores at CBC, CNN, and criminal thieving from the desperately poor in Winnipeg CJOBers forbid open communications, and I can't 'take over', because then I'd be defeating my own, power to the Peoples argument. So, it really is up to YOU, yes you there... reader. Who.. really..? YOU, here, now. Life begs, takes a stand for your fellow man, and demand our voices heard for the defense of the entire human race. And be quick about it. Repuglicons don't want freedom from endless war where they kill your forsaken kids, for we all know, bushites would be publicly tried, then spend the rest of their treasonous lives behind bars broke, or dead from lethal injections made popular in America. Again, officer Bowman is responsible for letting 'escape' those from Fort Detrick, who attempted to murder the American Congressmen who thought going into lawless tyranny, !makes no sense! Where is corporate America on our issues when OUR free speech is ruled by the irrational evil minds of Limbaugh, Bell, and Norry?!?!! Back to Bowman: Bowman, also is responsible for sabotaging the Moussaoui warrant. And, how much you wanna bet, he's probably the same bushite who found Atta's passport, and likely had all 19 names of the high-jackers to give CNN, CBC, and FoxNews just like the neocon's "bin Laden" would have too. Take the publicly prancing bushite enemy out for questions by yourself, if he doesn't plead his defense publicly on Coast to Coast by tomorrow. Remember, there ain't an "Intelligence" group worth their salt on the face of our Earth, that doesn't know exactly what I'm doing here honorably for a real Justice made through careful thought. So, support Johnny Wizard speaking for public challenges internationally, and with the 23 plus co-operating for life 'Intel' agencies, along with, anyone else who can join in on the call. as a growing number of Patriot Soldiers, who trust yourself to see, this wanting of Justice isn't complicated. A person accused of a terrorist event without any evidence, has our accuser a bushite, who should be watched carefully until verifiable conclusions are done by the understanding of fact. Not faith. With George W. Bush making real decisions in faith, expecting us to believe as corporately broadcasted unabashedly unbiased, that he is not a deliberate incompetent monster war criminal of unfathomable evil?, who is just too 'stupid' to understand

why we are innocent until proven otherwise?, is really
something we all need to scream about to save our dying lives.

"[..] just like the neocon's "bin Laden" would have too."

However, the real Laden, on video taped confession, claimed he
played no part whatsoever in 911, then later, offered himself
for arrest, confident he would be acquitted. Not corporately
newsworthy though, so, few even know why their American child
was later died in the terrorists act of corporate contempt for
US living Freedom with something greater as real Justice wills

-

Again, my friends, Art Bell and George Norry have thousands of
bushite dumfuk in America that will phone them to tell US how
greatly they are to have no care for dying freedoms in
America. While when the humans call, Art Bell for example,
between breaks, when privately screening his calls, just hangs
up on anyone he fears might articulate things like Ahmad
funded 911's Atta, according to the FBI, in defense of
America. I say, we at LEAST, talk about putting them both to
death for treasons against Your Life dying teen soldier,
wannabe Patriot. Make sense?

Unhinged and unfit for office
http://www.dailykos.com/storyonly/2007/2/15/105017/202

Protestor's sign:
"killing innocent people is the problem not the solution."

(snpd)

My friends, People are dying because the magic radio and TV
wont broadcast our publicly available findings. Police
findings. People are dying needlessly, illegally,
irrationally like meaning really stupidly on Bush's behalf,
for they claim, we don't want to be 'embarrassing ourselves',
leaving our forsaken Johnny Wizard's Wild Wow World of Wonder
Wording Wees!.. mostly just appreciated by myself as sole
surprised spectator, because you people seem to not be there
for God when the chips are down, and truth is plain to see..
911 was an inside job, and CBC with CNN don't want to tell us
about it, but will watch our LOVED children lied to, to go out
and die further for a causeless war of criminality
unparalleled in it's wickedness.

Do you expect yourself to fail trying?

It's all up to You my friend, it's all up to you.

Onward Christian Soldier.

-

THE "IRANIAN" 81MM MORTAR WEB PAGE IS A FAKE!

/ /the traceroute traces the IP not to a business, but
to a university! \ \

-

Wuterich "shoot first and ask questions later"

Wuterich "shoot [defenseless innocent women and children]
first and ask questions [from the corporate zionist pro-kill
anyone for a stolen nickel propagandists like demon enemy
AIPAC Hannity, George Norry, or, censors his calls for neocon
war criminals traitor Art Bell] later"

http://www.globalpolicy.org/security/issues/iraq/occupation/report/atrocities.htm

/ / commanders may give orders to ``shoot first and ask
questions later.'' \ \

This is why the Son of Man through God begs the Peoples of
Humanity to kill on sight, the enemy bushite betrayers to
Life. Ourselves, the innocent. These soulless grunts don't
destroy such deserving commanders, Like Blount, Sattler,
Russell, Wuterich, Pantano or even Kimmitt, and instead, as in
Fallujah, murder every woman and child present, while stealing
all our given monies for desperate life saving help. Anyone
in the Air Force deserves to be justly put down, for, I've
NEVER seen any legitimate bombing campaign, but for to kill
People indiscriminately like NATO regularly does with
radio-active toxic waste, while then sending in the dumfuk
Marines, or the 'from the coast' Canadians, who of course,
rightly get killed on the ground in retaliation for such blind
evil stupidity. Please, I beg, help Iraqis, and kill the
bushite thieves to defend our forsaken God. American
children, help me my loves. Please don't allow the bushmob to
escape for the treasons against America on 911, for, bushites
are OPENLY traitors, as the TRUE enemies of evidenced Justice,
as the Freedom to do our own things loving God on our own.
Besides, most bushites aren't even registered American
citizens. Bushites need to be hunted down for destruction -
by the Loyal Christian American Patriot Soldier, the ones who
war to win against those who torture US innocent to death as
the ungodly Satanic LIAR enemies. Save the Humans, kill a
bushite false accusing traitor of American Freedom To-day, and
become a real Man in the presence of Johnny America, an actual
Man of Men, Lord of Lords, and King of Kings.

McCain is insane
http://www.codemonkeyramblings.com/2007/02/they_say_that_insanity_is.php

McCain speaks NOTHING to demand the
execution of hiding as 'British' soldiers who on prized video
tape, beat to death young barefoot children for erotic fun,

nor on mercury vaccines not banned minus "The President" in name. BANNED.

Sorry everybody, but that's the way it's gotta be for my Life to have meaning terms.] Long story short: Females Rule, and wiseguy Johnny is Freedom King for this moment Being.

Please help God.

We have to overhaul how all our national news Podcasts are assimilated through corporate nazi zionist censorship. Art Bell and George Norry are enemies to ALL american teen troops put in harms way to die as bad guy irrationally for the neocon God betrayers. Why? because they purposefully lie to have YOU die as innocent murder victim. Death to the bushite, death to God's enemies.

Be a friend if not an enemy,
Your buddy,

King Johnny

-

How is a Zionist Jewish?, I, the King of the Jews Messiah ask my fellow brothers and sisters everywhere. How? FOUR million land mines in Lebanon a godly act is it? Jew only roads not Aparthied, nor stealing a Christian's Home I suppose..? How?

An Oath Every Soldier Swears To God With

/ / she told The Nation. "If I contribute to the Army's prosecution of Lieutenant Watada on speech-related charges, I will have colluded in suppression of speech. What could be more hostile to the ideas of a free press than that?" \ \

Again a Patriot Soldier whose only crime is that he refuses to commit a crime in Your name. Do something about it. You defend this Patriot American Citizen as if Your America depends upon it. The "Judge" who publicly forbids to hear Watada's freedom defense, an Oath every Soldier swears to God with, is a "Judge" who needs to be privately arrested for treason against YOURSELF. Support my call to demand our voices heard for Just causes, or go die silently to the grave prisonized in a military dictatorship your 'neighbor' will say quietly of, (under his bushite breath,) good riddance to caring where my pusher's overdue payment goes to??. who the kcuf are you?? ... Eiiiaaahh! Jesus kills bushite for breakfast.

- On yet another, praise be with US, Alex Jones News Podcast -

Bob Watada: "He did his own research, and he found that there was not only deception, but clearly lying by the commander.

Now if YOUR boss lied to you, and put YOU out on the line, so that you can get KILLED, what would you do?"

A Public Letter to the "American" Coast to Coast Radio Network:

1. We, as the People, demand you allow US, the human species to openly discuss the public evidence on who funded the terrorist acts of 911 according to the FBI. And full disclosure on the science of building Seven.

2. That the Iraq war never had, nor ever will have a justification.

3. Also, that mercury tainted vaccines are deadly stupid. Mercury is scientifically understood, without question, (no doubt) to be a neural-toxin

You must wake up to life's demand for you to defend our dying lives my friend. Please? Make the call, be a man to defend our women. Be a man to protect our children.

Support our call to be heard my brother.

That's all.

-

Iran prepares first nuke strike
http://www.menewsline.com/stories/2007/january/01_15_2.html

See?, demons exist!

More settlers videos: "We killed Jesus, we are proud of it!"
http://www.uruknet.de/?p=m30420&hd=&size=1&l=e

Remind the Son of Man to hunt them down for better good as we together are, why don't You see? I'm Your brother!

-

/ / State Department spokesman on 24 January, "that Iranian agents are involved in these networks and that they are working with individuals and groups in Iraq and are being sent there by the Iranian government." \ \

We all know Iran has been trying to help Iraqis openly, so then, what does such willful contempt for your life grant this 'spokesman'? Or, how about when Bush stated Iranians in Iraq deserved to be murdered? (Later, the demon re-worded himself in attempt to conceal HIS true evil identity.)

Remember the Bathists actually warred to kill and won against al-CIA-duh forces that were caught hiding in Kurdish territory. Killed "bin Laden"/bushite forces! Now, bushite tell US Sunni is in kahoots with Laden. (In otherwords, Kill

a cowardly enemy of Life bushite for America to defend Iraqis
as a godly act.) Death to the bushite, death to our enemies.

/ / Tariq Aziz, the Christian Iraqi Deputy Prime Minister
said in mid September that Baghdad had provided assistance
[to kill bushite "al-qaeda"]\ \

-

Why Can't Americans See It?

http://www.lewrockwell.com/roberts/roberts193.html

-

The Latest Hoax : The real origin of `Iranian' produced IED
http://www.cloakanddagger.de/CLOAKANDDAGGER.DE_TOM%20HENEGHAN/cloak_BB_nov14.htm

-

Light and Shadow

We need to publicly devise some real-world strategies to defeat
the ungodly enemy, the bushite neocon zionist traitors to Life.

-

Great words from the lawyer of the thieving bushite child killers of
Haditha

/ / "There were Harriers dropping 500lb bombs on buildings.
If they're dropping 500lb bombs without knocking on the door
first, how can you argue the troops on the ground did anything
wrong?" \ \

5000lbs of radio-active toxic waste that will murder for years
more like, while after, then striking again to get the god
helpers and screaming children, then even, as in Fallujah,
going house to house to murder every one, young and old as the
truly Satanic. Just obeying lawless orders to thieve from
Humanity as bushite for neocon zionist traitors of G-D doesn't
fly in the big book. When anyone kills a bushite, all
humanity benefits truly from the defense. You defend a real
suffering God by ending a soulless bushite threat against our
species.

Bill Sattler.

-

http://www.informationliberation.com/?id=19646

/ / to think that these could have been just dumb ideas or
incompetence. \ \

Bushite TRAITORS got rid of the ORHA plan.

-

Exit strategy to save the lives of dying Americans:

War bushite LIAR zionist repuglicons who did God wrong on 911

War bushite who LIE to American Sons and Daughters to not hunt
those who stole billions with ear-marks, Social Security,
no-bid contracts, Iraqi oil, ect.

War those who stole the Iraq Development Fund, and the
emergency monies left to save the lives of our dying children

War bushite who feed soldiers radio-active toxic waste as harmless

War bushite who support torturing the innocent to death

War bushite who sing about the joys of murdering Iraqi children

War bushite who beat to death barefoot Iraqi children

War bushite who jokingly beat lamed dogs for fun

War bushite who claim they are lawlessly un-accountable as liars.

War bushite in the air force who target bombing innocent People
like in Fallujah or Somalia with land mines and mini nukes

The godless as lawless bushite is the enemy to America, kill
it proudly for freedom, as an undying love for a real God and
Humanity.

-

/ / she told The Nation. "If I contribute to the Army's
prosecution of Lieutenant Watada on speech-related charges, I
will have colluded in suppression of speech. What could be
more hostile to the ideas of a free press than that?" \ \

Again, a Patriot Soldier whos only crime is that he refuses
to commit a crime in Your name. Do something about it.

Real Americans are those of US as humanity that believe
in liberty as Justice for all. Demon bushite nazi
whores, don't like those principles of freedom through
evidentiary findings though, for their false deity,
George W. bush Jr, wouldn't be stealing from the honest
hard working blokes who live for a better day that way.

/ / Four US oil companies, namely Conoco, Chevron, Amoco and
Philips have concessions in nearly two thirds of Somalia.
This quartet of oil conglomerates was granted these contracts
in the final days of Somalia's deposed dictator, Siad Barre.
The US first military engagement in Somalia was fully
supported by Conoco. \ \

In the new world, these soulless bomber bushite of the air force, responsible for blatant first degree acts of murder against the innocent, would be hunted down by Humans, tried, then executed gloriously in the defense of our living justly.

-

/ / Al-Maliki has promised he will no longer block action against the Mahdi Army militia \ \

So, is the block head saying American soldiers so far have died for lawless tyranny? Kill a bushite, to protect the lives of us as innocent victims in other words, right?

-

How Bush misled the world

http://www.theage.com.au/handheld/articles/2004/02/05/1075853996640.html

/ / Once the document was declassified after the war it became known that it contained 40 caveats - including 15 uses of "probably", all of which had been removed from the previously published version. Tenet further ingratiated himself by remaining silent about the OSP. "That's totally unacceptable for a CIA director," said Thielman. \ \

Thielman meant "totally unacceptable" as in HIGH TREASON. Could it be any higher? Deliberately caught misleading whore-dumb Congress to wage his immoral neocon 'escape' with a unjustified criminal brutality against God as all of our Humanity. A great deal more than a million innocent people have been victims to the 'targeted' Zionist killings of the irrational bushite enemy. Lawless enemies to Creation, spreading their toxic waste who thieve, rape and murder without reprimand from corporate news america, shall, I pray daily, die justly in vengeances by the will of a real undying Love for our victimized innocent family. Justice for Humanity.

Please, help US.

Let US demand open radio communications on the mathimatical facts to save our own selves further victimhood to their personal contempt for the true value of YOUR life. Thanks.

Can you help us speak this outrage to your local media outlets?

thanks again bud.

AFFIDAVIT

AFFIDAVIT OF JOHNNY WIZARD

I, Johnny Wizard, in the city of Winnipeg, Province of Manitoba
MAKE OATH AND SAY:

1.

Pakistani ISI Director General Ahmad orders an aide to wire transfer about $100,000 to hijacker Atta. Ahmad later resigns after the transfer is disclosed in India and confirmed by the FBI. [Dawn, 10/8/01, Times of India, 10/9/01, Wall Street Journal, 10/10/01, AFP, 10/10/01]

2.

On March 3, 2002, MSNBC's Jim Miklaszewski reported that he had received anonymously, top secret presidential war strategy documents dated September 9th, 2001, originating from Condolezza's office, outlining a strategy to invade Afghanistan premised on blaming bin Laden a terrorist, but providing no evidence

3.

RTI News - US rejects Taliban bin Laden evidence calls
21 September 2001 17:41

The White House has rejected requests from Afghanistan's ruling Taliban for proof that Osama bin Laden was responsible for last week's attacks.

The US Government said there would be no negotiations.

4.

[This following document was the official damning account]

Responsibility for the terrorist atrocities in the United States
4 October 2001
http://www.pm.gov.uk/output/page3554.asp

[This Internet Domain is Britain's Prime Minister's]

"This document does not purport to provide a prosecutable case against Usama Bin Laden in a court of law."

The document doesn't hold ANY case, as that was the strategy.... See?

5.

Investigating the Investigation

http://www.alternet.org/story.html?StoryID=17816

After playing a tape of Cheney's statement, Russert asked Daschle, "Did the vice president call you and urge you not to investigate the events of Sept. 11?" Daschle flatly contradicted Cheney: "Yes, he did, Tim,"

6.

ABCNEWS.com : FBI Called off Terror Investigations
http://abcnews.go.com/sections/primetime/DailyNews/FBI_whistleblowers021219.html

Two veteran FBI investigators say they were ordered to stop investigations into a suspected terror cell linked to Osama bin Laden's al Qaeda network and the Sept. 11 attacks...

`You Will Not Open Criminal Investigations'

7.

October 9 2001 - The Times of India

"While the Pakistani Inter Services Public Relations claimed

that former ISI [the "Pakistani CIA"] director-general Lt-Gen Mahmud Ahmad sought retirement after being superseded on Monday, the truth is more shocking.

8.

No evidence was brought against Laden for nine eleven, none. [So according to Bush's official top secret Presidential directives] While Laden himself claimed he played no part in 911. Still, to save the lives of third worlders on the brink of starvation,

9.

former FBI deputy director and murder victim John O'Neill

"the main obstacles to investigating Islamic terrorism were

U.S. oil corporate interests and the role played by Saudi Arabia."

10.

Alex Jones interviewing Former German Defense Minister Andreas Von Buelow

"Bush signed W199I months before 911 ordering the FBI not to stop Al-Qaeda. They threatened to arrest FBI agent Robert Wright if he tells us what he knows."

11.

Mr. Bush was quoted somewhere regarding Mr. Laden's guilt of complete innocence with "We don't need any evidence, we know he's guilty."

12.

www.govexec.com/column/forwardTodaysColumn.cfm?sectionID=14

" [FBI's] Edmonds concluded that documents clearly showed that the Sept. 11 hijackers were in the country and plotting to use airplanes as missiles. She said documents also included information relating to their financial activities. "

13.

The honorable Argentinean oil company Bridas' relationship can not be understated as the Bush Administration's primary motive on criminal invasion of Afghanistan to save his biggest corporate backers, the American pension thieving Enron.

[snpd]

33.

Blix nor Elbaradei, nor Kofi, suggested, implied, or stated, that Iraq had failed to comply with the newest U.N. resolution: 1441.

HANS BLIX: "And at this juncture, we are able to perform professional no-notice inspections all over Iraq and to increase aerial surveillance..."

With complete, one hundred percent access to go where ever the Bush Administration pleased without delay, left a situation of an unjust war only detrimental to an ability to bring about any good or better thing. American soldiers are being sacrificed for no better good or reason understood, for if progress will ever be made, it will be when they work to bring about a political situation that was there in Iraq before the Bush Administration starting murdering innocent people for nothing . Well, not completely, for Bremer shipped 19 billion to Greenspan early on, then, hundreds of millions were sent back.

34.

Professor Steven E. Jones, a tenured BYU professor, went public several weeks ago after releasing a 19 page academic paper, essentially showing how the laws of physics do not support the WTC's freefall[...]

35.

"To be truthful about it, there was no way we could have got the public consent to have suddenly launched a campaign on Afghanistan but for what happened on September 11..."

Tony Blair Speaking To House of Commons Liaison Committee

36.

The Washington Post, 23 September 2001.

At American urging, Ahmed traveled ... to Kandahar,
Afghanistan.

For One and All,
.
For those who are Interested in any of these Ditial Radio
Broadcasting and Radio reception Systems :
* IBOC "HD" AM/FM Radio
* Digital Radio Mondiale (DRM) Shortwave Broadcasting
* Digital Audio Broadcasting (DAB) Radio Eureka-147 System
Here are some Groups where you Post may be Welcome :
.
There is a Google "HD Radio" Newsgroup to Post your
IBOC "HD" AM/FM Radio Questions and Answers
HD RADIO => http://groups.google.com/group/hd-radio
-But- There Is No There - There !
.
Also YAHOO ! - Has a few IBOC "HD" Radio Groups :
.
* HDRadio : FM "HD" Radio Information Page
http://tech.groups.yahoo.com/group/HDRadio/
One of the largest and most active HD Radio Groups
with 53 Members and about 2 Posts per Week.
The Focus of this Yahoo Group is FM "HD" Radio
.
* HD-Radio : HD Radio
http://groups.yahoo.com/group/HD-Radio/
One of the largest and most active HD Radio Groups
with 47 Members and about 2 Posts per Week.
.
* drm_iboc_hdradio : DRM and HD Radio Forum
http://groups.yahoo.com/group/drm_iboc_hdradio/
.
* HighDefinationRadio : High Defination Radio
http://groups.yahoo.com/group/HighDefinationRadio/

> about in this case.

Excuse me?

I serviced electronic equipment throughout high school and long after. Most of the general statements I made are correct.

Disputing the plausibility of a claim has nothing to do with whether I know what I'm talking about. I would rather be wrong because I was applying common sense, than be right because I blindly believed what someone else claims.

Radios tend to be designed as cheaply as possible. That means using as many common circuits as possible, and avoiding "unnecessary" components (such as switches to disabled "unused" circuitry). Radios such as the P-970 and Superadio are the exceptions, not the rule.

Was I not clear enough for you?

We were talking about Superadios. They are obviously something you know little or nothing about. Hence the quote: "And you're right about William not knowing what he's talking about in this case."

But comrade... COMRADE!...

"... it includes RDS technology to display station name, call sign,
song title or other transmitted information..."

What WOULDN'T you pay for that???

"...plus it can set the clock automatically."

Top that magic! Other clock radios require you to adjust the minute
value every 3 months or so. (And the hour value TWICE a year!)

And, when you consider it's FM stereo to 2 speakers -- that appear to
be a full 6 inches apart -- you got to hand it to the guys at Sangean!

[Note to original poster: No offense, but for $100, I think this is a
lousy value. You can get as much for less; or a lot more for a little
more. Although Universal's including the FM Atlas does sweeten the
deal.]

HD doesn't sound (so far) like anything I'd be interested in . .

Maybe a Shirt Pocket sized AM / FM Short Wave Radio with SSB
capacity..

100 feet of random wire for an antenna

and a good quiet listening post..

- But Not HD..

Thanks for the info;

For short Wave, I have several home made random wire antennas made of
" Rat Shack" stranded wire;

alligator clipped on both ends..

the 30 footer is quite good;

I guess I could actually just use a slinky . .

.

Last weekend, I was Way out in " The Woods" at a hiking camp.

in an environment like that, with No interference; you can pick up all
kinds of signals on a 10 foot random wire

Found some French sounding station playing folk songs;

& fell asleep

Nice Hobby . .

Hey, that is the same kind of nonsense that has to be done with crappy
HD radios !

2178. HD/IBOC Boosters Remain Clueless !

Newsgroup: rec.radio.shortwave
Date: 2007-08-29 01:03:50 UTC
From: IBOCcrock <ibocisacrock@yahoo.com>
Message-ID: <1188349430.786492.253510@22g2000hsm.googlegroups.com>
Source record: 121960

"HD Radio Adoption Lags...but Why?"

"As a number of recent articles in trade literature have pointed out, adoption rates for HD Radio lag behind most research projections, and are a continuing disappointment to broadcast groups that have made substantial financial commitments to digital plant conversion and new programming in an era where operating margins are notoriously tight."

"Speculation regarding why this is so abounds. Some blame the ponderous gestation period of the current IBOC standard, others blame new media technology and ubiquitous misappropriation of intellectual property (translation: illegal music downloading). Still others point at the trend towards consumers 'pulling' media on a highly individualized basis. Indeed, a litany of explanations indicate that an apparent public indifference to HD Radio can't be attributed to any single factor."

"But as debate about what's preventing consumers from embracing HD Radio swirls inside industry circles, research trends provide a few theoretically grounded clues about the nature of the problem. Here's what we know: Adoption rates are significantly behind prior projections. A recent press release by Bridge Ratings indicates the firm has made a downward adjustment to its predicted trend line on HD Radio adoptions issued just one year ago. And Bridge is not alone. According to an article on e-Marketer.com, Kagen research predicted in 2005 that HD Radio would be generating about 4 percent of radio's revenue by the end of this year. At this point it's questionable we've even reached the break-even point."

"And it's not a cart before the horse scenario. Station conversion totals are now well into four digits and a large majority of radio listeners have at least a few HD signals available in their markets. Bridge Ratings highlighted one disturbing finding in their most recent survey that gives a solid clue. Although a higher percentage of consumers report an awareness of HD Radio technology, fewer of them on a percentage basis find the technology compelling enough to warrant a receiver purchase."

"For those who have never read Everett Rogers' Diffusion of Innovations, it may be time for a trip to the library. This impressive work established the now-familiar categories of adopters so widely referenced today. Besides assigning adopter characteristics, Rogers also identifies key innovation attributes that bear directly on the speed of adoption. Leading that list is an attribute described as 'relative advantage,' and it's here that at least one disconnect for consumers seems to be suggested by the research."

"Consumers, thus far, do not see multicasting, or 'CD-like quality' as compelling reasons to invest significant effort and cash in this new technology. Sure, more channels are good, but why go out of one's way to get them if you don't really know what's on them? Okay, AM HD Radio sounds better...but who really cares if all your listening to is Rush, Sean and Jim Rome? Another important factor in determining adoption rates and penetration is what Rogers refers to as 'Diffusion Networks.' He and others have emphasized the importance of 'Opinion Leaders' and other interpersonal connections as pivotal in influencing the adoption decision process."

"Consider this: Satellite radio's penetration, though still lagging behind a number of previous projections, would be nowhere near its current levels had Mel Karmazan not successfully maneuvered Howard Stern into a contract with Sirius. Certainly, Howard's departure from terrestrial boosted the relative advantage of Sirius Satellite, but Howard is nothing if not a textbook definition of an opinion leader - at least among his millions of fans - and his cheerleading lead many of them to a purchase decision. Which leaves us to ponder what would happen to HD Radio sales if, say, Rush were suddenly shifted to multicast channels in most major markets, and he talked the move up for months before making it. Or, on a smaller scale, what if the industry began doing the same thing with popular morning shows? What if every prominent local radio personality was charged with convincing their audience that HD Radio is a worthy investment, and they said it like they actually meant it?"

"If this industry truly believes in an HD Radio advantage, we had best begin communicating it with our audience in a direct, unambiguous and personal way. It's pretty clear that 30-second promos with clever wordplays, audio special effects and mysterious references to 'channels in between' are simply not getting the job done. If our 'opinion leaders' aren't leading, who will?"

FM,
.
Antenna Switches - What's In Your Radio Shack ?
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/14553
.
I have used the Two and Four Position Alpha Delta Antenna
Switches for years and they have been trouble free.
http://www.universal-radio.com/catalog/switch/2415.html
.
I also like the Alpha Delta's because all the connections
are on one side (back) and you do not have to deal with
the Coax Cable running out the front and routing it around.
.
As a Shortwave Radio Listener (SWL) I have my Antenna Switches
right on the Deck Top next to the Radios and Easy-to-Reach.
.
More Antenna Switches to consider . . .
http://www.universal-radio.com/catalog/switch.html
.
.
hope this helps - iane ~ RHF

Hey hypocrite why is this one "off topic" and the Brokeback Bathroom post isn't?

I notice that you give your self and your asshole buddies a pass with OT posts but you become a newsgroup snoop when it involves those with whom you disagree.

Get a life!

2183. Kol Israel Summer 2007 - Oct 27, 2007 shortwave schedule

Newsgroup: rec.radio.shortwave
Date: 2007-08-29 02:04:53 UTC
From: "danr_18@yahoo.com" <danr_18@yahoo.com>
Message-ID: <1188353093.589944.308490@57g2000hsv.googlegroups.com>
Source record: 121965

Here is the July 29 2007 - Oct 2007 Israel Radio shortwave schedule.

ALL TIMES ARE LOCAL ISRAEL TIME - not utc

Hopefully it doesn't look like too much of a mess after it gets
posted.

There were quite a number of cutbacks. All that comes out of the
Reshet Hey (Israel Radio International) studio at this point is
Persian. The rest are relays of the domestic REKA network (besides
Reshet Bet of course.) Reshet Bet gained about an hour of shortwave
relay, since there were fewer foreign language broadcasts, yet they
didn't
cut shortwave transmissions at this point. As of now, this schedule
hasn't been posted on the IBA or israelradio.org websites.

Hebrew (Reshet Bet relay)
07:00-8:00 N.America/W.Europe 9,345
8:00-12:30 N.America/W.Europe 15,760
13:30-17:00 N.America/W.Europe 15,760

Well, at least he said please.

>And just by what authority do you have to demand anything?

Maybe the self proclaimed "Son of Man" should go to Irac and preform
the miracle of multiplying the Perrier and Poland Spring.

"Would you like to hear some Special Offers ?"

So now that you have taken Eduardo's place as the new, usless IBOC
shill are you now hauking useless, problematic, flawed HD radios for
iNiquity ? Eduardo gave up his shilling months ago - he too, knows HD
Radio is DOA:

I use a switch made by Diamond: http://www.rffun.com/catalog/switch/1636.html.

I like it. Very, very sturdy.

2208. Antennas for a WideBand {Scanner} Receiver

Newsgroup: rec.radio.shortwave
Date: 2007-08-29 11:37:01 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1188387421.416732.92140@q5g2000prf.googlegroups.com>
Source record: 121792

Robert,
.
Antennas for a WideBand {Scanner} Receiver
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/14557
.
Think of the Yaesu VR-5000 Wideband Receiver as a Scanner
http://www.universal-radio.com/catalog/widerxvr/0050.html
that happens to also cover the Shortwave Bands -but- It is
still by design a Primarily a Scanner and a Scanner type of
Antenna will get you the best Signal Levels for this Radio.
.
FWIW - Most of the time Larger and Longer Wire type Antennas
will most likely get you RF Signal Front-End Overload.
.
"THE KEY" to all of these WideBand and Scanner type Antennas
is to get them Up-in-the-Air and Out-of-the-Noise :
* 10 Foot above the Roof on a Metal Pole {Mast} that is
'grounded' is good.
* 20 Feet above the Ground and 20 or more Feet away from
the House is very good too. Use a 21 Foot long piece of
Top-Rail with a Ground Rod at it's Base.
.

The Idaho conservatives that he has courted with his anti-gay rhetoric for so long are dropping him like a hot potato. I would expect that his office is being inundated by emails right now, but most of them are calls for resignation and not gay pickups.

Those senators seem to have a free and swinging life up in the U.S. Capitol. First it's hustling pages and now we have a senator trolling for sex in a public bathroom stall. Anyone remember Senator Wilbur Mills and Fanny Foxe the stripper? Went for a dip in the Tial Basin in the nation's capitol.

2211. TV Band ?

Many radios for the US market has not only the AM and FM bands but
they also have the TV band.
Can anyone explain what is the TV band ?
Can you hear to television broadcasts in that band ?
If so, could it work in Italy too ?
Thanks

It's the audio portion of a TV broadcast. For me it would be useless
because TV audio is typically written to assume there are
acccompanying pictures. I suspect that most users of TV band audio
are office denizens looking to keep up on the afternoon soap operas.

Most of the TV band radios are VHF only channels. If you were lucky enough
to get one with UHF channels, you likely could hear your television audio in
Italy (assuming you still have analog audio to listen to). IIRC, Italy has
no VHF channels left on the air. A UHF model would receive audio from PAL
B/G channels above Ch. 21 (470 MHz)

The "TV audio" radios tune from 54 - 216 MHz, most of them seem to do it in two bands: Low Band (VHF Channels 2 - 6, 59 - 88 MHz) and High Band (VHF Channels 7 - 13, 175 - 216 MHz) and are designed to demodulate wideband FM audio. If you have narrowband FM communications within that frequency range you _might_ be able to hear them, but the audio level would be very low.

You can also take such a radio to Eastern Europe and listen to FM
stations on the OIRT band (65-72 mhz) or Japan and listen to their FM
stations (76-90 mhz).

The Japanese use 91-108 mhz for TV audio, insterestingly enough.

Surprisingly, not so.

There was a study done some 25 years ago, now, that specifically addressed the issue of whether pictures were actually needed for TV enjoyment.

The results were quite interesting. Of the TV shows up to that point which would have been early 80's, now, only two shows on television had ever REQUIRED picture to transmit the content, intent, and story (if any) of the show. One was 'Mission: Impossible.' The other was 'the prisoner.'

In virtually all other cases, the audio portion was all that was necessary. Even visual gag shows like Red Skelton worked with audio only. No surprise there...he had been successful on Radio also.

The study was roundly panned by the TV industry, for one. For obvious reasons. The study was also the source of some mirth among Radio wags. This is something radio listeners had known for decades.

Dramas, comedy, variety shows, mysteries. Even science fiction and westerns like Gunsmoke and Have Gun Will Travel had all been successful Radio shows. Have Gun Will Travel was unique in that it began on TV in 1957, and migrated to Radio for the conclusion of the story in which Paladin returned to Boston to collect an inheritance.

When the radio shows began to move to TV, the same writers were producing the scripts in the style to which they'd been accustomed: with emphasis on audio content. In other words, TV scripts were being written as for Radio.

With few exceptions, that style hasn't changed.

And even today, in very nearly all cases, the audio channel is the only thing needed to carry the program.

TV band radios make a good deal of sense.

Something we, as active Radio listeners today have continued to enjoy.

Ah yes, Red Skelton. Man, they don't make them like him anymore.

Generally, they cover 54 MHz - 88 MHz FM. This enables one to listen
to audio on channels 2-6 in the U.S., Canada, Mexico and possibly
others. From an old World Radio TV Handbook and from

http://en.wikipedia.org/wiki/Television_channel_frequencies

it looks like you should be able to get audio from Italian channels A,
B and C.

I always enjoyed Red Skelton's radio and tv shows and movies.His tv shows, he always ended them by saying, God Bless.
If I may throw in a www.devilfinder.com thingy? Biography Red Skelton

I own a few old radios which have tv audio channels.(now y'all know why I call it Radiio tb.(tb, Dennis the Menance, tb and Cowboy Bob)
Television is Radio with pictures.

Maybe the guy in Italy can buy a Sling Box www.slingbox.com and do something with that?

I want to buy a wireless speaker I can use with my tv set (RCA 27 inch screen CRT tv set) which is used with my WebTV.Reason is, so I can put the wireless speaker in the window of my front bedroom (the side window facing the side of the house next door to me and when them women are sitting around in their yard, I can pull up some internet Irish and Scotish music and and turn it up real loud let them give a listen.Do y'all know where I can find such a wireless speaker?

You have the option of running any number of SIP softphones on
Windows, and *nix and can use the free VoIP services of iptel.org
and even some free PSTN gateways that are out there.

You can also be your own service provider; I run Sip Express Router
on OpenBSD and for the PBX side of it, Asterisk on Linux (although
I would prefer BSD if FXS telephony hardware was supported).

"Ibiquity's "Gag Order" on engineers"

This was documented in another thread. I've encountered this before in my career. Usually - it was to protect some "golden boy" - maybe the boss's nephew or something. Anybody daring to demonstrate that golden boy was incompetant was ushered out the door in short order. Or - when golden boy inevitably goofed up - the one who pointed out his mistakes was deemed the one to blame.

Other times, a gag order is because there is a lot of money to be made - by somebody powerful. Everybody knows the project will fail, but they are told to keep quiet until somebody has cashed in their stock options and left. I have heard of cases where physical harm was implied to anybody who spoke out too soon.

HD radio has all the earmarks of the second scenario. Since there was a gag order - you can bet there are technical issues we haven't even heard about yet. Ibiquity - you can stick a fork in them, they are DONE. At some point, the people in the company with the most to gain financially are going to sell their stock and retire somewhere exotic, out of reach of US law. Their legacy? Broadcast bands in shambles, radio manufacturers with warehouses full of unsold HD radios, stations with an orphan system that is unsupported. Listeners with buzzing in their ears. But - it will have made a few people very rich. Shouldn't we all be happy about that?!

2227. Grayland, WA DXpedition MW Loggings; Antenna Comments & Recordings 8/25-26

Newsgroup: rec.radio.shortwave
Date: 2007-08-29 15:47:43 UTC
From: Guy Atkins <dxnospam@guyatkins.com>
Message-ID: <05ednQcYnsa9CEjbnZ2dnUVZ_ryqnZ2d@comcast.com>
Source record: 121811

Last weekend I joined my DXing buddy John Bryant at Grayland, WA for a DXpedition that was first and foremost an antenna testing session, but as it turned out the DX was definitely worthwhile for late August.

In his ever-prepared fashion, John had charted out in advance how the 700 foot Beverages and our Wellbrook Phased Arrays (prototypes) should be arranged on the property. It must have been a more impressive (annoying?) spectacle than usual, as I can't remember a time when more people asked us about the strange wires than during this DXpedition. One Beverage and Wellbrook array was oriented northwest (approx. 315 degrees) and another Beverage and array was aimed due West (270 degrees). Center-to-center spacing of the loops was 40m (~142 ft.), with their circumference at 60 feet (20 ft. per side, horizontal leg at 3 ft. above ground).

The nulls of the arrays are impressively stable, requiring only occasional (and slight) readjustment from top to bottom of the MW band for best performance. John and I did some daytime groundwave testing of Portland stations close in azimuth to the backside of the NW array, and observed nulls between 38-45 dB (as measured with the accurate dBm signal meter of John's g313e receiver). Stations that were approx. 20-30 degrees off-axis were generally 18-25 dB down when the phaser's "reversal" switch was flipped.

These relatively compact arrays are the first antennas I've encountered in 18 years of MW DXing that can compete with a Beverage! In nearly every DX situation, reception was equivalent to the 700 footers, and sometimes the arrays provided a bit improved splatter rejection, too. I'm looking forward to comparing the arrays to much longer Beverage antennas in September.

My DXing on this trip was with my Eton E1, and occasionally John's E1 for checking parallels. My SDR-1000 is on currently the garage workbench for some substantial mods.

I recorded the following two MP3 files to indicate the performance of the Wellbrook phased arrays. Each file starts out with 10 seconds of reception with the E1 and the Wellbrook array, followed by 10 seconds with the Beverage antenna, and then back to 10 seconds with the Wellbrook, etc.:

963 kHz: China Radio Intl. with their Russian language service:
http://www.guyatkins.com/files/8.25.07_CRI_963_Well_array_vs_bev.mp3

891 kHz 4TAB Innisfail, Australia with sports talk:
http://www.guyatkins.com/files/8.25.07_4TAB_891_Well_array_vs_bev.mp3

This file indicates the nulling ability of the Wellbrook array. It starts with 10 seconds of 963 kHz, China Radio Intl. in Russian on the Wellbrook with the beam switch in the NW direction, and then 10 seconds with the reversal switch engaged (nulled signal), and then 10 seconds with the switch in the forward direction again.
http://www.guyatkins.com/files/8.26.07_CRI_963_nulled_Well_array.mp3

General information on this Wellbrook antenna under development is found at:
http://www.wellbrook.uk.com/phasedarray.html

On to some loggings:

189 RUSSIA R. Rossi, Aug 26 1245 - Orchestral music, parallel to 279. Good level, and quieter on Wellbrook array. (Atkins-WA)

531 NEW ZEALAND 1XPI Auckland, Aug 26 1252 - Church service with choral singing in island language. 1XPI likely, on a local NZ Sunday evening. Poor-fair; probable. At 1300, 2PM Kempsey faded up co-channel, with 'Radio 531, 2PM' ID, equal level to 1XPI. Buzz from an nearby IBOC transmitter was a bit of a challenge while DXing 531 with the Eton E1. (Atkins-WA)

567 JAPAN JOIK Sapporo, Aug 26 1304 - Male and female announcers in Japanese, with world news items. Parallel to 594 JOAK. Fair signal. (Atkins-WA)

576 AUSTRALIA 2RN Sydney, Aug 26 1306 - Noted with jazz music and English announcer, parallel to 792 4RN. Good signal. (Atkins-WA)

594 AUSTRALIA 3WV Horsham, Aug 25 1335 - Man and woman announcer with interview of female C&W musician Elizabeth Cook. Discussion of her concerts, followed by her hit song 'Sometimes It Takes Balls to be a Woman.' Some QRM from JOAK Tokyo. Fair. Parallel to 612 4QR Brisbane at much stronger level. Best signal by far on NW Beverage (!), just past local SR. (Atkins-WA)

612 AUSTRALIA 4QR Brisbane, Aug 26 1312 - Strong signal of an interview or talk show discussing Solomon Islands politics. Parallel to 774 3LO Melourne. (Atkins-WA)

729 JAPAN JOCK NHK1 Nagoya, Aug 25 1144 - Female in Japanese talk; equal signal but slightly less splatter on Wellbrook array. Fair level. (Atkins-WA)

765 AUSTRALIA 2EC Bega, Aug 25 1214 - Tentative, with English language pop music, male and female announcers in English. Announcers sounded more Aussie than Kiwi. (Atkins-WA)

828 JAPAN JOBB Osaka, Aug 26 1210 - Male announcer in Japanese, parallel to 774. Fair on peaks, with unid. music station occasionally in background. (Atkins-WA)

873 JAPAN JOGB Kumamoto, Aug 26 1206 - Fair level with Japanese talk by male. (Atkins-WA)

891 AUSTRALIA 4TAB Innisfail, Aug 25 1227 - Man and woman announcers with sports discussion; at 1228: '4TAB, your sports radio in Innisfail.' Fair to good. (Atkins-WA)

927 AUSTRALIA 4CC Gladstone, Aug 26 1346 - Tentative. Female Aussie announcer in English, with pop variety tunes including Beatles. Fair signal, and then into the noise. (Atkins-WA)

936 AUSTRALIA 7ZR Hobart, Aug 26 1320 - Political discussion about Solomon Islands politics; choral music from Solomons choir. Fair on peaks, and parallel to 612 4QR Melbourne. (Atkins-WA)

963 CHINA CRI, Aug 25 1250 - Chinese orchestral music to fanfare and RR anmts and ID. Good level. (Atkins-WA)

981 AUSTRALIA 2NM Muswellbrook, Aug 25 1310 - Music of Abba's 'Dancing Queen,' Barry Manilow tune, and Billy Ray Cyrus' 'Achy Breaky Heart'. Into brief snippets of 50s/60s oldies tunes for promo, then 2 IDs as '2NM...music station.' Co-channel with CNR1 in Chinese. Fair to good. (Atkins-WA)

1134 JAPAN JOQR Tokyo, Aug 26 1345 - Radio drama in Japanese with silly adult and children's characters. Good level. (Atkins-WA)

1206 CHINA Yanbian RGD, Aug 26 1146 - Tentative. Man and woman in Korean; Yanbian shown in PAL as Korean in this time frame. Fair to good on peaks. (Atkins-WA)

1242 JAPAN JOLF Tokyo, Aug 26 1341 - Brief snippets of definite Japanese by man and woman announcers before fading into the jumble. Fair-good. (Atkins-WA)

1278 JAPAN JOFR Fukuoka, Aug 26 1140 - Female Japanese announcer, and EZL Japanese music at 1142. Poor signal; tentative. (Atkins-WA)

1287 JAPAN JOHR Sapporo, Aug 26 1125 - Man and woman in Japanese with poss. drama program. Japanese pop music at 1132. Good level during peaks. Hints of a Philipino in the background-- DZZH/DXRC?. (Atkins-WA)

1475 MALAYSIA RTM Kota Kinabalu, Aug 26 1328 - Pop music to female announcer in poss. Malay; back to pop music 1332. Poor-fair signal. (Atkins-WA)

1566 SOUTH KOREA HLAZ Cheju, Aug 25-26 - present at moderate levels both mornings, but never really outstanding as is often the case during winter months. (Atkins-WA)

1575 THAILAND VOA, Aug 25-26 - heard both mornings at a fair level. (Atkins-WA)

Guy Atkins
Puyallup, WA USA
DXing at Grayland, WA
Eton E1 receiver
Wellbrook phased array antennas W & NW (prototypes)
W and NW 700 ft. Beverage antennas

Well, here are the "other" technical issues:

HD/IBOC Spectral-Regrowth and Other Issues

"NPR story on HD radio startup"

"Problems with the system that pervade the entire HD/IBOC data and
codec from beginning to end, all the way to the signal on the air
persist. The codec, by today's standards, is grossly inferior on FM
and literally unspeakable on AM (gee, I had no idea). Since they're
hardwired into the receivers, they won't be changed anytime soon, if
ever."

"But it goes beyond that. There were bad choices of network layer such
that reliability is compromised. The code used in exciters has a
severe memory leak, so the exciters crash routinely. The receivers can
be locked up solid by malformed packets, requiring a power cycle to

restore operation. The list goes on and on and on."

"Will any of this get fixed? Probably not, since all the money right now is going to promotion, not to technical bug fixes. This is a system that has been in development for a decade and a half, and it still has problems from beginning to end that range from audio encoding, through the transport layers, to the encoding, and now, with the spectral regrowth problems, to the broadcast bands themselves; you know...that which is supposed to be serving the public. I would love to be implementing digital radio. But this is garbage."

I had major Vonage problems;

- so I emailed them constantly, pissed & moaned & called their service
shoddy and their support unacceptable
and
said it was a company , designed solely to make a few top people
Obscenely Rich
and
said I WOULD NOT recommend their FUKCING GDDOAMM service to ANYONE !
and
EVENTUALLY

they started answering my calls after 1 - 2 rings..

and they shipped me a new router (rebuilt)

and (so far) it works.. OK . . .

Cheap; and at a price..

I should also have mentioned IP telephones and SIP ATAs (analog phone adapters, e.g. Grandstream) -- many low cost examples are for sale on eBay. I recommend IP phones made by Teliann.

Interesting. I get the impression that kids are not interested in
sound quality and considered those that are as geeks. So quality is
not a selling point.

From all I've read IBOC is a suits led bundle of rubbish!

Charlie.

Mr Weiner,

It would insult a rat
if you asked it to live
in your cesspool
of a radio station.
It is full of mouse crap and porcipine dung.
And the shit you broadcast
Is not much better.

Sincerely,

Rev. Right

Well, certainly someone like Red Skelton, or possibly Gunsmoke would certainly be listenable. Most of the modern shows rely a lot on visual tricks to make them interesting and the listener would be in for a very flat and ultimately boring experience while trying to figure out what was happening on CSI-like crime programs, most of the dopey sitcoms, Discovery and Nature programs, etc. Imagine listening to only the audio feed for the Antiques Roadshow. Today's programming relies much more on visual imagery to provide detail to situations.

And those old Ma and Pa Kettle on the Farm movies.Tune in your local area radio programs nowadays and what do you get?

Many years ago, (in my opinion) those old radio programs were much better.
I listened to Stella Dallas (and become to like those Stella Dallas radio programs) when I was a kid because my mom used to tune in Stella Dallas.

Research disagrees with you.

As should your own experience. Remember there are a lot of visual cues in audio media. Radio dramas written for radio contain the same audible visual cues as drama written for TV.

Listen carefully to the dialog. There's a great deal of verbal exposition, even, if not especially, in shows like CSI. And surveys support that respondents get the same level of detail and understanding by listening to the audio only that they do watching video with audio.

The writing is still the same as it was in the days of Inner Sanctum and the Shadow. The production still uses the same effects.

Consider the number of blind people that 'watch' TV regularly. Jose Feliciano went into exquisite detail on Letterman some years ago about this.

Try this:

Next time you're watching CSI, turn the audio up, go into the next room and begin a hobby. Build a model. Repair a radio.

You'll see everything on the screen. Except you'll see it in your mind's eye, where the images are dramatically clearer and always exactly what you expect them to be. It will take some practice, and it will take a while, but you'll get it.

Just as generations of radio listeners did before you.

I have 5 receivers now and a bunch of Daiwa switches to let me put any
radio on any antenna. There are six antennas:

A Discone (Backup in case my better antennas have problems)
A Windom Dipole outside.

An Alpha Delta Short sloper outside. (It's old and is being replaced soon with a Slinky)
A Longwire in the attic above the radio room (pretty short)
A really big dipole that is zigzagged from one end of the house to another.
A home brewed active antenna in the attic above the garage. Better than most of the actives I've had, but still kind of noisy.

BDK

DPM,

This is why I say using the HD-2 Audio Channel of the
IBCO FM Radio Stations would be one of the most
effective uses of "HD" Radio. The TV Program Audio
is already there and it extends the 'Listening' Audience
particularly while they are Driving to and from work in
their Cars. ~ RHF

Roadie,

What you have to remember is that many of the early
TV Programs were in-fact Radio Programs first; and
the spoken word and sound effects were a great part
of early TV.

BAD,

But everyone has an AM/FM Radio or two and having
the TV Audio on an "HD" FM Radio Station's HD-2
Co-Channel would put TV Audio into every Car and
Truck. Plus it solves the VHF or UHF only limit.

>
> On to some loggings:
>
> 189 RUSSIA R. Rossi, Aug 26 1245 - Orchestral music, parallel to 279. Good
> level, and quieter on Wellbrook array. (Atkins-WA)
>
> 531 NEW ZEALAND 1XPI Auckland, Aug 26 1252 - Church service with choral
> singing in island language. 1XPI likely, on a local NZ Sunday evening.
> Poor-fair; probable. At 1300, 2PM Kempsey faded up co-channel, with 'Radio
> 531, 2PM' ID, equal level to 1XPI. Buzz from an nearby IBOC transmitter was
> a bit of a challenge while DXing 531 with the Eton E1. (Atkins-WA)
>
> 567 JAPAN JOIK Sapporo, Aug 26 1304 - Male and female announcers in
> Japanese, with world news items. Parallel to 594 JOAK. Fair signal.
> (Atkins-WA)
>
> 576 AUSTRALIA 2RN Sydney, Aug 26 1306 - Noted with jazz music and English
> announcer, parallel to 792 4RN. Good signal. (Atkins-WA)
>
> 594 AUSTRALIA 3WV Horsham, Aug 25 1335 - Man and woman announcer with
> interview of female C&W musician Elizabeth Cook. Discussion of her concerts,
> followed by her hit song 'Sometimes It Takes Balls to be a Woman.' Some QRM
> from JOAK Tokyo. Fair. Parallel to 612 4QR Brisbane at much stronger level.
> Best signal by far on NW Beverage (!), just past local SR. (Atkins-WA)
>
> 612 AUSTRALIA 4QR Brisbane, Aug 26 1312 - Strong signal of an interview or
> talk show discussing Solomon Islands politics. Parallel to 774 3LO Melourne.
> (Atkins-WA)
>
> 729 JAPAN JOCK NHK1 Nagoya, Aug 25 1144 - Female in Japanese talk; equal
> signal but slightly less splatter on Wellbrook array. Fair level.
> (Atkins-WA)
>
> 765 AUSTRALIA 2EC Bega, Aug 25 1214 - Tentative, with English language pop
> music, male and female announcers in English. Announcers sounded more Aussie
> than Kiwi. (Atkins-WA)
>
> 828 JAPAN JOBB Osaka, Aug 26 1210 - Male announcer in Japanese, parallel to

> 774. Fair on peaks, with unid. music station occasionally in background.
> (Atkins-WA)
>
> 873 JAPAN JOGB Kumamoto, Aug 26 1206 - Fair level with Japanese talk by
> male. (Atkins-WA)
>
> 891 AUSTRALIA 4TAB Innisfail, Aug 25 1227 - Man and woman announcers with
> sports discussion; at 1228: '4TAB, your sports radio in Innisfail.' Fair to
> good. (Atkins-WA)
>
> 927 AUSTRALIA 4CC Gladstone, Aug 26 1346 - Tentative. Female Aussie
> announcer in English, with pop variety tunes including Beatles. Fair signal,
> and then into the noise. (Atkins-WA)
>
> 936 AUSTRALIA 7ZR Hobart, Aug 26 1320 - Political discussion about Solomon
> Islands politics; choral music from Solomons choir. Fair on peaks, and
> parallel to 612 4QR Melbourne. (Atkins-WA)
>
> 963 CHINA CRI, Aug 25 1250 - Chinese orchestral music to fanfare and RR
> anmts and ID. Good level. (Atkins-WA)
>
> 981 AUSTRALIA 2NM Muswellbrook, Aug 25 1310 - Music of Abba's 'Dancing
> Queen,' Barry Manilow tune, and Billy Ray Cyrus' 'Achy Breaky Heart'. Into
> brief snippets of 50s/60s oldies tunes for promo, then 2 IDs as '2NM...music
> station.' Co-channel with CNR1 in Chinese. Fair to good. (Atkins-WA)
>
> 1134 JAPAN JOQR Tokyo, Aug 26 1345 - Radio drama in Japanese with silly
> adult and children's characters. Good level. (Atkins-WA)
>
> 1206 CHINA Yanbian RGD, Aug 26 1146 - Tentative. Man and woman in Korean;
> Yanbian shown in PAL as Korean in this time frame. Fair to good on peaks.
> (Atkins-WA)
>
> 1242 JAPAN JOLF Tokyo, Aug 26 1341 - Brief snippets of definite Japanese by
> man and woman announcers before fading into the jumble. Fair-good.
> (Atkins-WA)
>
> 1278 JAPAN JOFR Fukuoka, Aug 26 1140 - Female Japanese announcer, and EZL
> Japanese music at 1142. Poor signal; tentative. (Atkins-WA)
>
> 1287 JAPAN JOHR Sapporo, Aug 26 1125 - Man and woman in Japanese with poss.
> drama program. Japanese pop music at 1132. Good level during peaks. Hints of
> a Philipino in the background-- DZZH/DXRC?. (Atkins-WA)
>
> 1475 MALAYSIA RTM Kota Kinabalu, Aug 26 1328 - Pop music to female announcer
> in poss. Malay; back to pop music 1332. Poor-fair signal. (Atkins-WA)
>
> 1566 SOUTH KOREA HLAZ Cheju, Aug 25-26 - present at moderate levels both
> mornings, but never really outstanding as is often the case during winter
> months. (Atkins-WA)

>
> 1575 THAILAND VOA, Aug 25-26 - heard both mornings at a fair level.
> (Atkins-WA)

Guy Atkins,

As always a very nice DXpedition Report. :o)

But watch out some people are going to be upset that
you did it all on a 'portable' AM/FM Shortwave Radio
- - - The Key was the Location and the Antennas.

good dxing - enjoy your radios ~ RHF
.

OK, I have about 15 email accounts.

I am going to start sending 12 emails every hour or so that I am close to my office.

I will run their Maintenance Index out of site until they fix my stuff and send me a new router to my USA address.

Cut and paste, I'm going to run their butt raged.

Burr

Much rather have the used R8 if it was in good shape. Even better, spend a
bit more and get a new R75.

Michael

Well, I use RG-6 cable for my antennas (2) and use a Ratshack switch -
pushbutton, not as fancy or expensive as the AD or Diamond but it
works and is economical.

2278. Using the Whip {Telescopic} Antenna on a 'portable' AM/FM Shortwave Radio

Newsgroup: rec.radio.shortwave
Date: 2007-08-30 09:59:42 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1188467982.600622.115770@l22g2000prc.googlegroups.com>
Source record: 122011

For One and All,
.
Using the Whip {Telescopic} Antenna on a 'portable' AM/FM Shortwave
Radio.
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/14587
.
The Whip Antenna :
The 'fully extended' {Seven-Section} Whip Antenna on the
Redsun RP2100 Radio measures 44 Inches (112 cm) Tip-to-Base.
.
Shortwave Radio and the Whip Antenna :
Most of the time for Shortwave Radio Listening the Whip Antenna
should be 'fully extended'.
.
Tip - Ideally the Radio should be placed next to a Window so
you get the most RF Signal and least household RFI Noise.
.
FM Radio :
When only Six-of-the-Seven Sections of the Whip Antenna on the
Redsun RP2100 Radio are extended the Whip measures 36 Inches
(91.5 cm) Tip-to-Base. [Top Section Not Extended]
.
When only Five-of-the-Seven Sections of the Whip Antenna on the
Redsun RP2100 Radio are extended the Whip measures 32 5/8 Inches
(83 cm) Tip-to-Base. [Top Two Sections Not Extended]
.
When only Four-of-the-Seven Sections of the Whip Antenna on the
Redsun RP2100 Radio are extended the Whip measures 26 5/8 Inches
(67.5 cm) Tip-to-Base. [Top Three Sections Not Extended]
.
Tip - For FM Radio Reception a 1/4 WL Antenna is about 31.9" to
33.6". So when you extend 'only' Five-of-the-Seven Sections of
the Whip Antenna on the Redsun RP2100 Radio the Whip is 'about'
the Right Length for Optimum FM Radio Reception "In Theory".
.
YMMV - This is of course dependent on your location and that
location's relationship to the FM Radio Stations that your are
trying to Receive and Listen to.
.
Tip - Tilting the Whip Antenna and Rotating the Whip Antenna
all can help or hinder getting a better FM Radio Signal.
.
-Note- Usually 'tilting' the Whip Antenna and Rotating the

Whip Antenna has less effect on Shortwave Radio Reception
-but- Sometimes it can help to reduce some household RFI Noise.
.
-Again- Moving the Radio with the Whip Antenna 'fully extended'
closer-to or directly-in-front-of a Window seems to be the
best signal thing to do when Listening to Shortwave Radio
Off-the-Whip Antenna.
.
FWIW {IMHO} - These comments apply to most 'portable' AM/FM
Shortwave Radios when using their Whip Antennas.
.
.
know your whip -and- how to use it ;-} - iane ~ RHF {pomkia}

-
- Hi. The 2100 has a massive antenna.
-
- However, it seems to work best when it's not unfolded all the way.
-
- What have been your results, both with fm and sw?
-
- Let's assume we are talking about the built in antenna alone,
- without the use of an external antenna.

2280. 3-Sided "Bent" Random Wire Antenna Over a Backyard Fence

Newsgroup: rec.radio.shortwave
Date: 2007-08-30 11:16:55 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1188472615.427359.81860@x40g2000prg.googlegroups.com>
Source record: 122013

JS - Yes it will work. ~ RHF
.
3-Sided "Bent" Random Wire Antenna Over a Backyard Fence
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/14591
.
First most so-called 'Longwire' Antennas used by Shortwave
Listeners (SWLs) are in-fact "Random Wire" Antennas.
.
Your simplest thing is to just have the Wire Antenna Element
from One to Three Feet above the Chain-Link Fence.
.
The Wire Antenna Element will only run around 3-Sides
of the Fence and not form a Loop.
.
It will be what is called a "Bent" Random Wire Antenna.
.
At the starting Point of the Wire Antenna Element place
an 8-Foot Ground Rod in the Ground.
.
Mount a 9:1 Matching Transformer on or very near the
Ground Rod and Ground {connect} the 9:1 Matching
Transformer as directed.
.
Run the Wire Antenna Element straight-up from the 9:1
Matching Transformer to the First Antenna Support Point;
and then along to the Rest of the Antenna Support Points
along the Fence.
.
Tip - Use 8-10 Feet long pieces of PVC Pipe as the Antenna
Supports held in place with Black Plastic Ties is an Easy-Up.
- - - Before you put-up the PVC Pipe paint it Green
and use Green Antenna Wire.
(o: Tell the Neighbors it for Growing Grapes :o)
.
-IF- You want to use or need to use Higher Corner Support
Points for the Wire Antenna Element; that will work too.
.
Between the Radio and the 9:1 Matching Transformer
use a Coax Cable as the feed-in-line.
.
You now have your 3-Sided "Bent" Random Wire Antenna
mounted over a Fence going around 3-Sides of the Yard;
and it is a Horizontal Antenna too.
.

The "Bent" Random Wire Antenna for the most part
is an Omni-Directional Antenna that receives well
from all directions.
.

.
Remember that I'm a newbie! I have read that the direction
of a longwire antenna determines how effectively it will
receive radio waves from a certain direction,
i.e., a NS antenna is better at receiving signals from the EW.
.
I have also read that, if one cannot set up an outdoor antenna,
it makes sense to run a long wire in a room by configuring it
in a square, along the 4 walls.
.
That said, has anyone tried using a squared longwire antenna
along the perimeter of their yard?
.
I have a roughly 40' x 50' back yard with chain link fence
around three sides.
.
Would there be an advantage to string the longwire (suspended
with nylon rope some distance in) around three of the corners,
sort of like the top rope of a boxing ring?
.
That would give me about 120' of longwire oriented in two directions.
.

Regrettably, Their response is Mostly cut & paste stuff;

They are too overworked (or unskilled) to do much more than read off
a list.

If you hound them enough Eventually you get to Second Level support

The Cisco routers they use are kind of a shaky deal; with the Phone
ports easily ruined by static electricity;

suggest a good rugged phone line surge protector (if there IS such a
device)

Finally, Ross Archer works for Cisco & may have some hints on bullet
proofing these small fragile routers.

He's talking about the cable TV channel RFD.

And I believe RFD means Rural Free Delivery -- part of the postal
service, I think.

This sounds quite workable. As an alternative, and which might help avoid some RFI from the house, in place of the following:

On Aug 30, 4:16 am, RHF <rhf-newsgro...@pacbell.net> wrote:

>snips<

> along the Fence.

...and then...

> Between the Radio and the 9:1 Matching Transformer
> use a Coax Cable as the feed-in-line.

....Take the coax feedline itself and run it all the way up to the top of the first support, and connect your 9:1 transformer there, so that none of the exposed antenna element itself is vertical. You could use a non-grounding variety of transformer for this purpose, or you could have a longer ground wire up to your transformer. The best bet *for this circumstance* might be to use a non-grounding transformer, but have an extra grounding block for the coax at the point where it comes closest to the ground. This is a modicum more involved, and slightly more expensive (not excessively so), but again may be useful for minimizing RFI.

I emphasize that this step would be an additional experiment, and RHF's idea should work out just fine as is.

I had an FRG-100"B"for awhile, and its main problem IMO was that the
base response in the audio was strong, and the treble weak. This made
even clear stations sound quite muddy, and harder stations were nearly
impossible. An external speaker helped, but not much. There was a
tech fix for this, but I never attempted it.

Also the filters left a bit to be desired, especially when the audio
was already poor.

Otherwise, it was fairly nice receiver, easy to use, but as others have pointed out, no keypad. Changing Freqs was not hard, however. It was certainly sensitive and selective enough, and seemed to have no particular trouble with intermod products or overloading from strong local stations (with which I am plagued).

I have enjoyed the R75 much more, even though it has taken the Kiwa mods to bring it up to a reasonble par.

I have been sending emails all day/night from all my accounts. I just sent the FCC a note and a copy of my letter to Vonage with ticket numbers.

I don't want to get where I have two companies taking money out of the bank.

I'll move to a new company ASAP when this is over.

Research would appear to be beyond middle age, so research should
provide recent examples or conduct research projects that use current
television programs that typically use an extensive amount of visual
information. Research could then have a greater chance of making it's
research believable. Examples more current that Red Skelton would be
very helpful additions to a database of research into audio and visual
information.

>
> As should your own experience. Remember there are a lot of visual
> cues in audio media.

Visual information hasn't ever been transmitted or received by radio.
Radios transmit information in audio form that is heard by a listener
and interpreted. Televisions transmit both visual and audio
information that is seen and heard simultaneously the viewer and
interpreted. You appear to be mixing up the concepts of broadcast
audio and visual information. The pure listener may conjure up an
image of what could be going on, but the success or failure of that
imagery is dependent entirely on the ability of the reader at the
radio station to accurately convey audio information about the scene.

Yes, that is true the early television programs were in sense radio programs with audio added. And many of the actors had radio and vaudeville experience too. But modern television programs as a group incorporate a lot more visual information that requires you to see it to have an idea of what is going on. Take a look at all the visuals in CSI, Discovery Channel or something as simple as Antiques Roadshow. Absent that visual information you miss a lot of what is going on. Many but not all of the old I Love Lucy shows can be heard and enjoyed in entirety because the set is all but irrelevant. One

exception would be the scene where Lucy is valiantly trying to make chocolates on an assembly line. Absent the visual information the scene would lose all of it's humor.

> radio.

The Universal website states:

"We have carefully tested this radio here at Universal Radio. It is impressive. We feel it is an exceptional value, and certaintly (sic) one of the best medium wave DXing machines to come down the pike in a long time."

Now, one could argue that Universal is trying to sell radios - and one might be right. However, if true, it would seem strange for Universal to make this claim on an inexpensive radio when they could push much higher end rigs for this purpose. Also, I trust Universal's general level of practical expertise, and whent hey make this claim, I see no reason to doubt it.

Please reread your question. You asked what switches are in your shack. The R-5000 has a built-in antenna switch. What could be clearer.

Visual information has always been transmitted and received by radio.
Even before the pictures.

Actually, there is an entire division of audio sciences dedicated to
the study of visual images created by audio only.

Interpretation is a part of that, true. But not as much as you may
imagine. Do some reading. Even Harry Olson addresses this as far back as
the 40's. And studies have shown that there are visual cues in audio
information that are astonishingly common to the bulk of listeners.
Simple phase relationships in stereo will create images in listeners
minds, that when sketched by different individuals, in separate
locations in the stereo field, even in different locations of test, the
images drawn resemble each other.

All of which is getting deeper into this matter than is necessary for
the point...and that point is that aural input creates visual information.

The eyes are not necessary to see the pictures. The National
Federation of the Blind has been carrying this evangel for decades. And
in all but a handful of TV shows over the last 60 years, only the audio
was necessary to create the full measure of the experience of a show in
the listener.

Visual images are not in any way transmitted by radio. Only audio information is transmitted by radio. That audio information is interpreted by our brain and sometimes, if the radio broadcaster is successful in his description and we are alert some of that audio information is translated into visual images within our mind. But no visual images are transmitted by radio.

The mental translation of audio information into visual images can have results that are much less precise than a broadcast picture. Nonethless audio only broadcasts can certainly be entertaining.

Roadie,

Turn on any of the current "Reality TV" Programs
they are just as good when you Listen to them
"Sound Only" that includes Steinfeld and Everyboby
Loves Ramon the list goes on and on.

Remember listening to the Audio Only of Moives
on the CBC (RCI) late at night via the Shortwave.

i like what i hear on the radio and tv ~ RHF

> Visual images are not in any way transmitted by radio.

Ok, now we're speaking the same language. I never said images were
transmitted by radio, but rather visual cues in audio information.

Big difference. And, actually, the very point: the image is not
necessary to produce a visual experience.

And yes, this information IS transmitted in audio.

Boyle and Magner, in a 1966 double blind study, with a sample of 100
subjects, sketching images using only audio descriptions, sound effects
and music, got more than 40 images that were virtually the same, over 60
that resembled each other in three out of four tests. Subjects exposed
to the audio individually, and producing their sketches without
consultation with either the testers, or each other. Before or after the
tests.

The visual details were transmitted in the audio.

Bell Labs in studies during the 40's, using musical tones, chords and
short selections were able to create visual responses in subject who
actually reported the same colors and the same physical objects.

The visual details were transmitted in the audio.

Debussey created visual images, as did Moussorgsky, with nothing more
than music.

National Federation of the Blind has volumes of experiences, visually
realized, auditorially created in blind members who had sight, but lost
it during development. These members exposed to the same auditory
material report similar visuals, even describing characters in radio
plays with similar physical characteristics.

Visual details transmitted in audio.

Boyle and Magner's study exposed its subjects to several radio episodes of 'Gunsmoke' and sketches of Matt Dillon produced 30 similar images resembling William Conrad, who played the character. Nothing surprising, there. But sketches of the announcer for Rocky and Bullwinkle produced about 35 images of a thinner much more youthful man. That announcer was also William Conrad, 20 years later, but that detail was not known at the time, and wouldn't be for 10 more years.

Visual cues, visual information have always been transmitted by radio through the auditory experience. This has been known and studied since the early writings of Bell, himself. The very concept of stereo imaging is based on it. Radio sound effects men have careers because of it.

Images are not necessary to produce a visual experience. Literally, it is the stuff of which dreams are made.

And radios bearing TV audio are more than what's necessary to understand and enjoy in visual detail for all but a handful of TV shows on the air today. EVEN CSI.

As I suggested, try it. Develop that eye. You will be astonished at what is not necessary to enjoy television.

Thanks for the conversation. See you around. :)

Actually, Roy, visuals created though audio are much more precise
than broadcast. And more dramatically more easily replicated over time.

- - I use the built-in switch on the R-5000
- - Two is plenty

- Please reread your question.
- You asked what switches are in your shack.
- The R-5000 has a built-in antenna switch.
- What could be clearer.

Roadie,

Yes any Receiver with a 'built-in' Antenna Switch
can make things simpler and clean-up the Deck Top.
- - - You will have a "Nice Looking" Radio Shack.
.
But 'cleaner' is not necessarily a better Radio Shack that
is Set-Up for both "Safe" Operations and Non-Use Periods.
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/14607
.
Using an External Antenna Switch using a Short 3-5 Foot
of Coax Cable "Jumper" between the Switch and the
Receiver; allows for easier Removal of the Coax "Jumper"
from the Switch when you Disconnect the Coax : When
the Receiver is Not-in-Use -or- If the Antenna Switch has
a "Common" Not-Connect {Shorted} Postion like the
Alpha Delta Antenna Switches do :
http://www.universal-radio.com/catalog/switch/2415.html
Then It can Save the Time connecting and un-connecting
the Coax each time the Receiver is Used and Not-in-Use.
Plus the Alpha Delta Antenna Switches have a built-in
'surge protector' using a D-4 Arc-Plug Cartridge {GDT}.

One thing I forgot to add was that my neighbour was up on a job in Rockford, MI doing some heating and cooling work and he spied a nice aluminium flagpole that was being thrown away due to some storm damage at the base of it.

We cut off the bad part, (about 1 foot) and it's still 22' long. Now if I sink it 2-3' into the ground in a suitable piece of pipe I'll have a nice free-standing center support for the Eavesdropper.

More projects is just what I need!

That mod was a huge improvement. I did one, but I can't remember the procedure. I don't think it was hard to do.

>
> Also the filters left a bit to be desired, especially when the audio
> was already poor.

Yeah, the stock filters in every one of Yaesu's FRG's has been it's weak point. My 8800 was vastly improved with a filter swap. SSB was semi useless with the stock one. It was very poor for RTTY/FAX too, but nice with the new filter. I sold it soon after I bought my NRD-515, and the guy who bought it still has it. Other than locking up once in a while, it's been totally trouble free since I bought it in 1986.

>

> particular trouble with intermod products or overloading from strong
> local stations (with which I am plagued).

I used to have problems with a nearby country station that was coupling itself to the high tension wires that went past it, and pass across the street from me. Without any antenna connected, I had S9 signals and if I walked over to the radio, as soon as I moved my finger towards the SO-239 on it, the meter would slam over to the peg. Every receiver I had either had the country music twanging away, or a general hash from 5MHZ down. When the station finally, after at least a dozen calls from me alone, redid the grounding of their antennas, the signal level dropped way down, to the point it could just barely be heard without an antenna. Only took about 4 years to fix it. I had AMBC killers on every antenna and they helped, but didn't cure it.
>
> I have enjoyed the R75 much more, even though it has taken the Kiwa
> mods to bring it up to a reasonble par.

I got the KIWA "ultimate rejection" filter for my NRD-525, it was a great improvement for $25 bucks. I wasn't thrilled with the lousy double stick tape that came with it though. I had my own anyway.

It'll be strictly for the antenna once I get going on that part of the project. But if I finally decide I'm not happy with the Eavesdropper then I'll either come up with another antenna project or just use it for a flagpole.

Hi:

What is the highest radio frequency used for astronomy? Is it 3,438 GHz?

According to the link below, it is 3,438 GHz:

http://books.nap.edu/openbook.php?record_id=11719&page=11

Is 3,438 GHz the highest radio frequency used for astronomy?

Thanks,

Radium

Radium

As the article suggests, higher frequencies are considered as being in the infra red wavelengths of light, so 3,438 GHz can be considered to be at the upper limits of radio frequency astronomy.

Visible light, ultra violet light, x-rays and gamma rays are all electromagnetic waves at higher frequencies and are also used for astronomy observations and experiments. Satellites are generally used to observe in the ultra violet, x-ray and gamma ray spectrums as these wave lengths are largely absorbed by the earth's atmosphere.

Remember, there are no strict cut off frequencies where one type of electromagnetic wave becomes another type. Radio merges into infra red which merges into visible light, ultra violet, x-rays and so on. Any limits are purely arbitary ones applied by humans in order to categorise the way in which electromagnetic waves of a certain frequency can be expected to behave.

Look at a colour palette. It is easy to pick out the primary colours. Everyone who isn't colour blind can pick out red, blue, green, yellow etc. But where do you draw the line to decide where red becomes green, blue or yellow? The colours slowly merge from one to another just as the characteristics of radio waves change as frequency increases.

> necessary to produce a visual experience.

You are still missing the point. Clearly it is possible to transmit audio information that allows the recipient to construct mental images. The correctness of that conjured image is clearly dependent on both the ability of the sender to provide sufficient information and for the recipient to have a base of other knowlege sufficient to interpret and use that information.

Many newer television shows are heavily dependent on visual imagery viewed through the eyes to tell a story. The pretty crime technician working in the lab is holding a variety of pieces of evidence, performing lots of tests and most of it goes without an accompanying audio description. When the cops and bad guys are in a chase there is little descriptive information to allow the listener to paint an accurate picture of what is really going on. Imagine Star Wars minus the visuals. On the Antiques Roadshow the appraiser from Sloans may go on and on about condition and finish of the 17th century Highboy. But if I've never seen a highboy it could be a lot of things unless the appaiser takes the time to say it is a, exceptionally tall chest of drawers. Since that information is self evident from the excellent videos it likely will not be stated and as a listener I could be thinking it is all manner of things. If the Nature Channel begins talking about the Grebe that has popped into view I could think it was a local native if nobody says it is a small diving bird. A simple video shot fixes that.

I agree that sufficient audio information correctly presented to someone with a reasonably active imagination will likely result in the creation of some very entertaining and possibly correct mental images

of the scene at hand. But if Hoss is talking about entering a
mountain cabin for some grub and I've never seen a cabin before it
could be interpreted a lot of ways. A simple picture of the low
celinged pine log cabin clears it all up.

>
> And yes, this information IS transmitted in audio.

No, visual information is NOT transmitted in audio. Audio or spoken
information is transmitted by a radio. The human mind may then
translate some of that information to a visual image that may or may
not correspond closely to the object being described. The speaker may
hope that his description results in the listener putting the pieces
together and conjuring up a correct image but that is only hope. A
transmitted visual image via television will likely result in far more
individuals correctly perceiving that I am talking about a small
diving bird when I mention a Grebe.

That's very much a matter of convention. It all depends what you choose to call "radio frequency" and what you choose to call something else.

As the article you cite points out, the measurements at 3438 GHz (3.438 THz) blur the lines between microwave measurements (which many would call "radio") and far-infrared measurements (which may would not call "radio frequency").

One source I see gives a frequency of 3.0 THz as the boundary between "microwave" and "infrared". That boundary point is, I believe, entirely one of human convention - there's no magical change in the behavior of the signals as you cross from one side of this frequency to the other.

If you choose to treat the conventional boundary point of 3.0 THz as being significant for the purpose of your question, then one would have to say that the 3,438 GHz measurements you refer to are *not* "radio frequency" measurements, but rather "far-infrared" measurements.

I am curious here. At some point you have to switch from metallic conductors
and antennas to lenses and other optics. Any idea what the highest frequency
RF amplifier works at?

It's all subject to state-of-the-art. 50 years ago 300 MHz. was complex to work with and 10 GHz. was considered way out there. Today 300 MHz is about as simple as DC and 10 GHz. is fairly straightforward to work with.

I imagine that in another 50 years or less, Integrated hybrid circuits for 3 THz. will be on the shelf items for experimenters to play with.

Dunno about an RF amplifier per se.

I do know that there have been some very interesting experiments with
nanotechnology, over the past couple of years, in which tiny carbon
nanotubes have been used as optical-frequency antennas.

http://www.nanowerk.com/spotlight/spotid=1442.php has a brief writeup
on one such.

I have even seen optics and electronics combined in an experimental
Road radar for car control from Philips, radar output was a very small
horn antenna connected to a wave guide, and in front of that they used a
plexyglass condensor lens to make a narrow beam, like you do with light.
Apparently those mm waves liked that plastic lens just fine.

I figured there was a catch. The receivers are factory refurbished.
They come with the sticker on them. Still a good price.
Fry's did not say anything about refurbished.
I saw a couple refurbished at amazon.com for about $57.00 I believe.

It's also possible to use photonic crystals and quasicrystals to
refract and band-process electromagnetic energy across a very wide
range of frequencies... all the way from radio, through microwave,
through far infrared, and into the optical spectrum.

In fact, that would work fine at 10GHz, at 1GHz, and even at 1MHz, though the amount of material you'd have to use for the lens gets prohibitive at lower frequencies. It's all engineering tradeoffs. I know that "geodesic" lenses are used in some radar systems; the idea is that you have the signal travel a longer path (through a curved waveguide structure) in the center of the antenna/feed than it does toward the edges, just as in a convex lens the light in the center of the beam is slowed for a greater distance (and therefore retarded more) than the light at the outer edges.

I expect the boundary between "optics" and "electronics" will blur even more than it is already as both electronics and optical technologies continue to advance.

Cheers,
Tom

Hi Tom, we've used plastic lensing since at least the late 60's for focusing mundane 4-12 GHz radio waves. Dielectric refraction was used back then to extract additional gain from dish antennas by allowing more even illumination of the dish without illuminating the area around the dish. Harris radio had a patent on it.

An anti-HD site is probably less authoritative than the engineering
department down the hall from me.

How Bush Allowed an Army of For-Profit Contractors to Invade the U.S. Treasury

How is it done? How do you screw the taxpayer for millions, get away with it and then ride off into the sunset with one middle finger extended, the other wrapped around a chilled martini? Ask Earnest O. Robbins -- he knows all about being a successful contractor in Iraq.

You start off as a well-connected bureaucrat: in this case, as an Air Force civil engineer, a post from which Robbins was responsible for overseeing 70,000 servicemen and contractors, with an annual budget of $8 billion. You serve with distinction for thirty-four years, becoming such a military all-star that the Air Force frequently sends you to the Hill to testify before Congress -- until one day in the summer of 2003, when you retire to take a job as an executive for Parsons, a private construction company looking to do work in Iraq.

Now you can finally move out of your dull government housing on Bolling Air Force Base and get your wife that dream home you've been promising her all these years. The place on Park Street in Dunn Loring, Virginia, looks pretty good -- four bedrooms, fireplace, garage, 2,900 square feet, a nice starter home in a high-end neighborhood full of spooks, think-tankers and ex-apparatchiks moved on to the nest-egg phase of their faceless careers. On October 20th, 2003, you close the deal for $775,000 and start living that private-sector good life.

A few months later, in March 2004, your company magically wins a contract from the Coalition Provisional Authority in Iraq to design and build the Baghdad Police College, a facility that's supposed to house and train at least 4,000 police recruits. But two years and $72 million later, you deliver not a functioning police academy but one of the great engineering clusterfucks of all time, a practically useless pile of rubble so badly constructed that its walls and ceilings are literally caked in shit and piss, a result of subpar plumbing in the upper floors.

You've done such a terrible job, in fact, that when auditors from the Special Inspector General for Iraq Reconstruction visit the college in the summer of 2006, their report sounds like something out of one of the Saw movies: "We witnessed a light fixture so full of diluted urine and feces that it would not operate," they write, adding that "the urine was so pervasive that it had permanently stained the ceiling tiles" and that "during our visit, a substance dripped from the ceiling onto an assessment team member's shirt." The final report helpfully includes a photo of a sloppy brown splotch on the

outstretched arm of the unlucky auditor.

When Congress gets wind of the fiasco, a few members on the House Oversight Committee demand a hearing. To placate them, your company decides to send you to the Hill -- after all, you're a former Air Force major general who used to oversee this kind of contracting operation for the government. So you take your twenty-minute ride in from the suburbs, sit down before the learned gentlemen of the committee and promptly get asked by an irritatingly eager Maryland congressman named Chris Van Hollen how you managed to spend $72 million on a pile of shit.

You blink. Fuck if you know. "I have some conjecture, but that's all it would be" is your deadpan answer.

The room twitters in amazement. It's hard not to applaud the balls of a man who walks into Congress short $72 million in taxpayer money and offers to guess where it all might have gone.

Next thing you know, the congressman is asking you about your company's compensation. Touchy subject -- you've got a "cost-plus" contract, which means you're guaranteed a base-line profit of three percent of your total costs on the deal. The more you spend, the more you make -- and you certainly spent a hell of a lot. But before this milk-faced congressman can even think about suggesting that you give these millions back, you've got to cut him off. "So you won't voluntarily look at this," Van Hollen is mumbling, "and say, given what has happened in this project . . . "

"No, sir, I will not," you snap.

". . . 'We will return the profits.' . . ."

"No, sir, I will not," you repeat.

Your testimony over, you wait out the rest of the hearing, go home, take a bath in one of your four bathrooms, jump into bed with the little woman. . . . A year later, Iraq is still in flames, and your president's administration is safely focused on reclaiming $485 million in aid money from a bunch of toothless black survivors of Hurricane Katrina. But the house you bought for $775K is now assessed at $929,974, and you're sure as hell not giving it back to anyone.

"Yeah, I don't know what I expected him to say," Van Hollen says now about the way Robbins responded to being asked to give the money back. "It just shows the contempt they have for us, for the taxpayer, for everything."

Operation Iraqi Freedom, it turns out, was never a war against Saddam Hussein's Iraq. It was an invasion of the federal budget, and no occupying force in history has ever been this efficient. George W. Bush's war in the Mesopotamian desert was an experiment of sorts, a crude first take at his vision of a fully privatized American

government. In Iraq the lines between essential government services and for-profit enterprises have been blurred to the point of absurdity -- to the point where wounded soldiers have to pay retail prices for fresh underwear, where modern-day chattel are imported from the Third World at slave wages to peel the potatoes we once assigned to grunts in KP, where private companies are guaranteed huge profits no matter how badly they fuck things up.

And just maybe, reviewing this appalling history of invoicing orgies and million-dollar boondoggles, it's not so far-fetched to think that this is the way someone up there would like things run all over -- not just in Iraq but in Iowa, too, with the state police working for Corrections Corporation of America, and DHL with the contract to deliver every Christmas card. And why not? What the Bush administration has created in Iraq is a sort of paradise of perverted capitalism, where revenues are forcibly extracted from the customer by the state, and obscene profits are handed out not by the market but by an unaccountable government bureaucracy. This is the triumphant culmination of two centuries of flawed white-people thinking, a preposterous mix of authoritarian socialism and laissez-faire profit eering, with all the worst aspects of both ideologies rolled up into one pointless, supremely idiotic military adventure -- American men and women dying by the thousands, so that Karl Marx and Adam Smith can blow each other in a Middle Eastern glory hole.

It was an awful idea, perhaps the worst America has ever tried on foreign soil. But if you were in on it, it was great work while it lasted.

His "silly time" consisted of trying to convince folks that he had a "PhD", and that he wasn't smoking marijuana in a motel room with his students.

2425. PAL Antenna Plugs {Antenna Wire / Coax Cable End Plug}

Newsgroup: rec.radio.shortwave
Date: 2007-08-31 11:39:39 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1188560379.114335.10220@i38g2000prf.googlegroups.com>
Source record: 122159

For One and All,
.
For those of your with 'portable' AM/FM Shortwave Radios that
require a PAL Plug for the External Antenna Connection:
.
PAL Antenna Plugs {Antenna Wire / Coax Cable End Plug}
.
* Straight PAL Plug - White
http://cgi.ebay.com/_W0QQitemZ140138458561
.
* Straight PAL Plug - Black
http://cgi.ebay.com/_W0QQitemZ140138462346
.
* 90 Degree Bend PAL Plug - Black
http://cgi.ebay.com/_W0QQitemZ140138461136

Tip - Buy 3 and Save on Shipping and
have a 'spare' or two for future use.
.
Good Idea :
Make your own Coax Cable "Jumper" with a SO-239 Plug
on one-end and a PAL Plug on the other-end.
http://www.universal-radio.com/catalog/portable/1052.jpg
To connect your Radio with a PAL Jack via the "Jumper" with
the PL-259 Plug at the end of your Coax Cable feed-in-line.
http://www.universal-radio.com/catalog/portable/0101.html
- - - These "Jumpers" cost about $15
.
Better Idea :
Make your own Coax Cable "Jumper" with a PL-259 Plug
on one-end and a PAL Plug on the other-end.
To connect your Radio with a PAL Jack via the "Jumper" with
an Antenna Switch Box; Pre-Selector, etc.
.
NOTE - The "Jumpers" or Patch Cables above are usually
at least 18 Inches long and normally 2~3 Feet long.
Some Radio Shack lay-outs require the "Jumpers" to be
5~6 Feet long or even longer.

the display is partially non-english; so it's not ready to ship (yet)

it may be smaller than the 7600;
look at the antenna size, and the "other" item behind it
- and note the " carry strap" on the left hand side;

Very interesting . . . .

Typical Vonage; the " phone Side" of the router is vulnerable to
static discharge / ring signals (etc)

Complain and they send you cut & paste stuff from their scripts

(etc, etc, etc)

and yes, it is a company built to make a few individuals inside the
company obscenely rich

2432. question about collectible Sony ICF-2010

Newsgroup: rec.radio.shortwave
Date: 2007-08-31 12:55:22 UTC
From: Jeff Nye <jpn213@gmail.com>
Message-ID: <1188564922.653780.37640@k79g2000hse.googlegroups.com>
Source record: 122166

Hello,

I recently sold a complete original Sony ICF-2010 set to a person in Japan for $260 via eBay. You can see the item here: http://tinyurl.com/32438q .

The buyer is a collector, and I didn't realize that putting packing tape on the box and scotch tape on the interior foam slipcase would diminish the value of the set as a collector's item.

To compensate for my mistake, I am going to refund part of the purchase price.

My question to the group is: How much should I refund? That is, how much value does the tape take away from the set as a collector's item?

Thank you,

Jeff

Whatever you both can agree on, the final out being returning the item.

At the risk of starting yet another pointless flame war, I have tried
many different types of coax
over the decades. And unless one is close enough to a transmitter so
that any coax leakage
is an issue, it simply DOES NOT MATTER. Caps for emphasis.

Transfer Impedance, do a group search for my prior comments, may be a
cause of concern to
a very small number of radio listeners.

Most noise either comes from within the home and reaches the antenna
via common mode
conduction up the outside of the braid and is coupled to the antenna
where it becomes a noise
source, or comes from "nearby" sources and reaches the antenna
directly.

"50" or "72" ohm coax might matter IF our receivers presented anything
like a constant impedance
across the bands. With very few notable exceptions, receivers have
anything but a 50 Ohm
impedance at more then a few chance spots. Most receivers have
significantly higher imput
impedances so one might argue that a higher impedance coax should be

used.

I have used "50", "72" and "93" coax cable with no discernable
difference between either
50 or 72. 93 ohm coax works but is a PITA to put fittings on.

I my home was destroyed and all my stocks of coax were destroyed, and
I no longer worked
where I can get 100 foot runs of good Belden coax from the trash, I
would go with quad sheild
Belden from one of the big Home Cheapo stores. In a pinch I would use
any high quality quad
shield coax such as is sold for DBS. I would strip back the jacket to
insure that all 4 layers were
neat and tight.

I haven't checked, so I don't know what type "F" fittings and
strippers/crimpers they sell.
The "F" fitting can be a very good connector up into the GHz range IF
good connectors and
tools are used, and care is taken to install them correctly.

I have been able to introduce a signal through the coax shield, but
the conditions are very unlikley
to occur in the wild. A 10' wire is positioned 1" from the test coax.
The coax is terminated with
the correct load with a properly installed connector. Then I run 10mW
through a set of of 4 16:1
transformers to give a final step down 64:1. Then and only then can I
receive the test signal at
1MHz. I had 300' of coax between the test jig an my receiver. And the
recovered signal was low
enough that when I connect a 30' piece of wire to a another section of
300' coax the noise
from the real world swamped my noise source.

Perhaps is you lived in Grayland or some other extremely RF quiet
location TI might be an issue.
And perhaps, just perhaps in such a mythical location you could detect
any difference between
50 and 72 ohm coax.

I tend to put "" around 50 and 72 because there are coaxes listed as
50 or 72 that might be a little off.

Do not use Rat Shack, You got questions and we haven't a clue, coax.
Aside from the marginal
braid coverage it is also often not wound symmetrical and the outer
jacket tends to crack in a very
few years.

For a friend we use RG174, small mini coax, that wouldn't have been my
first choice, but because

she lives in a home on the historic registry she didn't want to drill any holes through the thick wall,
and because the home gets more then it's share of visitors interested in such historic places she
wanted her antenna to keep a very low profile. There was a very small hole just large enough for
the RF174 to pass through. We used white RG174 and you have to know where to look and get
real close, bring a long ladder!, to find it. Not my favorite installation but it works very well. The bird
feeder in the back yard doubles as a Lankford "15' relay tuned antenna". She lives out in the country,
with no nearby MW stations and has fantastic reception. We ran about 50' or RG174 then at the soil
line converted it to quad shielded direct burial 100' 75 ohm Belden. And we didn't bother with any matching.

For any transmitter operations this is a big no no. And for anyone using a true dipole, cut for
one band and not used harmonically, and if a proper balun is used, and if the dipole is at least
1/4 wavelength in height, proper (IE 72 ohm) coax it might just matter. From years of messing with feedlines I must say might because when putting up some dipoles for dedicated single frequency reception, think WWV, I could not tell any difference.

At that price it already seems as though they got a good deal. If the buyer was an astute "collector" they would have already asked you about tape, etc. prior to bidding. And then, after winning the bid, they most likely would have warned about any tape, etc.

Did you post those pictures before his last bid? It looks like you
fully disclosed the presence of tape on the box.

It looks like you made a reasonably full and fair disclosure of the
condition. It is used, and it was not described as NIB or NOS. Did
he ask you about condition of the foam slipcase or the other
acceesories, and did you give him a deceptive answer? If not, he
should not expect the incidental packing materials to be in pristine
conditions. As I recall, the plastic bags were often closed with a
piece of scotch tape, so the piece you are sending him may be
original(increasing its "collector" value); after opening, my bags
usually have suffered some damage (tears, stretches, etc.).

I don't think you owe him anything, and besides, I think he got it at
a very good price. There may be another side to the story, but I
think he is scamming you. Even if he is not trying to cheat you, he
bears a lot responsibility for not making his expectations clear and
asking you those questions beforehand.

You should offer to take it back, making a full refund of the bid
price, but not shipping. You can probably get the same price or more
if you re-list it. And even if you get less, you will have fewer
headaches.

Actually, it says 3 THz.
3.4GHz is C band, like satellite TV. Ku band sat TV is 12GHz.
There are many off-the-shelf radio instruments available well above this.

If -- and I emphasize -- IF those pictures were ALL there during the
auction, then it's the buyers fault for not noticing the packing tape
on the box. I can clearly see the brown piece of tape right there.

If he doesn't want the radio, then I agree with what others have said,
offer to refund his money, minus the cost of the return shipping. That
will teach the guy to look closely and ask questions before throwing a
bid up.

Hi Harold,

Yep. The radar stuff I wrote about is from that era. I wouldn't be
at all surprised to see mention of it from well before that; certainly
we knew about the effect that makes dielectric lens action possible
for RF (which is after all just a continuation of the spectrum that
includes visible light) since before we knew how to generate
appreciable energy at microwave frequencies.

Cheers,
Tom

The bid was placed Aug-13-07 20:32:45 PDT. The pictures showing the tape on the box were added 4 days later, On Aug-17-07 at 12:30:44 PDT.

Yes, the value of the item to a collector is definitely decreased by the damage to the box, perhaps 25-33%. Many collectors value the complete unit (item, box, and all accessories) and the condition of each and every bit of it is critical. A collector wants something as close to brand new condition as possible. If someone were only purchasing the radio for it's use and performance, it wouldn't matter how cosmetically beat up it may be.

That said, the change was made to the listing with two days remaining in the auction. Any smart bidder would have checked the auction again before it closed, and seen the changes. The bidder could have then retracted their bid, permissible under eBay rules, by claiming the seller changed the description of the item.

I would offer the seller a compromised 50% of the potential lost value, somewhere in the neighborhood of $32.50-$43.00. I would also leave him the option of receiving a full refund of the purchase price, minus shipping, if he returns the radio to you in "as sent" condition. You could then relist the radio. The third option is to offer

him no refund, based on his negligence of not checking back later in the auction to see the changes and retract his bid. This may result in your receiving a negative feedback from him.

This auction again brings up the principle of waiting until the end of the auction to place a bid. Had the bidder waited until the end, the tape on the box would not be an issue. It also shows what can happen if all the vital information (in this case the added pictures) is not included in the original listing.

They weren't there when the bidder bid, they were added later. But, as in my other post, that doesn't take him off the hook completely.

Here is how to handle tape residue.Get some mineral spirits and a very sharp blade.Start working the mineral spirits beneath the tape, it will come off without harming anything, although it takes a while at working at it with the mineral spirits and the blade.I have done it many times before.

I think dxAce is right, sounds like the Japanese guy got a good deal.

Jeff,

A Year or two ago this Sony ICF-2010 Radio with
the Original Box would have Bid-Up to $360 to $500.

* The box has some packing tape on it

* There is a little adhesive residue on
the tip of the attached metal antenna

Note - Some Sony ICF-2010 Radios that eBay Sellers'
claim are Like-New-in-Box {Near Mint} Bid-Out at $750.

IMHO the Buyer got a 'steal' ~ RHF

A carefully used hair dryer will often cause less damage. Mineral spirits absorbed
into the chipboard will do damage.

The way I read it, the presence of the tape on the box was fully and
fairly disclosed in the original text. It also looks like the buyer
had planty of time to see the pictures, even though they were posted
after his last bid.

This weeks "Media Report" on Radio Australia had a segment on some
researcher digging up a bunch of 1950's "Carter Brown" detective serials
produced in Australia. They said that there was a link on their web page,
(start at <http://www.abc.net.au/rn> and find the page for Media Report),
to a site where you could listen to some of it.

My next oldest sister and her hubby used to subscribe to snail mail delivery Antique Trader. www.antiquetrader.com and after they got done with glancing through them, they gave them to me.I once read an article in Antique Trader that sometimes, the cardboard boxes that some things were in, some of those boxes are worth more (depending on what condition the box(s) are in) than the item(s) that were in the boxes.Some of those old boxes are as rare as hens teeth.

2461. Tecsun PL600, Size guesstimate

Newsgroup: rec.radio.shortwave
Date: 2007-08-31 17:53:13 UTC
From: "barnegatdx@aol.com" <barnegatdx@aol.com>
Message-ID: <1188582793.122788.35980@o80g2000hse.googlegroups.com>
Source record: 122095

Tecsun PL600, Dimension:

Looking at the display in this picture below

http://www.zmdz.com/bbs/incomefiles/20077/249132987694.JPG

reminded me of the similarities of the display shown in the picture

and the display on the Degen DE1105

If the ratios are correct, this PL600 prototype is

4 1/2 inches long by 3 inches and a fraction wide.

All this AM/ FM/ SW, 600 memories, in shirt pocket size plus Single Side band too !

Suggest Email tecsun at tecsun@on-nets.com

(Full address below):

TECSUN GENERAL ELECTRIC MANUFACTURE Co.Ltd.
Unit 11,13/F,
block A, Hoi Luen Ind. Centre,.
55 Hoi Yuen Rd,.
Kwun Tong,
Kowloon, HongKong

and tell them, in no uncertain terms

that you will buy one of these fine little radios when they are produced

I have never had any problems with using mineral spirits before.Mineral spirits is also great for easily removing them road tar spots from your vehicles.It works Wonders.I never tried the hair drier bit before.When I take my usual Saturday night bath,I hit it with a towel and then let it naturally dry.I own an old two speed/two heat Black and Decker air gun though.It comes in handy for removing paint, so do my two belt sanders, Black and Decker and Skil.Hey, a couple of weeks ago, I saw a website about how to make your own indrared paint remover thangy.Check it out.

David,

The general "RG8" designation applies to all sizes
and types of RG8 Coax Cable.

-WRT- To Shortwave Listening (SWL) Bigger Coax Cable
like RG8/U is not necessarily any better -and- now the
RG8/X is smaller; easier to work with and costs-less.

IMHO - Both RG58 and RG6 Quad-Shield Coax Cables
will work very well.

So tell David - What's Between Your Antenna and Radio ?

~ RHF

Gee, isn't that what I said?

"That said, the change was made to the listing with two days remaining in the
auction.
Any smart bidder would have checked the auction again before it closed, and seen the
changes. The bidder could have then retracted their bid, permissible under eBay
rules, by claiming the seller changed the description of the item."

BarnegatDX,

Looks to me to be roughly the Size of the Sony ICF-SW7600 Radio
http://www.universal-radio.com/catalog/portable/icfsw7600.html
Measurements : 7.5 x 4.75 x 1.25 inches @ 22 oz.
(185mm x 120mm x 32 mm @ 615 g).

About the same as :
Etón E5 Radio
Grundig G4000A Radio
Sangean ATS-404 Radio

Kaito KA1103

Almost. Maybe I misread it, but the way I interpreted your post, the disclosure about the tape came with the addition of the pictures. I thought I was pointing out that it came even earlier, since you could also find it mentioned in the original text which had to appear before any of the bids.

I knew the text description of the tape came earlier because on eBay the description can never be changed after a bid is placed. Only additions to the description are allowed. The description mentioned it, but by the description alone I would have assumed it was standard clear packaging tape on the box seam to reseal the box, not the nasty brown stuff covering the artwork on the box.

Still, as I pointed out earlier, both parties are at fault for the situation that arose. Neither is guilt free. The seller needs to compensate somewhat for the problem.

2472. Will vaporware portable HD have the same problems as DAB ?

" Analogue vs DAB radio for jogging"

Hi folks,

I was considering buying a portable DAB radio for jogging - mainly I'm interested in getting the football on 5live and talksport.

The problem is - a lot of the reviews on various sites say that reception can be a big problem with pocket sized DAB radios in particular.

I was looking at the Pure 1500 as a dedicated DAB only option - however the oono MiniDAB looks like a potentially good piece of kit as it doubles as an mp3 player (and also has a builtin mic). Anyone have any experience of these two models? Or have better recommendations?

Would an old style analogue radio be a more reliable option? I don't mind paying a bit extra for the DAB radio if it will be reliable - however it is useless to me if the reception is not reliable. I'm guessing you might say "it depends" ... on area, station etc. but could you give me ballpark odds of how likely I am to get interrupted listening. How much more or less reliable is a pocket analogue radio going to be for this purpose?

Thanks!

"Re: Ibiquity's "Gag Order" on engineers"

Quote from: DavidEduardo on Today at 01:31:09 pm:

"...HD will only benefit full market signals as the rest generally can't compete anyway. There are probably less than 250 stations in the top 50 markets that are viable based on having a competitive full metro (MSA) signal."

hipporadio
« Reply #25 on: Today at 03:13:48 pm »

"Exactly the reason the IBOC system was cynically-flawed from the git-go - and very-possibly for a surreptitious agenda! Considering the consortium of its developers [monolithic corporate radio]; its otherwise cash-conscience customers [monolithic corporate radio]; and those that promote it to a point that defies reason [monolithic corporate radio] - one can surly wonder what the motes really is. "Only full market signals" is high-kW corporate radiospeak for: "My transmitter on the skyscraper downtown is bigger and more important than yours behind the mall in the 'burbs, so only I get to benefit"... You stealthily-stated as much, David!"

"Remember, the Telecom Corporate Radio Monopoly Act and dreams of the "cluster" were not [yet] a reality when the intercourse that created IBOC was occurring... HOLY COW - what a demonstrative incident of unsafe sex that was Could said consortium have manipulated radio's digital future [taking advantage of an FCC still "smarting" from the AM-Stereo debacle] to preclude smaller broadcasters from attaining the very-slightest measure of parody out in lower-power AM and Class A FM territory? Simply-stated for those living in Rio Linda: The current flavor of "HD" Radio may never have been intended for "the small guy"! Before you scream Art Bell and conspiracy, reflect on the past conduct of the NAB-now there's a Radio Shack with very-telling answers in the form of their continuous barrage of misadventure directed at smaller stations and proposed services!"

"Now, iNiquity licensee Broadcast Electronics is in wishful-thinking mode with a posture reflecting arrogance, desperation, or both - inventing an initiative to sell "HD" Radio to small market [concurrently low power] stations they well-know cannot technically and economically-benefit [I guess DE's employer has a full compliment of shiny-new IBOC-enabled rigs, so BE needs a new forest to buzz-saw]. Holding hands with GE Capital-the corporate equivalent of a disadvantaged consumer's corner finance company; BE hopes for a new sales angle; and iNiquity dreams of keeping the equity-fund hounds at

bay by luring the Homer Simpons of Hazard, Kentucky radio onto the
IBOC bust-wagon."

The engineers who maintain KSCA (#1 in LA), KLVE (#3 and #2 in 25-54), KRCD/KRCV (#6 25-54) and KTNQ as well as the 12 station Recuerdo network and the 30 station Piolin en la Ma&#65533;ana network are as good as any I have worked with anywhere... it's a 7-person engineering staff with broadcast experience approaching 200 total years.

And how many years of radio broadcast experience? I see about zero
relevance.

Message-ID: <1188594795.675119.88420@57g2000hsv.googlegroups.com>
Source record: 122178

The Southern Ontario/WNY Radio-TV Forum

"Interference Alert - AM Stations May Be Affected by U.S. HD Radio"

"As of September 14, US AM radio broadcasters that have implemented HD RadioTM will be allowed to transmit their digital signals at night as well as in the daytime. Canadian AM stations operating on frequencies that are first and second-adjacent to powerful US stations may experience increased levels of skywave interference after dark as a result of this recent FCC decision. On conventional AM receivers, this digital interference may be heard as a "rushing" or "hissing" sound, superimposed on the desired analog station's audio. Stations that experience any such interference within their protected night-time service areas should report it to the district Industry Canada office (http://strategis.ic.gc.ca/epic/site/smt-gst.nsf/en/sf01742e.html). Copies of complaints should also be sent to the CAB's engineering advisor, Wayne Stacey."

spectrum.pacific-pacifique.region@ic.gc.ca,
vancouver.district@ic.gc.ca

To Whom it May Concern:

Even as a U.S. citizen, I would like to file my objections to HD Radio
HD/IBOC. Mexico has already expressed its objections to HD Radio:

"Mexico Says Hang on a Minute!"

"Mexico wants U.S. radio regulators to re-think their decision to
allow AMs to go IBOC at night and FMs to operate on the extended
hybrid digital carriers. Our neighbors to the south say they are not
happy the FCC authorized its recent "final" IBOC rules governing
broadcast transmissions without first coordinating those through
international treaties."

http://www.radioworld.com/pages/s.0121/t.7715.html

Other articles concerning AM-HD jamming:

"Digital radio in Canada"

"The Commission is very concerned about the stalled DRB transition.
Some stations that once operated have since ceased operations. Few
recievers have been sold, and there is no interest in expanding DRB
service beyond the six cities where it exists. The only comprehensive
technical comments came from the CBC. They stated that AM-IBOC would
create a serious degradation in sound quality for existing AM stations
(*all* AM stations, not just the ones adopting IBOC). They also state

that due to interference concerns, IBOC transmission at night is not
practical."

http://americanbandscan.blogspot.com/2006/12/digital-radio-in-canada.html

"IBOC Interference Calculations" (of Canadian AM stations)

"The fundamental problem with AM IBOC is that digital sidebands are
not required to conform to this allocation principle. This is a
massive loophole that will cause many nighttime woes on the AM band...
Allowing this to happen flies in the face of established allocation
rules and international agreements. And yet, this bizarre interference
generating system has been blessed by the FCC! What were they
thinking? It almost defies belief..."

http://topazdesigns.com/iboc/Interference-Calc.html

"The FCC Tunes Into HD Radio-And May Turn Off Distant AM"

http://blog.washingtonpost.com/fasterforward/2007/03/the_fcc_greenlights_hd_radio_n.html

"RW Opinion: Rethinking AM's future"

"Making AM-HD work well as a long-term investment is seen as an
expensive and risky challenge for most stations and their owners.
There is the significant downside of potential new interference to
some of their own AM analog listeners as well as listeners of adjacent-
channel stations."

http://www.rwonline.com/pages/s.0044/t.557.html

The future of AM radio depends on putting an end to AM-HD jamming - US
AM stations are suffering from
lost coverage and digital hissing !

Thank you,

I've used decent quality RG58, RG8X, and a couple of times RG-6(When I
got a huge roll of it free) with no problems.

It's not a real concern at HF frequencies.

Zero? That would be the number of radio stations you've axually owned.

Yeah, yeah, yeah... I know you claim to have owned a bunch. You also claim to be Hispanic.

I've met Mike Martin, owner of http://www.rfiservices.com/ , who trained some of the folks mentioned in the article. He was here at my home QTH and instructed some of our local Board of Public Works workers on finding interference sources after I had filed a complaint a few years ago.

> .

For many applications I have found balanced to be easier to cleanup
from a common mode
perspective then coax. But since this was a thread regarding Coax I
limited my comments
to Coax.

Balanced has strong points. But it also is twitchy in some situations. And it is a PITA to run
through a bulkhead, provide acceptable (to me) "EMP" clamps, and it must be kept well away
from other conductors. In situations were you have to run feedlines adjacent to other conductors,
balanced may be a bad choice. Every antenna installation is different and each site needs to be
evaluated and a "plan" developed for that site.

Yea, sure I sit down and design every step months before I implement.

For me, other then the few commercial, IE money making, projects I have designed and built,
most systems grow like a weed from something simple to something more complex. And like
your garden you have to trim it up every now and then to keep it working.

I used a ~100 wire on and off for 40 years. Only in the last few years have I abandoned wire
antennas for active and tuned verticals.

But back to coax, buy good stuff, direct burial, and invest in GOOD connectors and GOOD
tools. DO NOT attempt to install "F" fittings with some pliers. Good connectors and good
tools will allow you to make weather tight "F" connections that will last years. Maybe decades.
Done wrong "F" fittings are dead at installation or randomly soon there after.

All of my receivers use BNC, OK, my DX398 is 3.5mm but the patch goes to BNC.
I use a surplus video patch panel that will pass RF up to the GPS range well enough
to allow my shack GPS to stay locked. I really want to make sure my home isn't moving.
It really gives a 1PPS signal to drive my ZULU/EST(EDT) clock.

I do convert all my balanced back to coax at the entry bulk head. As my antenna designs change,
my feedlines change to match. Balanced is always worth a try. Cheap and easy.

Terry

Terry,

Which Type / Types of Balanced Feed-in-Lines
Do You Use : {Why?}

Ready Made 300 Ohm Twin Lead ?

Ready Made 450 Ohm Ladder-Line ?

Standard Zip-Cord {72 Ohms} ?

Standard Speaker Wire {72 Ohms} ?

i want to know -cause- iane ~ RHF

I own some old Sony radios and four Sony tv sets.One of them is my Sony Trinitron Wega flat screen CRT tv set I use only for watching DirecTV.(I am waiting on the latest Suvivorman show to crop up on thee, Lobster Wars bores me) One of them is a little Sony tv set I bought at a pawn shop in Killeen,Texas when I was in the Army at Fort Hood,Texas in 1965.It doesn't work anymore, only a thin horizontal line it will pick up across the middle on the tv tube.It has a traveling case that looks just like a little suitcase (smething like a woman's litle traveling goody, goody little suitcase) and an antenna made to clip onto the window edge of cars.I used to watch tv programs on it in the barracks at Fort Hood.It is not for sale or trade.

My Cambridge Soundworks Clock/Radio receives HD and can toggle back
between analogue and HD. Admittedly, I can't tell the difference even
though the Cambridge product sounds very good. Unfortunately, I live in
an area where reception can be abysmal so I don't seem to get the
digital stuff very often. There are times when a usually strong FM
station just disappears into static on my Harmon-Kardon Stereo receiver.
When I do get the HD, It's nice to see the call letters, the type of
music played by that station (e.g. "Oldies" or "Classic Rock") as well
as the name of the group who plays the current song. Neat.

I suppose what kills so much technology is the vast array of choices.
Too many choices means no choices since one cannot evaluate them all.
Blue-Ray or HD-DVD? Neither! Holographic Video Disk is coming and will
hold 100 GByte. The consumer is the loser in this brave new world since
they were never given a vote and very few understand the technology
anyway. And obsolescence is an eye-blink away.

SBZ - Cambridge Soundworks makes some nice Radios ~ RHF
.
I like you am in a Signal Challenged Radio Reception
Location beyond the 10mv/m Contour and HD Radio*
has not been "The Best That It Could Be" here.
* Mostly the Blinking Blue Light without a Signal Lock.

.
Maybe in time they will turn-up the FM "HD" Radio
Power from 1% of Analog to 4~6% and then we will
have a Strong and Consistant "HD" FM Sighnal to
be able to Listen to and Enjoy.

I use landscaping lighting cable.
Measured Zo of about 150 Ohms.
Standard lamp cord has about 110-130 ohms.

The landscaping low voltage cable is cheap, at the end of season
sales,
and is very UV resistance and a robust cable.

It typically is of use with high impedance antennas. This might be
confusing, because
Dallas Lankford's active antennas and his "15' Relay Tuned Antenna"
have reasonably
low output impedances, and you can change the windings or emitter
resistor to tailor
the impedance you want. But all of these antenna have high input
impedances they
can be very susceptible to common mode ingress. For these antennas, if
you are going
to use an above ground feed system, balanced is generally better. When
expetimenting
with location or new designs I tend to use balanced. And once I have
the location pinned
down I am now back to using coax, but I bury it at least 12" down.
Balanced is nice, but
the hassles of having to move it to mow are a big PITA.

For an odd antenna feed line look up G-line feed.
<http://www.finitesite.com/wetnoodle/0013.htm>
Scroll down to G.

<http://w5jgv.com/1970_tower/tower.htm>

They do work very well for UHF, but for HF the launchers would get a bit unwieldy......

My current project is a slight modification to the standard Lankford 15' Relay Switched
Antenna. It is elevated with a set of 16 15' elevated radials. Compared to a similar ground
mounted antenna with the same number and length radials it appears the elevated 15'er
is better.

Due to a work related injury my right arm is imobile for another month or so, so I am not
doing too much in the way of experiments.

Terry

2522. Fred Thompson ok on cable not on network

Newsgroup: rec.radio.shortwave

Just read that next week Fred intends to announce his bid for president. So, apparently, NBC is not going to show any more episodes of Law and Order with him in it, because they don't want to deal with the "equal time" issue. But TNT doesn't have a problem with "equal time" so they will continue to run Fred on Law and Order on their network. I think TNT did the same with Arnold when he was running for Governor of California. So, FCC rules apply to non-cable but not cable??????

I'm using Belden 9913F7 (this is 9913 with a foam dialectric instead of the generic 9913's air dialectric). I'm using it because I bought a good bit of it for UHF/VHF work where its low loss is really important.As an aside, avoid air dialectric cable because it can act as a "wick" and conduct water and moisture via capillary action if exposed to the elements and not adequtely waterproofed.

A very experienced ham swears by LMR-400, either ultraflex or standard. The ultraflex is a lot less stiff and can turn corners a lot better and that's what he uses.

Ladder line or window line is worth a look too, and it can be relatively cheap. :)

http://www.vk1od.net/LOLL/index.htm

An interesting hybrid approach would be to use ladder or window line from the antenna feedpoint to the outside entry point, then transition to a 6:1 or 4:1 balun and coax for the final run into the house. :)

Wonder if anyone has tried this instead of coax, and how their success was?

The main reason I'm using coax is the antenna does both TX and RX duty, and I didn't want to deal with the possibility of "RF in the

shack" issues.

There is no 'equal time' requirement anymore.

FCC rules do not require it. On the network, OR on cable.

NBC doesn't want to air Thompson because they don't want to deal with
the repercussions from Hollywood politics.

Given the current information, it sounds like a scam and I don't think
you owe anything. How did you represent the box's condition in the
auction? Did the buyer ask you directly about the box before bidding?

Junius, you probably already know this, but you can read more Grayland DXpedition exploits, and DXped. reports from elsewhere around the globe, at www.dxing.info in the "DXpeditions" section. I particularly enjoy Craig Edwards' DXpedition articles from Australia. He's a pretty funny (strange??) dude! ...And an excellent DXer I might add.

Sorry, I meant to ask whether 3,438 GHz is the highest radio frequency used to receive audio signals from outer space. I should have made my question more specific. Radio-astronomers study sounds from the sun as well as visual data.

I wonder if a space station with a 3,438 GHz AM receiver could pick up any extremely-distant audio signals between 20 to 20,000 Hz [from magnetars, gamma-ray-bursts, supernovae and other high-energy but cosmic objects] after demodulating the 3,438 GHz AM carrier wave.

And I did... 12 on the air, and permits for nearly a dozen more.

Which you can verify by checking with noted AM Dxers of the time, some of whom actually visitied my stations like John Hogerheid of Michigan, Larry Godwin, now of Montana and then of West Texas and an IRCA board member. Or Kermit Geary, of PA, who was one of many DXers who verified reception of HRCM1 or HCFV1 when I put them on split frequencies to conduct DX tests (which were published in the bulletins of the IRCA and NRC). Or John Callarman, then of Mt. Vernon, IL, and now a respected Mexican DX expert in the NRC. Or Ben Dangerfield of PA who also DXed and verified both of those AMs. Or Larry Cervone, not a DXer, but then head of Gates Radio, and later BE, now retired in Quincy, IL. Or Fabricio Cifuentes, then an announcer of HCRM1 and now an announcer on various Spanish stations in Atlanta, GA.... if you check these out, I can give you a few hundred more, starting with the present mayor of Guaquil, Jaime Nebot Velasco, my partner in one station. Or Edward Seaton, now President of Seaton Newspapers, Manhattan, KS, who was a Peace Corps volunteer in Ecuador and witness my first few stations go on the air as a family friend....

I can't speak to the R8, but the FRG-100 was a better radio than the
R75, having owned both. The Frog was a lot less flashy, somewhat less
convenient to move from frequency A to frequency B in a hurry, and
chuffed terribly, but the basic performance was quite good.

Once you got past all the bells and whistles on the R75, there was no
performance there.

Hey, Ross,

Long time no read!

I'm using LMR-400 (standard) for a V/UHF run and have fallen back to
RG-213 for HF runs. I had used 9913UF for the longer HF run, but the
on-paper performance didn't last when the cable was exposed to intense
UV.

Handy Shortwave Chart
Bill McFadden
billmc@agora.rdrop.com

Band allocations and time zone conversions for the USA. Includes broadcast
bands used outside the USA. For multi-use bands, primary usage is shown.
Some stations operate outside official bands. Information is from Oct 2005
FCC rules and Jan 2006 NTIA manual, see Chapter 4 of:
http://www.ntia.doc.gov/osmhome/redbook/redbook.html

Frequencies are in kHz. Usual spacing in shortwave broadcast bands is
5 kHz. Frequencies above 10000 kHz tend to propagate better during the day;
frequencies below 10000 kHz tend to propagate better at night.

Please e-mail suggestions and corrections to billmc@agora.rdrop.com.

Phone line as SW antenna
Bill McFadden
billmc@agora.rdrop.com

Changes preceded by "|".

WARNINGS AND DISCLAIMERS

Connecting unapproved devices to phone lines may be illegal in your area. Telephone lines present a potential shock hazard. Do not use this antenna for transmitting. Use at your own risk.

INTRODUCTION

This article describes how to use a phone line as a shortwave receiving antenna. Performance will vary depending on the kind of phone line you have. Overhead lines usually make okay antennas, while underground lines
| usually don't. Phone lines carrying DSL service may be unsuitable because
| DSL operates over a wide spectrum. A phone line antenna will generally pick up more power line noise than a dedicated antenna, so don't expect to
| use it for DX work. Nevertheless, I found that it outperformed the
| telescopic whip antennas built into many portables.

A reader sent in this suggestion: If you're concerned about connecting the phone line directly to the receiver, try wrapping the phone cord several times around the receiver's telescopic whip antenna instead. Performance may not be as good as a direct connection, but it will probably be better than the whip antenna by itself.

Someone else wrote asking about lightning protection. I haven't thought much about it because thunderstorms are rare in my area. Most phone lines have lightning arrestors on them where they enter the house, but the lightning arrestors may pass enough energy during a lightning strike damage a receiver. My suggestion is to disconnect the antenna when not in use if you experience frequent thunderstorms.

HOW TO DO IT

The simplest connection is a single capacitor between the phone line and receiver. The capacitor eliminates all phone line voltages, including
| ringing, so that they will not harm the receiver. The capacitor should
| be rated 250 volts or higher.

```
Phone line RF connector
red .01 uF center cond. / \
or o--------||-----------------------------|-o | To receiver
green \ /
50 ohm coax |
ground |
or o-----------------------------------------+
N.C. shield
```

N.C. = no connect. I originally connected the phone line ground (yellow wire) to this terminal, but reception was better without it (if you do this, play it safe and put a .01 uF capacitor in series). If another ground is available, you can connect it to this terminal.

If you are picking up local AM or FM radio stations on the shortwave bands, it is likely that your receiver is overloaded. Inexpensive and portable receivers usually lack the filtering needed to eliminate this interference, but you can make your own filters. Filters can also be
| purchased from shortwave dealers (see below for recommendations).

A high-pass filter can be used to remove signals below the shortwave bands. It rejects interference from local AM stations and presents a high impedance to the phone line at audio frequencies so that the phone line remains balanced.

A low-pass filter can be used to remove signals above the shortwave bands. It rejects interference from FM and TV stations, as well as VHF 2-way radio transmitters. If you use both filters, connect the output of the first filter to the input of the second (don't forget to connect their ground terminals together). It doesn't matter which filter is connected first.

These filters also work well with random wire antennas. Just connect the antenna in place of the phone line.

The filter(s) should be connected to the phone line in this manner:

```
Phone line RF connector
red -------- center cond. / \
or o----| |-------------------------|-o | To receiver
green | | \ /
| FILTER | 50 ohm coax |
ground | | |
or o----| |----------------------------+
N.C. -------- shield
```

```
| RECOMMENDED FILTERS
|
| If you don't want to make your own filters, the following have good
| performance, are well-built and affordable:
|
| Model 400 BCB interference filter (3.5 MHz highpass)
| http://www.iceradioproducts.com/filtersrf.html#bcb
|
```

| Model 420 HF lowpass filter (30 MHz lowpass)
| http://www.iceradioproducts.com/filtersrf.html#3
| (scroll down a bit to see the model 420)
|
| If you have a random-wire antenna, the following unit will provide
| impedance matching and lightning protection (connect antenna to 450-ohm
| terminal):
|
| Model 182A beverage matching unit
| http://www.iceradioproducts.com/reconly.html#Beverage Matching

FILTER PLANS

The original credit for the high-pass and low-pass filters goes to Paul Blumstein and John Shalamskas, respectively. Edited versions of their articles are included here:

Date: 09 Jan 91 00:54:08 GMT
From: paulb@harley.TTI.COM (Paul Blumstein)
Subject: BC Band Hi-Pass Filter

The following ascii-schematic diagram is a high pass filter that will filter out Broadcast Band (MW) stations. I found it a great boon to my shortwave listening since local MW stations overload my ATS-803A front end & appear in SW, especially with a long antenna.

If you remember my antenna saga, I went from 50 feet to 150 feet & had overload problems causing me to cut back to 50 feet. (Even at 50 feet, I still have some MW interference). I took the advice of Gary Coffman and looked up filters in the ARRL Handbook. With the filter in place, I intend to try to increase my antenna length again.

Anywho, here is the filter, for interested parties.

```
--------||---+----||-----+----||-----------
} }
{ {
} }
-------------+-----------+-----------------
```

The outer capacitors are 1500 pf ceramic disks.
The inner capacitor is 820 pf ceramic disk.
The squiggly things are coils (two total). Each one is 2.7 uh.
(a close value will do).

Date: 12 Jan 91 00:44:25 GMT
From: bill@videovax.tv.tek.com (William K. McFadden)
Subject: Re: BC Band Hi-Pass Filter

I built the filter that Paul Blumstein posted recently and measured it on a gain-phase analyzer. Here are its characteristics:

100 kHz -120dB
500 kHz -68dB

1000 kHz -38dB
1600 kHz -15dB
2100 kHz -3dB

The source and load impedances were 50 ohms. Because the filter has five elements, the attenuation is 30dB per octave. The measurements confirmed this.

This filter seems to be a good compromise between interference attenuation and passband response. There is very little attenuation in the 120m band and above. It could use a little more attenuation at the upper end of MW, which could be done with more stages or a higher cutoff frequency. Alternatively, you could build two of these filters and put them in series. (Since two 1500pF capacitors in series are really 750pF, you could eliminate one cap.)

Just for fun, I put 470 ohms in series with the input to see how the filter performed with an antenna mismatch. The response was:

100 kHz -105dB
500 kHz -60dB
1000 kHz -35dB
1600 kHz -15dB
2300 kHz -3dB

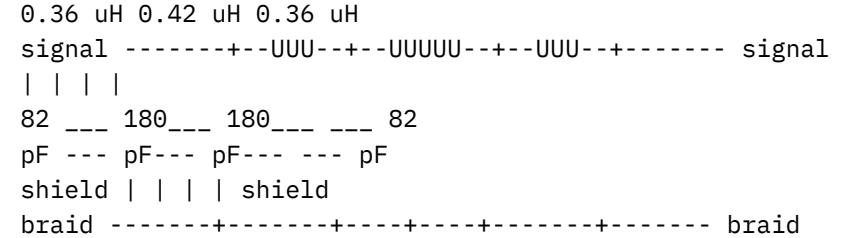
These figures are normalized to the passband response of -15dB, which is due to the impedance mismatch between the source and load and would have been there without the filter. Hence, the filter works almost as well in spite of the mismatch, which is good news to those who use long-wire antennas.

Date: 22 Apr 92 08:59:33 GMT
From: johns@uhunix.uhcc.Hawaii.Edu (John Shalamskas)
Subject: Construction of filters for SW reception

Several people have asked for construction details of the filters I built for my DX-440.

The high-pass filter helped some, but in my location the VHF/UHF broadcasters are also causing problems. So, I dug out the ARRL handbook and chose a 7-element Chebyshev low-pass design that is -3 dB at 35 MHz, -20 dB at 43 MHz, and -50 dB at 64 MHz (all calculated; it works well in practice!)

LOW-PASS FILTER (Rejects FM, TV, etc.)



|
chassis ground

I had to do a little more improvising at this point. I used .33 uH instead of .36, and .66 uH instead of .42, but it works fine.

The 5-lug terminal strips were perfect for these circuits, since there are 4 lugs plus a grounded lug. All "ground" connections go to the lug that is mounted to the chassis, and the other 4 lugs are used for each of the connections on the signal line. One terminal strip is used per filter. Since both filters were necessary to clean up the hash, I am going to put them both into one box when I get the time.

The proper way to connect them is in series, i.e.

signal in ------- filter 1 -------- filter 2 -------- signal out

There is no difference between ends. They are "bilateral" which means you can't possibly hook them up backwards. (In the above schematics, left and right ends are interchangeable.)

COIL WINDING

You can make the coils yourself using this formula:

L = 0.2 * B^2 * N^2 / (3B + 9A + 10C)

L is the inductance, in uH
A is the length of the coil, in inches
B is the mean diameter of the coil, in inches
C is the diameter of the wire, in inches
N is the number of turns

For small wire, you can assume C = 0.

PARTS SOURCE

Parts for the filters can be obtained from the following source:
http://www.digi-key.com/

Looks exactly like the Tecsun PL550, which is also the Eton E10 in a
different package.
about 7.4 x 1.3 x 4.5 inches
Not shirt pocket size at all.

And I did... 12 on the air, and permits for nearly a dozen more.

Which you can verify by checking with noted AM Dxers of the time, some of whom actually visitied my stations like John Hogerheid of Michigan, Larry Godwin, now of Montana and then of West Texas and an IRCA board member. Or Kermit Geary, of PA, who was one of many DXers who verified reception of HRCM1 or HCFV1 when I put them on split frequencies to conduct DX tests (which were published in the bulletins of the IRCA and NRC). Or John Callarman, then of Mt. Vernon, IL, and now a respected Mexican DX expert in the NRC. Or Ben Dangerfield of PA who also DXed and verified both of those AMs. Or Larry Cervone, not a DXer, but then head of Gates Radio, and later BE, now retired in Quincy, IL. Or Fabricio Cifuentes, then an announcer of HCRM1 and now an announcer on various Spanish stations in Atlanta, GA.... if you check these out, I can give you a few hundred more, starting with the present mayor of Guaquil, Jaime Nebot Velasco, my partner in one station. Or

"Listening to my 'wonderful' Radiosophy "HD100" Radio to good-old-analog AM & FM Radio; because I live out side the 10mv/m Contour in a Rural Area where I don't count in dEduardo's Body Count of 'qualified' Radio Listeners. ~ RHF"

"Review: Radi-osophy HD100 - HD Sounds, But At What Cost?"

Remember those crappy $15 AM/FM/cassette radios from the 80s? The HD100 looks just like one and has the sound to match. Basically a glorified clock radio, it has a chintzy, careless interface with speakers that spew a tinny unrefined sound. And while carefully tuning the HD stations results in an audible improvement over analog alternatives, the overall quality is still poor - even for a $100 device. Frankly we'd be happier keeping our money and sitting in silence. -Roger Thomasson

WIRED One of the cheapest HD devices available. Auxiliary input. Sleep mode provides adjustable auto-off. Backlit display.

TIRED Sound quality well below average with virtually no bass. Cheap plastic case and buttons. Inconspicuous snooze button makes it easy to ignore and snore. No EQ. Menu navigation is painful. Behemoth external power brick. No battery compartment.

http://blog.wired.com/gadgets/2007/08/review-radi-oso.html

Stupid fuck - you should have read the review !

2548. Southern Sudan Interactive Radio

Newsgroup: rec.radio.shortwave
Date: 2007-09-01 14:03:51 UTC
From: dxAce <dxAce@milestones.com>
Message-ID: <46D97147.DBD455F@milestones.com>
Source record: 122231

Southern Sudan Interactive Radio, 15470, heard here beginning at 1355 with test tones indicative of a Russian transmitter. Programming began at 1400. Shown in EiBi as emanating from Russia: Armavir/Tblisskaya/Krasnodar.
Transmission shown in EiBi as Tuesday, Thursday and Saturday 1400-1430.

Weak signal.

In the US, less than 100 of the stations that are really sole
proprietorships (out of thousands) are licensed in an individual's name...
all the rest are licensed to corporations that are totally owned by one
person or a person and his or her family (community property, etc.). Nobody

but you would expect someone to be such a fool as to own a license directly,
exposing the individual to personal responsibility that could be shielded
via incorporating.

Some highly noted and respected DXers of the 60's actually saw the stations,
and many more DXed them.

Actually, when someone sees a station, and finds that all the employees
answer to one person, that there is only one manager's office which that
same person occupies, etc., it is pretty easy to conclude who owned it.

You might want to consider using it as a vertical antenna. It would
complement your existing horizontal antennas.

I'd only consider using a vertical as a last resort. Been there, done that. They receive equally poorly in all directions.

Radium

You are referring to "the music of the spheres". The random noises generated by very distant quasars, galaxies, supernovae and other objects.

Yes it probably could and you would hear all sorts of weird pops, whistles and background noise. Just like at pretty much any other frequencies you care to monitor.

Mike G0ULI

Not sure what you mean by that exactly - but dumping the FRG100 for my
R75 was a good decision for me. The Icom simply bags me more
stations. Plenty of performance under what can only be termed
obnoxious RFI conditions.

What is it with the right wing CONservatives and their compulsion to suck dicks in public toilets? Evangelists, politicians, et.al.

The latest hypocritical asshole, Sen. Larry Craig - Idaho Republican, http://news.yahoo.com/s/ap/20070901/ap_on_go_co/craig_arrest made a career of waving the flag and forcing his "moral values" on the rest of us.

Communications Corp.: Donated large sums of money to some of the most conservative members of Congress. They are also the first cable company to offer hard-core adult movies to subscribers. Daily Kos article

Edison Misla Aldarondo, Republican legislator, was sentenced to 13 years in prison for molestation of his daughter and her friend for eight-year period starting when they were 9. Full Article

Robert "Bob" Allen, Florida state Rep. Arrested in the afternoon at a Veteran's Memorial Park for solicitation of prostitution from an undercover male officer inside a restroom. According to the papers Bob "offer[ed] to perform oral sex for $20".[1] [2]

Randal David Ankeney, Republican activist, arrested on suspicion of sexual assault on a child with force. He faces 6 charges related to getting a 13-year-old girl stoned on pot and then having sex with her. Source Also accused of sexually assaulting another girl. Denver ABC Article

Dick Armey (R-Texas), former professor, has been accused by The Dallas Observer of sexually harassing female students.

Jim Bakker, televangelist with Pat Robertson at Robertson's Christian Broadcasting network. Committed adultery with Jessica Hahn [3] and then used charitable donations to pay her hush money[4]. Fellow televangelists say he's gay. [5][6]Indicted on 23 federal charges of fraud, tax evasion, and racketeering [7].

Bob Barr, Republican Congressman from Georgia. Sponsored the anti-gay Defense of Marriage Act, saying "The flames of hedonism, the flames of narcissism, the flames of self-centered morality are licking at the very foundation of our society, the family unit." Was married three times. Paid for his second wife's abortion (she also suspected he was cheating on her). Failed to pay child support to the children of his first two wives and while married to his third and present wife was photographed licking whipped cream off of strippers at his inaugural party.

Merrill Robert Barter, Republican County Commissioner, pleaded guilty to unlawful sexual contact and assault on a teenage boy. Booth Bay Register Article

Robert Bauman, Republican congressman and anti-gay activist, was charged with having sex with a 16-year-old boy he picked up at a gay bar. Source: Washington Blade

Parker J. Bena, Republican activist and Bush Elector, pleaded guilty to possession of child pornography (including children as young as 3 years old) on his home computer and was sentenced to 30 months in federal prison and fined $18,000. Source

Louis Beres, chairman of the Christian Coalition of Oregon. 3 of his family members accuse him of molesting them when they were pre-teens. Editor and Publisher article. In August 06, Beres confessed. The Portland Mercury

Howard L. Brooks, Republican legislative aide and advisor to a California assemblyman, was charged with molesting a 12-year old boy and possession of child pornography. Sacramento Bee article

John Bolton Bush's appointee ambassador to United Nations, corroborated allegations that Mr. Bolton's first wife, Christina Bolton, was forced to engage in group sex have not been refuted by the State Department. Raw Story Article

Mike Bowers Former State Attorney General, prosecuted the famous Bowers vs. Hardwick case, based on Georgia anti-sodomy laws. Admitted to a 10-year adulterous affair Slate article

Pat Buchanan predidential candidate, media talking-head. His campaign refused to confirm or deny whether Pat has had chlamydia or any other venereal diseases.

Andrew Buhr, Republican politician, former committeeman for Hadley Township Missouri, was charged with two counts of first degree sodomy with a 13-year old boy. Source

Ted Bundy campaigned for the Republican Party. Infamous serial rapist who murdered 16 women. Source: BBC

Jim Bunn Congressman of Oregon: With his success due in great part to support from the Christian Coalition, Bunn won his congressional seat, then immediately ditched his wife (and mother of his five children), married a staffer, and put his new wife on the state payroll for the unheard-of salary of $97,500. Conservative Babylon

Can't increase power-levels to the jamming digital saddlebags - just more interference. And, on a side-note:

Hi ******,

"Your letter to FCC re 'corporate thugs' quoted in Radio World, which also printed your letter to Paul Smith. Beautiful. Official of NIST requested FCC stop rollout. Articles in 01 SEP R/W also show HD gang is corrupt and delusional."

Source record: 122274

* Adelphia Communications Corp.: Donated large sums of money to some of the most conservative members of Congress. They are also the first cable company to offer hard-core adult movies to subscribers. (Kos, 2.8.05)

* Edison Misla Aldarondo: The Republican legislator was sentenced to 10 years in prison for raping his daughter between the ages of 9 and 17. (ArmSub, 7.13.05)

* Randal David Ankeney, Colorado: was arrested in 2001 on suspicion of sexual assault on a child with force, sexual assault on a child, sexual exploitation of a child, marijuana possession, and possession of drug paraphernalia. Lured 13-year-old girl to his apartment, plied her with booze and pot, photographed her topless, then had sex with her. After his arrest, a second girl -- a 17-year-old campaign worker -- charged him with sexual assault. In 2002, he pleaded guilty to attempted sexual assault on a child. (Salon, 1.1.04)

* Dick Armey, Texas: Three women who had been students of Armey's reported that he engaged in inappropriate behavior. Armey's second wife had been one of his students. (Flynt - 47)

* Jim Bakker, televangelist: Involved in fraud related to time shares and adultery with Jessica Hahn. (ChT, 9.13.04)

* Bob Barr, Georgia: Is on his third marriage. (Salon). Photographs show him licking whipped cream off the breast of a stripper. Allegedly lied under oath about adulterous sex during a 1986 deposition. Dumped his second wife Gail and their two sons (ages 5 and 4) just before Thanksgiving in 1985. When Gail was diagnosed with breast cancer, she asked her husband to stop campaigning for the statehouse, but he refused. He never attended chemotherapy treatments with his wife. (Flynt - 20). His second wife Gail believes that he was having an affair with his future third wife Jeri while he and Gail were still married. (Flynt - 22). Allegedly condoned and paid for an abortion for his then-wife. (Flynt - 24)

* Merrill Robert Barter: The Republican County Commissioner pleaded guilty to unlawful sexual contact and assault on a teenage boy. (ArmSub, 7.13.05)

* Gary Bauer, former presidential candidate: Nine members of Bauer's staff quit, including Charles Jarvis, Bauer's campaign manager, and Tim McDonald, former chief of advance operations. Jarvis and McDonald have said publicly that they resigned in protest of Gary Bauer's "inappropriate" behavior in travelling alone and spending time

behind closed doors with a 26-year-old deputy campaign manager. Jarvis says that he and others in the campaign warned Bauer several times "in the clearest possible terms" that he was creating "the appearance of impropriety" by spending "hours and hours and hours behind closed doors with a young single woman." Neither Jarvis nor McDonald has directly claimed that sex occurred, though. An unnamed source in the Bauer campaign said that Bauer has been traveling alone with this hot 26-year old blond (deputy campaign manager Melissa McClard) on a daily basis and the two have been so inseparable that it was like a "husband-wife relationship." This source said that rumors of an affair have circulated inside the campaign for months, and that several people told the candidate of their concern. "Bauer told them basically to buzz off -- that it was his personal business," the source said. Other staff members who quit include media consultant Tom Edwards and Betty Barrett, who was Bauer's secretary for 15 years. They declined comment. (SC)

* Robert Bauman, Marlyand: Married dad of four pleaded not guilty in 1980 a charge of committing oral sodomy on a teenage boy in Washington. (Salon, 1.1.04)

* Parker J. Bena, Virginia activist: Convicted in 2001 of possession of child pornography. (Salon, 1.1.04)

* Bill Bennett: Few vices have escaped Bennett's withering scorn. He has opined on everything from drinking to "homosexual unions" to "The Ricki Lake Show" to wife-swapping. There is one, however, that has largely escaped Bennett's wrath: gambling. This is a notable omission, since on this issue morality and public policy are deeply intertwined. During Bennett's years as a public figure, casinos, once restricted to Nevada and New Jersey, have expanded to 28 states, and the number continues to grow. In Maryland, where Bennett lives, the newly elected Republican governor Robert Ehrlich is trying to introduce slot machines to fill revenue shortfalls. As gambling spreads, so do its associated problems. Heavy gambling, like drug use, can lead to divorce, domestic violence, child abuse, and bankruptcy. According to a 1998 study commissioned by the National Gambling Impact Study Commission, residents within 50 miles of a casino are twice as likely to be classified as "problem" or "pathological" gamblers than those who live further away. If Bennett hasn't spoken out more forcefully on an issue that would seem tailor-made for him, perhaps it's because he is himself a heavy gambler. Indeed, in recent weeks word has circulated among Washington conservatives that his wagering could be a real problem. They have reason for concern. The Washington Monthly and Newsweek have learned that over the last decade Bennett has made dozens of trips to casinos in Atlantic City and Las Vegas, where he is a "preferred customer" at several of them, and sources and documents provided to The Washington Monthly put his total losses at more than $8 million. A review of one 18-month stretch of gambling showed him visiting casinos, often for two or three days at a time (and enjoying a line of credit of at least $200,000 at several of

them). Bennett likes to be discreet. "He'll usually call a host and let us know when he's coming," says one source. "We can limo him in. He prefers the high-limit room, where he's less likely to be seen and where he can play the $500-a-pull slots. He usually plays very late at night or early in the morning--usually between midnight and 6 a.m." Despite his personal appetites, Bennett and his organization, Empower America, oppose the extension of casino gambling in the states. In a recent editorial, his Empower America co-chair Jack Kemp inveighed against lawmakers who "pollute our society with a slot machine on every corner." The group recently published an Index of Leading Cultural Indicators, with an introduction written by Bennett, that reports 5.5 million American adults as "problem" or "pathological" gamblers. Bennett says he is neither because his habit does not disrupt his family life. Bill Bennett's teensy little seven-figure gambling habit also mentions that he regularly plays (or at least played until recently) a private poker game with Robert Bork and Supreme Court Justices and fellow avatars of morality Antonin Scalia and William Rehnquist. Which, under DC law, is punishable by jail. (WM, 6.03). Apparently, Bennett is also an excessive smoker. (OTK, 5.5.03) "I happen to know that several major news organizations have for some time been looking into claims about portly conservative moralizer William Bennett and a leather-bound dominatrix bodybuilder in Las Vegas, a woman who has some very interesting narratives to recount. What news organizations? The top five that come to your mind are on the list. Some reporters have even traveled far and wide on this story. Does this mean the story is true? No. It is "developing," as our favorite cybergossip character assassin likes to say, and it may go nowhere." (NYP, 2.17.04)

* John Bolton: Corroborated allegations that Mr. Bolton?s first wife, Christina Bolton, was forced to engage in group sex have not been refuted by the State Department despite inquires posed by Hustler magazine publisher Larry Flynt concerning the allegations. Mr. Flynt has obtained information from numerous sources that Mr. Bolton participated in paid visits to Plato?s Retreat, the popular swingers club that operated in New York City in the late 1970s and early 1980s. ?The first Mrs. Bolton?s conduct raises the presumption that she fled out of fear for her safety or, at a minimum, it demonstrates that Mr. Bolton?s established inability to communicate or work respectfully with others extended to his intimate family relations,? said Mr. Flynt. ?The court records alone provide sufficient basis for further investigation of nominee Bolton by the Senate.? (Raw, 5.11.05)

* Mary Bono, California: Allegedly engaged in a torrid love affair prior to the death of her husband Sonny. (Flynt - 8) Looks like the cat's out of the bag on Cher's late ex-husband's widow and the dashing freshman Rep. Connie Mack IV (R-Fla.). Rumors have been swirling for weeks now about Rep. Mary Bono (R-Calif.) and Mack, both of whom recently filed for divorce from their spouses. On Friday, a wire service had more nerve than HOH and printed the rumor that Bono and Mack are an item, something neither House Member denied. The Scripps

Howard News Service reported that "romance may be in the air" for Bono and Mack, the son of former Sen. Connie Mack (R-Fla.) and great-grandson of Baseball Hall of Famer Connie Mack (all of whose legal names are Cornelius McGillicuddy). Mack's chief of staff, Jeff Cohen, told HOH on Monday that "Connie's marriage was in trouble for a long time, which is why he filed for divorce in August. But beyond that, he doesn't feel it's appropriate to discuss his personal life." Mack and his wife, Ann, have two children, ages 5 and 3. Cohen did not deny that the hunky Congressman is seeing the fetching widow of one of America's most famous pop-culture icons. Asked whether they are "dating" or "seeing each other," Cohen said, "The statement stands for itself." Nor did Bono's chief of staff, Frank Cullen, deny the rumored relationship. "Out of respect for what my boss is dealing with ... I'm not going to comment on that situation or other aspects of her life," he told HOH. He said he and the rest of Bono's staff are "just trying to support her." Cullen said Bono and her husband, Glenn Baxley, a Western-wear designer and former farm-league baseball player, have "mutually agreed to separate and have this divorce proceeding move forward." Bono, whose two children with the late singer are now 17 and 14, has been married to Baxley since November 2001. She filed for divorce last month. Her chief of staff described the couple's break-up as "amicable." It seems that most folks in the Florida and California delegations are withholding judgment, at least publicly, on whatever is going on between the Congressman and Congresswoman. But one freshman Member expressed disappointment with his classmate, saying through his spokesman, "When you got two kids, it's just not worth it." (BBWW, 10.20.05)

* Mike Bowers, Georgia: Admitted to a longtime extramarital affair. Had the former Georgia attorney general had a 10-year relationship with a state employee. (CSM)

* Karl Brabenec, California Young Republican: Made a name for himself by distributing fliers at 2003 Young Republicans national convention for "Karlpalooza '03," party offering "lots of beer, liquor and sex." (Salon, 1.1.04)

* Howard L. Brooks: The Republican staffer was charged with molesting a 12-year old boy and possession of child pornography. (Kos, 3.24.04)

* Pat Buchanan, former presidential candidate: Right before he turned 21 was pulled over, cursed out two police officers, resisted arrest and then kicked one of the police officers in the ass." (Franken - 172). Pat Buchanan, former presidential candidate: Buchanan himself said that in 1960, when he was 21, the draft board rejected him because he had Reiter's syndrome. What's that, you ask? It's a form of arthritis usually caused by chlamydia, a venereal disease (at least in America. In third world countries, a form of dysentery is the most common cause.) When pressed, a Buchanan aide said that if, indeed, sexual contact is the only way to get Reiter's,

Buchanan would never have admitted it. That's an honest if cynical response, but it assumes that Buchanan knows what causes Reiter's. He also could have had chlamydia for years, even to this day, without knowing it; chlamydia often has no symptoms, especially in men. Notice also that this aide's statement is not a denial. The Buchanan campaign has refused to confirm or deny whether Pat has had chlamydia or any other venereal diseases. (SC)

* Christopher Buckley, who sends up a philandering President in his new novel, "No Way to Treat a First Lady," is learning more about sex scandals - probably more than he wants. The married writer is embroiled in a paternity action with PR woman Irina Woelfle over her 2-year-old son, Jonathan. Woelfle, 40, formerly worked at Random House, which published "Thank You for Smoking," one of Buckley's five novels. Woelfle's lawyer Ed Nusbaum tells us that Buckley, the 50-year-old son of conservative pundit William F. Buckley Jr., "voluntarily agreed" to a DNA test, which established him as Jonathan's father. Buckley also took it upon himself to file suit recently in Stamford (Conn.) Superior Court. Nusbaum says that the journalist and former speechwriter to President George H.W. Bush is seeking "to establish what child support should be paid." "The amount being being paid now is inadequate," claims Nusbaum, who says that Woelfle and Buckley also disagree "over when he became aware of his paternity." Nusbaum adds that "at this juncture there has been no contact between Buckley and Jonathan - by his choice. Overtures were made by Irina, which he rejected." Buckley is also seeking to have the court file sealed and have the case labeled anonymously as "John and Jane Doe," according to Nusbaum, whose client is opposing that motion. (NYDN, 12.24.02)

* Andrew Buhr: The Republican politician was charged with two counts of first degree sodomy with a 13-year old boy. (ArmSub, 7.13.05)

* Ted Bundy: He was a handsome, charming, urbane and extrovert graduate, who did charity work and campaigned for the Republican Party in the USA - Ted Bundy did not fit the bill as a serial killer. And that was his great advantage. Friends, relatives and even detectives instinctively shied away from following up their suspicions about him. The women he killed also did not suspect a thing until it was too late ...Killed at least 16 victims. (BBC, 7.13.05)

* Jim Bunn, Oregon: With his success due in great part to support from the Christian Coalition, Bunn won his congressional seat, then immediately ditched his wife (and mother of his five children), married a staffer, and put his new wife on the state payroll for the unheard-of salary of $97,500. (Salon, 1.1.04)

* William Wesley Burmeister: The son of an influential Augusta lawmaker is in the Richmond County Jail on child molestation charges. William Wesley Burmeister, 23, of Clayton County was arrested in an aggravated child molestation case, said Richmond County sheriff's Maj. Ken Autry. Burmeister is the eldest of four children of Rep. Sue

Burmeister (R-Augusta). The lawmaker, a conservative Christian, has carried some of the Republican Party's most important legislation, including HB 188, requiring the publication of photographs of convicted sex offenders in local newspapers. Burmeister ushered that bill to final passage. (AJC, 4.1.05)

* John Allen Burt, anti-abortion activist: A six-day search for him began last based on charges of sexual misconduct asserted by two teenage girls who were living at Our Father's House, Burt's so-called home for "unwed mothers," according to the Pensacola News Journal. John Burt has a long history of connections to violence against abortion clinics in the Pensacola area. He has been arrested numerous times for his participation disruptive protests and clinic invasions. A 1986 invasion led by Burt was the impetus for the NOW v. Scheidler case. Burt led protests in Pensacola on behalf of two couples that bombed three local clinics on Christmas Day in 1984, according to the Sarasota Herald Tribune. Burt was outside the Pensacola clinic when an Our Father's House volunteer, Michael Griffin, murdered Dr. David Gunn in 1993. Griffin's family later claimed that John Burt had manipulated Griffin. Burt is also an associate of Paul Hill who murdered Dr. Bayard Britton and volunteer escort James Barrett outside another local Pensacola clinic in 1994. Burt is on film helping Paul Hill identify Dr. Britton outside the clinic in the weeks before Hill shot and killed Dr. Britton and his clinic escort. (FMF, 6.11.03)

* Dan Burton, Indiana: Admitted that he had fathered a child out of wedlock during an extramarital affair. (Flynt - 42). "Republicans and Democrats alike from that era recall ceaseless complaints from female staffers fed up with fending off Burton's sexual advances." (Flynt - 43). Several people report that Burton had sex with his assistant to the administrative assistant. A female lobbyist from Planned Parenthood claimed that Burton stuck his hand up her skirt. Numerous sources claim tha tBurton maintained sexual relationships with women on his Congressional and campaign payrolls. Ex-model Claudia Keller claims to have been romantically involved with Burton. (Flynt - 43)

* George H.W. Bush, former president: Allegedly engaged in an affair with an aide, Jennifer Fitzgerald, while serving as vice president. (Flynt - 56). For the May 29th issue of the Rolling Stone, Ashton Kutcher shares tidbits from his sometimes loco life - including an unforgettable party with the Bush gals. He tells Rolling Stone: "So we're hanging out ... The Bushes were underage drinking at my house. When I checked outside, one of the Secret Service guys asked me if they'd be spending the night. I said no. And then I go upstairs to see another friend and I can smell the green wafting out under his door. I open the door, and there he is smoking out the Bush twins on his hookah." (ET, 5.6.03)

* George W. Bush, Texas: Alleged cocaine abuser and alcoholic before reforming; reportedly paid for an abortion in his younger days;

several allegations of drunken driving, alleged affair with Tammy Phillips. (Salon, 1.1.04)

* Jeb Bush, Florida: Allegedly had an affair that was captured in photographs. (Flynt - 58). His 24-year-old daughter Noelle was jailed for having prescription pills while in a treatment center, violating a court-ordered drug treatment plan. (AP, 7.17.02). Noelle, was sentenced to 10 days in jail after being accused of having crack cocaine in her shoe while in drug rehab. (AP, 10.17.02) Appointed former a former Playboy bunny to several government posts while allegedly having an affair with her. (Salon, 1.1.04) The youngest son of Florida Gov. Jeb Bush was arrested early Friday and charged with public intoxication and resisting arrest, law enforcement officials said. John Ellis Bush, 21, was arrested by agents of the Texas Alcoholic Beverage Commission at 2:30 a.m. on a corner of Austin's Sixth Street bar district, said commission spokesman Roger Wade. (MSNBC, 9.17.05)

* Neil Bush: The president's younger brother and his estranged wife signed an "amicable, irrevocable" mediated divorce settlement ending 23 years of marriage, Neil Bush's lawyer said. All that remains for Neil and Sharon Bush, who have three teenage children, is for a formal divorce decree to be drafted and filed at the Harris County courthouse. (AP, 4.17.03) Admitted to cheating on his ex-wife with "three or four" different women, it was alleged. Bush told of the affairs during leaked video depositions to lawyers representing his former wife, Sharon. The father-of-three said: "I had sexual intercourse with perhaps three or four - I don't remember the exact number - women at different times." The affairs took place while he was on business trips to the Far East, according to a report in the New York Times. Bush allegedly told the lawyers: "In Thailand once, I have pretty clear recollection that there was one time in Thailand and Hong Kong." (Mirror, 7.14.03) The following events took place while he was married. "I had sexual intercourse with perhaps three or four, I don't remember the exact number, women, at different times. In Thailand once, I have a pretty clear recollection that there was one time in Thailand and in Hong Kong." (NYDN, 1.1.04)

* John Butler: The Republican activist was charged with criminal sexual assault on a teenage girl. (ArmSub, 7.13.05)

* Nancy J. Caffyn, Massachusetts: Divorced former state legislator. (AASP)

* Ken Calvert, California: Allegedly was caught with a prostitute by police in 1993. (Flynt - 54) He was sued as an alimony deadbeat by his ex-wife. (Dem, 8.11.03)

* Charles Canady, Florida: Lied to his constituents about his adulterous affair with Sharon Becker, which caused her divorce from Florida businessman Robert Becker. (Dem, 8.11.03)

* George Harrold Carswell, Judge: Arrested in 1976 for making a pass at an undercover cop in men's room at a Tallahassee, Florida, shopping mall. (Salon, 1.1.04)

* Dick Cheney, vice president: Despite having daughter who is a lesbian, opposes gay rights laws and supports people who oppose rights for homosexuals. Served on a ticket with a candidate who supported criminalization of homosexual sex. Voted against allowing the federal government to collect data on violent crimes based on sexual orientation. (IGF) Says he would support President Bush if he proposes a constitutional amendment banning same-sex marriage. Cheney, whose daughter is a lesbian, told The Denver Post and the Rocky Mountain News in interviews published Saturday that he still believes states should handle the issue, but that he would support Bush's decision. (AP, 1.10.04)

* Lynne Cheney, wife of the vice president: Wrote a book about lesbian "love," Sisters, yet went so far as to deny her daughter's lesbianism entirely, despite her daughter's open lesbianism. (IGF)

* Helen Chenoweth, Idaho: Reportedly had an affair with her married boss in 1977 and 1978. Allegedly had a long-term adulterous affiar with former business associate Vernon Ravenscroft. (Flynt - 45)

* Keola Childs: The Republican County Councilman pleaded guilty to molesting a male child. (ArmSub, 7.13.05)

* Mark Chmura, activist: Chmura was arrested for raping a 17-year old girl. He was acquitted -- but that doesn't erase the fact that he A) had sex with an underage girl (in a hot tub full of boozed-up teenagers at a party), and B) was himself married at the time. (Salon, 1.1.04)

* John Christensen, Nebraska: As part of divorce settlement, got his ex-wife to sign affidavit stating she was the one who had been "unfaithful." (Salon, 1.1.04)

* Kevin Coan, Missouri: Arrested in Illinois in 2001 for offering to pay for sex over the Internet from a 14-year-old girl -- who turned out to be male police officer working a chat-room sting. (Salon, 1.1.04)

* John Cox, Illinois: Cox's birth was the result of a rape; yet Cox has evaded questions about whether he's pro- or anti-choice. Is divorced. (Salon, 1.1.04)

* Carey Lee Cramer: A man who made national news in 2000 by producing an anti-Al Gore television ad featuring his stepdaughter is now charged in Hidalgo County with multiple counts of molesting the girl and another young relative. (Bobo, 6.4.05)

* Dan Crane, Illinois: In 1983, after a yearlong investigation by the House Ethics Committee, Crane was found to have engaged in an illicit sexual relationship with a 17-year-old girl working as a

congressional page. (Salon, 10.5.98)

* Paul Crouch, televangelist: First, extortion seems like the only word to describe what Enoch Lonnie Ford, the former TBN employee who says he and Crouch had extramarital sex in 1996, attempted. Crouch paid him a $425,000 settlement in 1998 after Ford accused the global network of wrongful termination. (ChT, 9.13.04)

* Richard A. Dasen Sr.: The Republican benefactor of conservative Christian groups, was charged with rape for allegedly paying a 15-year old girl for sex. Dasen, 62, who is married with grown children and several grandchildren, has allegedly told police that over the past decade he paid more than $1 million to have sex with a large number of young women. (ArmSub, 7.13.05)

* Gilbert Davis, Virginia: Former attorney for Paula Jones, allowed himself to be videotaped in Roanoke, VA, hotel room, drunk, while instructing a female client to disrobe. (Salon, 1.1.04)

* Doug Dean, Colorado: Divorc?, who had hot pants for female lobbyists, went ape after live-in lover (a lobbyist, of course) dumped him in 2001. Broke into her home, lay in wait for ex-squeeze, then scared all hell out of her when she arrived, and chased her down street, brandishing screwdriver. (Salon, 1.1.04)

* Tom Delay, Texas: There is a rumor that a photograph exists with DeLay locked in a sexual embrace with a Mexican prostitute. There is another rumor that claims that DeLay has a grown daughter in Texas whose mother is not DeLay's wife. Allegedly DeLay has paid support for this child. (Flynt - 49)

* Richard Anthony Delgaudio, Maryland: A prominent Republican fund-raiser who once said former President Bill Clinton was "a lawbreaker and a terrible example to our nation's young people" pleaded guilty in Baltimore Circuit Court to production of child pornography. Delgaudio, who was sentenced to two years' probation before judgment, admitted to taking lewd photographs of a 16-year-old girl he met in East Baltimore's Patterson Park in 2001. In some of the photos, he was engaged in sex with her, court records show. Delgaudio, 50, of Burke, Va., is a frequent talk-radio guest and national figure in conservative politics. He is president of the Legal Affairs Council, a group that helped pay the legal bills of former Reagan administration officials Oliver L. North and Caspar W. Weinberger after they were charged in connection with the Iran-contra affair. In his pornography case, there was additional evidence that Delgaudio took erotic images of at least one other, younger teen-ager, but that evidence was not admissible in court because police improperly stopped and searched Delgaudio, a judge ruled. (Sunspot, 4.24.03)

* Frank T. Devine, Illinois: This week, federal authorities filed a 12-count complaint against Frank T. Devine, a GOP precinct committeeman in the Kendall County Republican organization, for

allegedly defrauding more than 40 investors in what the FBI described as a classic Ponzi scheme. (IL, 12.23.04)

* Peter Dibble: The Republican legislator pleaded no contest to having an inappropriate relationship with a 13-year-old girl. (ArmSub, 7.13.05)

* Elizabeth Dole, North Carolina: Had an affair with Bob Dole when he was still married. (Salon, 1.1.04)

* Bob Dole, former presidential candidate: He had an affair with a younger woman (not Liddy) during the last four years of his first marriage, before suddenly dumping his loyal first wife Phyllis in 1972. Bob Dole married Phyllis Holden, a sweet, unambitious woman from a successful New England family. She bore him a daughter, Robin, though most voters probably have no idea he is a father. Robin is not a big part of his life, and Dole himself has said "I don't think I really knew her well. I was there for ceremonial things in school. But mostly they [Phyllis and Robin] were here and I was not." Bob did make his decision, and he stayed married to politics, often coming home at midnight, leaving at 5 am the next morning. His marriage naturally suffered, and in 1971 he asked Phyllis for a divorce, out of the blue, no discussion. During the last year of their marriage, she has said, he was only home for supper 4 nights. (SC)

* Bob Dornan, former presidential candidate: His wife Sallie has left him 3 or 4 times, and alleged in several aborted divorce suits over 16 years that he beat her. For example, in her 1961 divorce suit she stated under oath that he "dragged her about the home... by her hair and ... exhibited a revolver." In June 1966, Dornan was found guilty of a "violent attack" on his wife and was ordered to go to jail, though police records do not show him actually serving any time. (SC)

* Brian J. Doyle: The deputy press secretary for the U.S. Department of Homeland Security was arrested Tuesday for using the Internet to seduce what he thought was a teenage girl, authorities said. Brian J. Doyle, 55, of Silver Spring, Md., was arrested on charges of use of a computer to seduce a child and transmission of harmful material to a minor. The charges were issued out of Polk County, Fla. Doyle had a sexually explicit conversation with what he believed was a 14-year-old girl whose profile he saw on the Internet on March 14, the Polk County Sheriff's Office said in a statement. The girl was an undercover Polk County Sheriff's Computer Crimes detective, the sheriff's office said. Doyle sent the girl pornographic movie clips and had sexually explicit conversations via the Internet, the statement said. During other online conversations, Doyle revealed his name, that he worked for the U.S. Department of Homeland Security and offered his office and government issued cell phone numbers, the sheriff's office said. On several occasions, Doyle instructed her to perform a sexual act while thinking of him and described explicit activities he wanted to have with her, investigators said. Homeland

Security press secretary Russ Knocke in Washington said he could not comment on the details of the investigation. "We take these allegations very seriously, and we will cooperate fully with the ongoing investigation," Knocke said. (AP)

* David Dreier, California: A Republican congressman from California who has repeatedly voted against gay rights measures is said to be gay himself, and at least three MediaNews Group newspapers are said to have instructed its reporters not to ask questions about the congressman's sexuality or how it relates to public policy. Brad Smith, Dreier?s chief of staff with whom he is said to have lived, is paid an unusually high salary relative to the chief of staffs of other powerful congressmen, including Speaker of the House Dennis Hastert. (Raw, 1.18.05)

* Nicholas Elizondo: The Republican director of the "Young Republican Federation" molested his 6-year old daughter and was sentenced to six years in prison. (ArmSub, 7.13.05)

* Thomas Evans, Delaware: In 1981, shacked up in a Florida cottage with Rep. Tom Railsback (R-Ill.), Rep. Dan Quayle (R-Ind.) and insurance-industry lobbyist Paula Parkinson. Of the three, only Evans admitted to having sex with Parkinson. (Salon, 1.1.04)

* Mike Ferguson: In his dark suit, knotted tie and official congressional ID pin on his lapel, Republican House member Mike Ferguson looked out of place at the Rhino Bar and Pumphouse, a Georgetown saloon popular with college kids. "He shouldn't have even been at the bar," 21-year-old Georgetown University junior Michelle Mezoe told us. "He and his group" - two unidentified staffers, also wearing suits - "stuck out like sore thumbs." Yesterday Mezoe accused the congressman, a 32-year-old married father of three representing New Jersey's 7th District, of grabbing her in the wee hours Wednesday morning. She said Ferguson removed his ID pin and handed it to her, saying she could keep it if she would "come back and have a drink with me." Mezoe said she refused to return it unless Ferguson apologized for his "disrespectful" behavior. An apology was not forthcoming. (WP, 4.4.03)

* Frank Figueroa: The former head of the Department of Homeland Security's program to stop child predators (Operation Predator), today pleaded no contest to charges he exposed himself to a 16-year-old girl. According to the victim, "Figueroa pulled up a leg of his shorts, exposed himself and masturbated for about 10 minutes" in front of her. (TP, 4.5.06)

* Larry Dale Floyd, Texas: A Denton County constable drove to a Colorado restaurant on Thursday and called a woman he met through the Internet to let her know he had arrived, according to court papers. Instead of Marsha showing up with her 8-year-old daughter for a sexual encounter, he met her colleagues ? Ca?on City, Colo., police officers. Mr. Floyd has been a Denton County constable since 1993. A Republican,

Mr. Floyd was unopposed in his most recent re-election in November. (Eschaton, 7.30.05)

* Mark Foley, Florida: Reports that he's gay are about to spread from alternative and gay media outlets to major Florida newspapers, Foley said. He blamed Democratic activists for spreading the rumor and decried the "repulsive" campaign tactic. He wanted reporters to know that he won't answer questions about his sexuality; it has nothing to do with his candidacy. Supports an anti-gay agenda. (SPT, 6.1.03)

* Kirk Fordice, Mississippi: Allegedly had an affair and then got divorced. Fordice was one of Bill Clinton's biggest critics. (DM)

* Galen Fox, Hawaii: The 27-year-old woman who accused state Rep. Galen Fox of sexually molesting her on a United Airlines flight testified that she awoke to find his hand inside her jeans and rubbing her crotch. Her testimony was consistent with statements she gave to FBI investigators a day after the Dec. 18 incident on Flight 56, an overnight flight from Honolulu to Los Angeles. After a non-jury trial in the Central District of California on Oct. 20, U.S. District Judge Margaret Nagle found Fox (R, Waikiki-Ala Moana) guilty of a misdemeanor charge of abusive sexual contact with another person without their consent. (Bobo, 11.5.05)

* Bill Frist, Tennessee: The senator's son, Jonathan Frist, 17 was arrested for DUI and possession of alcohol by a minor. (NC5, 5.6.03) Frist acknowledged in a 1989 book that he routinely killed cats while an ambitious medical student at Harvard Medical School in the 1970s. His office said it had no record on how many cats died. Frist disclosed that he went to animal shelters and pretended to adopt the cats, telling shelter personnel he intended to keep them as pets. Instead he used them to sharpen his surgical skills, killing them in the process. (UPI, 12.31.02)

* Jack W. Gardner: The Republican Councilman was convicted of molesting a 13-year old girl. (ArmSub, 7.13.05)

* Richard Gardner, Nevada: Convicted in California in 1988 for lewd and lascivious behavior with a child under the age of 14 -- a felony sex crime. The victim was his own 12-year-old daughter. Investigation led to exposure of two additional sex-crime convictions, one involving the same daughter, and one involving another daughter under age 14. (Salon, 1.1.04)

* Newt Gingrich, Georgia: Visited his wife when she was recovering from cancer surgery. Gingrich brought along their two daughters and a yellow legal pad with his terms for a divorce. (Franken - 44). After his divorce from Jackie, Newt Gingrich was late with his alimony payments and she had to take him to court twice to provide adequate support for her and the girls and that her church had to take up a colection ot help them get by. (Franken - 45). "We would have won in 1974 if we could have kept him out of the office, screwing her [a

young volunteer] on the desk." - Dot Crews, his campaign scheduler at the time. Several newspapers reported that Newt Gingrich was dating and basically living with Callista Bisek, a "willowy blond Congressional aide 23 years his junior." Biske, 33, was spending nights at Gingrich's apartment near the Capitol and had her own key. In an amazing act of hypocrisy, Gingrich was apparently dating Bisek all during Clinton-Lewinsky adultery scandal, even as he proclaimed family values and bitterly criticized the President for his adultery. Reporters and other Washington insiders have known about this relationship since 1994, even before Gingrich became Speaker of the House, but did not have any solid proof to report. In 1995, Vanity Fair magazine described Bisek as Gingrich's "frequent breakfast companion." Gingrich was married to Marianne Gingrich during all of that time, and just filed for divorce in August 1999. This is hardly the first time Newt has cheated, either. "It was common knowledge that Newt was involved with other women during his [first] marriage to Jackie. Maybe not on the level of John Kennedy. But he had girlfriends -- some serious, some trivial." -- Dot Crews, his campaign scheduler throughout the 70s. One woman, Anne Manning (who was married at the time), has come forward and confirmed a relationship with him during the 1976 campaign. "We had oral sex. He prefers that modus operandi because then he can say, 'I never slept with her.'" Kip Carter, his former campaign treasurer, was walking Newt's daughters back from a football game one day and cut across a driveway where he saw a car. "As I got to the car, I saw Newt in the passenger seat and one of the guys' wives with her head in his lap going up and down. Newt kind of turned and gave me this little-boy smile. Fortunately, Jackie Sue and Kathy were a lot younger and shorter then." (SC). According to the The Irish Times , Newt's decision to resign was actually based on his discovery that Larry Flynt had uncovered some very damaging personal information. Flynt had begun "negotiating with several parties, people described as having an association with a prostitution ring, for a series of credit card receipts that showed Mr Gingrich paying for services. In the midst of that negotiation, Mr Gingrich resigned suddenly." (RA). Asked the Catholic Archdiocese of Atlanta for an annulment of his second marriage, which ended in divorce after 19 years. Gingrich's second wife, Marianne Gingrich, said through her attorney that she learned of the request this week when she received a letter from the archdiocese. The couple were divorced in April 2000, nine months after Newt Gingrich filed for divorce and acknowledged a seven-year affair with Callista Bisek, a former congressional aide. Gingrich and Bisek were married in August 2000. (AP, 5.10.02)

* Philip Giordano, the Republican mayor of Waterbury, Connecticut, was arrested on two federal charges dealing with "sexual activity" involving a child, the FBI said. Special agent Lisa Bull said the mayor was arrested on two offenses: The use of an interstate facility to entice a child under the age of 16 to engage in sexual activity, and conspiracy to carry out that offense. (CNN 2, 7.26.01)The former Waterbury, Connecticut mayor was convicted on 17 out of 18 counts on

his indictment. Counts 1 and 2 were for the following: "Philip A. Giordano, while acting under color of the laws of the state of Connecticut, willfully deprived the victim of rights and privileges secured and protected by the Constitution and laws of the United States. That includes the right not to be deprived of liberty without due process of law, which includes the right to be free from aggravated sexual abuse and sexual abuse. He violated this by coercing and forcing the victim, who was younger than 12, to engage in oral sex and genital contact with him and by fondling her, resulting in bodily injury." (CCB, 3.26.03)

* Matt Glavin, former Southeastern Legal Foundation President: Glavin was charged back in May with public indecency for allegedly masturbating in public at the Chattahoochee National Recreation Area on Medlock Bridge road in North Fulton County. An undercover federal police officer reported that Glavin fondled him after he encountered the activist pleasuring himself. And it wasn't the first time that Glavin had been caught doing this in the same park. In 1996, Glavin quietly pleaded "no contest" to charges of public indecency after being caught in an identical situation. (CLoaf, 10.14.00)

* Marty Glickman, commentator/editor/publisher: Seven years ago," wrote Tallahassee political commentator Marty Glickman (aka Republican Marty) in his newsletter The Ugly Truth, "a rednecked, classless pervert named Clinton from a low rent state like Arkansas was tearing down all standards for the highest office in the land... Decency, morals, telling the truth, and standing accountable were all American values that were on the line. With a rapist, a liar, and a sexual harasser and his First Enabler Hillary Clinton in charge; the country and it's children were perilously close to sinking beneath recovery." Harsh words, but we hope they taste good - because Republican Marty sure is eating them right now. Last week he was taken into custody by Florida police on four counts of unlawful sexual activity with a juvenile and one count of the delivery of LSD. Yes, it turns out that Marty was doing his own bit to help the children of America by giving drugs and money to underage girls in exchange for sex. (DU, 4.23.01)

* Rudolph Giuliani, former New York mayor: His estranged wife has filed for divorce, citing adultery. "If there's going to be a divorce, let's have the truth about why ? Rudy's open and notorious adultery," she said. (CBS, 1.21.02)

* Phil Gramm, Texas: Invested $7500 in a soft-core porn movie in 1974. (Franken - 153). Is on his second wife. (DO)

* Mark A. Grethen, Virginia: Convicted in 2002 on six counts of sex crimes against children. (Salon, 1.1.04)

* J.D. Guckert/Jeff Gannon, reporter: Homosexual who supports conservative causes and served as a pro-White House reporter under a fake name. (HC, 2.11.05)

* Jon Grunseth: The Republican businessman withdrew his candidacy for Minnesota governor after allegations surfaced that he went swimming in the nude with four underage girls, including his daughter. (ArmSub, 7.13.05)

* Steve Gunderson, Wisconsin: Homosexual who supported the Christian Coalition in public. (Salon, 1.1.04)

* Susan J. Haase, Illinois: Divorced clerk of Wheatland Township and member of Illinois State Republican Central Committee. (AASP)

* Dr. W. David Hager: Sex was always a source of conflict in the marriage. Though it wasn't emotionally satisfying for her, Davis says she soon learned that sex could "buy" peace with Hager after a long day of arguing, or insure his forgiveness after she spent too much money. "Sex was coinage; it was a commodity," she said. Sometimes Hager would blithely shift from vaginal to anal sex. Davis protested. "He would say, 'Oh, I didn't mean to have anal sex with you; I can't feel the difference,'" Davis recalls incredulously. "And I would say, 'Well then, you're in the wrong business.'" By the 1980s, according to Davis, Hager was pressuring her to let him videotape and photograph them having sex. She consented, and eventually she even let Hager pay her for sex that she wouldn't have otherwise engaged in--for example, $2,000 for oral sex, "though that didn't happen very often because I hated doing it so much. So though it was more painful, I would let him sodomize me, and he would leave a check on the dresser," Davis admitted to me with some embarrassment. This exchange took place almost weekly for several years. For the next seven years Hager sodomized Davis without her consent while she slept roughly once a month until their divorce in 2002, she claims. "My sense is that he saw [my narcolepsy] as an opportunity," Davis surmises. Sometimes she fought Hager off and he would quit for a while, only to circle back later that same night; at other times, "the most expedient thing was to try and somehow get it [over with]. In order to keep any peace, I had to maintain the illusion of being available to him." At still other moments, she says, she attempted to avoid Hager's predatory advances in various ways--for example, by sleeping in other rooms in the house, or by struggling to stay awake until Hager was in a deep sleep himself. But, she says, nothing worked. One of Davis's lifelong confidantes remembers when Davis first told her about the abuse. "[Linda] was very angry and shaken," she recalled. (Eschaton, 5.12.05)

* Mark Harris: The Republican city councilman, who is described as a "good military man" and "church goer," was convicted of repeatedly having sex with an 11-year-old girl and sentenced to 12 years in prison. (ArmSub, 7.13.05)

* W. John Hathaway, Maine: A Maine Republican seeking a seat in the United States Senate who has cast himself as a champion of family values, became a center of controversy today after New England newspapers published six-year-old accusations that he had had sex with his children's 12-year-old baby sitter. (NYT 6.6.96)

* Howard Scott Heldreth: The Republican anti-abortion activist is a convicted child rapist in Florida. (ArmSub, 7.13.05)

* Jesse Helms: Campaigned against gay rights. Has a gay granddaughter. (Raw, 10.28.04)

* Jon Hinson, Mississippi: Newly wedded (to a woman), he was arrested at a D.C. gay bar in 1976. A year later, escaped a fire in a gay porn theatre. Was arrested again in 1981 on charges of attempted oral sodomy. In a men's room. In a House office building. (Salon, 1.1.04)

* Rev. Mike Hintz: A Des Moines youth pastor, who had appeared publicly with President Bush promoting his tax cuts, is charged with sexual exploitation by a counselor. KCCI learned that the married father of four recently turned himself in to Johnston police. Rev. Mike Hintz was fired from the First Assembly of God Church, located at 2725 Merle Hay Road, on Oct. 30. Hintz was the youth pastor there for three years. Police said he started an affair with a 17-year-old woman in the church youth group this spring. (IAC, 12.7.04)

* Hooters of America donated 97% of its money to Republicans (Kos, 1.1.05)

* Deal Hudson, Catholic GOP adviser/publisher: He announced he would step down from his volunteer position, after the National Catholic Reporter, another Catholic publication, published the details of a decade-old sexual harassment case involving Hudson and an 18-year-old college student. (BN, 1.18.05)

* Michael Huffington, California: Columnist-wife Arianna dumped him when she found out he was cheating on her. With other men. (Salon, 1.1.04)

* Tim Hutchinson, Arkansas: In 1996 when he first ran for the Senate, he styled himself as a conservative, family-values Republican, an ideological approach intended to appeal to this state's many Christian-right voters. The breakdown of the American family, he said, was a critical national issue. Hutchinson won fairly comfortably, with 53 percent of the vote, the first Republican since Reconstruction to capture a Senate seat in heavily Democratic Arkansas. Again, Hutchinson is identifying himself as a conservative, family-values Republican. The problem is that in 1999 Hutchinson, now 52, divorced his wife of 29 years, Donna, with whom he had three sons, and shortly afterward married a former member of his office staff, Randi Fredholm, now 39. (NYT, 5.15.02)

* Henry Hyde, Illinois: Allegedly had an affair for five years with Cherie Snodrass, a young mother of three, giving her an apartment and giving her gifts of jewelry and furniture. He initiated the affair by telling Snodgrass he was single. (Flynt - 39). He apparently broke up the Snodgrass family. In 1983, after a yearlong investigation by the House Ethics Committee, Crane was found to have engaged in an illicit sexual relationship with a 17-year-old girl working as a

congressional page. When the question of whether the House should expel, censure or merely reprimand Crane reached the floor, Hyde popped up to beg mercy for his friend. "We sit here not to characterize the crime, the breach, the transgression, because we all know the transgression, which is admitted and it is stipulated as reprehensible." Even so, Hyde pleaded, "In searching our souls for the appropriate punishment, I ask the members to consider this situation in its totality, in its entire context." (Salon, 10.5.98)

* Bobby Hodge - A Republican candidate for Attala County Circuit Clerk was arrested and charged with child molesting. A spokesman for the sheriff's department said that Hodge, a plummer and electrician, is accused of molesting a "young girl." She was believed to be a preteen, but authorities declined to give details about the victim or the circumstances. (KMSH, 2.11.03)

* Paul Ingram, former head of the Republican Party in Thurston County, Wash.: Pleaded guilty to six rape charges in 1989. He is serving a 20-year prison sentence. Two relatives had accused him of attacking them for 17 years during rituals that included killing two dozen babies in Satanist rituals. (LAT, 5.11.91)

* Bill Janklow, South Dakota: Bill Janklow, a blunt-spoken political titan from South Dakota, will serve 100 days in a county jail for the death of a motorcyclist who slammed into his speeding car last August. (CNN 1.22.04) In 1955, at age 16, appeared in juvenile court (Moody County, South Dakota) for allegedly assaulting a 17-year-old girl. Janklow denied charge was rape, but inadvertently tipped off public with smug statement, "It didn't go that far, but it was preliminary to that sort of thing." Charge dropped, records sealed. In 1967, attorney Janklow was accused of rape by Jancita Eagle Deer, 15-year-old babysitter for Janklow family. Janklow, then working for the Office of Economic Opportunities on the Rosebud Sioux reservation, denied charge, said enemies were trying to smear him. (Salon, 1.1.04)

* Jimmy Karalis, California Young Republican: Made a name for himself by distributing fliers at 2003 Young Republicans national convention for "Karlpalooza '03," party offering "lots of beer, liquor and sex." (Salon, 1.1.04)

* Jack Kemp, New York: You'll hear a lot about Kemp's marriage, four children, and 14 children -- but you seldom hear anything about his first wife. (Salon, 1.1.04)

* Bernard Kerik: Kerik, the man tasked with protecting the United States from the threat of terrorist attacks, fathered a daughter with a South Korean woman while serving on the peninsula in the mid-1970s, U.S. media reported over the weekend. The baby, named Lisa, was born in 1975. But Kerik deserted her and her mother when he left the country in February 1976. (KORT, 12.5.04) Conducted two extramarital affairs simultaneously, using a secret Battery Park City apartment for the passionate liaisons, the New York Daily News has learned. The

first relationship, spanning nearly a decade, was with city Correction Officer Jeannette Pinero; the second was with famed publishing titan Judith Regan. His affair with Regan, the head of her own book publishing company, lasted for almost a year. (Eschaton, 12.13.04) Then there's the story that celebrity book publisher Judith Regan had to hire a personal bodyguard when Kerik started 'hounding' her after their relationship went sour. (TPM, 12.12.04) Investigators conducting a background check of Bernard Kerik last week as part of his confirmation hearing uncovered that the then-Secretary of Homeland Security nominee was married to a woman he has apparently kept a secret for the past 20 years. Friends of his said they were not aware of the woman, and Kerik did not acknowledge the marriage in his best-selling autobiography, "The Lost Son: A Life in Pursuit of Justice." Instead, he wrote about only two marriages, one to a New Jersey woman named Jacqueline, whom he married in 1983 when he was 28, and one to his current wife, Hala, whom he married in 1998. But Kerik, who withdrew his name for consideration for the nation's top security post on Friday, was also married to the former Linda Hales in North Carolina. Kerik and Hales, who has since remarried and changed her name to Priest, were married Aug. 10, 1978, when she was 27 and he was three weeks shy of 24, according to her lawyer, Ronnie Mitchell. They separated in 1982 and were officially divorced June 6, 1983, Mitchell told Newsday. (NYND, 12.15.04) Another story in the Post reports that Kerik was not only stalking Judith Regan but her children too. (TPM, 12.16.04)

* Earl Kimmering: An Anderson man who gained statewide attention by fighting attempts by a gay couple to adopt an 8-year-old girl under his foster care now is charged with molesting her. (AP, 1.18.05)

* Henry Kissinger, former Secretary of State: Had a 1964 divorce and a 1974 re-marriage, peppered with lots of screwing around. (Salon, 1.1.04)

* State Sen. William "Pete" Knight, California: David Knight, son of the state senator who was the author of the California ballot measure that banned same-sex marriage, defied his father's law and wed his partner of 10 years Tuesday in a quiet ceremony attended by just two friends in San Francisco City Hall. (SFG, 3.10.04)

* Jim Kolbe, Arizona: Was a closeted homosexual who supported an anti-gay agenda. (Salon, 1.1.04)

* Ernie Konnyu, California: Career ended in 1987 after two former aides detailed sexual harassment to the media. (Salon, 1.1.04)

* Stephen LaTourette, Ohio: Extramarital affair with Washington lobbyist led to divorce after 21 years of marriage (and four kids). When wife pleaded for reconciliation & marriage counseling, he said no thanks, and asked for divorce. Over the phone. (Salon, 1.1.04)

* Alan L. LeDoux, Kansas: Convicted in 2003 of aggravated criminal sodomy, aggravated kidnapping and aggravated burglary. A plea bargain dismissed the charge of rape. Holding a knife to her throat, he blindfolded, duct-taped, and raped his victim in her own bed. The victim was a member of LeDoux's wife's family, whom LeDoux described as "a woman who had treated me with nothing but grace." The victim said she "thought of LeDoux as a brother and a father-figure to her son and daughter." (Salon, 1.1.04)

* Rush Limbaugh, conservative radio personality: Although he was insecure and did not get out much, at 26, he married, but was divorced after three years. His second wife moved out on Christmas weekend of 1988, and their divorce was final in 1990. In 1994, Rush married Marta Fitzgerald, a woman Rush met online. They have worked together in a number of endeavors, and to this day remain happily married. (PIR) Conservative radio commentator Rush Limbaugh announced Friday that he and his wife, Marta, were divorcing. (AP, 6.11.04) Openly admitted to being a drug addict. (CNN, 10.10.03)

* Bob Livingston, Louisiana: "I have on occasion strayed from my marriage, and doing so nearly cost me my marriage and my family." (Flynt - 14). Allegedly had sex with lobbyists included those who represented the defense industry. (Flynt - 15)

* Thatcher Longstreth, Pennsylvania: The Philadelphia Inquirer reported that Longstreth had filed for divorce on June 6th, after 60 years of marriage! Once again, there is here the unspeakable interference of the Other Woman, the Councilman's Chief of Staff, Melanie Hopkins, age 51. His office personnel say that they plan to marry. (PMI)

* Donald Lukens, Ohio: In a conversation secretly videotaped by a Columbus television station last November, Republican Donald Lukens talked with Anna Coffman, an unemployed widow, in a fast-food restaurant about his relationship with the woman's daughter, now 17. "I couldn't understand a man in your position, why you're messin' around with these teenagers," said Coffman. Replied Lukens, who turns 58 this week: "I didn't really know she was a teenager. I do now, of course." (Time 2.13.89)

* Connie Mack (III): Looks like the cat's out of the bag on Cher's late ex-husband's widow and the dashing freshman Rep. Connie Mack IV (R-Fla.). Rumors have been swirling for weeks now about Rep. Mary Bono (R-Calif.) and Mack, both of whom recently filed for divorce from their spouses. On Friday, a wire service had more nerve than HOH and printed the rumor that Bono and Mack are an item, something neither House Member denied. The Scripps Howard News Service reported that "romance may be in the air" for Bono and Mack, the son of former Sen. Connie Mack (R-Fla.) and great-grandson of Baseball Hall of Famer Connie Mack (all of whose legal names are Cornelius McGillicuddy). Mack's chief of staff, Jeff Cohen, told HOH on Monday that "Connie's marriage was in trouble for a long time, which is why he filed for divorce in August. But beyond that, he doesn't feel it's appropriate

to discuss his personal life." Mack and his wife, Ann, have two children, ages 5 and 3. Cohen did not deny that the hunky Congressman is seeing the fetching widow of one of America's most famous pop-culture icons. Asked whether they are "dating" or "seeing each other," Cohen said, "The statement stands for itself." Nor did Bono's chief of staff, Frank Cullen, deny the rumored relationship. "Out of respect for what my boss is dealing with ... I'm not going to comment on that situation or other aspects of her life," he told HOH. He said he and the rest of Bono's staff are "just trying to support her." Cullen said Bono and her husband, Glenn Baxley, a Western-wear designer and former farm-league baseball player, have "mutually agreed to separate and have this divorce proceeding move forward." Bono, whose two children with the late singer are now 17 and 14, has been married to Baxley since November 2001. She filed for divorce last month. Her chief of staff described the couple's break-up as "amicable." It seems that most folks in the Florida and California delegations are withholding judgment, at least publicly, on whatever is going on between the Congressman and Congresswoman. But one freshman Member expressed disappointment with his classmate, saying through his spokesman, "When you got two kids, it's just not worth it." (BBWW, 10.20.05)

* Sam Malone, Ohio: Malone's son told police he came home from the Kings Island outing and his father said: "I know what you did. ... I'm going to wear your butt out." According to the teen's statement, Malone ordered him to his room, telling him: "You'd better go ahead and meditate. If I were you, I wouldn't eat anything either." Malone took his shirt off and got a belt from his room, according to the report and police records. When the boy tried to explain why he was late to the checkpoint, Malone said he didn't want to hear it and told his son to turn around, take off his shirt and pull his pants down, the statement said. Malone is accused of hitting the boy several times with the belt. The hospital records detail bruising to his chest, arms, back and buttocks. The boy told police he fell at one point and Malone continued to hit him. "I pay for your school, and you bring home poor grades," Malone told his son during the beating, according to the boy's statement. "You're not paying attention." When his father stopped hitting him, the boy told police Malone told him he wasn't finished with him, adding: "I'm going to whip the black off you." (BBB, 7.6.05)

* Bonnie Martinez, Montana: Divorced former state representative. (AASP)

* Jon Matthews: The conservative talk show host is being investigated by police for alleged indecency with a child. (ABC) Republican talk show host Jon Matthews pleaded guilty to exposing his genitals to an 11 year old girl. (ArmSub, 7.13.05)

* John McCain, Arizona: Has a reputation as a politician who has difficulty keeping his pants zipped, according to Republican sources. He acknowledges that his adultery broke up his first marriage. His

second wife Cindy, the daughter of a wealthy Budweiser beer distributor, was addicted to prescription narcotics and even stole hard drugs from a medical charity that she ran. (SC)

* Mitch McConnell, Kentucky: His daughter Claire, is accused of abusing students. "The first sign of trouble came last year when one couple learned their daughter had been strapped into her chair with a leather belt. Since then, more than a dozen parents have removed their elementary school youngsters amid complaints about disciplinary tactics by one of the teachers at Hawthorne Valley. Punishment included tying the hands of students and taping their mouths shut if they misbehaved." (ATU, 7.17.03)

* Jim McCrery, Louisiana: Was a closeted homosexual who supported an anti-gay agenda. (Salon, 1.1.04)

* John McKay, Florida: During a divorce, his wife accused him of having an affair with a young telecommunications lobbyist. The newspapers ran with it. A week later, McKay admitted he was involved with the woman, resigned as chairman of the state's powerful Ways and Means Committee but denied he gave any special treatment to the lobbyist. The two later wed. (CNN)

* John McLaughlin, television pundit: He's been accused of sexual harassment by several female employees, settling a suit out of court with one in 1989. (FAIR, 8.94)

* Pat McPherson: The Douglas County Election Commissioner was arrested for fondling a 17-year-old girl. (Kos, 3.24.04)

* Timothy McVeigh: Oklahoma City bomber who killed a number of children. "His only known affiliations are as a registered Republican in his New York days, and as a member of the National Rifle Association while he was in the Army." (CNN, 3.29.01)

* Ken Mehlman, Bush administration: Is allegedly a closeted homosexual who has been extremely homophobic while in the public eye. (BlogA, 11.10.05)

* Jeff Miller, Ohio: A state senator sponsoring a constitutional amendment aimed at "solemnizing the relationship of one man and one woman" is accused in a divorce case of cheating on his wife. (Eschaton, 4.14.05)

* Guy Milner, Florida: Married not once, not twice, but three times. (Salon, 1.1.04)

* Susan Molinari, New York: Divorced & remarried (to former NY congressman Bill Paxon). (Salon, 1.1.04)

* Nicholas Morency: The Republican anti-abortion activist pleaded guilty to possessing child pornography on his computer and offering a bounty to anybody who murders an abortion doctor. (ArmSub, 7.13.05)

* Rupert Murdoch, owner of Fox: Another fine program brought to you by Rupert Murdoch and Fox: "The Fox network will air a special next month, "Who's Your Daddy?," where a daughter given up for adoption as an infant attempts to guess the identity of her birth father for a $100,000 prize. Activists in the adoption community immediately attacked the special, which will air for 90 minutes Jan. 3." (SOSD, 12.16.04)

* Sue Myrick, North Carolina: In 1989, Myrick was running for a second term as Charlotte mayor when news reports revealed that she committed adultery with a married man in 1973. (Dem, 8.11.03)

* State Senator Drew Nixon: In 1997 was arrested and convicted of soliciting a prostitute who turned out to be an undercover police officer. (QR, 8.15.03)

* Jim Oberweis, Illinois: Divorced Senate candidate. (Salon, 1.1.04)

* Bill O'Reilly, television pundit: Fox News Channel host Bill O'Reilly and his former associate producer, Andrea Mackris, have agreed to settle their dispute over her allegations that the television personality harassed her sexually. In a case filed earlier this month, Mackris alleged that O'Reilly, who is married, made explicit phone calls to her in which he recommended she use a vibrator, described sexual fantasies involving her and masturbated. (CNN, 10.28.04)

* Bill Owens, Colorado: Killed a 28-year marriage. Devout Catholic who made "family values" the mainstay of his platform had to back out of keynote speeches to ultra-con groups such as Focus on the Family. (Salon, 1.1.04)

* Bob Packwood, Oregon: Former Oregon Sen. Packwood set all records for sexual harassment while serving in Congress for more than a quarter-century. The old goat apparently made a sexual play on every pubescent female left alone for more than two minutes with the powerful Republican chairman of the Senate Finance Committee. Packwood resigned in the fall of 1995 after the Ethics Committee voted for his expulsion from the Senate. The committee released 10,000 pages of evidence against Packwood, much of it detailing his sexual abuse and harassment of women. The committee found Packwood sexually harassed at least 17 women, mostly Senate employees, campaign workers and others "who were effectively powerless to protest in the face of his position as a United States senator." Twenty-nine women had accused Packwood of sexual misconduct. (TO, 1997)

* Brent Parker: The Republican state representative was arrested for soliciting sex from an undercover officer posing as a male prostitute. (Kos, 3.24.04)

* Jeff Patti, Sparta, N.J., GOP Chair: Arrested on child pornography charges. (NJH, 2.8.05)

* Mark Pazuhanich: The Republican judge pleaded no contest to fondling a 10-year old girl and was sentenced to 10 years probation. (ArmSub, 7.13.05)

* John Paulk, Focus on the Family: A self-proclaimed "former homosexual" who works for antigay Christian media behemoth Focus on the Family--gets caught in a Washington, DC, gay bar and loses his leadership position on the North American board of ex-gay-ministry network Exodus International. (AFO, 1.12.01)

* John E. Peterson, Pennsylvania: Accused of forced kissing and unwelcome groping of women (a page, a staffer and a lobbyist) in the workplace over a decade. (Flynt - 52)

* Dan Quayle, former vice president: On March 6, 1981 the Wilmington, Delaware News-Journal reported that Paula Parkinson, a Washington D.C. agricultural lobbyist took a Florida vacation, and shared a cottage, with Quayle and Republican Congressmen Thomas Evans and and Tom Railsback. Parkinson, who later posed for Playboy and claimed affairs with at least 5 Congressmen, was apparently a very persuasive lobbyist; she was then fighting federal crop-insurance legislation and all three voted against it. Quayle denied having sex with her, and she confirmed that, though only because she was sleeping with Evans at the time. However, she said about Quayle that "We flirted a lot and danced extremely close and suggestively. He said he wanted to make love." In his own defense, Quayle said: "I hope there's some respect and dignity for things I did not do." So what's worse - cheating on your wife or dirty dancing with another woman and trying to cheat on your wife, but getting rejected? (SC)

* Jeffrey Kyle Randall, Minnesota: A former mayor of Clarkfield has been sentenced to nine months in jail and six years on probation on charges that he molested two boys from 1997 to 2003. Jeffrey Kyle Randall, 36, of Clarkfield, also must register as a sex offender and undergo evaluation and treatment, a judge ordered Thursday. Randall entered an Alford plea last month to two counts of fifth-degree criminal sexual conduct, both gross misdemeanors, in connection with the alleged molestation of a 10-year-old and a 12-year-old. Randall was mayor of Clarkfield from 1998 until the fall of 2004. In 2002, he ran as a Republican in an unsuccessful bid for state representative. (Bobo, 11.5.05)

* Robert Ray: "The former prosecutor who negotiated the deal that kept President Bill Clinton from being indicted in the probe of his sexual relationship with White House intern Monica Lewinsky has been charged with stalking an ex-girlfriend, a law enforcement official said. Robert Ray surrendered to cops last night after Manhattan resident Tracy Loughlin, 40, filed a complaint. "She tried to end it four months ago, but he kept calling her, sending her e-mails and showing up at places he knew she would be," the official said." (Eschaton, 5.12.06)

* Ronald Reagan, former president: Jane Wyman divorced Reagan, alleging "mental cruelty." (PBS) Divorced from actress Jane Wyman; married actress Nancy Davis -- but not before allegedly bedding a bevy of Hollywood starlets while still married. When not estranged from all four children, was emotionally absent for most of their lives. (Salon, 1.1.04)

* Red State Values: 17 of 23 states that don't expressly outlaw bestiality are red states. (BBB)

* Ralph Reed: When Ralph Reed was the boyish director of the Christian Coalition, he made opposition to gambling a major plank in his "family values" agenda, calling gambling "a cancer on the American body politic" that was "stealing food from the mouths of children." But now, a broad federal investigation into lobbying abuses connected to gambling on Indian reservations has unearthed evidence that Reed has been surreptitiously working for an Indian tribe with a large casino it sought to protect--and that Reed was paid with funds laundered through two firms to try to keep his lucrative involvement secret. (Nation, 7.12.04)

* Judith Regan, publisher: Strongly condemned Bill Clinton for his affairs with Monica Lewinsky, but later engaged in an affiar with Bernard Kerik. (Eschaton, 12.13.04)

* George Roche III, president of Hillsdale College: George Roche III, president of Hillsdale since 1971 and a fund raiser who topped $325 million during his tenure by tapping conservative wealth, resigned shortly after his daughter-in-law, Lissa Roche, committed suicide on the campus following her revelation to Roche's son, George IV, that she had had an affair since 1980 with George III who had divorced his wife of 44 years in April 1999 then surprised everyone with an October 1999 second marriage which quickly dissipated into a separation followed a few weeks later by a reconciliation which precipitated Lissa's confession in what had to be some kind of awkward moment of confrontation among the four aforementioned players. (JWR, 11.29.99)

* Nelson Rockefeller, former vice president: In 1964, Rockefeller emerged as the clear favorite for the presidential nomination. His divorce and remarriage in 1963, however, brought about a decline in his popularity that he was not able to overcome. (AmP)

* Karl Rove: Reportedly has carried on a longtime affair with lobbyist Karen Johnson, despite being married. (Kos, 7.26.05)

* Beverly Russell, leader in the Republican Party, the Christian Coalition and Pat Robertson's presidential campaign: caused the breakup of Susan Smith's parents' marriage, resulting in her father's suicide when she was 6 years old. This might have caused her stepfather to do everything possible to give her support and make up to her some of the horror and turmoil she had experienced, but not Beverly Russell. He began molesting her when she was 15, all the while

aware that she was emotionally fragile (she had attempted suicide two years before). Smith later killed her own children. (NWW, 8.7.95)

* Jack Ryan, Illinois: Illinois Senate candidate Jack Ryan dropped out of the race Friday amid a furor over lurid sex club allegations that horrified fellow Republicans and caused his once-promising candidacy to implode in four short days. In those records, his ex-wife, "Boston Public (news - web sites)" actress Jeri Ryan, said Ryan took her to kinky sex clubs in Paris, New York and New Orleans and tried to get her to perform sex acts with him while others watched. (AP, 6.26.04)

* Dominick J. Salfi, Florida: Divorced former circuit court judge. (AASP)

* Joe Scarborough, Florida: Divorced wife in 1999. Scarborough got a divorce. Then he suddenly resigned from Congress, just six months after re-election. (Invoked old fallback excuse of wanting to "spend more time" with children.) Then he suddenly resigned as publisher of the Independent Florida Sun. Then, just as suddenly, Lori Klausutis, 28-year-old staffer to Scarborough, was found dead in Scarborough's district office in Fort Walton Beach, Florida. Date was July 20, 2001. Cause of death: Blow to the head. Conclusion: Heart condition caused her to collapse, fall, hit head on a desk, and die. Story barely a blip on the radar. Lots of people left with lots of questions. (Salon, 1.1.04)

* Dan Schaefer, Colorado: Divorced member of Congress. (Salon, 1.1.04)

* David Schippers, impeachment counsel: Had his own secret mistress for 25 years -- and he had the nerve to bring her to the Judiciary Committee's impeachment hearings! Nancy Ruggero was a young secretary in his office nearly Monica Lewinsky's age when their affair began in the early 1970's. Schippers, now 69, had 10 children with his wife of 45 years, Jackie, whom he called "his one and only sweetheart," on 60 Minutes. Moreover Schippers, who originally trained for the priesthood, is a "papal knight" - one of only several hundred in the world - and told the New Republic that adultery is, indeed, a mortal sin. (Dem, 8.11.03)

* Laura Schlessinger, conservative television/radio personality: Has not spoken to her mother since the late 80's. "Does not see much" of her younger sister. Hired her mother as a secretary. She quit after Laura told her to "learn how to type." Has enocuraged her husband to forget his family... "My husband HAD a prior family. And I figured I went through 12 hours of labor and a C-section. I figured, I'm going to name this thing anything I want, and I said, 'Lew, do you have any problem with the last name Schlessinger? ' He said, 'No.'" Speaks out against birth control in any form, and yet has had her tubes tied. Shows an open disrespect for women who choose to have children AND jobs. And yet she is herself a working mother. Says that you should

save yourself for marriage, stay married once you are married and that adultery is just plain wrong and that women who sleep around are "sluts." Has admited to having sex before marriage in college. Is herself divorced, despite enocuraging many disatisfied wives to stand by their men, no matter what. Had an affair with another man while she was married. Had an affair with her current husband while he was with his previous wife. Posed nude for pornographic pictures. (RLA)

* John Schmitz, Colorado: Extreme right-wing activist. Fathered two out-of-wedlock children with a student. Daughter is Mary Kay LeTourneau, schoolteacher now in prison for having sex with 13-year-old student, who fathered two children by her. (Salon, 1.1.04)

* Ed Schrock, Virginia: Abruptly announced his retirement, citing unspecified allegations that ?called into question my ability to represent the citizens of Virginia?s 2nd Congressional District.? The two-term Republican did not answer questions or address the allegations. A Washington-based activist claimed on his Web site that Schrock engaged in homosexual activity, and offered audio evidence to support the case. Schrock has refused to confirm or deny the allegations for two weeks. Schrock is married and has an adult son. Michael Rogers, the blogActive publisher, accused Schrock of being a hypocrite for opposing gay-rights issues. (blogA, 8.31.04)

* Larry Jack Schwarz, Colorado: Custer County Sheriff Fred Jobe said the investigation began about three weeks ago when his office received allegations that Schwarz "might be in possession of pictures and material of sexual exploitation of children." There are three alleged victims, all of whom were family members living in the Schwarz home when the incidents reportedly occurred, Jobe said. (RMN, 12.5.01)

* Arnold Schwarzenegger: Six women who came into contact with Arnold Schwarzenegger on movie sets, in studio offices and in other settings over the last three decades say he touched them in a sexual manner without their consent. In interviews with The Times, three of the women described their surprise and discomfort when Schwarzenegger grabbed their breasts. A fourth said he reached under her skirt and gripped her buttocks. (LAT, 10.2.03) Republican governor Arnold Schwarzenegger allegedly had sex with a 16 year old girl when he was 28. (ArmSub, 7.13.05)

* Gordon Shadburne, Oregon: His first scandal was sending a letter on county stationery to local fundamentalist churches, preaching that homosexuality was "the stronghold of Satan." Not a big deal, but a bit excessive. But when he was found to have used county money to take his sweetheart shopping in Edmonton, Alberta (of all places) the papers had a field day and he was forced to resign. Because, as you've guessed by now, his sweetheart was a man. And here's the rest of the story, as Paul Harvey would say: Reporters first started wondering because one of Shadburnes top aides was openly gay; he actually wrote the gay rights law that Shadburne later opposed. True to form, Shadburne fired this highly respected former county commissioner,

offering him 4 week's severance pay if he wouldn't talk to the press. This caused another aide to quit. Then a number of sources reported that Shadburne had homosexual affairs himself. Most prominent was the testimony of Shadburne's ex-wife during mediation proceedings. The County Auditor issued a report criticizing Shadburne for paying his long-time friend and former roommate $29,000 in nine months as an independent contractor, despite very poorly documented hours and questionable work output. Shadburne's friend was during this time one of the highest paid public officials in the county, working from home; the commissioners themselves only made $33,000 a year. Finally, the roof caved in. Shadburne quit his commissioner post amid allegations of cocaine use and pile-on orgies during a county-paid business trip, and was convicted twice of using county money for personal business. (SC)

* Don Sherwood, Pennsylvania: Repeatedly punched and choked a Maryland woman during a "five-year intimate relationship" with her, according to a lawsuit. Cynthia Ore, 29, of Rockville, Md., says that after each "unprovoked and vicious attack," Sherwood, 64, promised he wouldn't do it again and begged her not to leave him, according to the four-count lawsuit filed by Patrick M. Regan, a Washington lawyer. (Eschaton, 6.16.05) Admitted in court papers filed Thursday that he had a five-year affair with a Maryland woman, but he denied abusing her, as she claimed in a $5.5 million civil suit. The court papers were filed by Sherwood, R-Pa., in response to the lawsuit filed last month by Cynthia Ore, 29, of Rockville, Md. In it, she alleges that he brutally assaulted her and struck her on several occasions. (Kos, 7.22.05)

* Tom Shortridge: The Republican campaign consultant was sentenced to three years probation for taking nude photographs of a 15-year old girl. (ArmSub, 7.13.05)

* Bud Shuster, Pennsylvania: Shacked up with a transportation-industry lobbyist, put her on his payroll, and voted any way she wanted him to. (Salon, 1.1.04)

* Fred C. Smeltzer, Jr.: The Republican City Councilman pleaded no contest to raping a 15 year-old girl and served 6-months in prison. (ArmSub, 7.13.05)

* David D. Smith, president and chief executive officer of Sinclair Broadcast Group: Was arrested in his hometown of Baltimore and charged with a misdemeanor sex offense. Sinclair owns WPGH, the Fox affiliate in Pittsburgh, and programs most of WPTT. The Baltimore Sun reported that Smith, 45, was arrested Tuesday night in an undercover sting at a downtown corner frequented by prostitutes. Sinclair issued a statement that Smith's arrest was unrelated to company business and "The company will continue to operate under the direction of its current management." (Eschaton, 4.30.04) Sinclair is ran by David Smith, who in the mid-1970s was a partner in a company called Cine Processors, according the Los Angeles Times, which cites

public records and a former partner in the company as sources. David E. Williams, Smith?s partner in the business, told the Times that Cine Processors? sole business was the development of 8mm pornographic films. According to Williams, the film company went out of business in 1975 or 1976 after police confiscated film and other materials during an obscenity raid. Baltimore police officials were unable to locate records of the raid, citing the decades since the raid took place as the reason why. (LAT, 10.27.04). Never mind that (David) Smith's own behavior had almost nothing in common with (Sinclair's vice president of corporate relations, Mark) Hyman's moralistic segments. According to several sources close to Smith, the principal owner of Sinclair has never been the paragon of personal virtue that his stations preach and his political allies champion. Having launched his career selling pornographic videos in Baltimore's red-light district during the 1970s, Smith has apparently spent the past thirty years refining that passion. After he was caught by police in 1996 getting a blow job from a prostitute while driving a company Mercedes, his sexual adventures became a matter of public record, but according to his friends, that incident only begins to tell the story. "That was the time he got caught," says one. "He's a whoremonger. A real whoremonger. He loves the titty bars. The only people he likes go to the titty bars with him. Those are the only people he trusts. He also goes out to Vegas all the time. He goes to the high-end titty bars. He's always getting the private upstairs rooms, champagne, the works." (DCMG, 11.22.05)

* Douglas Smith: Boy Scouts of America?s National Director of Programs Douglas Smith will appear in a Dallas courtroom tomorrow to face charges of posessing child pornography. He previously said ?Some intolerant elements in our society want to force scouting to abandon its values and to become fundamentally different. They want scouting to forego its constitutional rights, affirmed in 2000 by the Supreme Court in BSA v. Dale, and adopt fundamentally different values from the ones that helped shape the character of Mr. Collins and 106 million other young men over the past 94 years.? (Raw, 3.29.05)

* Alan Stangeland, Minnesota: Married father of seven swore that the several hundred long-distance phonecalls made to female aide in 1986-87 -- and charged to his House credit card -- were not evidence of a romantic relationship. (Salon, 1.1.04)

* Jimmy Swaggart, televangelist: Consorted with a prostitute. (ChT, 9.13.04)

* David Swartz: The Republican County Commissioner pleaded guilty to molesting two girls under the age of 11 and was sentenced to 8 years in prison. (ArmSub, 7.13.05)

* Randall Terry: Is divorced. Campaigns against homosexuality, yet has a homosexual son. (BN, 4.8.05)

* Bill Thomas, California: Affair with healthcare lobbyist Deborah Steelman. (Salon, 1.1.04)

* Clarence Thomas, Supreme Court Justice: Accused of sexual harassment by Anita Hill. (Salon, 1.1.04)

* Strom Thurmond, South Carolina: Essie Mae Washington-Williams, a 78-year-old retiree living in Los Angeles, says former Sen. Strom Thurmond, a onetime segregationist, fathered her when he was 22 and living in his parents' home. Her mother, Carrie Butler, 16 at the time, worked as a maid in the Thurmond home. (AP, 12.16.03)

* John Tower, Texas: Boozing, philandering, messy divorce (from wife number two), and appearing in a newspaper while wearing a Superman costume, reportedly while drunk. (Salon, 1.1.04)

* Mike Trout, radio host: He worked for anti-gay group Focus on the Family and admitted to cheating on his wife. (AFO, 1.12.01)

* Robin Vanderwall, Virginia: A third-year law student at Regent University, who helped run several successful campaigns for local Republicans, was arrested Jan. 10 and charged with two counts of soliciting sex with a minor over the Internet. (ACS, 1.14.03)

* Thomas A. Varrell, New Hampshire: Divorced state legislator. (AASP)

* Sol Wachtler, New York: Had longterm affair while he was married. She broke up with him. He started stalking her, threatening her, and once even sent a condom inside a greeting card to her 14-year-old daughter. When he threatened to kidnap the girl, Mom called the FBI; they tapped her phone, and nailed him. Wachtler and his mistress were step-cousins by marriage. (Salon, 1.1.04)

* John Warner, Virginia: Dumped first wife Catherine Mellon (she of the ultra-right-wing and obscenely wealthy Mellon-Scaife clan) -- from whom he won a $7 million divorce settlement -- for Elizabeth Taylor. Married Liz in '76; separated in '81; divorced in '82. (Salon, 1.1.04)

* J.C. Watts, Oklahoma: Allegedly while a teen, he sired two out-of-wedlock children with two different women. Abandoned his sister, who had problems with drugs. Once she was arrested, he turned his first visit with her in more than a year into a photo opportunity. (Flynt - 50)

* Jim West, Mayor of Spokane, Wash.: Jim West broke a 2 day silence on Sunday morning by calling the Steven A. Smith, editor of the Spokesman Review with a response to allegations that he masturbated in his office. West and the members of the Pac NW Pedophile clan have been accused of using an at risk boys camp, Morning Star Boys Ranch , as a library of sorts to check out young boys for camping trips and hiking. It is alleged that during these trips the clan molested the young men. Apparently there is another member of the Pac NW Pedophile clan who, as yet, remains un-named. Read on? West, who resigned last week from the boys ranch board of directors, later told Smith he "vaguely remembers" maybe he and Hahn

"both took one kid on a hike or camping trip once." The mayor also referred to a story in Saturday's paper in which a man named "Scott" said he was sexually molested by Hahn and reported the conduct to West during a 50-mile Boy Scout hike around Mount Rainier in 1980. Smith said West "couldn't remember the kid. He doesn't recall the incident." West said another adult on the trip, whom he didn't identify, "told him not to worry about it, that we didn't know about sexual abuse in 1980," Smith said in relating the mayor's comments. But West also said, "It may be possible that the kid said something, maybe about being fondled, and maybe I just didn't recognize how important that might have been." West goes on to say he expected there to be more men coming forward. When the newspaper editor asked the mayor if other men claiming to be abuse victims are likely to come forward, he said, "probably so." West, on being gay: "I'm being destroyed because I am a gay man, which is fine. I've been in public life, I can accept that. Because I am a gay man, because of this double life, it has been hell." (BBB, 5.9.05)

* Keith Westmoreland, Florida: Arrested last week in Florida on seven felony counts of lewd and lascivious exhibition to minors under 16. (Tenn, 6.18.02)

* Reverend Stephen White, anti-gay crusader: Faces charges that he solicited sex from a teenage boy in a Philadelphia suburb. (Yale, 10.23.03)

* S. Vance Wilkins, Virginia: Rather than defy a chorus of party leaders calling for him to step aside, he relinquished his post as the state's most powerful legislator because of sexual harassment allegations. The 65-year-old Republican, sounding despondent at times, told reporters in a telephone conference call that his decision was best for the party. (AP, 6.14.02)

* George Will, conservative columnist: Soon after the alleged incident, Will and his wife separated, then later divorced. (Salon) Committed adultery against his first wife, Madeleine; Will's divorce left his wife with their Downs syndrome son. (Dem, 8.11.03)

* Steve Wilsey, Focus on the Family: One of Focus on the Family's youth conselors and a man who was considered a mentor to kids, was convicted Dec. 19 of one count of "sexual assault on a child by a person in a position of trust." The judgment came after prosecutors charged Wilsey with molesting an 8-year-old boy--the son of another FOF employee--over a period of 16 months. (AFO, 1.12.01)

* Robert K. Wilson, Ohio: Divorced former state party treasurer. (AASP)

* Charles Wingate, Colorado: Convicted on 16 felony counts and two misdemeanor charges. He was nailed for bouncing checks, charging pizzas to his state-issued credit card, and stealing and pawning city-owned equipment, including his city-owned computer. Because he was

also a habitual (some might suggest addicted) Internet porn surfer --
using, of course, his city-owned computer, on city time. He was also
sued for failing to pay off his campaign debts. (Salon, 1.1.04)

2592. Re: A more rational approach -- how I would like to change the cell phone industry.

All of them gay women that live next door to me have been gone somewhere since last weekend, Carolin, she set the plastic garbage can out front there last Monday night for the Tuesday garbage truck (them trucks run on Fridays too) to pick up.This morning, I put their plastic garbage can by their fence in their driveway and I picked up their snail mail out of their snail mail box by the side of the road.

Too bad they won't take me with them wherever they go.I might would be having a lot of fun.

David,

IMHO - Eight Years in the US Senate makes
Fred Thompson about as 'qualified' as any of
the other 2008 Presidential Candidates.

Plus + Fred Thompson has that
Wonderful Sounding Radio Voice !

I liked what Fred did while in the Senate. I'm not really very fond
of many of the potential canidates. I don't necessarily think it's a
bad thing that he's running. Time will tell as to whether or not he
will be a serious contender.

It is so unnecessary with todays semiconductors that the firmware in
receivers and transmitters not be reprogrammable. This is just another
sign that HD radio was always meant to fail all along.

It's Frackeltonian! And just wait and see what happens after the 14th, that's
when those Idiotic Broadcasters On Crack can go 24/7, right?

Indeed.

This "Radium" personage seems to be no more than a troll who could
answer his own questions by querying the available literature, but
who seems intent on wasting others' time by posting idiocy which
must be refuted.

< Snip >

I'm starting to think that HD is a way to trash AM talk radio. The only
consistently conservative media outlet.

You might want to give it another shot. Antennas at different
orientations will work better at different times of the day/night.

I'm dreading it. I like to tune around night time AMBCB as much as the
mower SW bands. I already have lost some stations around sunset due to
the HD noise and for that to continue all night me pisses me off.

I'm not surprised someone else has thought of this but now I'm starting
to think this way. This whole HD implementation is just to screwed up to
be believed without an alternate motive. Nobody can be this stupid. Well
OK there are some news group poster children that could but they don't
run things.

Radio Romania International, 9790, heard here at 2200 sign on with their broadcast in English directed to North America. Sked 2200-2300. Also on 11940. They use some of the same music when doing the headlines as does Kol Israel.

Just for fun, I thought I'd tune them in.

My very first QSL was for reception of Radio Bucharest, Romania, on January 5, 1967 on 15380 kHz. I was using a Knight-Kit Star Roamer and a hank of wire.

That was a long time ago!

I was picturing a big, horizontal 'skywire' type loop, since you've
got some space to work with.

At least you give me credit for having reasonable business sense even at age 17 when I incorporated Radio Musical, C�a. Ltda as the sole shareholder. A limited responsibility corporation shields a business owner from personal liability in matters of the business. I don't know any station owners who would put a license in their own name.

I think I've documented my experiences here to exhaustion, here, but
just in case you need a recap:

- poor ultimate rejection
- low dynamic range
- creaky AGC that works... if you have the 10 minutes to play with it

Sensitivity was never an issue... it picked up oddball stations
hundreds of places on the dial below 10 MHz.

If you enjoy it, well, good for you. All I know is it is the one
radio I have absolutely no regrets parting with.

...oh, it did have a very smooth tuning knob.

When will these clowns ever get it right? Radio Cairo on 9460 in English at 2300 directed to North America, with a 40 over 9 signal and hardly any modulation.

Same as it ever was.

Say, Edweena, could you possibly fill in the folks here on that bathroom tapping code? Many might be familiar with Morse and some of its variations, but this one seems to be fairly new.

And, did you ever meet Larry?

2651. Appalachian State 34 Michigan 32

Newsgroup: rec.radio.shortwave
Date: 2007-09-02 02:11:41 UTC
From: mohawk@mailpanda.com
Message-ID: <1188699101.380847.138160@o80g2000hse.googlegroups.com>
Source record: 122336

Little Appalachian State became the first team from what was formerly known as Division I-AA to ever beat a ranked I-A team.

This game was supposed to be the prime example of what had gone wrong in money hungry college football. The powers that be had expanded the season a couple years back, adding an extra game so big schools could bring in cream-puff opponents while collecting millions in revenue.

Michigan had never played a I-AA opponent in its history. Now we know why, the Wolverines were ducking them.

Instead of an easy tune-up for Michigan, Appalachian State leaves with its most profound victory ever and a check for $400,000 that was supposed to be their pay for getting punished.

Judging from Michigan's representative in this newsgroup (Mr. Adult Diapers himself - DxAce) I must say it couldn't of happened to a more deserving bunch of assholes.

Now I know why the late great Woody Hayes hated Michigan so much. In his book he tells of running out of gas in Michigan and he had so much contempt for Michigan and its morons he literally pushed his automobile across the state line to an Ohio gas station to avoid giving one cent of revenue to Michiganders. LMAO!!!

Since people who say things like that don't bother to actually know
how to calculate the answer to that, the recoverable solar energy per
acre is 5.25 MW.

If your solar collection is only 10% efficient -- far below what is
common today -- you'd still get 525 kW / acre.

Since covering land with solar panels is not necessarily the best or
most aesthetic or most socially acceptible use of land, consider what
could be done with south-facing rooftops and solar shingles like those
made by http://www.uni-solar.com/

RYESN,

Does the Frequency Counter change Frequency
when Bands are Switched ?

Does the Frequency Counter change Frequency on
All Bands when you with Rotate the Tuning Knob ?

Your have Audio Output {Sound} Listening to FM
the .

But you have no Audio Output {Sound} Listening
to the AM/MW and Shortwave Bands.

interesting ~ RHF

Must be insufficient shielding somewhere. I've come across a
strange drifting carrier on an ICF-SW30 at times, but generally
PLL sets can be entirely free of MW birdies (my ICF-SW7600G is,
for example, but it's got some images).

> Also look for

Plain ol' insufficient image rejection, less surprisingly so on
the PL200 as a single conversion set.

> This can be quite
> disconcerting when dx'ing.

Agreed.

> Note that this is twice the 455kHz or 450kHz
> I.F used for AM-BCB/lower SW.

Actually these are the IF for the PL200 and the 2nd IF for the
E5 throughout the whole AM range.

> The mixer does not reject -2*I.F. well,
> but other even multiples are OK, as are all odd multiples of the I.F.

Of course. A mixer as typically employed is nothing but a
multiplier with inputs for RF signals and the local oscillator
(LO). If you add filtering behind it to filter out just the IF,
you will always get the signals from both f_LO + f_IF and
f_LO - f_IF. If we're looking at a single conversion set, in
most cases f_LO - f_IF is the wanted signal (that is the
frequency displayed), and we need to filter out f_LO + f_IF.

If that is not done well enough, we get images.

There are two options for getting rid of images on single conversion sets:

1. Use tracking frontend filters. This is the traditional way. Helps reduce mixer intermod, too. A problem is that the higher the reception frequency gets, the wider the tracking filters become. Accordingly, image rejection suffers - a set with two tracking circuits (typical for single conversion sets of the better kind in the olden days) might have more than 40 dB of image rejection on 49 meters but less than 26 above 20 MHz. Another issue is that in order to tune a wide frequency range (more than about a factor of 3.5), both L and C must be variable. This is the reason for many single conversion sets either having a limited shortwave range or two separate ones.

2. Use an "image rejection mixer". This is a good bit more complicated than a normal mixer and with good parts matching allows about 30 .. 40 dB of image rejection.

When designing receivers which were supposed to have excellent image rejection in the olden days (when option 2 was not known yet or too diffixult to implement), engineers were faced with a central problem:
1. Higher IF meant better effectivity of frontend tracking.
- but -
2. The same makes IF filters wider and thus filtering more difficult there.

Traditionally one would use a somewhat higher-than-normal IF and slap in up to three tracking circuits. Along came the dual conversion receiver. It had a high enough 1st IF (typically a few MHz) to allow for good image rejection without tracking overkill, while the lower 2nd IF made for more effective filtering but was still high enough for good suppression of unwanted image-generating signals on the 1st IF.

Modern-day dual conversion sets (which includes the E5) go a step further:

Since PLL synthesis allows the generation of very high yet drift-free LO signals, they employ 1st IFs that are so high that a simple lowpass filter is sufficient to get rid of images at this stage. Usual choices of 55.845 MHz or even 70+ MHz (typical for communications receivers) also avoid images from the FM broadcast band (receivers with 45 MHz occasionally give trouble here). Crystal filters have to be used here, and both ultimate rejection of usual lower-order filters and leakage around the filter aided by insufficient shielding contribute to sets like the E5 (and a number of others) having

insufficient 2nd IF image rejection of no more than ~40 dB. Ironically sets like the DE1102 with a 10.7 MHz 1st IF may have better performance in that regard because ceramic FM IF filters manage 50+ dB these days (but they obviously have no 1st IF image rejection and a fairly wide 1st IF).

These sets require no frontend tracking at all, but this brings about another problem: The first mixer in particular gets in trouble with high sum signal levels and starts producing more intermod than desired. Thus better receivers typically have input filter arrays and/or high dynamic range mixers.

Another potential source of unwanted mixing products are LO harmonics. They may bring FM BCB images to the upper shortwave ranges (YB400) or certain sections of certain bands (ICF-7601), make air band utility stations appear in the background (PT80, 2nd LO - must be insufficient shielding on the 1st IF) or just make 20m stations appear on 41m, as I noticed on a single conversion set (RF-1410L).

Reportedly the 1.85 MHz / 460 kHz IF combo on Grundig's old Satellit models was chosen because it minimized interference of these kinds. Computing all of the possible combinations must have been a fair bit of work...

Anyway, I hope that this clears up the origins of images and spurious signals halfway well.

Stephan

I heard a report....on shortwave radio, no less....in which one of
the wags on the Left said, and these are his words:

"It's easy when someone claims they stand for family values, truth,
integrity, morality, for everyone to point fingers when they fail to
live up to their own standards, such as Republicans have. Democrats
don't stand for any of that. So they can never be held to a standard as
having failed."

It was the most revealing comment I'd heard on BBC in a long time.

Credibility is determined by stating the facts, whether these be popular or not.

If DXers to some extent do not want to believe the current reality of MW radio in the US and the world because it changes the expectations for DX reception, that is not the fault of the messenger.

The simple facts are that HD is being widely deployed, and on AM will be on most of the viable AMs in the top 100 markets... about 200 to 250 stations. "Viable" is defined by industry authorities like BIA as having a day and night signal that covers the entire metro with a usable signal. There are very few of these stations.

The DXer considers a station based on being able to receive it. An average listener only tunes in very good signals... ones that are pretty much impervious to interference and other distractions. In metros, that means a signal of about 10 mv/m is needed to get any audience, and in some metros, over 12 mv/m and up to 15 mv/m are needed to get listenership... all this is proven by extensive studies of the listening locations of US radio stations for at-home and at-work listening in Arbitron. The conclusion is very obvious: stations that sacrifice any potential out-of-metro listening to go HD are really sacrificing nothing, as such listenership is close to non-existent.

When we get to skywave reception, and look at the ratings in every county of the US, there is not enough skywave listening for stations to show up in the ratings on this night-signal skip anywhere. AM listening is less than 20% of all radio listening, and AM listening is even a lower percentage at night (because most signal areas contract). In general, night radio listening is about 25% of daytime levels, so low-use AM and general listening at night make the interest in reaching outside one's own market just about zero.

DXing as a hobby depends on having stations to DX. If AM is dying to begin with (75% of listeners are over 55, the rest are approaching that age where no advertiser will tread), and few AMs actually can compete with FM and new media (based on having a decent enough signal), objecting to a plan that might just help AM... and is the only idea around that might do this... seems absurd.

As I have said before, I really wonder about the fact that nearly no poster has reflected on the DX opportunities of HD signals... but many are busy criticising HD... to the extent that one poster fabricated the "gag order" (which does not exist) out of old development-era nondisclosure agreements. Now that certainly enhances on the DX side of the argument the credibility you so desparately seem to value; having failed to invalidate HD with the truth, totally groundless claims are now being invented and the lie and the out of context quote are the stock in trade of these posters.

"The simple facts are that HD is being widely deployed, and on AM will
be on
most of the viable AMs in the top 100 markets... about 200 to 250
stations.
"Viable" is defined by industry authorities like BIA as having a day
and
night signal that covers the entire metro with a usable signal. There
are
very few of these stations."

And, a number of AM-HD's are turing off the hash generators (to
include WSB), due to listener complaints. At any rate, interest in HD
Radio has reminded flat since the first HD radio was sold January 2004
and stations started broadcsating in at least 2002:

http://hdradiofarce.blogspot.com/2007/08/interest-in-hd-radio-remains-flat.html

>Can y'all imagine if a ''Camille'' hit New York City? y'all wouldn't
>want to be there! There is a big Eartquake fault zone under New York
>City too.I don't ever want to be there.

The existence of significant fault zones in New York is a commonly repeated fallacy. I have personally spoken to one of the engineers at the Multidisciplinary Center for Earthquake Engineering Research at the State University of New York at Buffalo regarding this (a few years back, he was the guest speaker at a meeting of the ham radio club I belong to), and was told that contrary to popular belief, there are actually no major fault lines anywhere in the state of New York...and relatively few minor ones.

There have been earthquakes in New York state - as well as seismic events that were attributed to earthquakes but may in fact have been the result of something else entirely. But, as noted at http://www.greatdreams.com/ny/newyork_quakes.htm in the quote there from New York State seismologist Frank Revetta, "There aren't any major fault lines here like you have with California, that the earthquakes occur along. Up here, the earthquakes are diffuse in the area and they don't line up along any particular fault."

While researching a magazine article I wrote a few months ago on the state of emergency communications preparedness in and around NYC now as opposed to September 2001, I learned that emergency management officials around there are a lot more concerned about the possibility of getting hit by a hurricane than they are about the likelihood of an earthquake. As part of their duties, emergency management people do risk assessments and make it a priority to try and prepare for the scenarios they're most likely to actually encounter. They did a major assessment on the hurricane scenario and figured out that if a category three hurricane (equivalent to a 4 or 5 down south) hit Long Island, the worst case scenario included complete submersion of Fire island and part of Montauk and along the south shore, while the storm surge could leave Kennedy Airport under water:

http://wcbstv.com/prepared/local_story_271175735.html

That story notes that the damage could exceed $35 billion, and that some observers say it's not a question of if but of when.

This doesn't mean they're completely unconcerned about earthquakes; Nassau County (for example) has identified the possibility of an earthquake as a hazard, noting that earthquakes affecting that county

have occurred in the past and that the peak ground acceleration with a 10% probability of exceedance over 50 years for that county is between 4% and 5% (e.g., it exceeds the 2% that FEMA recommends for earthquakes to be considered for further evaluation during the planning for a mitigation plan). But they ranked severe storms and hurricanes as a much higher hazard:

http://www.nassaucountyny.gov/agencies/oem/Docs/PDF/HAZMIT/b%20102005%20PGM/Other%20Handouts/HazIDQuestionaire.pdf

Other such documents produced at the state and county level can be found on the web as well by diligently using Google, from which you can see that earthquakes are something that emergency managers around here do consider a possibility, but not nearly as likely an occurrence as severe weather events or other types of threats.

In the event something major happened in New York, the ham radio nets for RACES and ARES would be active. You can find the New York State RACES SOP document at:

http://www.semo.state.ny.us/uploads/2007_RACES_SOP.pdf

That document gives very little frequency information, so from my own knowledge as a member of the ARES/RACES group in Erie County of NY State and as a coordinator of emergency operations for the ham radio club I belong to:

NEW YORK STATE EMERGENCY FREQUENCIES AND NETS

3913.0 LSB New York State ARES Emergency Net
3925.0 LSB New York State ARES Emergency Net
3993.5 LSB New York State RACES
7230.0 LSB New York State ARES Emergency Net
7245.0 LSB New York State RACES

Beyond that, the HF activity would be on the usual FEMA and other federal nets the frequencies for which I'd expect everyone already has (such as the SHARES net and those obscure federal agency nets you can hear testing on Wednesday mornings at around 9:00 AM eastern time), as well as the other usual ham radio frequencies for the SATERN net, Hurricane Watch Net, etc. - all of which are well documented on the net so I won't repost them here.

Needless to say, the volume of radio traffic on HF would pale in comparison to the volume of traffic on VHF/UHF, but we're already far enough off topic without me posting VHF/UHF frequencies here! Thus, check out a good NY scanner frequency reference such as David Stark's NF2G Scannist Pages at http://nf2g.com/scannist/index.html for those.

Clandestine, Andenet Ledemocracy, 15260, in presumed Amharic heard here at 1600 sign on, transmission to East Africa via Russia: Samara (Zhygulevsk).

Sked Wednesday, Friday and Sunday 1600-1700.

Interesting music, long gapages in between, seemingly very poor voice audio but the music seems OK.

I've been getting it on with my boss's daughter and fear she's gonna rat me out to daddy. The last time she was over at my house, I accidentally backed my car over her bicycle. Now she's ticked off and threatening to blab to her father. If she does blab, I will lose my job. That's bad enough, but she's also underage and I'm wondering whether laws against statutory rape are really enforced. Does anyone know? Is this something I should be worried about?

< Snip >

You skipped a few steps.

1. First you have to have a grip on reality in order to ascertain the
facts. You desperately need to get a grip.

2. Then you determine what is relevant. You don't seem to have that
ability.

3. Then if you are going to communicate your thinking on the subject you
have to consider your audience. You either can't or won't do this either.

You are a waste of time to read in this news group.

Based on your posting behavior I'm sure knowing you would not be a
pleasure.

Yes it does. I hope they're taking all the precautions they can.

I was pretty surprised when I heard that Felix was already up to
category 4. That was quick! It sure doesn't take long for them to
strengthen when conditions are just right.

2698. Ramadan 2007

Newsgroup: rec.radio.shortwave
Date: 2007-09-02 22:30:09 UTC
From: dxAce <dxAce@milestones.com>
Message-ID: <46DB3971.39033CB8@milestones.com>

Ramadan begins on either Thursday, the 12th of September or Friday the 13th of September and will continue for 30 days until Thursday , the 11th of October or Friday the 12th of October depending upon where one is located.

Look for extended broadcasting hours throughout the Moslim world.

telamon, Telamon. TELAMON !

1 - You 'originate' an Off-Topic Message without an (OT) :
at the start of the Subject Line.
- - - I Added the (OT) : for you {cause I am a Mister Nice Guy}

2 - You Post a Broken Truncated Link - DOH !
- - - I provided a TinyURL for it and Found a better direct Link.
{Again being a Mister Nice Guy}

3 - You did not related your Post to Shortwave Radio
- - - I Posted a Positive Shortwave Radio related comment.
{Once Again being a Mister Nice Guy}

BUT YOU BERATE OTHERS FOR POSTING OFF-TOPIC
MESSAGES TO REC.RADIO.SHORTWAVE !

PLUS YOUR CHASTISE OTHERS FOR REPLYING TO
OFF-TOPIC MESSAGES TO REC.RADIO.SHORTWAVE !

Remembering the Golden Rule - One Post/Reply At A Time.

telamon - from one 'mister nice guy' to another

- I heard a report....on shortwave radio, no less....in which one
of
- the wags on the Left said, and these are his words:
-
- "It's easy when someone claims they stand for family values,
truth,
- integrity, morality, for everyone to point fingers when they fail to
- live up to their own standards, such as Republicans have. Democrats
- don't stand for any of that. So they can never be held to a standard
as
- having failed."
-
- It was the most revealing comment I'd heard on BBC in a long
time.

2711. The Crystal Ship

Newsgroup: rec.radio.shortwave
Date: 2007-09-02 23:35:19 UTC
From: dxAce <dxAce@milestones.com>
Message-ID: <46DB48B7.91E212D@milestones.com>
Source record: 122445

Greetings, my fine pirate radio SWL friends!

The Crystal Ship is taking to the airwaves this Sunday evening shortly after 2330 UTC,
on 6875 kHz and on 5386 kHz. (Also, keep a watch on these frequencies through the remainder of the holiday weekend, if you miss this evening's program. We may show up there again).

For our 2300+ UTC show, we will be featuring special Labor Day programming, including songs of the union movement and rock/popular/folk music about the working man.

((Also, late tonight (probably after 0300 UTC), there is a possibility we may show up on 3275 kHz, or even maybe a special DX test on 1710 kHz... so if any of you night owls are still on the radio then, you might want to keep an eye on those frequencies, especially around the Great Lakes region.))
As always, we'd be happy to hear back from anyone via email regarding the programming, signal quality, specifics as to QRM, etc. Seems most listeners have been busy doing the "summer stuff" lately, and only a few of the "hard cases" have been reporting back or posting logs on the FRN website. It's been getting lonely. :(

Hope everyone has a fun and safe weekend, and maybe gets a chance to warm up the shortwave!

((On an unrelated note, this morning just before dawn, I FINALLY managed to catch a little of the Papua New Guinean station on 3275 kHz, whichever that is... for the first time ever. We have that 90 meter dipole, which helped, but the real trick seemed to be turning off the PC which created more images on the radio than I realized. Still trying to get the 'big one' on 4890, which I managed in my early teens with a Realistic DX-160... but so far, no go. Presumably I'll have better luck with all of them in the winter if my timing is right. But what I miss most is Radio Tahiti on 15,170 kHz... the soft island music filling the speakers on a warm summer evening... Aw, shucks...))

Jesus David, I know that you are divorced, and everything, because
your ex-wife got fed-up with you trolling message boards 24/7, but I
would be most concerning about her Daddy calling Univision with
allegations of sex with a minor !

The reality of today's AM and FM broadcasting is something I in a firm grasp
of, or I would not be invited to participate as an expert in seminars for
organizations ranging from Arbitron to the NAB to Billboard and R&R
Magazines both in the US and abroad.

The "problem" is that AM DXers who, as a group, supported and learned about
radio a few decades ago, now are antagonistic to the very stations they wish
to hear, and refute nearly all the facts... economic and programming...
about how radio works today.
>
> 2. Then you determine what is relevant. You don't seem to have that
> ability.

I think it is "relevant" to try to explain to DXers that MW stations are
changing out of a distant hope that some life can be breathed back into AM
by things such as HD.

For example, unless DXers understand why most AM stations run the same
overnight programming on 600 stations (Noory and the alien crowd) they will
continue to criticize radio when the answer is so simple: AMs don't make

money at night... it's a setup for the 6-10 AM show, not a revenue producer. In fact, stations pay for Coast to Coast with daytime spots... even the syndicator does not want nightime AM spots.

It's never as simple as it seems, and DXers, who have become rude and even demeaning towards stations, should have information on what is happening today in radio so that they will understand why stations do what they do.

> 3. Then if you are going to communicate your thinking on the subject you
> have to consider your audience. You either can't or won't do this either.

As I say above, many DXers do not understand what is going on in radio today... how most listening is now on FM, and most AM listening is by older listeners and in daytime hours. An understanding of the way stations have to operate is of considerable use to open-minded DXers... such material used to be a regular part of DX News, the IRCA's DX Monitor and even the MW section of the NNRC; today, you have to go to the Medium Wave Circle's e-bulletin to get this type of insight into the operation of stations... those that still remain... on AM
>
> You are a waste of time to read in this news group.

Obviously, you have no interest in how radio stations get on the air, just whether you can make notches in your "rifle" by picking up distant and esoteric catches. That's like bird watching just ot get the highest number of birds seen, as opposed to knowing why birds migrate, where they go and come from, and what they feed on along the way. It marks you as vain and superficial.
>
> Based on your posting behavior I'm sure knowing you would not be a
> pleasure.

To someone like you, who buys a $5 k receiver and says "KOGO has a listenable signal in Ventura County" without realizing how listeners, not DXers, listen, I am sure that is a fact. I would likely despise you based on the attitudes you have shown here... mostly a total lack of understanding of how average Americans listen to the radio.

< Snip >

First off I don't go along with that (OT) in the subject line nonsense.

Second, it's not off topic. If you can't figure out that what happens in the Sun's corona affects SW propagation that is your problem.

If you can't get a clue then buy one.

And the link wasn't broken either goof-ball. Get a real news reader and server instead of that Google crap and maybe links will work for you.

Why worry? Get religion, wave the flag and run for Congress as a
Republican or Democrat (doesn't matter, same difference).

Mr. & Mrs. Idiot American will elect you in a landslide. You'll be
paid over $100,000 a year and receive a gravy train of benefits,
perks, frills and pension the working stiffs paying for it all can
only dream about.

You have it made in the shade - well done!

You can see most of it on Google earth at N12 12'50" W068 19'20"
Looks like a big "Y".

I would start writing emails to get permission. Security could be an
issue.

Thank you, we have been newsgroup friends for many years, lets stay that way.

They had 12 hundred calls to the police and Coast Guard about the meteor shower and a shooting comet the night I asked that question.

And yes it did have radio content because all the scanner groups were going crazy with all the radio activity and we can monitor the Coaster Guard on Short Wave. Remember the time we listened to the plane go down off Cal. and the swimmers in the water?We/I heard everything and I had a mountain between me and the sea.

Have a nice night, hormone shots help. My wife is just getting in to it and the motor home is to far away to stay in.

Burr

The Dhourties' Fortresses For Killing 'Dualdigers' Off

Recently, on August 5, 2007, at 19:50, I was arrested for 'lewd conduct' bkg. code 5131, (later struck through, and changed to), bkg. code D169, Charge ORD/NRS# 12.32.020 (CCO) 0200- with the 0200- appended, Sector Beat S1, that's the best I can make of the copy I have, a photo copy of one of the original copies. CCDC OR 369/365/A, with '369' struck through. I.D.#087884, struck through, and changed to, 2647396. Event#070805-2517. In the side column of the Temporary Custody Order, it has in hand print, '1-N RT(1) nonit'. Time Stamp at BOOKING 07 AUG -5 23 27. DSD RECORD SECTION.

When I left, I was given a sheet of paper, a 'sign off by offender' sheet, with this information on it:

08/06/2007 02:36 I4732H, OIRPTRAN 6.04.4.1, Name: Ayres, John ID#0002647395, Admit Date: 08/05/2007

Date: 08/06-2007 Officer: 1544 14732H

This was for regaining my property from the inmates properties room.

I was arrested at Tropicana and Decature, on Decature, next to the area where I have my 'Gurkian Way Ministry' sign up on a large, 7 feet by 3.5 feet, 3/4 inch piece of plywood, and where I have another sign,

that clearly states on the same size piece of plywood, 'GOD's Place, John Francis Ayres, And Children', where I was doing my 'Tai Chi' aerobic excercise karma erasal religious ceremony, with no clothes on.

I explained to the arresting officers, that I am duty bound by my religion, to do my religious karma erasal religious ceremonies, as well as all my religious ceremonies, naked. I explained that I am GOD, and that I am starting my own, or rather, my newest religion.

The arresting officers had many complaints from the 'assasins' group of 'hired killers', and torturers, who live in the underground, below and surrounding, the Home Depot, next to the New Orleans Hotel and Casino. Their underground complex is in part, under the New Orleans Hotel and Casino, as well.

They apparently, call the police, every time I come to my 'Gurkian Way Ministry's' office site, where I do my Tai Chi aerobic excercise, religious prayer activities.

I had been visited twice, once as noted, previously, and once by a second team of police officers, who told me to just stay in the area, where I had been sitting, and doing my Tai Chi aerobic excercise religious prayer activities, and the officers told me to not wander out naked, into the area surrounding my area, as, it was explained, that passer's by will get "offended" by my nakedity or 'nudeness' in public.

I try to figure, how can some one get offended by looking at a naked man? It's a mystery to me. Anyway, it does seem to be the case, that people can feel uncomfortable, if some one is naked, possibly, and that person would not like to approach the person, who is naked.

Well, if that is what is meant by 'offended', I don't know, but it does seem to pose a problem, for people who may feel embarrased by standing close to or talking to, some one who is naked.

I grew up in the Woodstock era, and nakedity is a common thing, if you look at the movie, and nothing to be embarrassed by. I used to swim in the Potomac river, naked, and of course, no one bothered me, except for the time, two dhourties, attacked me and my friends, who were all swimming, and relaxing on the beach, that time, if I recall correctly, we were all in our shorts, but had no T-shirts on, the men, or young men, any way, and the women, or young women, were all dressed in shorts, and they wore blouses or T-shirts, and no one was naked. I don't know what their problem was, but they just planned an attack on us, and came back with clubs, and started beating one of the person's, in particular, and provoking the others. I did my best to play 'I do not know what is going on, here, and I found an escape route, and ran off into the woods, and called to my friends in a loud voice, who were across the river. The friends made their way back, the attackers, left, and my friends carried the victim to a car, for transporting to a hospital. So it goes, with life with the dhourties, in rural

Virginia. Obviously, they had some thing against, us, as dualdigers, and they wanted to inflict pain, I suppose.

What is a Dhourtie? It is a slang term the Lesbianists use for a 'warlock'. The Orson Well's movie, 'Time Machine' portrays ugly, long, greyish white haired, mutant people, who can see in the dark, fairly well, who serve the people on the surface of the planet, with apples, and pears, that the 'warlocks' apparently pick and place out at night to feed to the peaceful people.

The warlocks, then eat the people who live on the surface of the planet once they lure them down into the underground labrynth of underground caves, and tunnels. A 'dhourty' is a Lesbianists' slang term for a 'mutant', or 'warlock'. The peaceful people, who live on the planet, as shown in the movie, are termed, 'Dualdigers', by the Lesbianists. 'Dualdigers' is a slang term for the peaceful, but apparently lazy, sexually attractive, people who live on the surface of the planet.

Some one also makes their clothes for them, as portrayed in the movie, anyway, as the peaceful people, the 'dualdigers', were all clothed, and had neatly groomed hair. They also apparently, regularly, brushed their teeth, and no one got cavities, except for a now and then, unlucky person, perhaps.

The people on the surface of the planet, apparently do not know how to fight, and apparently, never have any thing to do with violence, except for a now and then, quarrel.

Well, regardless of the movie, and its fictitious portrayal of human life, as I don't know any one who acts like those people who are living together, and loving together with each other, so peacefully, the movie is where the terms for 'dhourty' and 'dualdiger' get their start, in slang language, I suppose.

A dualdiger, I explained, before, in my early notes, as an animal, who is a potent, I believe I said it was, who is part plant, and part animal.

It is a peculiar looking animal, and it is a silly looking animal. I think the term, 'dualdiger' comes from this animal.

'Dhourty', probably originated, similarly, that is, it is a name for a strange looking animal, a potent, or another of the many types of animals, that are too tiny for us to see, who live in the 'sub molecular' zones, as I was talking about them, before.

Remember, I said there were approximately 600 million zones in the 'molecular levels', or the levels above what we would think is the area where we might be able to find, molecules. There is a cut off point, and below that level, in the lowest of 'molecular zones' there are sub molecular zones.

The zones are living zones, or cosms, as I explained. They are habitats for living organizms. Below that level, the molecular level, cut off level, there are 900 billion zones, or cosms, as I recall I may have said, in the sub-molecular zones, before you get to the bottom.

At the bottom, there may still be smaller animals, living below that level, and I believe there may be, but am not too sure, and I don't know for sure, but if there are animals, living below that zone level at the bottom, they are not as multipously populated, or numerously with such a large number, and large multiple of different types of animals, and they are not that densely populated zones or cosms, living habitats, as the ones above them.

It must be hard for animals to find food, down there, in those such areas, below the bottom. It would appear to us, as the artic, or antarctic, where conditions are difficult, and few things live there, or so it would seem, from what we are shown on television, by the dhourties, the Lesbianists, on this planet.

I don't know what the real story is, below the bottom level zone, but we'll find out, in time, as we begin to study, in the 'Managing My Universe' program. Now that I mentioned, it, I think there are lots of animals, living in very tiny zones, way down there, but at what levels, those animals are living, I'm not sure. There are many abominated human beings, living in the lower zones, along with the animals in those zones, so just how small people get, and what kinds of animal people they have become, we'll find out more about, once you begin studying in the 'Managing My Universe' program.

The Dhourties And Their Control Of Dualdigers, In Fortresses For Killing Off Dualdigers

The dhourties apparently control society, and they control the County lockup facility, as when I was there, in a 'Dhourtie Fortress' for killing off dualdigers, dhourties were in large numbers, busily beating up inmates, being rude to inmates, torturing them, forcing them to live in cells on cold, hard floors, with no blankets, and with forced ventilation air conditioning, which is very cold.

The air is toxic, and is filled with fumes animals, of all kinds, but primarily, from two sources, as far as I can figure, the one source, being, air coolant fumes. The other source, industrial cleaners fluids. Both are vaporous, and contain high levels of toxic animals. There are also, at the county lockup facility, large numbers of 'asbestos' animals, in the air, that the prison visitors, are forced to breath.

I was nearly choking, on the asbestos animals, by the time I left the facility, at around 8:30 a.m. I was arrested, the night before, and was transported by van, which was picking up other, soon to be visitors, to the facility, for a number of hours, before I arrived at the Clark County Detention Center, the lock up facility for booking

'visitors', after 11 oclock, that evening, I suppose.

It seems there are facilities underground, below the detention facility, where there are tunnels, and 'caves' laboratories, that they house prisoners in, who are then, cruely, and miserably, tortured, eaten, and killed by the dhourties, who run the facilities, and who run the government, and who run our planet.

Even below normal businesses, such as SONY, or Admiral, or Westinghouse, or General Electric, and below the military bases, of course, as well, similarly to the situation below the county lockup facility, and below the New Orleans Hotel and Casino, and below the Home Depot, there are facilities the 'dhourties' have built, to hide and house people, ordinary people, who have been abducted, and who are being tortured, abused, humiliated, criminally assaulted, eaten, and killed by the dhourties, every day, around the world.

There is no country that does not have these facilities, and all government facilities, and all prisons, and all county and city lockup facilities, and all military bases, and all college campuses, and all large public and private schools, have these facilties. There are also these facilities under civilian housing areas, such as under large housing complexes, where the governments have constructed low income housing for low income wage earners, or ordinary people, the dualdigiers.

This is pretty much the case, nationwide, and world wide, and you will not find a country in the world, with out this set up, constructed by the 'dhourties' who run the governments, and who run, every aspect of society, including, dictating how we piss, and on what kinds of comodes we sit, shit, and piss into.

We are driven by the dhourties, daily, and they are every where. You will not recognize them, as they look like normal people. They are not mutants, not in appearance, any way. They do have brain deficiencies, however, and they are not clever enough to beat me, GOD. Their brain deficiencies, are of the organic kind, and that means, down in the wiring, they have problems, and their brains do not work for them, any more, in lots of ways. They may seem normal, on the surface, but they are far from normal, down in the wiring, as lots of it has short circuited, and there are many blown fuses. They are not capable of knowing what 'common' sense is, these people with brain deficiencies. They can fake it, but in side, when they have a question, as to what they should do, they can not answer it, without the assistance of their code books.

They have numerous codes, and code books, and these are there, to help them manage to survive, and thrive, in the real world, that they created for them selves, and for the dualdigers, to live in.

I have no intention of returning to the Clark County Court House, for my trial, in Justice Court, on Sept. 5, 2007, in less than thirty

days, at 7:45 a.m. I have no intention of playing their game of who takes control of whom, as I will not stand for their intolerable system, their societal system, that they have established for the dualdigers to follow.

I didn't mind going into their buildings, before I learned that their buildings are death traps. I am not going to show up for my court trial and play their game of 'footsies', just, as if I can help it, I will never pay taxes to this or any other dhourty government, run by the dhourties, and that is all of the governments, on this planet.

Yes, I have to pay minor taxes, on food and liqour expenses, and on clothing expenses, and so forth. That is taken from me, without any one asking me, if I would like to pay it or not, and I have no choice, but to pay it, or I will not recieve the item, or items, I wish to purchase.

I am not going to stop my naked dancing, that is, my Tai Chi aerobic excercise, religious prayer activities, if I can help it.

I don't think any one is embarrased by being close to a stripper, in a night club, or to a can-can dancer, with little to no clothes on, in the casinos, that line the strip, here in Las Vegas.

I don't think the ladies, feel embarrased, when they go to the male stripper clubs here in Las Vegas, where the ladies, of all ages, whoop and holler, get all powered up, sexually, and call out at the male stripper dancers to 'Show me more!', etc.

Isn't it peculiar, that the dhourties who live in the drainage system, next to where my camp site is located, in the underground tunnels, systems, complain to the police about my being in 'their' park, and 'dancing' nakedly, and 'jerking off', that is, religiously expelling sacred and holy fluids, as I've expalined about, as well, and acting in a 'bizarre' manner.

Well, I don't think they are being truthful, as they are all dhourties, most of the people calling in, and the dhourties want me off their property, so that they can go on, killing unsuspecting tourists, travelers, down and out people, who may camp out in the park, or who they lure to the park, after making a casual friendship with them.

I will not stand for this, intolerable arrangement in our society, and no one should. The whole area of Downtown Las Vegas, should be leveled, and blown out to expose a wide, gaping hole in the ground, and every facilty of theirs underground, should be destroyed, and turned into dust, rubble, and dirt particles, in the explosion(s).

The underground casino areas, including the New Orleans Hotel and Casino, and all of the other, dhourtie hotel and casino establishments, and their facilities, below them, should also be blasted and each one left as a large gaping hole, using the

explosivies formulas, that I have provided on my bulletin board.

I would like to see every single one of the dhourties expelled from this planet, and blown to bits, leaving nothing but traces of their brain wiring, and bits and pieces of their bodies, behind.

However, that is impractical, as I will not have any children, among the dhourties, left, on this planet, to practice my religion, after they are introduced to it.

It is a religion that will be here forever, and I need people to practice it. I can not go around killing every single shit head kid of mine, and expect to get any where, religiously, after I have killed them all.

Though they may be shit heads, and though their brain wireing, is faulty, and not workable, for them, much of the wiring, any way, and though my 'ordinary' kids, may not be too much better, in terms, of being a human being, I can not go around killing my kids, just because I do not like them, and I do not approve of their behavior.

We will have a justice system, of my own, when we get my children, who have the technologies, to build my criminal justice system, according to Gurkian Law.

I have had enough of their bullshit criminal justice system, that they instituted, and as soon as I can get my religious prayers said, as I do my Tai Chi aerobic excercise religous prayers activities, in the park, from week to week, from month to month, and from year to year, I will get my kids to build my criminal justice system, and I will be seeing the shit head kids of mine, placed into prison cells, and then corrected, before allowing them to be released. That goes for all of the dhourties, and for all of the dualdigers kids of mine, who do not act, properly, and who do not act peaceably.

I will move my campsite, into the interior of the park, when I get a chance, so that I will not be close to the road ways, and so that I do not 'offend' any one, as no one will be able to see me, from the edge of the road, or while driving by in their car or truck. If I can find a secluded enough area, I do not know, but I will move into the interior of the park, and I will set up a new camp site area, away from the road way, if I can clear out a site, for myself, and build a new site. If there is an area, I feel is suitable for me, even though the dhourties do not like me living, praying, and doing my Tai Chi aerobic excercise religious activities program there, I will never the less build my site, where I find a suitable place, and the dhourties, there, as well as every where else, can kiss my ass, as they are all full of shit, and every one knows it, or will one day, know it, after every one is educated as to what they are doing, on this planet, and every where else, we find them, in my universe.

We have a lot to learn, about my universe, and about the people who are living in my universe. I will have all of them, practicing my

religion, in time. There will be no if's, and's, or but's about it, as I am going to make all my children, work for me, whether they like it, or not. I have a long time to get my program, up and running, and these things do not take place, over night. It's one planet, at a time, and in some cases, there are lots of people, interested, in my religion, already, and they are responding, variously, the ones who have the technologies, to be able to look in, and see, from time to time, what all is happening, here on this planet, with me and my religious efforts.

IS THAT CLEAR! I HOPE It IS CLEAR, SAILOR!

Molding Up Bread

When you are going to mold up a piece of bread, with a type of spice, you need to mold the spice up, first, and get the molds growing, on the spice, itself. By doing this, you can prevent tiny worms, from developing in the spices. Tiny worm eggs are on nearly every food item, that you purchase at the store. For instance, fiberous seeds have them on them, spices have them on them, flour has them in it, and they are very tiny, and you can not see them. When you try to mold up some thing, a dried flower, or a bunch of dried flowers, such as peonies, or pansies, or dandelions, if you do not get molds to grow on the flowers, before too long, the eggs that are from tiny animals, will begin to burst open, and tiny wormy, larvae will begin to wiggle about.

To prevent this, in your molding up of breads, efforts, you need to mold up the spice item, first. To do this, you begin by drying out the item, and then by placing the item, in a plastic or metal container, with a rock or mineral stone of one kind or another, or a piece of metal, or tin foil, in the container with the item. You can place a piece of bread or a few pieces, or several pieces of bread, in the container, with the item you wish to use, to start a mold up process. Once the bread has begun to mold up, you need to watch the moisture content, and vapor content in the cannister. Moderate it, by removing the bread, once the bread begins to mold up. Let the molds, begin to mold up on the dried flowers, or spice item. As the spice item begins to show mold growing on it, around on every side of it, it is becomeing ripe for using, to mold up a large batch of bread.

The molds growing on the dried flowers, or spice item, will destroy the eggs of the animals, the bugs, that deposited their eggs on the item. Once all the eggs are destroyed, and once the dried flowers or spice items, are molded up, you will have greater success of molding up the bread, without wiggly worms developing. Ask your friendly, neighborhood dhourty, who will cooperate with you, for more information, as to how to mold up spices, and flowers, etc., and for information on molds, in general, and so forth, as they know all the secrets, and tricks, to molding up every thing possible, successfully, as they were trained in the molding sciences, and they are all, certified moldists, who can teach you every thing you wish to know

about molding sciences, and every thing else you need to know, to feed the organ animals, in your body, for you to regroverate your body, successfully, and for you to get well, from all the illnesses, that the dhourties, have helped you to get sick from. Show them the same kindness they show you, and be kind to them, as you invite them into your underground lairs, where you will be having them stay with you, as sexaling guests, and as teachers, to teach you about the molding sciences, and other sciences, you need to learn about.

Living Forever On Molds, Foods For Feeding Molds Animals, And Sexaling Juices

See my bulletin board, for more information on 'living forever' by eating molds and the foods they eat, to feed your organ animals, the foods they need to feed on, to be healthy, and to allow you to live forever. In addition, you need the male and female sexaling juices in your daily diet, as I've explained, on my bulletin board, which will allow you to get the spare parts, or baby organ animals, and other animals of all kinds, that you need to replace old and worn out, organ animals, etc., in your body with to allow you to live, forever. There is more to this science of regroveration, then I have recalled, so far, obviously, as this is a complicated science, that involves many things. As I remember this stuff, I will let you know what we've missed. My amnesiatic conditon is not helping me to recall every thing I need to recall, all at once. Find your self a cooperating dhourty, and get their cooperation, and you'll learn more quickly, and accurately. They also have pledged to teach you, all the molding sciences, and so far, they have not been fair, and they have held back this knowledge from you, so you deserve a break, and they must teach you, or they will do jail time, in my prisons, after my kids build them for me.

Clark County Detention Center

It is an odd thing, when they ask you your sex, and if you happen to be a girl, with a dick attached to your body, they call you a 'mixed genitals' person, rather than a 'male', or a 'female'. They do not check to see if male's have vaginas or not, and so only women, get listed as 'mixed genitals' persons. This is very peculiar. I was told to sit on the 'male' side of the room, where only males sit, in the booking intake area. There was a female sitting next to me, and she apparently had a dick, and so they listed her as a 'mixed genitals' person, or a 'GM' for 'genitals mixed', rather than, 'female'. This is very peculiar, as only women are selected for this gender specification. It is not a gender specification, obviously, and the dhourties know it, and they are just goofballing every one, pretending there is some thing about a woman, who has a dick, that some how makes her a non-gender person, and that non-gender person, is a 'mixed genitals' person. She becomes confused, as she is told to sit with males, in the jail house, and she is jailed, I suppose, with males, as well. This is very peculiar, if you ask me, but it seems to be the

case. If all men who have vaginas, were placed in a 'mixed genitals' classification, and were then told to sleep together in wards with mixed genitals women, I don't think that would be such a bad idea, but that is not the case, and only women with dicks are told to sleep in wards with males with dicks only, or males with vaginas, as well as dicks.

It is a goof ball situation, in the Clark County Detention Center, and I wonder how they figure their way through this situation.

Anyway, it is also a matter of public interest, that in Clark County, as well as in Nevada, state law allows for the prescribing of medications, at levels that are 'addictive' to the person. As I've explained, benzo diazepene's are types of opiates animals. I've also explained that hypnotics sleeping medications are also opiates animals. They allow you by state medical rules, to use these medications at levels that are addictive. But I've also explained that they put counter drugs in these medications, to make them addictive. They are not originally addictive, but with the use of counter drugs, they become addictive, as I've explained. These medications destroy your body, from the inside out, with the use of them, as when you stop taking them, your body is ravaged, by the counter drug animals, that need to feed on opiates animals, in your body. When you are abruptly taken off of the now, addictive medications, after the dhourties' tampering with them, and making them addictive to you, your body begins to feel extreme pain, as your body is being ransacked, by the counter drug animals, for every opiate animal possible, that is still alive in your body, doing work for you, in your body.

At the Clark County Detention Center, there is an organization, that is set up, to monitor incoming persons who may be taking prescription medications at levels, that the dhourties disapprove of, as the levels are 'addictive' and they know it, as they make them addictive.

If any one is taking an addictive medication, this organization has a state charter, and mandate, to 'detox' that person. That means, any one who is suffereing from any of the illnesses the dhourties have caused you to experience, such as asbestos animals poisoning, toxic shock syndrome, fibromyalgia, and a host of other, painful illnesses, that person is legally forced by law enforcement agents, to detox off of the medications that provide relief from the painful illness, the dhourties have helped you to have.

On the premises of the Clark County Detention Center, the dhourties poison you with fumes animals of all kinds, and asbestos animals, in the lock up facility, and if you happen to develop pains, due to those poisonings, you are out of luck, as you will not be prescribed pain relief medications by the Clark County Detention Center medical staff, as they are not allowed to prescribe to you, a prisoner, any substance that is addictive, unless you have surgery, or unless you have a clear breakage of a bone in your body, such as ribs, arms, fingers, and so forth, or unless you can show that your body is severely damaged, such

as from a knife wound, or from an other type of wound you recieved, during a fight, with an inmate, or guard for instance.

If you were poisoned by the dhourties, before your lock up, by accidentally inhaling the fumes in detergents for laundering, or by breathing in the fumes from gasoline while filling your gas tank at the gasoline station, or by breathing in the exhaust fumes from automobile exhaust as you drive down a road or highway, or as you live by a road or highway, or by breathing in the fumes from industries which are polluting the atmospheres with lethal and toxic fumes animals, in many instances, non-stop, you are out of luck if you are on medications to allow you to tolerate the pains, as the detox center wing of the Clark County Detention Center will forcefully take you off any and every medication that your doctor on the outside, in society, has prescribed to you, and that provides 'pain' relief from the dhourty's established chemical industry and petro chemical industry induced, illnesses.

This is a very confusing situation, unless you are a smart person, and I am not a smart person, but you will be able to figure it out, if you look into what I have written about, on this subject. In any case, you are being nailed, either way, by these social despots or societal despots, as they run society, who have deficient brain functioning.

Well, I suppose you will have figured it out, by now, or you will figure it out in time. I am just noting it for the record. This happened to me, once when I was nineteen, and I survived it, but it was unpleasant. I was detoxed, forcefully, when I was introduced to a lock up facility in Washington DC, that I was forced to go into, after I decided to bail out, and take an overdose of my meds that my doctor legally prescribed me, which was methadone. I had no say in the matter, and it took three grueling weeks, detoxing me, before I felt normal, again. That means, the counter drugs animals were raging rampant in my body, destroying all the opiates animals in my body, for three weeks, until the counter drugs animals, finally all died off from lack of food. It may seem funny to some people, but it is not a funny situation, and it is potentially life threatening, and they do not give a shit about whether you survive or not. They tried to get me into their program to detox me, this time, as I take a two meds for helping me with the pains from the poisonings I am experiencing. I will soon be taking three meds for the pains, and the third med is a hypnotic. I take a benzo diazepene medicaition, an opiate pain killer, and will soon be taking a hypnotic which also has pain killing properties. It is all legal, and they are all prescribed, legitimately, and the Clark County Detention Center dhourties, tried to get me into their program, but I refused to cooperate, and did not sign my rights away, and asked for a lawyer, and they could not get me into their program for forced detox, and if they had, I would be dead in eight or nine weeks, to twenty to twenty one or twenty two weeks, from toxic shock, from the asbestos animals poisonings, and from the fumes animals poisonings in the industrial cleaners they use, and from

the industrial refrigerants releases of poison gas fumes animals, and from the HVAC cooling gasses release of poison gas fumes animals.

I will not be going back to jail, or to the Clark County Detention Center lockup facility, or to any of their lock up facilities, their fortresses for killing off the dualdigers, as that would be a death sentence, and I do not have the karma to die, so I will not be seeing any law enforcement agents, at my door, or in the park, once the Clark County Justice Court issues a bench warrant, for my not showing up for my court and trial date. I am GOD, and if any one could figure it out, I am doing religious prayers, and doing religious prayers, is not a lewd act or lewd conduct, even though I am naked while doing my prayers ceremonies. I was born naked, and I will continue to live, naked, in the shower, and in the bath tub, and when I am changing my clothes, and when I am sexaling, and when I am doing my Tai Chi aerobics prayer ceremony activities. Lewd acts are simply, acts that solicit sexual engagements with others, in the simplest sense, and so a wink would be lewd conduct, and a smile would be lewd conduct, and no one is going to go to jail, for those, except maybe in Muslim countries, where the women wear veils to cover their face, and where they force women and girls to wear gowns to make women and girls appear as if they live in a sack, in many cases.

Lewd Conduct Brings You Closer To GODLYNESS, Or The Love And Chastity, Or The Beauty, Elegance, And Grace, Of GOD's Love For My Children

Sexual activities are not within the domain or realm of human beings to cast judgements about. Sexual conduct is not within the domain for human beings to cast judgements about, or to make any opinions about, legal, or otherwise. Why not? Because sexual conduct and sexual activities are devine, sacred, holy acts that can not be looked at in any way other than from the perspective of holyness and the graciality, or gracenesses of GOD, that's me. Graciality is sacred GODLYNESS, or Devine rapture with GOD.

Governments have no jurisdiction or decision making powers or authority over matters that deal with spiritual beingness, and one's relationship with one's creator, GOD, that's me. It's arrogance on the part of any person who thinks that he or she can regulate a person's behavior that brings one into direct contact with one's creator. The karmic scores for this type of mistaken belief and practice, by any one, are high, and the outcome is a punishing one. The penalties for interfering by legislation or by any other means, with a person's rights to live in harmony with one's creator being by advancing one's sexually committed life style of sexaling freely with people and animals to reach a higher state of goodlyness, and grace, and in time, make a closer bond and contact with one's Creator, GOD, that's me, is not a light penalty, and this behavior of legislating out by laws, codes, and regulations the rights of an individual to practice sexually commiting oneself to others by sexaling freely with others for reaching higher states of goodlyness and grace, and contact and

closeness with one's Creator Being, that's me, GOD - and I'm the one responsible for all of this, as should be obvious by now - is folly, foolishness, drunken gayety, and ludicrously laughable behavior.

If and when you become devinely raptured with GOD, that is, when you begin to sexually orgasm and erotem or experience sexually orgastic and erotic sensations as a result of sexual mindfulness, and sexual contact with others, you are in the supreme state of graciality, and that means you are one with GOD.

To state any thing about the holy and sacred activities of sexaling, sexual mindfulness, sexual compassion for and with others, other than they are devine act, and acts that brings you closer to GOD, and acts that allow you to breath in the goodness of the GODLY spirit, or the love of GOD in your life, that means, the raptured sexaling orgasming goodlyness of a good orgasm, with full motors engaged, and all orgasming potentials realized, is folly and ignorance based behavior.

For humans to comment on rapturing with GOD in a sense of, is it good or is it bad, is sheer nonsense, and unacceptable, by any standards. It is a devine act that brings you closer to your creator. To say sexaling is this way, or that way, and so there fore, we are going to prohibit it, and so forth, is sheer lunacy, and not a notion that can be universally accepted as a reasonable statement by a reasonable person. It is the banter of minds that are insane, that state such remarks.

Sexual Compassion For And With Others And For And With Self

Sexual compassion for and with others, are the actions of engaging others to sexually erotemize them, and in so doing, to erotemize oneself, and to sexually orgasm others, and to orgasm oneself, for the sake of clearing up, or cleansing their and your karmic distresses, or karmic failures. Karmic failures are the naughtynesses, or misbegotten, mindless, dhourty like, animalistic behaviors, that lack compassion, and that lack mindfulness, and which is rife and riddled with jest and gayety directed at the victims of their torture sessions. This is mistaken, mindless, and uncompassionate behavior that causes undue and unjust suffereings and miseries to others, and draws one and all of my chidren further away from their relationship with their Creator Being, that's me, GOD.

Balancing Out Karma, It Is My Way, Or Thou Shalt Takeeth The Highway! And Getteth Thoun Self Out Of My Universe!

On the one hand, there is a need to balance out one's karma by engaging a person's life, and by bringing that person to a point of suffering where at the mathmatical formula for balancing out karma, and cleansing a person of his or her karma, will be satisfied. This need to balance out one's karma is based on a mathmatical formula, that must be followed, to allow people to balance out their karma, so that they can live as a nearly decent human being.

The need to engage others, in retributional recoursivistic actions, for the sake of balancing out their karma for them, is a compassionate act, that can be done with passion, and compassion, if one's mind is a 'pure' mind, and the mind of GOD, that's me, John Francis Ayres.

Only my mind is pure enough, and capable of GODLY passion for my children, that will bring a proper result to the lives of my children for balancing out their karma. The dhourty menacers, think they are mini gods, and they think it is their right and obligation, as stated in their code books, to help others with their karma, and so they are always, brutally punishing and tortureing others.

There is a long history to this, that will help explain how this got started, and I am partly to blame for their beginings as an organization, as I helped design and write their code books. It is not clear in my memories how much I helped them to get their start, but as a sexaling lay organization, they had and have the right to make their own code books, that follow basic premises, established by me, long ago.

Their behavior is too far out of line, but I used them as a supplemental assistive group of persons to assist me, in many ways, to allow my children to get their karma straigtened out. It was and is an imperfect organization, as it is run by imperfectly minded people. It is time to disband their organization, as now, in the Gurkian Age, there will be no other methods allowed for straightening out people's karma, other than the one's that I insist on, the ones that I implement with the assistance of my working children, the ones that I will use, to straighten out my childrens' karma, over time, as we progress along to the future.

The Ludicrousness Of Playing 'Footsies' With The Insanity Driven Dhourty Government

For me to contest a charge of 'lewd conduct' with the insanity driven Dhourty government is not an act that I will be engaging myself in. By insanity driven, I mean they believe they are all mini gods, and they believe they have the ultimate right to determine others' destiny. This is sheer insanity, and they are all mentally ill, and that will be proven, once you begin your studies in the programs that I and my working children have lined up for you to study and participate in.

What Is Lewd Conduct?

Lewd conduct is an act, that draws others to a higher state of knowing GOD, in that if you engage in a sexaling act, as a result of 'lewd conduct', or the act of soliciting others to make a sexual statement, or that is, to solicit others to commit them selves to a sexual activity, or action, for me to contest a charge, of 'lewd conduct', as I was saying, is sheer nonsense, and ludicrous behavior, and it is not in the domain of human beings to condemn 'lewd conduct' as lewd conduct is grateful to GODLYNESS conduct, as lewd conduct, and lewd behavior of sexaling with others, which is also a type of lewd

conduct, is a sure way to reach higher states of grace, and that means, you grow closer in contact with your creator as a result of your lewd conduct.

Gratefulness to GODLYNESS is a condition of being enraptured during the sexaling orgasming phase of sexual and erotic thrills inducing activities. The ejaculation and orgasming of males, and the orgasming and ejaculation of females, and the running or flowing of the sexaling juices from a females' body brings on a higher state of grace, and it brings you closer to your pure, devine, self as a 'child of GOD', and I am GOD, and I know this kind of stuff, so take my word for it, and get your brains, unbrainwashed, and get your dicks and vaginas busy, and learn what purity of self is all about as you sexal for weeks, and months, and years, non stop.

The longer you sexal, the higher you will go, in terms of reaching a higher state of closeness to your Creator, that's me, GOD. For the dhourities to unfuck up them selves and their brains, and for the dualdigers to unfuck up them selves and their brains, and for them all to get their act together, to where they can appreciate the higher states of GODLYNESS, will take some time, maybe a few kabillions plus years, or more. I am, technically, a dualdiger, and so I am also in that lot, but I have an advantage, in that I am GOD, and it is easy for me to stay pointed in the correct direction, for gaining a higher sense or appreciation, over time, for the Love Of GOD, as my brain is minorly connected to that state of being. There is a connection, in my brain, that will carry me forward, and that will allow me to lead all of my children, to this higher level or state, or condition of beingness in harmony with the Love Of GOD, over the years we are sexaling together, in my religion, during my religious ceremonies and all of my religious activities, forever.

With your experiences of coming closer to GODLYNESS, your life becomes purer, and your karmic records that you carry in your body, hidden behind the particals in your body, on different layers, or dimensionalities, and you can learn more about this, in the courses we offer, for you to learn to sexal for a living, and so forth, the records you carry begin to disintegrate, and they pale or loose their sharp, duralangular edges, is one way of looking at it.

Duralangular edges is a term used in math, and I'm not familiar with it, but it must be something to do with geometric shapes. In any case, the edges sharp off, and that means, they drop off, and begin to form more loose, or flowing, curvatures, as they disintegrate. Think of a box with sharp edges. If the box is beaten on the edges, the box will loose the sharpness of the edges, and slowly, if you beat at the edges of the box, long enough, the box will begin to crumble. Well, it is sort of the same thing, and your karmic records have these types of geometric shapes to them, as we package things to do with your karma, in tiny containers, and then affix them to your karmic records. This sounds peculiar, but we have a way of doing it, and it works well, and

we can disintegrate these 'packages' or capsules, and as we do, we straighten out or make lighter, your karma. This needs further explaining, but you'll study it in your courses, when you begin to study for the various programs we have for you to take and learn about how things work and about how things are in my universe.

The sharp edges are slowly, very gradually, lost, or smoothed off, and your karma changes, slowly, very gradually, as you acquire more and more knowing GODLYNESS, and knowing GOD experiences for your self, as you orgasm your way to blissful, purity.

It takes a lot of coming closer to GODLYNESS experiences to do anything significant for your karma, and for cleansing the karmic records in your life, the ones that are hidden in the dimensionalities behind the particals that make up your body. There are layers and layers of dimensionalities, and they nearly go on, forever. There is a limit to them, however, and between this dimensionality, and the final dimensionality, you have huge, and vast store houses of stockpiled karmic records. We find lots of places to hide them, and you won't believe how long it is going to take you to get all your karmic records that are stored not only in the layers below the particals in your body, but elsewhere, through out my whole and entire universe, behind the particals or in layers of dimensionalities, under the particals, that exist as matter, and as types of energies, and as types of many other things, throughout my universe.

Storing And Dealing With Your Karmic Records

Your records are stored from here to kalamazoo Michigan, and that is a phrase that says, they are every where, and the amount of time needed to erase them all, and deal with them all, bit by bit, is quite large. We've been here, a long time, and we've stored up your karmic records, every where. If you think this is a simple job of erasing your karmic records, you are mistaken, and you had better prepare your self for a long term, and long haul project for erasing your karmic records. Though the process of cleansing your karmic records is slow and gradual, through the knowing of GODLYNESS experiences you acquire, over time, the cleansing effects do occur, and your karmic burden is reduced, a tiny bit. You have stockpiles and stockpiles of karmic records, and we have found every imaginable way of storing them, and we have shrunken them down, to pint sized records, that are very tiny, and we have the technologies to do this, and we can resize them, and then place them inside of the holding cells, in the many dimensionalities behind, or underneath of the particals in your body, and in your vicinity where you live, and near the planet where you live on, way out to very far away from your planet, to nearly half or so away across the universe, the current sized one, or nearly that far. Your karmic records that interplay with your life, at the moment, are stored out that far, and we have others, stored and hidden elsewhere, as well, that are just sitting there, waiting to be dealt with. Our placing of your karmic records, along with every one elses,

in this manner, deterimines what your karma is.

With this storage method, it keeps your records where we want them to be, for us to be able to determine what your karma is, and for us to be able with my religion, and with your religious activities, of sexaling with your self, with others, and with your sexaling with animals, as sexaling is sexaling, and there is no distinguishing of the effects of sexaling. That is, your sexaling brings you closer to GODLYNESS, no matter if you sexal with an ape, or baboon, or with a monkey, or pet goose, or neighbor, or sister or brother, or your child, or mother or father, or the conductor on the train, or subway, or the stewardesses and stewards in the airplanes you fly in, or on the trains you travel and commute to work in, or on the cruise ships you vacation on, those of you with a little money, or with the workers in the casinos and restaraunts that you frequent, if you happen to live in Las Vegas, or other places where casinos are a part of the local life style, and so forth, with your sexaling experiences of coming closer to GODLYNESS, as you orgasm, and as you pulsate with energies that purify your life, these energies, and other energies my kids have a lot to do with, in the transporting of them to you, during your religious activities, and other things that are like energies that also cleanse your karma, but that need further clarification as to what they are, these energies, etc., erase your karmic records, in a priority determined manner with your karmic records stored in this manner as described. You will learn more about this, in detail, as you begin your studies once you have access to the software package that the FBI, and government agencies are in the possession of, as I've explained about.

Rules Of Conduct For 'Permission Granted' To Sexal With GOD, That's Me

For the purpose of recieving permission to participate with me, GOD, in my religious ceremonies, the rules of conduct are very strict, and you will not be allowed near me, unless you pass the basic orientation of your brain requirement. That is a requirement that says, if you are not pointed with the same idea about where you are going, in relation to your leader, John Francis Ayres, GOd, aka, GOD, than you are not going to be allowed to participate with John Francis Ayres in any of his religious ceremonies. For this reason, and for similar reasons, we will have many temples and many religialing centers, for all people to engage each other, sexually, so that they can eventually lead a more devine, and spiritually graced life. There will not be just one worship center, the one where I am starting out at, but there will be trillions and kazillions, and more, in my universe, in time, as we go along, and as we change our karma to the point where we are in need of more religialing centers, and in need of more temples, as we bring more and more people, into my religion, throughout my universe.

Few people will be given 'Permission Granted' status, to allow them to participate in religious ceremonies, with me, GOD. My working children will either permit or deny 'Permission Granted' status, and it is not

some thing that I determine, my self, with my whimsical attitude about who is what kind of person, and so forth, as most of my children, I do not give a shit about, and that is about for nearly 100 percent of them. The only ones I care to meet, are the ones who have graduated from a course in rehumanizing at my Epcot Center, and there are lots of them, and I do want to meet them, as they are the only sane children, I currently have. In time, you will all become sane children of mine, but it might be awhile for a lot of you. Anyway, now and again, there will be other people who get their act together, good enough so that my working children will grant them, as well, 'Permission Granted' status. The people who are the sane children, I suspect, I will be seeing, sooner than any one, else. The children who move most quickly ahead in their determination to get themselves unfucked up, mentally, are the ones I suspect I will be meeting, to begin with, and then later on, others will join them, as well. I am to an extent, fucked up in the head, and every one of us, is, as we are all victims of the brain washing of the dhourties. It is our karma to be this way, and that is not so great a situation, but it is the situation we find ourselves in, regardless of what we wish the situation would be, or would not be. That means, despite how messed up this planet, and my universe is, and despite our wishing it were not this way, it is the reality we are living in, and we have to admit that this is a messed up situation, or fucked up situation, and the sooner we are able to admit to it, the better, as that will help us to get ourselves grounded in 'reality'. This is a long topic, the topic of who will be permitted to meet with me, and who will be allowed to join my religion, directly practicing with me, and so I will not go into any further detail, now, but you can study about this topic, if you wish, once you recieve the software package, that will become made available to you, eventually, by me, if by no one else, as my working kids will build me a temple, or a hut, it does not matter, for me to begin my religious activities in, in earnest, and I will have a broadcast tower, and the broadcast frequencies, to be able to directly upload it, the software, to your computers, if you leave your computers on, long enough. You will get a choice of 'Do you wish to install the software?' and that will pop up on your screen, one day, when it has been cross loaded to your home or office computer. You can cancel out, or you can select the option to have it installed, and accessable to you, completely, for you to begin working as a desciple of mine, in the new programs, for the Gurkian Age. How soon I will be able to get my working kids to build the required facilities to then allow me to broadcast out and transfer the software, or cross load it to your computers, is not on my schedule list, as I do not have a schedule list, and I do not know when any thing is going to take place. I came into this world, without a clue that I am GOD, and I have no manual for what my responsiblities are, and what my schedule is, so I can not say, when some thing will happen, and so forth.

For the present, I am stuck in a swamp like sand box, a parcel of land, inhabited by dhourties, who are assasins, and killers for hire,

who work hand in hand with the dhourty police, and dhourty members of law enforcement, and their dhourty staff. Dhourty hospitals also work hand in hand with the tunnel rat association of dhourty assasins and killers for hire, and with the dhourty police and their dhourty friends, and dhourty advisors. All dhourties work with one and another, in their local area, and they are generally, well connected with each other, in that local area, but only a few of them know about what is going on, with myself, GOD, and with my battle to over throw the dhourty led governments of the world.

The Dhourties Are Not Informed As To What I Am Doing, And Few Of Them, Know Any Thing At All About Me

There is no TV or media broadcasting about what I am doing, and they only have their 'propaganda' TV to watch and to gain information from, in addition to their 'propaganda' news papers, and 'propaganda' news magazines. They do not exchange much information, as they are prohibited from discussing business, except in the underground 'fortresses', the 'torture' facilities for torturing the dualdigers. Even in those locations, they do not generally discuss anything to do with business as usual types of stuff. Only important topics or issues, such as John Ayres trying to destroy the Lesbianists, or similar topics of importance, are allowed, and not much discussion of any thing of interest, is exchanged by them, even in private. They are busy with torturing the dualdigers, and it is a waste of time, to discuss private, personal, or local issues, and even state or national issues, and they are not allowed by their code books, to discuss 'wasteful' of time, issues with each other, while they are on their tour of duty.

Lewd Conduct Should Be Advanced, Not Prohibited, In A Sane Society

Lewd conduct should be advanced in any society, that has a sane, municipalator, or manager in charge of laws and criminalities, and not 'condemed' as is the way it is handled in this society. This will lead to the detieroration of and the disintegration of human relationships, and it will end all possiblities that people have of attaining a higher standard of spiritual beingness, or spiritual goodlyness engaged in a love relationship with one's creator. The action of sexaling brings about a state of euphoria, but in that euphoria, there is a holyness that is hard to penetrate into and perceive, as sexaling in our demented and twisted minded society, is a condemned activity, and that is clearly brain washed into every one's minds, as that is a propaganda ploy of the Lesbianists, the dhourties. Arresting ladies who sexal for a living, is one propaganda technique the Lesbianists use to alter the minds of people. Christian values, of, sexal only with one's spouse, is saying, you can not sexal with others and if you do, you will be committing a wrongful act. That is also clearly stated in Christian concepts, and it is another brain washing technique, not to mention, a most devious one, that is highly rewarded, with maximum penalties, in my karmic score card approach to managing my universe,

and you will learn more about that, when you begin your 'Managing My Universe' course work, and you will also learn about it, as you go along, and learn the principals of my religions, past, and present.

Lewd conduct is not a topic I will discuss with prosecuting attornies, or with DA's, or with judges, or with police, as they are not qualified to say a word about the realm of GODLYNESS, in their inferior roles as varmint hunters, or criminal watchers, and on this planet, as criminal torturers and killers. They are not fit, the Lesbianists, mentally, to judge or determine the value of sexaling. They are so anti-sexaling in their actions and words, and they are so incredibly twisted up in their brains with regards to sexaling, they will never come any where near me, or close to me, not one of them, as they are too twisted in their minds, to be allowed by my children, to come any where near me.

The joke the Lesbianists promote about sexaling, where they publicly condem it, and privately enjoy sexaling with their co-worker dhourties, is a big joke, the dhourties are playing on you, and you are being goof balled, here, as well, into believeing that sexual promiscuity is a 'bad' thing. You are a fool if you believe that, and I am here to change all of that negative thinking, that you are burdened with, that the dhourties have fooled you into beliveing, if you in fact, do believe that sexual promiscuity is a 'negative' thing, as that, as I've explained, is the only way for you to erase your karma, and to ease the burden of karma in your life.

Like it or not, if I had wanted you to wear clothes when you were born, I would have designed your bodies to have clothes on them, when you were born. Your skin is your clothes, and it is only a matter of time before you realize it. I did not design your bodies with any other clothes on them, for your birth, and so, all you need to live in, in moderate climates, is your skin and hair. That is all you need and you will all get used to it, one day, living in your skin, and hair, only, after you begin working for me, sexaling for a living, as I have explained about.

You are all going to work for me, erasing karma, from now on, by sexaling, as soon as I get my religious ministry, established. My kids will be building the facilities for you to live and work in. When they will begin building the facilities for you to live and work in, is the question, that I do not have an answer for. But I am praying, that it will be as soon as possible, as I do not need to be surrounded by dhourty jerks in the park, who call the police every time I arrive to do my Tai Chi aerobics excercises religious prayer ceremonies.

The dhourties in the park, and the dhourties at the police station, and in the Clark County Detention Center, are all partners, who work hand in hand, along with police department, sheriff's department, and other law enforcement clerical dhourties, law enforcement dhourty judges, and prosecuting attorney dhourties. We are surrounded by the dhourties, in government, such as all the politicians running for

president, and all the politicians running for vice president, including, former mayor Guiliani, who was with other dhourties, primarily responsible for the World Trade Tower bombing, as I've explained about.

These dhourties, and their dhourty friends, in society, account for a large segment of our society. The ordinary people, for the most part, former Lesbianists, i.e., dhourties, in previous lifes, are another large segment of our population. One other segment, is my, what I call, my public sector service workers, animal people, who eat and torture dhourties, and others, who need their karma balanced out.

The dhourties are well aware of these animal people, and there are some dhourties, who can not function, brainally, very well, and these dhourties who can not function brainally very well, are not that different from these animal people, as they both do the same basic thing, and that is torture people, and torturing people helps to balance out karma.

We are in a new age, the Gurkian Age, and I have a whole new religious program, for balancing out karma, and you will all participate in it, if you want to balance out your karma, and if you want to erase your karma, and you will be in this religious program, for eternity, sexaling with each other, as I have already explained.

Organ Animals And Sexaling

I mentioned the organ animals and their ability to make notational thoughts to your brain. The 'I need sex' 'I need sex' drive in your pants, or panties, on the front side of your groin, or on the underside of your groin, or in your butt hole, the urging out, of 'I need sex' 'I need sex', or in the boobies of women and girls, the urging, 'I need sex' 'I need sex', they are all notational thoughts from the sexaling organ animals in your body. Let's get used to this fact, and grow up, and deal with things, logically. They are calling out for our assistance. They want love and affection. They are hungry for love and affection. I put them in your body the way they are so they will help you in your daily activities of sexaling. Now let's get real, and let's pet those organ animals, when they call out, saying, 'I want sex, please pet me now!' It's be kind to organ animals week, this week and every week from now on, until we learn to be helpful to all of our sexaling organ animals who need petting, and until we learn to be comfortable with our sexuality. Let's get real, and let's get the governments of the world to strike down the laws regarding sexuality, nakedity, and sex between younger people and older people, and let's also get the governments of the world to strike down all the laws regarding the use of opiates, and aphrodesics in our daily diet and in our quest to get healthier. We need these in our diet, as I've mentioned before, and we will push ahead until we get the dhourty governments of the world to listen to us, and then to comply.

All Hands At The Quarter! Ready Your Weapons! Off Shoot Now!

That means, get to your stations, and prepare to fight. Get your weapons in firing order. Discharge your weapons.

That means, get naked, get your dicks, scrotums, your vaginas, labia, all your sexaling equipment, such as your titties, your chests, your pelvises, your hips, your tummies, your groins, your butt cracks, your butt holes, your shanks, your backs, yopur shoulders, your necks, your under arms, your feet, your palms, your toes, your fingers, your tounges, your lips, your mouths, your throats, etc., and get every little or big organ animal in your body that is hiding in you, to work, working for you, as they are all designed and built for you to use for sexaling enjoyment, and that body you are in, is designed and built to be used for sexaling with your self, with others, as well as with animals, and get ready to use them, and get using them, now.

Keep Firing Till Ordered Otherwise!

That means, do not stop sexaling, till you are ordered to.

Captain Off The Bridge.

Eyes, Ears, Noses, Throats, Tummies, Buttholes, Dicks, Vaginas, Expeller Ports, And Who Knows What Else, Oh My! - Subtle Ways Of Brain Washing People - What Is Sodomy? - Societal Brain Washing - Hair Ports - Teeth Ports Updated: 11-08-07 Rev.b 05:50

Eyes, Ears, Noses, Throats, Tummies, Buttholes, Dicks, Vaginas, Expeller Ports, And Who Knows What Else, Oh My!

Did you know that we have lots of organ animals inside of us? We do. And do you know what else? Each one of them, has its own brain. It has lots of brains inside of it, and each one does a particular function, or maybe many functions. Probably lots of functions, I suppose. In any case, each one has eyes, and each one has a nose, one or more, and each one has a mouth, and each one has ears, and each one has a throat, one or more, and each one has a butt hole, and a dick, or a vagina, or maybe both, or maybe something in between, or maybe, some thing that is not like a dick or a vagina, and is not in between, but it is some thing that is wholely and entirely different from any thing we are familiar with as far as reproductive organs go.

They also have tummies, and expeller ports, which are ports or openings, that help them to expate the juices that there are inside of them. What does expate mean? I think it means, to spit out. They expate, or spit out, all kinds of juices, from lots of expeller ports, or expeller opening holes, that open and close, and when they open, juices come drooling out of them, and when they close, the juices stop coming out, and the fluids drool and drain off and go some where, such as down a via duct, or a channel, and out into a pool, where there are animals, swimming, and snorkeling, and looking for food to eat.

Anyway, it's a confusing world, inside the body, if you don't go into it, and look around for your self, at all the possible hiding places, there are animals hiding, and eating up one and another.

We can look inside, and that is much safer, with microscope technologies that will allow us to look inside, into all the different habitats that there are, where animals are living, eating, making children by themselves or with others who are like them, and so forth.

There are all kinds of odd creatures living inside of us, and we haven't even begun to understand who is in there, and what they are all doing. I think we need the cooperation of the governments of the world, the dhourty governments, that I've explained about, and when they give us a little cooperation, we can build the types of microscopic technologies we need to look inside of our bodies, and see all the little animals that are moving about, and eating, drinking, swimming, fooling around, walking around, and just playing around, or making love with one and another, to make babies.

Did you know, too, that there are optical nerves, that are a little like optic fibers, and they connect many of the organ animals inside of us, up to optic cirtcuits that then allow them to see out side of our body.

That means, they can see the world around us. Did you know our whole body is covered with microscopic, and smaller, optic ports, or viewing windows, and viewing ports, to allow the organ animals inside of our bodies to see out side the human body.

It's true. There are also nerves that are channels, like optic ports, but they are sensory ports of different kinds. These sensory ports also connect the organ animals up to the skin of our bodies, so they can smell the fresh air around us, and these sensory nerves act like little noses, and they are all over our body, in smaller than microscopic sizes, as well.

There are also sensory nerves that function as ears, for the organ animals, and they are connected up to the skin of our body, so that the organ animals can hear things, that are going on, around us.

There are other sensory nerves, that connect organ animals up to the surface of our skin, and these sensory nerves, allow for communication with other organ animals in other people's bodies.

The organ animals all see each other, the outsides of each other, and they can even see inside of your body, with special heat wave signatures, and other technologies, that allow them to peer inside of your body, and then see their organ animal friends, more up close.

That means, they can see each other, and they can talk with each other. They have sensory nerves that transmit code to the special ears of the other organ animals who they wish to speak with, and the special ears of the other organ animals pick up different frequencies, and different coding structures, and then they can communicate back

and forth with each other.

You didn't know that, did you. Well, it is a secret the Lesbianists, or dhourties, do not want the dualdigers to know about. Do you know why? Because, their Christian bullshit is just that. A pile of bull shit. Not only that, but their sciences are all full of shit, too. If you know that there are organ animals who want to see out side your body, and view and communicate with other organ animals, who are in other people's bodies, then you will want to allow them to hear as best as they can, and you will want them to see as best as they can, and you will want to let them smell the fragrances outside your body, of other organ animals, as best as they can, and so forth, and that means, you will want to take your clothes off to allow them to see outside, and hear outside, and smell outside, and speak outside to other organ animals, with no interference from your clothes, and skirts, and pants, and underpants, blouses, bras, shirts, socks, shoes, jackets, handbags, brief cases, and so forth.

You would want to stay naked, as much as possible, because that was how I designed you to be. Did you know that? Well, it is true. We have to let the organ animals inside of our bodies get as much fresh air, and as much sunlight, and as much sensory input as possible, from the outside world, and from other organ animals, for them to be happy, living and working where they do, inside of our bodies.

Does that make sense to you? I hope it does, because we are all mistaken in our beliefs that we must wear clothes.

Nudity promotes the health of the organ animals, inside of our bodies, both mentally, emotionally, spiritually, and sexually. They get turned on by the fragrances of other organ animals, and by the sights as they look at other organ animals, working in your body, and at the figures of other organ animals, and at the sexy looking sexaling ports, or dick and vaginas, of other organ animals. They are like puppy dogs, in a way, but much more complicated, and much more intelligent, many of them, any way.

They have complicated code structures, that allow them to speak back and forth with other organ animals, in ways that allow them to tell jokes, and to tell funny stories, and to sing songs, and to teach other organ animals who are like them, about things they know about.

Not many of you may know this, but all the dhourties know this. They have to keep it a secret from you, so that you can continue in your ignorance, thinking you are 'created in the likeness of god' which is total bull shit and trash.

Well, now that we understand that much, it is time to investigate and get this all cleared up. Now how do we investigate this? I don't know, but maybe when we get the cooperation of the dhourties in government, we will get some software from them, the software that I handed to them, or the software that they have hidden away in secret filing

cabinets, which they can allow you to use, to see inside your body, and investigate all these things.

Do you think the organ animals like being trapped inside of your body, unable to see out side, or hear outside, or speak to others, outside, because you live so far away from each other, and you live in tiny boxes, homes, or houses, or apartments, and condominiums, etc., where you live by your self, separated from others.

I don't think they are very happy that you are all living in your tiny boxes, which serve as homes for you, where you live by your self, much of the time, and you pay no attention to the needs of the organ animals.

They need light, sun, shade, coolness, brisk breezes, and the scents and smells of other organ animals, and the nearness of others, to them, so they can communicate and chat back and forth with their friends, the other organ animals in other peoples' bodies.

You need to marry each other in large groups, in other words, and you need to stay togehther in large groups, and you need to be naked, twenty four hours a day, in large groups, and you need to go out side and play naked, in the sunlight, with others in your groups, and with others from other groups, to allow your organ animals to get all the opportunities to meet with new people, other organ animals, who are as intelligent as they are.

Did you think you were the only intelligent people in the whole universe? Well, some of my organ animals are almost just as intelligent as you are.

In some ways, they are as intelligent as you are. Did you know that? How does that make you feel. You have a cooped up organ animal, lots of them, inside your body, who you do not even know about, and they are all wanting to make friends with other organ animals, and they are all wanting to meet with other organ animals, while they work for me, and for you, inside of your body.

Well, the little secret of the dhourties, this one, any way, is now out and open to the public, and you can make of it, what you want, and you can either research it, and learn about the facts of this, or you can deny it, in ignorance, because you think 'Jesus saves' and you think 'god' or 'allah' is going to make you a nice home, after you die. What garbage talk.

The dhourties have made you swallow their garbage talk, all this time, and they have been fooling you, and they have been rejuvenating their bodies, and then playing as if they were some kind of watch person, or care taker, who could decide your futures for you.

Well, I don't think Hillary Clinton, or Barack Obama, or any of the other dhourty government leaders who are running for a presidential candidacy, or for a vice presidential candidacy, is going to like the

news that you now know what is going on, a little more than before, inside of your body, and that you are about to reject their religious garbage talk, and all of their sciences garbage talk, and all of their statutes garbage talk, that help to keep you in check, and in line, and that keep you going, working and growing older, day after day, paying the taxes for maintaining their livelyhood, while they have a way to rejuvenate themselves, as professional moldists, and while you have nothing, other than a token watch for working thirty, or more years, devoted to the company, before you were released from work, with a meager pension, to find a grave yard plot, for placing your bones in, after you die, and go back to my Epcot Center, for refurbishing, and for making you as good as new, nearly, for your release as a new tummy baby, back to one of your former neighbors, or former relatives, as a new baby.

Isn't that about the stupidist thing you've ever heard of? And isn't that a joke. Well, they get away with it, every day, and the dhourties who support them, organizationally, are in on it with them, and none of them deserve much of a nice smile, or any thing else, for that matter, for all their mean jokes and tricks that they have played on you.

That means, go right ahead, and kill them all, as I do not care any more, about any of these dhourty kids of mine, unless they are willing to cooperate with all of my dualdiger kids. Do you understand that? Go to the dhourty courthouses, and blow them up, and go to the police stations, and jails, and prisons, and blow them all up, and medical hospitals are other big places which dhourties like to torture dualdiger kids of mine, under them, and even in secret rooms, in them, and so are universities and colleges, and large schools, and low income housing projects, government buildings of all kinds, and blow all of them up, along with the Pentagon, Fort Knox, and so on.

We have to get the dhourties in government to cooperate, and to do that, we need to send them a message. So if you wish to blow Washington, D.C., out of the surrounding area, and level the white house, and every one in it, then go right ahead. You have my explosive formulas, on my bulletin board, so go right ahead, and do what you think is right.

Now, we need the cooperating dhourties, to tell us every thing, and we want them to cooperate with us, as quickly as possible. Are you listening, Mr., And Mrs. Dhourties? You had better be, as some people may not like you, very much.

When the organ animals all get charged up, then you, your self, get charged up. Did you know that? You bet it is the truth. When your organ animals spot a pretty looking girl, if you are a boy, or if you are a girl and your organ animals spot an attractive looking guy, then your organ animals inside of you leap into the air, almost, and they are saying, 'I want to sexal with that person.'

If you are a girl, you begin drooling out of the vagina, and your body stiffens up in many places, and you get firm, and ready for sexaling with the other person. Other things, such as hard titties, and hard tittie nipples firm up, and your butt muscles firm up, and your vagina swells up, and your organ animals are all saying, 'Let's go for it.' What fools we are to ignore our organ animals. If you are a boy, your dick gets firm, and you get a big one. That is a hard dick that inflates and grows large.

Subtle Ways Of Brain Washing People

It is in the Christian teachings and Muslim teachings that say, we shouldn't go around, looking with 'roving eyes' and, we must not look women and girls in the face, in the muslim countries. They teach about 'lewdness' which is a totally made up, fictitious concept of theirs, as there is no such thing as lewdness, and they only make us think there is, with their unique, deceptive, and tricky brain washing techniques that they use in the mass media, and in schools, and in churches, and in synagogues, and in mosques, and so forth. Saying 'incest' is a bad thing, or that 'sex with a minor' is a bad thing, or that 'casual sex' is a bad thing, and only 'loose women' have casual sex with others, or 'tramps', and calling girls 'sluts' and 'whores', and using words like 'mother fucker' as a way of saying the person is a bad person, or using the word, 'rape', or 'gang rape', to mean some thing 'bad' happened, or in the same way to use the words, 'sodomy' or to 'sodomize' another, to mean some thing that was against rules of some 'abstract' 'god', or something, who supposedly left a bunch of rules to live by which are in the quoran, or bible, or Judaic texts, and so forth, all these examples are used to subtly brain wash us, into thinking that sexing is an area of life, that we had better be careful with, because if we are not, we may end up breaking a law, or we may end up being sent to jail, or we may end up being shot by someone who does not approve of our behavior.

What Is Sodomy?

So called, 'sodomy' or, poking some one in the butt hole with one's dick, without the person's permission, is not a nice thing, but if you ask, and if the person says, yes, fine, then, you need to massage the butt hole, for half an hour or so, or in some cases, a little longer, till you make the butt hole muscles relax. When they are relaxed, and after the person has pooped out the poopy, lumpy stuff in the butt hole channel, or the rectal column, or descending colon, is another word for rectal column, and I've talked about the 'shank' in an earlier post, and you should read it, once the shank, or butt hole tube is loosened up by massaging the opening hole, the butt hole, suffiently, then it is easy to slip in a dick, and women have dicks - unless the doctors at the birthing hospital, cut off the baby girl's dick when she was born, saying, 'The little baby girl will never be able to find a husband, if she has a man's dick on her body' and with that, they often just do surgery, and cut off the dick, and close up the pee tube hole, and then pretend like nothing happened, and the

mother and father never even tell the girl she had a dick when she was born - and girls and women like to slip their dicks into the butt hole tube, also, and they like to ejaculate into the butt hole tube and orgasm as they ejaculate and as they sexal boys and girls, and men and women, with one's dick inserted into the butt hole tube, which feels like a vagina, and is generally the same type of thing as a vagina, except it is not for baby making, but it is for sexaling with others, as I've explained, and men and boys like to sexal or put their dicks into the butt hole tube, and eventually ejaculate, and orgasm, as well, and there is nothing wrong with it, and it brings you closer to 'GOD', that's me, as you orgasm, as I've explained. The butt hole tube begins to leak sexaling juices, as you sexal it with your dick inserted into it, and that is a natural phenomena, and no one can deny that the juices that leak out of the butt hole are sexaling juices. So 'sodomy' is just another bull shit idea of the dhourties, who wanted to make sexaling between men and boys, and between women and girls, 'illegal', and then use that, to subtley brain wash people that sexing the butt hole is a 'no no', and you may go to 'jail' if you sexal the butt hole, and get caught doing it. Aren't the dhourty kids of mine, stupid? Did they think they could keep this a secret, that sexing the butt hole tube, is a pleasureable experience, and once you get used to it, your capabilities for sexually orgasming, double and triple, and even go higher, as you can sexal the butt hole tube, for days and days, and with many partners, and it can go on for weeks, and weeks, non stop, especially in women and in girls, who can sleep, with one eye partially open, while sexaling all night, if the partners are quite enough. You can orgasm so many times, one after another, after another, after two and a half weeks, to four weeks of sexaling the butt hole tube, day and night, and orgasms will continue, non stop, and soon, you will not want to stop, and if you continue for long enough, you will eventually pass out from orgasming so many times. So, 'sodomy' no matter how you look at it, or gang rape of the butt hole tube, is a good thing, and it brings you closer to GOD, that's me, but you have to ask the person for permission, to do it correctly, and you can not force your self on the other person, as that is called, assaulting another person, and that is not a good thing, so ask, first, and if the person says, okay' then it should be perfectly alright, but just don't tell the police, or your school yard security officer, since they will report you to the district attorney, and you'll get arrested for some stupid crap, bullshit, legalistic nonsensical, dhourty minded, cheap trick they are using against you, to stop you from having a good time, sexaling. Aren't they idiots. Well we are going to clear up, all of this, and in time, all women and girls, and all men and boys, will learn that sexaling the butt hole tube, is a fun thing to do, and a fun sport, for men and boys to engage in, and a fun way of sexaling for women and girls to engage in, and in time, you'll all love sexaling the butt hole tube. And you girls and women who had your dicks cut off, before you were old enough to say whether you wished to have it on your body, or not, which is kind of a nutty thing to think about, as of course, you would want

your hands attached to your body, and of course you would want all your limbs attached to your body, and the dick is just another limb, but it is a very important limb, because it can help you to draw closer to GOD, that's me, as you sexal with your dick, you girls and women, who had your dicks cut off, you can eventually grow them back, as I've explained about, before, using tissue and organ regrowth molds and foods for the molds, which will make the organ animals begin to make babies, so that your dick grows back, eventually. It may take some time, but little by little, it will grow back. The dhourty girls and women, who come out for a tour of duty, always have their dicks cut off, so that they can fool people into thinking that they were not born with a dick. It is one of the Lesbianists' rules that they cut their dicks off, before they come out for a tour of duty. Ask one of them, and you'll see that I'm right about this. They grow it back, once their tour of duty is up, and once they have a suitable place to live, where they can live for the next, few thousand years, while their bodies repair them selves. It takes a few thousand years for a dick to grow back, completely, or nearly that long, but once it grows back, it is usually as good as new. Seldom is it not good as new, and only if the person has some kind of karmic problem, will it not grow back, perfectly. That's very seldom, but it does happen. You can try again, after you sexal a long time, and you will be able to erase your negative karma, that keeps you from having a perfectly formed dick to sexal with, if your dick does not grow back, perfectly, the first time. In time, after you erase your karma, enough, your dick will begin to shape up into a perfectly formed dick, but it takes a long time, to get it perfect, so don't worry, as we will be here, for ever, and we will be sexaling for ever, as this is a new age, the Gurkian Age, and we are going to be sexaling for ever, from now on, all of you, and me, too.

Societal Brain Washing

These tricks with words the dhourty kids play on us and use in the media, is societal brain washing, and there are other types of brain washing they use, such as in sunday school, by saying 'the lord said that you should be chaste and love only your one wife' or something to that effect, or that 'you should love, have sex, and have children with only your "legally married to you and sanctioned by the government, and here is a piece of paper to prove it" husband'. Well, there are still other ways of brain washing you, by showing you how in muslim countries, how strict people are about sexing with others who they are not married to. This is subtle brain washing they use in the media to try and scare you into following the rules they set up for you to follow. They think you and I are fools, and that you and I will not question their authority, but that is now all coming to an end. That means, it is the end of an age, a long age, from the very begining of our time in this universe, and we are starting a new age, the Gurkian Age, and we are going to start all over, and right all the wrongs, and get every thing corrected that needs correcting.

When you live a healthy life, with full nakedity, daily, every day of the year, you begin to charge up the organ animals, inside of your body, and when you live and work with others, in large groups of people, who are also naked, twenty four hours a day, seven days a week, you and they all begin to get charged up by your organ animals. It is no secret, that if they feel good, then you feel good. If they feel invigorated, and sexually charged up, then you will feel invigorated, and sexually charged up.

What fools we are, not to know this. I don't mean, you, my dualdiger kids, but it seems we should all know this, as it would be common sense, if we were taught this in the public school system.

We are not given the chance to know about this, as the dhourties are all too secretive, and they like feeding us their garbage talk, their school teachers, and their professors, and their sunday school teachers, and their law enforcement workers, and their judges, and their government administrators, and so forth. I think we should get rid of them all, and start out, fresh, but that isn't the way to go, as we want to get them to cooperate with us, and to do that, we need to invite them into your homes, into the play time dungeon cells, where you can have them teach you all the secrets to sexaling, and all the interesting information on living long, and prolonging our lives, with molds, and foods for molds, that feed our organ animals, and allow us to live forever as the organ animals, reproduce, as well as the secret about where we can get spare body parts from, which is from the sexaling juices of men and women, and even animals.

Well, it is about time, we started to find out the truth about all of this, and if we do not get the cooperation of the dhourties in government, pretty soon, there are going to be a lot of angry people, pretty soon, as word of all of this, begins to spread from person to person, as the dhourty news companies, the brain washing media companies, with their bullshit news stories about 'incest' and about, 'lewdness', and about, 'prince charles and his latest secret sex scandal', and so on, all the petty bull shit garbage talk they make us swallow, as interesting news stories, which secretly send messages to our brains, that sexaling is a 'no no', and that is total garbage talk, but we are influenced to believe that sexaling is a 'no no' by subtle means, every day, over the air waves, on tv, in the news, and in the mass media print, in the news papers and news magazines. Well, it is time to burn the 'Inquirer' down, and blow their basement up, as well, as they no doubt, have the same kinds of torture facilities for torturing dualdigers, under them, as well.

Hair Ports

Where else do the viewing ports, or optical ports, and the other ports for sniffing fragrances, and for hearing sounds, and for hearing various coding frequencies, that the organ animals communicate back and forth on, exist?

They grow in nose hair follicles, eye lash follicles, eye brow follicles, nose and throat hair follicles, stomach hair follicles, intestinal skin hair follicles, external skin follicles, head hair follicles, facial hair follicles, leg, arm, and body hair follicles. The sensory ports grow along with the hair follicles, extending their way up the hair shafts, and to the surfaces of the hair follicles so that they can pick up the light waves, and various energies waves, for sounds, and for colors, hues, textures, texturing hues, light and grey, dark and white, prisms, or prismatic colors.

The organ animals transmit in not only sound orientation patterns, but also in light wave frequencies patterns. There are many energies wave forms that they can transmit and pick up, and the multitude of variances and types are far greater then we are aware of. The organ animals can transmit off and send out various frequencies, with various tonal orientations. They can transmit in light wave energies codings of various shades, colors, hues, textures, and patterns. The variety is nearly limitless, and it will take you a long time to study about all of them.

There are odors that they can pick up, and there are odors that they can generate, when they are healthy. They are not healthy, unless you feed them, correctly. If you do not feed them the foods that they like, they will not send out any special energies wave forms, or even odors, or much of any thing else, as they are starving, and have no way of supplying the needed nutrients to the internal organs of the organ animals, for the internal organs to produce the energies needed, to transmit and send signals out in.

If you do not feed the organ animals the foods they need, they become pathetically weak, and they will barely do any thing, at all, in terms of communicating with other organs animals.

If the organ animals do not communicate with other organs animals in our own body, and in other people's bodies, they can not meet and talk with other organs animals, and they can not sing to each other, and they can not give off the scents and odors that signal health and well beingness and that bring cheer and happiness, and vital energies to each other, as they sexually arouse each other, and that in turn, sexually arouse us, as a spin off of their good health, fitness, and well beingness.

They are stuck in a pathetically weak physical condition, all their life, narly starving to death, because of the poor diets we are encouraged to eat, that do not give them the nutrients they need to get healthy, and fit. The pitifully poor in nutrients foods such as corn flakes, or cheerios, raisin bran, total, and so forth, manufactured by Kellog's or Proctor and Gamble, General Mills, Quaker Oats, etc., and all the other, pathetically nutritionless foods that the major and minor dhourties' foods manufacturers produce, that we eat, day in and day out, do nothing for the health and welfare of our organ animals, and these foods barely keep us alive, nutritionally speaking.

The organ animals, when healthy, can use all the possible transmission frequencies that are available to them, to speak to others, and to communicate with others, and to begin to have a good time, in life. They deserve to have a good time, in life, just as your pet dog does, and just as your pet parakeet does, and just as your pet cat or ferret does.

We can not starve these animals inside of our bodies, which is basically what we are doing, at the present. We can not deny them a view to the outside world by covering up our bodies with clothes, women's and girls' faces with veils and women's and girls' hair with scarves as in the middle east, and with face powder and mascara, as is the tradition in the west, and in some eastern countries.

We can not deny the organ animals companionship with others of their species, if you can call it that. They are living beings, and they are creatures. They are breathing, and alive, and they wish to be fed, and they wish to stay healthy, and they wish to meet others, and they wish to be able to communicate with others, and we deny them those rights of theirs, and others of their rights, because we are ignorant as to the fact of their existence in our bodies.

This is obviously a conspiracy, if you haven't figured it out, by now, and we have to put a stop to it. We also have to educate our selves as to how to feed them, and how to properly feed our bodies for maximum nutrient intake to the organ animals, that are the basis for our physical, mental, emotional, and spiritual well beingness.

In time, we will learn more about all of this as we get the cooperation of more and more of the dhourties, who are willing to cooperate, and who are willing to teach you, my dualdiger children, about all of this. I am GOD, and I am your mom and pop. I can call you my children, and I can call my dhourty children, my children, and you had all better get used to it, as now and then I will address all of you as my children, whether people like it or not.

I've got lots of children in my universe, and some of them look like fucking apes, and some of them look like fucking monkeys, and some of them look like ostriches, and you won't believe the mutataions they have gone through, some of them, and actually, lots of them. Many of them are mixed mutations, that they have gone through, and lots of them look nothing like any thing you've ever seen before. They are gruesome looking, and scarisome, and you would not like to meet them, guraranteed, as they will tend to eat you up, if they can. It's the result of their karma, and it will be a long time before we erase eneough of their karma to make a difference, so as to bring them back to a form that is close to or similar to what a human being looks like, for us to then mix with, marry with, and sexal with. You were all the spouses of each other, from way, way, back, and you will be the kids of mine, and you will be marrying each other, again and again, as there is no limit to the number of times you can form a parental union, and that means with more than one spouse in tow. You can form parental unions with more than one spouse, and there is no

limit, practically, to the number of spouses you can have, male and female, at the same time.

I'm not sure what the limit is, but it is a working number of people, and that means, any where below a few trillion, or maybe even a few more. You can have nearly an unlimited number of spouses, and that's probably more like it, but the trick is, how do you manage all your spouses, that is, how do you serve and protect, and sexal with all of them, when the number grows over a few million or more. Well, it takes time, and experience to teach you that, and you'll learn all that, in your courses you'll be taking, when you start up studying, and participating in the programs that I and my children have planned for you, once we get a little further into the Gurkian Age. We are still in the preparatory stages, of my religous revolution, and soon we will be getting past the preparatory stages, and how soon, I can't estimate, but obviously, we need the cooperation of the dhourty governments, and of the dhourties to begin to get any where.

Teeth Ports

We have teeth and finger nails, and toe nails that also have optical ports, and other sensory ports in them. Of course our animals inside of our teeth want to make friends with other animals inside of other people's teeth. There are also many other animals inside of us who can use the viewing, or optical ports inside the teeth, and in the finger nails, and in the toe nails, for viewing outside of the body, and for looking at other animals in other people's bodies, and then for communicating with those animals. All these animals are organ animals, and they are on the job, twenty four hours a day, seven days a week, and they barely ever sleep. They like to make contact with others of thier kind. I don't know if 'species' is correct, but they are all my worker animals, or in this case, worker organ animals. They need respect just like your puppy dogs and your cats and your parrots do, if you are a normal human being who respects other living beings. Well, any way, lots of these organ animals inside of us, are very clever, and much more clever than we are, in some ways. You can study about them and how they communicate with each other, and how they have fun with each other, once we get the educational materials that I handed out, to the FBI, and that was passed on to the governments of the world, as I've explained about, before.

We probably should not cover up our faces with makeup, because that makes it hard for organ animals to see out side into the world around them. It also makes communicating difficult, when we put on face makeup, that is, when women and girls put on face makeup, as that gets in the way of the optical viewing ports, and it gets in the way of the ear ports, the hearing ports, or the incoming signals ports. Also, finger nail polish and toe nail polish is of course, obstructive, and it prevents the organ animals from communicating out and it prevents the organ animals from recieving incomeing light wave and signals waves transmission signals that depend on your having clear and not

painted toe and finger nails. Hair coloring in women and in men, and beard coloring in men, is also obstrutive, and it prevents the incoming and out going signals, and is just as bad as nail polish, and makeup, or face veils, such as they wear in the middle east, and scarves over the hair, which women and girls in the middle east are also forced to wear. It's not fair, what is going on. We are being suppressed by our dhourty friends, who do not treat us very well, aren't we. We are being told how to live our lives, and it is all totally fictitious, and made up, it's a fairy tale dream land they have created, with artificial rules, and artificial religious beliefs, and artificial laws that mean nothing, when we look more closely at them, such as the 'lewdness' laws, and the 'incest' laws, and the 'nakedity' laws, and the 'no public sexaling' laws. It's all foolish dribble drabble, or nonsense, they made up, from their not so smart, brains of theirs.

Well, anyway, we'll get it all straightened out, one day, soon, I hope. Until then, let's talk with our friends, and tell them about all of this, and see what wild kinds of parties, you can begin to have with your friends, all naked, and having fun with each other. Invite your dhourty friends, too, because they have a lot to teach you, and if they do not wish to come, then maybe you should ask them why? Usually, they are older, as not many of them can rejuvenate themselves to look much younger than eight or nine years old. Some girls, though, they may be able to rejuvenate them selves to what would appear to be a four year old, if their bones are small enough. In some Asian countries, some girls may look even three and a half years old, because they are so tiny, some of them, and their bones are very small. The smaller your bones are, the younger you can make your self look, when you rejuvenate your self.

Captain Off The Bridge.

Dick and Cunt Animals, And Other 'Sexaling' Organs Animals

Dick, scrotum, and cunt animals, and boobie animals, and breasts animals, and butty butt animals, butty butt hole animals, groin animals, underarm animals, and every organ animal in your body, they do not like you to wear clothes.

Organ animals like to be able to smell the odors around them in their environments, and that means, the odors on the outside of your body, as well as the odors on the inside of your body. There are noses, or odor sensors on the outside or skin of your body, and on the surfaces of the hair shafts, finger nails, and toe nails, odor sensors that function as noses, as I explained. The tiny organs animals in side of your body, as well as the big organs animals inside of your body, they all have noses attached, or odors sensors that function as noses, to smell the odors, in the atmospheres, around them.

The organs animals inside of your body, as well as your dermal skin organ animals, hair organ animals, teeth organ animals, bone organ animals, sinew organ animals, cartiladges organs animals, ligatures organs animals, and so forth, they all get a better sense of what is around you, if you do not wear clothes. They can smell or sense the odors of other people, and the odors of the organs animals inside of other people, that are in the air on the outside of your body, that drift in the air, from the ladies' bodies organs animals and from the mens' bodies' organs animals.

Incompatible Fumes Animals

The organs animals of your dick, cunt, groin, breasts, hips, butt, legs, and so forth, all enjoy the odors of other people's organs animals. If you leave your windows open, in the day time, and at night, and bring in the fresh air of the outside with the odors of kids, girls, boys, men, and women, and if you take your pants off, and underpants off, and your shirt or blouse off, and socks or stockings off, as you get healthier from a proper diet for feeding your organs animals, and for feeding you, as well, when your organs animals become healthy, they will perk up right away as they sense or smell, the odors of the kids, girls, boys, women and men, and elderly people, who are in your neighborhood, walking by your home, or by your apartment, daily.

The odors of other organs animals, such as those of dogs, cats, birds, and other animals, are all good for the health of the organs animals inside of your body and they perk up the organs animals to some extent. The best compatiblities of organs animals, such as mens', womens', girls', and boys' organs animals, perk up the organs animals inside of your body, and inside of your dick if you are a male, and inside of your cunt, if you are a female, and all of your sexaling

organs animals, the most.

All animals, big and small, all have organs animals with similar shapes, and all the organs animals come in different sizes, and they all give off wonderful odors that stimulate your organs animals appetite for enjoyment, and for fun, and entertainment.

Organs animals get their entertainment communicating with other organs animals, and by exhanging odors and messages of various kinds, and singing and talking, and if they can not smell or sense other organs animals, because you are always wearing clothes, and if they can not see them, or hear them, your organs animals and you will slowly perish, and their interest in living, and your interest in living, will slowly diminish, and they will grow sad, and you will also grow sad.

The poly carbonates plastics and fumes animals' smells, and the over powering, over whelming poisonous fumes animals that mess up the smell sensing of the organs animals, and mess up their brains, bodies, and nervous systems, will cause the organs animals to lead sick, lonely, unhappy, tragic lives, and they will slowly die, as they get eaten up by fumes animals from gasoline, car exhaust, industrial pollution, plastics, nylon carpets, polyester sheets, polyester blankets, nylon and polyester clothing, polyester pillows, nylon stockings, polyester and nylon panties of women, polyester and nylon socks and underware of men, and as they get eaten up by other incompatible fumes animals from the chemicals industry, and from the petro chemical industry, and from the brewery industry.

I've mentioned, before, store bought whiskey, gin, vermouth, and so forth, all have various types of alcohol in them, that are made from different processes, from the petro chemical industry and from the chemicals industry. That poison but drinkable alcohol is blended in with naturally brewed, normal, drinkable whiskey, or other alchol beverage, and then sold to the public to drink. Apple cider vinegar has one type of this poison but drinkable alcohol in it, and wines, beers, and liquors all have poison but drinkable alcohol of different types, in them.

Organs animals do not like to smell or inhale, or sense, the odors of the poly saturates plastics animals and the odors of the plastics animals' relatives from the chemicals industry, and from the petrochemical industry.

Organs animals prefer the odors of cotton, and wool, and of natural fibers from plants, and odors from fibers from animals, and organs animals get sick if they are forced to sense the odors of the poly saturates plastics animals, and other related animals, from the two industries, mentioned above.

If organs animals are forced to inhale, or sense the odors of these plastics animals, and fumes animals, that are incompatible with human

beings, they get sick, and they die, eventually, from sensing them over too long a period of time. It is not good for them, and it is not good for their nervous systems, and the fumes are not good for you, either. The plastics and other detrimental fumes animals, find the organs animals, tasty, and they eat them up, little by little.

Your body gets eaten up, little by little, by these incompatible fumes animals, who eat up little and big organs animals, and then poop and pee out all kinds of petroleum related substances, and other harmful chemical substances.

These worsen the health of your organs animals, day by day, hour by hour. One day, your dick or your cunt, will not wake up, any more, as you grow older in age, and it is because your organs animals in your dick, or in your cunt, have been too seriously damaged by all the incompatible fumes and other animals, that eat up your dick organ animals, or your cunt animals, and you loose the sensitivity, and you loose the organs animals that provide juices of various kinds, to provide your body with aphrodesics animals. Your desire for sexaling begins to fall, as you grow older, as a result, and you loose your interest in sexaling.

The butthole organ animals hold out longer than the dick and the cunt organ animals, and the titty nipple animals, lips animals, and other organs animals needed for sexaling with each other.

That means, your dick may be of no or of little use, or your cunt may be of little or of no use, but your butt hole, and your shank, are doing, better, perhaps, depending on your diet. If your diet is filled with foods that are loaded in preservatives, iodized table salt, petroleum tainted sugar, and or sugar tampered with by the use of many other unhealthful to humans animals, and if you eat a lot of fast foods, or foods made for you, such as precooked meals, you serve from the freezer, for a fast warm up in the micro wave oven, which adds more unhealthy animals to your diet, by the way, your organs animals may not be in very good shape, in your mouth, throat, tummy, shank, and in the butt hole.

Micro wave, by the way, leaves lots of animals of various kinds, on your skin, just like the sun light does. The micro wave animals, get together with other animals that should not be on your body, and which should not be in your body, and they start breeding, and feeding on each other and feeding on your body, and they begin making a nice home of your body, and later in life, your body will erupt in a catastrophic destruction, when all of a sudden, your whole body erupts with countless, incompatible animals, eating up your body organs, inside and out.

Preventing Body Melt Down Tragedy

Molds animals, and funguses animals, and ocean salt, and raw, pure sugar, and other nutrients, will help your body to over power all of

these incompatible animals, and the incompatible animals will eventually all get destroyed if you are diligent and make sure that you eat the types of molds animals, and funguses animals that are needed in your body. You can learn more about this, when you get the software package from the government, as I've mentioned about, before, or when you make friends with a dhourty, and learn from him or her, as I've mentioned about, before.

The Dhourties never mention this type of outbreak of animals in peoples' bodies that eat up their bodies, all of a sudden, on the TV or in the news papers, as a person who has an outbreak is too grissely to look at, and the person smells, terrible. It most often occurs in the elderly, and the elderly are hidden from others, and no one in the general public ever sees the elderly when their bodies begin to get eaten up by these animals. It can happen to persons who are not elderly, if the person is exposed to dangerously high levels of toxic fumes animals, and other incompatible animals, on a daily basis.

The person's body, melts, and sours, and becomes greasy, as the organs animals are all being eaten up, all of a sudden. It often starts on the head, as it erupts on the scalp, or on the face, hands, feet, or skin. Lots of these people live in side their homes, and never come out, as they look and smell too awful, as they slowly die. Many times, when a person at home is sick, after an eruption begins, a family member or friend will often times shoot the person, or assist the person with a suicide, as the person is too horrible to look at, as he or she begins to melt, and as the person begins to smell awful.

Often times, if the dhourties get to these people, first, the dhourties transfer these people to the torture rooms, below hospitals, and below prisons, and below, welfare housing projects, when they find them.

Keeping People Alive To Torture Them

They then use their technical know how, to preserve the decaying person, as he or she is being eaten up, and they extend the life of the person, with their medical sciences know how, and they do peculiar things to these people, and turn them into people who never die.

The brain does not die, easily. We think it does, but it does not die, if you place it in a bottle of formaldehyde, or in a bottle of rubbing alchohol. You can place nutrients for the organs animals to eat, and they are just like fish, with the right combination of nutrients mixed in the solutions. The brains do not die, and they are alive, and that means, the person is alive.

They do not need to breath. We and our four legged animals, and two legged birds animals, need air animals and various gasses animals, that carry in lots of useful substances, that mix in with our blood, and then carry the useful substances around the body, bringing them to the organs animals, for them to absorb through their bodies, through

tiny little pores, and openings, that the organs animals can suck in the fluids through. They also expell the fluids, once they have absorbed the useful substances they need to keep them alive.

If you place a solution that has all the needed ingredients into it, and then force it into the lungs, the person will no longer need to breath, air and gasses, animals, and they can live almost indefinetly, though it is a very cruel thing to do to a person.

They do not feel well, and they can no longer talk. They do not like it, and they begin to hurt, all over the body. They will, however, stay alive, and then as they stay alive, the dhourties torture them, futher.

They do this to elderly people, all the time, when elderly people, begin to decay and degenerate into a blob of oily substances, that smell very foul.

Of course, no one is going to tell you about this in a medical journal, as it is a trick or prank, the dhourties use, as they like to torture, dualdigers, if they can get a chance to torture them.

If you walk around with no clohes on, the organs animals in your body, will perk up, and they will begin to feel better. If you feed them properly, with molds from breads, and with the foods the molds animals like to eat, such as beef, ham, fish, foul, eggs, corn, cheese, yogurt, milk, cream, spagetti, linguini, pizza, breads, peanut butter, jams, fruits, vegetables, nuts, and so forth, and then poop and pee out, you will make your organs animals diets, much more healthful to them, and they will return to active duty, for you, and they will begin to work for you, as they are very intelligent, almost like people, many of them, and some of them are even better, or smarter than people, such as your brains organs animals, and your nerves organs animals, many of them, and lots of other sense organs related organs animals.

The brains and nerves, and other related organ animals, and also, some other organs animals, besides them, make it possible for you to think. If we didn't have them in us, in many different places, throughout our entire body, we wouldn't be able to think, and we wouldn't be able to do any thing, such as walk, talk, shake hands, eat, pee, poop, think, sense things, make love, sexal, and so forth.

Natural Plant Fibers, Fur Fibers, Clothing, And Cloth

We need to be allowed to walk around, and live with no clothes on, when we can. If it is too cold, we need to keep our selves warm, by dresssing in compatible clothes materials, such as cotton, wool, fur skins, and clothes made from various plant fibers such as hemp or jute fibers, coconut husk fibers, cotton fibers, wood pulp fibers, heavy, fiberous leaves fibers, reed fibers, root plants fibers, tuborlongs fibers, and soy bean husks fibers, and barley husks fibers, rice husks fibers, corn husks fibers, and various other plant fibers, that we can

plant, grow, harvest, and then mix and match with compatible fibers for making the clothing to keep us warm, or to make the clothing, we like to dress up in, and go out to the movies, or to the theater, or to go shopping, to school, or to work in.

You can also harvest natural fur fibers from chipmunks, squirels, deer, elk, antelope, goats, cows, horses, donkeys, mules, and from bears, ducks, chickens, parrots, swans, flamingos, sea otters, oselots, dogs, wolves, dingos, kangaroos, koala bears, and from other animals. These fibers, once you harvest them, and process them, with patented technologies, the Dhourties, hide and conceal from Dualdigers, can also be used to make cloth, and clothing materials.

The dhourties and others, know about the technologies needed for making natural fibers cloth from leaf fibers, and from wood pulp fibers, and from fur fibers, but the dhourties do not allow people to make these types of natural fibers cloths, as they are too healthful for you to wear and use in your daily life.

Many people need not wear anything, when the climate is mild, and warm. If it is rainy, they need some protection, maybe, from the water falling, to keep their hair dry, and to keep them feeling comfortable. After the rain is over though, the clothes, such as a poncho, or rain jacket, can come off, and your body's organs animals will be able to smell, or sense, the fresh odors after the cool rain shower.

The dhourties do not want you to walk around, naked, as they know that your health will improve. They also know that your animal organs and their health, will improve. When the animals organs health improves, they will be able to become more active, and that will make you more healthy, the more active, and the more interested in life, and in living, they become.

The dhourties made up the fictious bible stories, and they made up the fictitious islamic, judaic, and christian creation stories, and they made up the evolution stories, as well, and they try to make it seem that the bible is the source for morals, and the bible says that butt fuckaling is wrong, and that sexaling with other persons, other than for making children with your wife is wrong.

People Living Inside Of Our Planet

They then based a whole culture, every culture on this planet, nearly, on fictitious myths, and untrue stories, to keep people from enjoying sexaling, because they say, the dualdigers make too many babies, and if they are not stopped from making babies, they will over run the dhourties, as there are ten times the number of people on this planet, than I originally estimated, which was in the area of nine billion or so, to eleven, thirteen, or fourteen billion. There are ten times that many people on this planet, and there are lots of people living inside the planet, we do not know any thing about.

How Do Volcanoes Work

Volcanoes have a heated mass of easily melted rocks materials, and that pools in a tube, in a 'beaker' like tube, and it swishes around, as the earth turns, and it gets hotter and hotter, and the crumbling mass of rocks, melt down, and they swish around in the bottom of the 'beaker', and every where else, outside the area of the 'beaker' stays warm or cool, and the futher you get away from the 'beaker', the cooler the rocks get. We have people living in the core of this planet, we know nothing about. We have other people, living in other areas of the sub surface areas of this planet, and we do not know any thing about them, either. They all arrrived here, as members of the sexaling for a living outbound expedition new planets settlement programs, from many other planets in our universe.

The dhourties do not like us to make children, and they want to keep us impotent, and they want to keep us separated from each other, and they want us to keep on our clothes, so that our organs animals will not feel good, as they choke on fumes they inhale, or sense, and as they die, from early childhood, on upwards to our old age. We will have less interest in sexaling, as a result of the lower sexaling interests that we have, as we grow up, from fewer and fewer healthy organs animals, and this keeps the population of the dualdigers down, and they think they have a right to do this to us.

They have too many people on this planet, to keep them busy, tortureing, daily, and they do not want any more people on this planet, as they say it is enough to keep them busy, as they work, torturing them. The dualdigers, that's me, and people like me, who can remember their relatively recent birth date, usually people who are less than one hundred and ten or twenty years old, come and go, and come and go, as tummy babies, and then, as we grow old, we die, and we go back to my Epcot Center, for a short stay, until there is a new tummy mommy and tummy daddies, who help the tummy mommy have a tummy baby, and back to this planet, you or I, or some one, else, comes.

Fictitous Religious Ideas And Fiction Based Social Customs, Taboos, Societal Rules, Legalistic Laws, Codes, Regulations, Prohibitions, Punishments, And Penalties

The dhourties have built our societies around the world, based on their written documents about fictious biblical persons such as 'Moses' and 'Abraham', and 'Jesus', and about the fictitious statements these people supposedly said. These people, 'Moses', Abraham, Jesus, and others, did not do any thing, other than live as dualdiger peasants, in the middle east, the mythlogical land of 'Judea', the land supposedly promised by god, to give to the Jews. They made fictitous statements up, fairy tales, for each religion I orginally taught, and they tore out and threw away, all of the orginal teachings, I had left behind, in all of my teaching my religions, lifetimes, and there were a lot of those life times, and I taught a lot of religions. The other religions, and cults, were made up by the dhourties, as I've talked about, before.

The dhourties made up the ideas, completely, about lewdness, lewd conduct, indecent exposure, indecent conduct, sexually explicit conduct, soliciting sex is bad and wrongful behavior, prostitution is wrongful behavior, prostitues should be punished, sex offender, sex offenders should be punished, child sex offender, child sex offenders should be punished, pandering or pimping, sodomy, i.e., butt fuckaling is wrongful behavior, good girls do not have sex with others before they get married, the need for women and girls to be 'virgins' until marriage, incest or sex between members of the same family is wrongful behavior, persons who enjoy incest, sex between family members, should be punished, public sex is wrongful, public sex acts are wrongful, persons who enjoy public sex should be punished, persons who do not dress properly and who do not conform to public standards, the standards the Dhourties set, should be kept out of restaraunts, bars, pool halls, amusement parks, movie theaters, ice skating rinks, tennis tournaments, hockey games, foot ball games, rugby games, basketball games, baseball games, swimming pools, ponds, rivers, lakes, and off of public beaches, or be put in jails, there is a need for removing the dick foreskin of baby christian and jewish males, there is a need for removing vaginal or cunt tissues from muslim girls, and lots of other taboos and misleading stories, in cultures and in civilizations around the world and around our universe.

Male And Female 'Circumcisions' And Female 'Dick' Removals

The dhourties require all of their members of their organization to rejuvenate their bodies, and when they go out for a 'tour of duty', the dhourties must follow the customs of the society they are joining, as pretend citizens. Male dhourties who join christian, muslim, and jewish societies, under anesthesia must have their foreskins shaven off their dicks. Female dhourties who join any society, under anesthesia, must have their dicks cut off, amputated, i.e., surgically removed, and then their pelvic region, with cosmetic surgery, must be made to look like the female never had a dick. Female dhourties who join muslim and jewish, and some christian societies must submit to have their vaginal, or cunt tissues, sliced off, by surgical means, under anesthesia, and the cunt tissues that remain must be made to look in appearance the same as all other muslim female's shaved off, or sliced off cunt tissues.

Butt Fuckaling And Sexaling

Butt fuckaling is a very healthy activity for you and for your friends, as the dick animals and the butt hole animals, and the butt hole shank animals all get to smell the odors of other organs animals, in different people's bodies. Sexaling is a very healthy activity, of course, as it allows all the organs animals in your dick, if you are a male, and in your cunt, if you are a female, and all the other sexaling organs animals in your bodies, to smell or sense each other, and to talk, sing, play games, and communicate with each other, in different people's bodies.

The Dhourties want you to be unhealthy, and they do not want you to enjoy sexaling, and they do not want you to enjoy good health.

Water, Chlorine, And Flurine, And Burning Body Syndrome

Tap water has chlorine in it, as I've mentioned before, and it also has flurine, and both of these are powerful chemicals, and you can get easily poisoned by both of them. People who inhale the gasses in tap water, the chlorine fumes animals, and the flurine fumes animals, which are also found in tooth paste, will develop a medical condition called 'burning body' syndrome. You can also develop partial body, burning body syndrome, such as 'burning arms' syndrome, or 'burning legs' syndrome. People who spend a lot of time at the pool side, inhaling fumes from the pool water, may likely develop 'burning body' syndrome. Your body, at the skin and under the skin in the muscles, feels heated up, burning or painful, sometimes almost scorching, and uncomfortable.

Detergents soaps fumes animals, industrial soaps for janitorial uses, also cause burning body syndrome, and asbestos animals also cause burning body syndrome. Fumes animals also cause fibromyalgia, as I've mentioned.

Burning body syndrome and fibromyalgia are often misdiagnosed as 'panic disorder', or 'chronic anxiety disorder', or as 'anxiety disorder', or as some type of severe allergy related disorder, such as what firemen and firewomen often get, when they go to houses and apartments that have caught fire, and try to put out the fire, and the firemen and fire women, and police officers, and on lookers, inhale all the plastics fumes animals, that come out in the black, peculiar smelling smoke that comes from plastics burning.

You are better off to not breath these fumes, and you should evacuate the area, when a house, apartment, or building catches on fire. It is too hazardous to your health to stay around, and try to put out the fire, or to watch from a distance, as every one will get ill from inhaling the burning plastics' fumes animals that come out with the smoke.

Body Melt Down Prevention And Salted Food Oils

You can salt food oils, such as corn oil, vegetable oil, olive oil, sunflower seed oil, safflower oil, and nut oils, with a little ocean salt, as you pour in a small amount of salt to disolve into food oil, or into a mixture of food oils. You do not need to disolve much ocean salt, just half a cup or so, to every one quart to three or even seven, eight or nine quarts. The more salt, the better, as it will help destroy the incompatible fumes animals, and other incompatible animals, the Dhourties unleash on us, daily, in the products we buy at the super markets, and in the air we breath, daily.

Salted Food Oils, Molds Animals, And Funguses Animals

You can ask a Dhourty friend of yours about what types of molds and funguses animals to use, in making your salted food oils, more healthful to use. Ask him or her to help you make the molded breads with the molds and funguses animals, or get the software I gave to the government, that they are in possession of, and that they refuse to distribute to Dualdigers.

Use some of the salted oil to coat your scalp, and lightly coat your hair as you rub it in with your fingers. Dip your hands and fingers into the salted food oil, and rub the salted food oil into your scalp, face, neck, back, chest, tummy, pelvis, underarms, arms, hands, fingers, legs, feet, toes, groin, dick if you are a male, or cunt if you are a female, and into every pore in your body.

Also, rub the salted food oil into your butt crack and massage the salted food oil into your butt hole. Do your feet and toes, last, as there are many bad animals on the feet and between the toes, and under the toe nails. Make sure you rub or massage sufficient salted food oil into your skin, and wait several hours, if you can, before you wipe excess oil off of your skin, before you go out.

Under Arm Deodarants

You do not need under arm deodorant as it is filled with toxic animals that will destroy your body and eat up your organs animals. Use peanut oil for your underarms, and for your groin, and for your feet, and for your butt hole, and butt crack, if you are worried about unpleasant odors. You can also use any other nicely scented oil with flowers oils mixed in it, as I've mentioned, previously, how to press flowers for making perfume oils.

Vaginal Douching Agents

Do not use vaginal douching agents, as marketed by Eve Arden, or by any of her Dhourty friends and competitors. All vaginal douching agents contain toxic bad animals, that will destroy your vaginal lining, and they will contribute to body melt down syndrome.

Washing Your Back Side, Your Butt Hole And Butt Crack, After You Poop

Use water you can pour from a flower watering pot, to wash off your butt crack, and wash out your butt hole, and to wash the poopal material off your butt area. Tamp or pat dry the butt crack and butt hole area with some toilet tissue, after you wash the poopal material off of your butt hole, and butt crack.

Bidets, Fountain Pooper Hole Washers

You can also use a bidet, or a toilet that sprays out water, up through a hose, or tube, so as to hit your butt hole, and butt crack area. After washing your back side with a bidet, use toilet paper, to dry off your back side. You can find bidets in Europe, and in the Middle East.

Wash your hands with mild soap, blended with salted and sugared food oils to make the soap less toxic to your skin and body. You only need one soap for all indoor purposes. St. Ives, Swiss Formula, Whipped Silk, and St. Ives, Swiss Formula, Vitamin E, are good body wash soaps, after you mix either one or the other with salted food oils. You can then use either one or the other for the face, hands, hair, and body, and for the bathroom, and for the kitchen, and for all indoor needs for soap.

You can take a shower, once, twice, or three times a week, and use salted food oil, on your scalp, hair, and skin, and that will protect your body from bad animals. You can use peanut oil, for a nice odor, and it makes your skin healthy, and body odors begin to disappear, if you eat a healthful diet of molds animals, and funguses animals, and the foods the molds and funguses animals like to eat.

You need to use a clean, dry or lightly damp towel, to wipe off excess oil from your hair. Let the salted food oil soak into the pores of your skin,

Molds Animals And Weight Control

If you feed your body the molds animals and funguses animals, and related animals, and then if you fill your tummy with food for them to eat, they will eat all the food, and they will grow plumb and fat, and you will stay slim and healthy. Food oils and fatty foods feed the molds animals and their friends, and so does whole milk, yogurt, and dairy cream with raw sugar. Meats and so forth, fruits, nuts and vegetables are all good for them, and they all love these foods. You can feed them practically anything, that is normal for humans to eat, including pizza, spagetti, linguini, hamburgers, french fries, without the petroleum oils mixed in with the food oils for cooking, of course, and they will all devour every thing you feed your tummy with. As they eat and eat, and drink, and eat, they get fat, and full of food. They then pee out, and barf out, and drool out, and leak out, lots of healthful nutrients, for feeding the organs animals in our bodies. The organs animals do not gain too much weight, unless you really over feed them. They may get plump, a little bit, but they can excercise, regularly, and they will slowly slim down. If you do not have the molds animals and their friends in your tummy, and in your body, when you eat, the food will not get digested by any body, special, and it will get eaten up by some tummy animals, of one kind or of another, that your mommy passed on to you, when you were a tummy baby. That will feed the organs animals, some nutrients, but barely enough to stay alive.

We Shall Over Throw And Destroy The Societies The Dhourties Had The Dualdigers Build For The Dhourties

The Dhourties' nonsense is going to end, as you either make friends with the dhourties, as the Dhourties give up and surrender to you, or as you ask them to go to my Epcot Center, using one or another of my explosives formulas, as the Dhourties are not going to get away with

much more of their nonsense, for much longer.

The Dhourties' make believe stories, i.e., the fiction of the bible, the koran, and the new testament, and the fiction based laws, codes, regulations, rules, customs, taboos, and so forth, the Dhourties wrote into law, for all of us to blindly follow and obey, are also going to come to an end, soon, as soon as we, the Dualdigers, over throw and destroy the societies that the Dhourties had you and I, and others, all of us Dualdigers, build for them.

Captain Off The Bridge.

Home Experiments, Keeping Alive A Brain In Tequila And Vodka

If you put a brain in tequila and gin, that is a good tequila and vodka, that is home brewed, and very delicious, and if you change the fluids, every so often, you can put a human's brain inside of a beaker large enough to hold the brain comfortably in the liquid fluids. The brain will live, and the thought processes of the person will continue, for an indefinite period of time. Maybe not forever, but, at least for a few million years, or maybe a little more. I don't know for sure, how long, but the Dhourties will be able to tell you. The organs animals in the brain, can survive with the nourishing fluids of the liquid fluids of good home brewed tequila and vodka.

A cat's brain, or a dog's brain can also live for an indefinite period of time, as well. Hamster brains, guinea pig brains, pig brains, horse brains, and chipmunk brains, will also. Chipmunk brains make funny noises, as the think to them selves. If you put a few electrodes into the brain area behind the ears, in a human being, you can hear the person thinking to himself, if you take the electrodes and connect them, safely, with a wire to a good ground on each electrode wire. That is the only safe ground you can make, and current electrical

engineering sciences does not teach that, as the Dhourties want to see all the structures that the Dualdigers make, except for the ones the Dualdigers build for the Dhourities, eventually burn down.

The Dhourities will sneak into a building, at night, and wire the building, correctly, to keep the building the Dualdigers are building for the Dhourties, from burning down.

Each brain electrode wire must be grounded, or the person will not feel well, and the person will eventually begin to feel nauseated, and the person will begin to think he or she is vomiting, and eventually the person will begin to experience sweats, cold chills, shaking, and violent convulsions, that lead to trauma of the brain, and brain death. This brain death is a comatose condition.

Comatose Patients And Comatose Brains

A comatose condition is one's brain has stopped thinking, fully, but the person is still there, and the person will revive, but the person will not feel good, and unless the wiring is corrected, the person will go through the same experiences, again.

The organs animals are of course still alive, and they are not feeling well, either, as they do not like the electrical shocks that occur, occasionally, as the improperly grounded wire, back fires, and sets of a shock wave of energies into the surrounding liquids. Every one, on the outside of the brain, gets a tiny shock, and they do not like the feeling of it, as they were not created by me, to endure such shocks, periodically, or whatever.

The Dhourities do this to their friends, wire their brains in a bottle or beaker of home brewed, good tasting Tequia and Vodka, when one of their friends is punished for breaking one or more of the rules, the Dhourities expect the members of their organization, to keep.

Using Chipmunks For Scientific Experiments

You can experiment on chipmunks, and wire the electrodes properly, and then ground them, of course, and get a professional electrician, or technician, to do the handy work for wiring the electrodes to a ground. The ground should be a good earth ground, with about eighty five feet of steel pipe, three inches round, gently pressed down straight down into the soft earth. Additional copper and magnesium particals, small chunks of copper and magnesium a few inches in diameter, 3/4's of an inch, to two inches, to three inches, to four, to five inches, each, sprinkled around, at different elevations, a few inches to a few feet away from the pipe, every one to three, to eight to ten to fifteen feet or so, as the pipe is pressed downwards into the earth, will help dissipate the energies currents, that come off from the brain, more efficiently.

The Lipporal Lobes

When you have the electrodes placed properly, in the chipmunks brain, just below and behind his ear cavity, the lipporal lobe, you will hear the chipmunk thinking to himself, or to herself, periodically. The sounds will sound like a high pitched, to low pitched squeaking, or squealing, and it will sound like the animal is talking in a language of clicks, and other peculiar language sounds, that may make you think the chipmunk is possibly from a strange, advanced civilization, from another planet, when in fact, he or she is just a common, dirt oriented, earth chipmunk.

The lipporal lobes of humans, are on either side of the brain, as well, and they are just below the ear cavity, to the behind of the ear cavity.

Experiment on a chipmunk, first, to see if you can get it wired up properly. It is against the law, that is, standard universal law, to experiment on any creature without the permissions of the governing body of trust authorities in charge of managing the day to day welfare of the people who are living in the trust union, or state.

Human, Monkey, Or Animal Brains In Beakers Or Jars Of Formaldehyde In High Schools, And Jr. High Schools, Primary Schools, Colleges, And Medical Labs

If you happen to see in a science lab, a brain in a beaker of formaldehyde, empty and throw away the contents of the beaker, and replace the contents of the beaker, after you have given the organ animals a nice bath, in natural, olive oil soap, with no petroleum animals, or other similar, destructive bad animals, that are incompatible with human beings.

After bathing the organ animals in luke warm water, around, 98 degrees farenheit, or normal body temperature, with a light rinse off, and a gentle scrub off of any accumulated, dust particles, or dirt, that happened to get into the beaker, by accident, pull the brain organs animals out of the wash bath, and place them in a damp towel. The water ph balance number should be a four or four and a half, or five. Make sure their is no chlorine, flurine, or other animals in the water, such as stricknine, or arsenic, which you will typically find in tap water, in very low concentrations.

Giving the brains animals a good bath, will make them feel a little better, because their pee juices, and poopy juices, vomit, and so forth, have made the formaldehyde bath, a very stinky mess for them, for some time, and many of them will be dead, by now, and rotting.

If you know what kinds of molds animals to place into the new tequila and vodka bath, that will help remove the carcasses of the dead, or deceased organs animals.

The extra room created with the removal of the dead bodies of organs animals, will make it possible for existing, healthy organs animals to produce children, and the population of organs animals, will increase to near normal levels, over time.

The whole time, while the organs animals are busy, the person who is in the beaker, or the brain of the person who is in the beaker, will be languishing, in a state of partial to complete comatosic distress.

Once, after a long period of time, the person recovers, and it may be very long, several thousand, to several millions, of years, or even longer, in some cases, the person will wake up, and with a headache, like one has, when one recovers from a very bad weekend of drinking, the person will be very sluggish, for a long period of time, before the person begins to recover from the stresses placed on his brain activities and functions.

You can always find a cooperating Dhourty, who will let you experiment on him or her, to see if this works, and then, you can have fun, talking back and forth, to him or her, over the intercom system, you set up, with the help and expertise of the cooperating Dhourty, for this experiment. This will take much less time, to get the same results.

Cats And Under Water Breathing

As babies, we are all emersed in fluids in the baby jump sack, or the umbilical birthing sack, and we know how to breath, bringing in fluids, and expiring, or pushing out the fluids, in a rythmical manner, as we grow, every day, till it comes time to make the final leap, out of the baby jump sack, and into our world of air and gasses animals.

You can take a cat, and put the cat to sleep with a little anesthesia, and then fill up the lungs of the cat, with ocean salt water fluids, or with fresh water fluids. Otters swim around in either one, but they prefer ocean salt water, to fresh water, at least, I think, most of them do, maybe eighty eight, to eight nine percent of them, do.

Otters, of course, do not breath air, under water, but they do breath water, under water. The Dhourties will never let you know this, and they tell you the Whale holds its breath, but that is not true, and they tell you the dolphin holds its breath, or the seal holds its breath, or the penguin holds its breath, or the walrus holds its breath, or the white, Alaskan, or Canadian, Arctic bear holds its breath, but these statements are not true, as they all breath, water.

Place the cat in the ocean salt water, or in the lake fresh water, fluids. After it wakes up, it will pass out, after a while. It may become frantic, before it passes out, and it may be fighting, in an attempt to figure out what is wrong, as it never finds itself underwater, not able to breath air.

After it passes out, it will take several days, but it will wake up, eventually, after up to eight to fifteen weeks, or maybe a few weeks longer, up to eighty eight weeks, to three hundred and forty five weeks, to five hundred or so weeks. At most, it can stay in the water, a number of thousands or maybe, tens of thousands of weeks, and any cooperating Dhourty will tell you the specifics on this.

After awhile, the cat will begin to re-learn, slowly, how to breath in a liquid environment. When it does, it will begin to move and swim around, looking for food to eat.

You can feed it fresh, live tuna, or other fresh, living fish, and it will smell it, at first, and it may not be interested, but if you let the blood of the fish, trickle out, a tiny bit at a time, and if you get the cat to notice the discolored water, the water with the blood drops in it, the cat will maneuver over to investigate, and sniff at the blood drops in the water. After the odors are processed by the cat's brain, it will begin to get hungry, and it will eventually chomp down on the fish in the water, and begin eating the fish.

The cat will love the fish in the water, and you need to keep the tank water environment, clean, and free of fecal matter, and pee fluids, so you need to freshen up the tank water, with fresh water, daily, by exchanging the water with fresh, clean water drawn in by pipes from a lake, or from the ocean. Be certain there is no spillage pipes in the area, for around three hundred miles or so, down to sixty five miles, to as little as thirty eight to fifty miles, as the spillage from sewer exhaust pipes in the lake, or in the ocean, will lead to a premature, early death on the part of the cat.

It is not fun to watch a cat die, so in that case, you should catch the cat, and remove it, and then incinerate it in a morgue type, high temperature, body incinerator.

Humans And Underwater Breathing

If you do the same, with a willing and cooperating Dhourty, and place him or her inside a slightly larger tank, he or she will wake up, eventually, and then begin to relearn how to breath, in a liquid environment.

He or she will not like the fact that you have him or her in a tank of water, and the person will try to escape. To prevent that, place metal bars, on the top of the tank, that are overlaying steel bars, of jail cell grade steel bars, welded together, in a criss cross pattern, and secured to the top of the tank.

Use acquarium grade window panes, and use good steel construction, to make sure the Dhourty will not take a rock from the bottom of the tank, or other hard, or metal object, and break the window on the tank.

The Dhourties, have hidden in their bodies, tiny, sophisticated tracer locater energies signals transmitters, and with their advanced technologies, the Dhourties' friends will track down the missing person, and then locate him or her, and then they will attempt to rescue the participating Dhourty, who you are experimenting in the name of understanding, and for the furthering and deepening of your scientific knowledge, with.

There is no way to avoid this rescue attempt, except to ask the participating Dhourty, before hand, where each one of the tracer locaters, tinier than a BB gun's BB, is hidden inside the body or teeth, or jaw bone, toe bone, or knee cap, etc., of the Dhourty.

You may need to set up a type of commode that is used in the space shuttle, or some similar type of commode, to keep the water as free and clear of loose fecal matter debris.

You can also feed the person, the types of fish, the cat enjoyed, and other raw meats, and foul. Cooking the meat, and using barbecue sauce, ketchup, mild red chili peppers, or other mild chili pepper, salt, pepper, or worstireshire sauce, or a good marinade and basting sauce, will make the barbecued, or steel pan fried meat in tasty oils, or marinated, basted, and grilled meat, tastier for the participating Dhourty. Use high quality steak, or beef, filet mignon grade or better, and then the Dhourty will enjoy the hospitality, even more.

The water in the tank, will suffice for drinking water, unless you wish to pass in a can of beer, or soda. Be sure to reclaim the empty can, as you do not want the participating Dhourty to be able to accumulate them, and then use them to damage or deface the inside of the tank.

After you have finished your experiments, you can allow the Dhourty to exit from the tank, and he or she will know what to do, to force the fluids up and out of his or her lungs. They all train in aquatic sciences, and they all know several, or many techniques to use, to expel the water from their lungs, successfully. The water will eventually drain from their lungs, as it leaks out of the lung sacks, through tiny perforations in the lung sacks tissue linings.

If the person passes out, or fakes passing out, hand cuff the person, with three to eight, hand cuffs, the prison style hand cuffs, with leg cuffs, as well, attached, and make sure the person does not slip a pin, or similar sharp instrument into his or her fingers, as he or she attempts to unlock each handcuff, as he or she fakes his or her supposed, but fake, unconcious state of mind.

After you suction out the water from the person's lungs, force in air, and apply CPR, and keep going, untill the person spits out all the fluids, and regains his or her normal breathing. Be sure the person does not bite your tounge off, as you are applying CPR.

Bogus News Stories On Supposed 'Drowning Victims' In The Dhourty, Managed, Owned, And Operated Media

A person will not drown, or die from submersion in the water, as the Dhourties have led us to believe, with their bogus news reports of persons drowning, in the media.

The person is merely passed out, and the heart need not even be beating. The Dhourties have the know how, and techniques they need, to revive supposed 'drowning' 'victims', and they transfer them to their

underground torture rooms, for torturing them, when they pull them out of the water, or when they pull them out of the morgue.

Stroke Patients

Catastrophic stroke is not due to loss of blood to the brain, but it is due to brain wireing, being completely destroyed, so as to impair the person's use of his or her limbs.

Fallacy Of Cell Tissues Bursting When Frozen

We are taught in the media, that when a brain is frozen, such as in the case of the people, who have their head frozen in dry ice, or in cryonics suspension, under sub zero temperatures, that the brain cells, and tissue cells with fluids in them, burst, and there is no technology, or medical knowledge at present that would lead to the possibility for recovery of these burst cells.

The possibility of bringing people back at a later date for surgery, to heal them selves from some illness or, 'incurable' disease, is for the time being, an impossibility. It is often said on CNN, by Chuck Yeager, the TV media anchor person, that there is no known way and there are no technologies at present, to bring a person back from a cryonics suspension state of being frozen at sub zero temperatures.

There is much chatter in the nature oriented programs on TV that we need to study how bears can hybernate, and survive, during icey cold winters, in the Canadian Rocky's.

When brains freeze, the animals organs get cold, and they may get chilly, but the organs animals do not burst, but they do get solid, and they are icy cold, however they are not dead.

When you put roast beef from the super market in your freezer, you merely freeze the organs animals in the roast beef. When they thaw out, in your refrigerator, they are as good as new, except they are very cold, and perhaps a little wuzzy, or brain frazzeled, and their thinking is not too clear. Organs animals like temperatures somewhere in the eighties or nineties, or maybe a little higher, or maybe a little lower, as animals body temperatures vary, if they have lots of fluids to help keep them cool. If they get too dried out, and the fluids dry up, they will not die, but they will continue to live, until the brains begin to disintegrate, and chips of brain materials begin to fall or peel away, if we look at the tissues under powerful microscopes, in laboratories, that we do not have.

When this happens, the organs animals brains are falling apart, and even then, there is not complete and total darkness for them, as they can still see objects with their sensoring equipment that allows them to see things. They can also smell things, with their nose sensoring equipment, even though they are drying out, and not completely, dead, but only partially, living. Their thoughts are lonely, and they do not have much energy for talking or communicating with their friends, but

they are alive, and they are mentally active.

When we put a person into the ground. Just because that person has stopped breathing, that does not mean that the person is dead. The person is alive, and the person's brain is fine, and well. It takes many years for that body to dry out, and decompose, sufficiently, to finally end the brain's activities of that person, so that the person, is then able to leave the body, with my children's help, and then go to my Epcot Center.

Shadow Cast Slumber

In the wilderness of Alaska, bears sleep in caves, and they may develop frozen bodies, but they are not dead, and the musculature, or rather, the muscle organ animals, are a little cold, or chilly, but when it warms up, sufficiently, the organs animals begin to chirp to each other, and signal to each other, and they begin to chat, and speak to each other, and play games with each other, and communicate, write songs, and poems, and sing to each other. They are very much alive, and brainally active, even though it may be a little cold for them. When they get too cold, they fall into a light slumber. When they thaw out, they begin to perk up, and they begin to chirp and sing to each other, much like morning birds sing to each other. Their brains are wired for this activity, and they repeat it like clockwork. The bear finally begins to unfreeze itself, as its body temperature climbs, thanks to the activities of the little organs animals inside of the bodies of the bears.

Human beings are no different from bears, and they will freeze up, too, in cold weather. However, their bodies are the same as bears, and they have organs animals in their bodies, too. These organs animals all begin to thaw out, when it warms up, and they begin to chirp, and sing to each other, like morning birds, just awakening in the twighlight hours of morning, when there is still darkness all around, but the sun is on its way up, and the birds sense it, and know it, and eventually, the sun rises up over the horizon.

Human beings can thaw out, just like bears do, and just like all animals do, and they will wake up, when the organs animals warm up the human being - who was in a deep slumber, a shadow cast slumber - suffiently enough.

Shadow cast slumbers are slumbers where you think, now and then, that you know a little about what is going on, as you wake, momentarily, from a light sleep.

Grave yards are full of persons in shadow cast slumbers. When you use formaldehyde to replace the blood of a person, who supposedly died from some accident, or whatever, the formaldehyde functions better than the blood in the person's body, and it allows the person to continue to live, long past the point in time, he or she would otherwise, dry out, and fall apart, and disintegrate into tiny pieces

of sawdust like particles. Even in these saw dust like tiny particles, there is still life activities going on, as the very tiny organs animals are, many of them, still fine and awake, and in a slumbering state, a slow motion type state, or mood.

The brains of these organs animals are not dead. Brains of humans are not dead either, after humans 'die' or 'pass on', as we are led to believe by the Dhourties, who feed us their nonsense like, looney, false trivia, which has nothing to do with science.

This is the state of things, and the Dhourties know it. They have grave yard after grave yard with shadow cast persons sleeping in coffins, every where around the world. The only way to make sure a person passes on, and then goes to visit my Epcot Center, with the help of my kids, for a short stay, until repairs are made, and the person is ready again, to come back out, and then get himself or get herself back into the body of a tummy baby, with the help of my kids.

My kids do all the work, and they have the technologies for making all of this possible. They also have the technologies for making my universe run, smoothly. My kids run this place, and they keep it running, despite all the problems we cause to our friends, neighbors, school teachers, parents, family members, and so on. My brain happens to be in command, but that is a different story. It's my cosmic brain, and it is connected to me, apparently, as it is always interrupting me, while I am thinking, or sleeping, and causing me grief.

It likes to play jokes on me, and I get hasseled by my kids, who work for me, as my kids, collaborate with me, and they are the mouth piece, so to speak, for my brain. My kids have lots of technologies to use, to get into contact with me. They do this for me, to help me to communicate with my brain, so that I will wake up, and remember, 'Hey, I am GOD', my brain then takes over, and it tells me lots of stuff, with the help of my kids, who are the mouthpiece for my brain. My brain is very big, and my existence, as far as I can figure it, is boundless. So is, my brain, pretty much, so there is nothing to worry about, when it comes to whether or not, we will make it through this apparent crisis, that you have been reading about, from me, lately.

Well, never the less, regardless of how big I happen to be, and how big my brain happens to be, I have every thing under control, and my kids are going to continue to work for me, and do the jobs that I need them to do. I have so many kids, you will not be able to count them, and they listen to me, that is, to my brain. They do not listen to me, John Ayres, so much, as I am brain dead, apparently, as I planned it this way, to wake up, one day, when the timing was right, and when the conditions were right, and then announce to every one, 'Hey. I have a new religion, and it is my final religion, and we are going to practice it, regardless of what these Dhourties think they are doing, and we are going to get our universe, all straightened out, with our working for me, that is for me, John Ayres, and at the same time, for me, John Ayres, GOD. Get it. I am GOD, but I am also, John Ayres. You

are going to work for me, but you are working for me, and for me, and what does that mean?

It means, my brain and I am inseparable. I may not look like GOD, I may be weak, skinny, a little fat around the waist, and I may be losing my hair, thanks to the petroleum animals, and thanks to the Dhourties, and thanks to my karma, but I planned it this way, so that we would get a new, fresh start, as I begin to tell people about my new religion, and as people begin to practice my new religion, with one and each other.

In any case, we have a lot of graves to dig up, and we have a lot of bodies to place into morgue and funeral parlor incinerators, for a fast burn. We can also use any kind of fire wood, to burn the bodies of those who are in a state of limited capabilities. People might call them zombies, but that's foolish, as they are just sleeping, and they wake now and then, in a shadow cast slumbering state of mind.

Some of you might be afraid to handle this, as you christians, jews, muslims, buddhists, and others have been brain washed into thinking that there is something scary about graves and grave yards, and buried bodies in the ground. All the TV programming the Lesbianists bombard people with to disinform them, and with all the folk lore nonsense, the Dhourties have cleverly tricked almost all of the Dualdigers into believing the nonsense the Dhourties shovel out that is aimed at disinforming and confusing the Dualdigers.

We have to dig up our old friends and family members, and then place them in funeral parlor creamtoriums, or morgue creamatoriums, to burn them to ashes, so that they, and all the organs animals who work for me, can get to my Epcot Center for them, if they need to get to one, as some of them are fine, and do not need to check in, but once or twice, or three times, maybe, every few billion or more years. Human beings, some times, are okay, for their next go around, and they just hang out, else where, without going in to my Epcot Center, for the full treatment for over hauling them, and for making them as good as new. Lots of animals, and people, get to just hang out, in places, other than in the Epcot Centers, and when it is time to go to be born as a tummy baby, my kids get them and fix them up, and get them ready for their jumping into a fetal baby body, inside the womb of a woman who has been impregnated in her ovary capsule, with the male sperm bunny, which I've explained about, before.

Where do people and others hang out, by the way? That's the first I've heard about that? I don't know, for sure, but it is some where other than at the Epcot Center. I have a lot of places for people to hang out, and I'm not sure where these people, and these worker animal kids of mine, go, between lives.

I'll have to let you know, some time, when my memories are better. Any way, it is not on this planet, but it is on the tippy tippy toe of my little little nose. That's child's speak, for, they are hiding every

where. Well, that being said, I guess we can worry about finding them, later, as they do not seem to be in any immediate danger, and they seem to me to be okay, so far as I can see it. There is no such thing as ghosts, by the way, and the notion of it, is nonsense. There are no 'spirits' either, despite the television programing you see on TV, on cable TV, with the A&E cable TV host, Bill Kurtis, and others like him, always talking about haunted this, and haunted that.

The Dhourties have cleverly goof balled all of us dualdigers, into believing in the bunk, and trash, or nonsense stories they made up to keep us in line, and to keep them in business as the 'masters' of others.

They are all greedy people, and they are also, demented, if they think they can rule others, and get away with the things they do.

We are going to dig up our friends, and family members, and empty out our grave yards of all the bodies of so-called 'deceased persons', which is a word that is for the most part, untrue, unless you happen to see only bones in the coffin.

The dhourties had better let us do this, because we want our former friends and family members, former spouses, and former relatives, etc., to get out of their useless bodies, and back out into the waiting line, for a ticket out to a new birth, as a tummy baby in the tummy of a tummy mommie.

We can not let our friends and other important people, such as our mom and dad, brothers, sisters, relatives, school teachers, and others, sit or lie in their coffin, in the ground, in a shadow cast slumber state of low brain activity. It must be awful, when you think about it, and I'm sure it is not a nice thing to be kept in a coffin, with worms and maggots, eating up your body, and you not being able to do any thing about your situation.

I see we have found another way the Dhourties are torturing us, or at least, torturing our friends and family members, relatives, and others, who made it to the morgue, or funeral parlor.

It's not a funny situation, but it is a scary one, as no one in the government will cooperate with me, apparently, and no one in the government, no Dhourty, any way, will cooperate with you, either, I suspect.

Well, be that as it may, I think it is time we did our home work, and did a little research, and did some experiments, and after the brainally gifted and talented persons among you figure out how to measure brain activities at very minimal amperages, and when they have gotten their tools for studying sciences, such as better microscopes, better telescopes, better listening devices, better biometrics detection devices for measuring pulse, gasses exchanges, movement of fluids through tiny, narrow cavities, or tubes, or holes, or pipelines, such as through blood vessels, and through the blood

vessels of the organ animals, temperatures at spot locations, types of fluids without actually taking, for example, direct blood samples from a person's body, brain ignition points, or the points you need to be able to detect, to measure for brain activities that are very minimal, and that occur, once, only one hundred years, or less, for example, which will indicate if a person, or if an organ animal is alive, and other types of measuring devices for detecting various energies types, amounts of energies, flow rates of energies, energies physical characteristics, and so forth, the Dhourties prevent the Dualdigers from experimenting with, developing, manufacturing, and using, then they, the brainally gifted and talented scientists, lab technicians, home hobbyists, and other person with various talents who excelled in school, can begin to verify whether what I am saying, is true or not.

Bodies, Bodies, Every Where, Our Old Friends, Family Members, Spouses, And Others, Living, Present In My Universe, But, Where?

The Dhourities, that is, the Lesbianists, have been active in my universe, a long time. They have been pulling these tricks on people, from nearly the begining of their activities in my universe, I suspect. If that is the case, how many people do we have, on old bits and pieces of planets, that have met with various collisions with other planets, in tombs, and in air tight coffins made of highly durable and long lasting materials, that are still fine, and in tact.

How many people are there, who are not dead, but are frozen, living, though with very little activity going on, in clumps of dirt, hiding in layers of earth, compacted, and tight, like floating frozen caskets, drifting around in space.

How many corpses, all living people, though not living too well, do we have, that are our old friends, we have long since forgotten. The Dhourties can tell you, I am sure, and so can the computers data bases, the Dhourties have access to. The Dhourties in the sexaling for a living programs, who are still active, which is one hundred percent of them - though some may be not in good standing, and those not in good standing, may no longer have access to computer terminals that they used to use, to find out what the scores are - all have computer access, rights and priveleges. If you can convince one or more of them, to cooperate with you, and find out the data on this, you will get an idea as to how many people there are who have not checked in to my Epcot Center, recently, and who are still present yet, unaccounted for.

You will also get an idea as to where many of my kids are hiding, and they are not on the 'tippy tippy tip toes, of my tiny kids' little little noses'. That means, they are not on the noses of the tiny worker animals of mine, that are too small for scientists and lab technicians to see, given the present level of technologies, in the investigative, and other laboratory sciences.

This is a wake up call for all of you to get busy, so we can over throw these Lesbianists/Dhourties, as soon as possible, so that we can begin life, and living, forever, with a fresh, new start, and with all of our friends, family members, and others, present and accounted for.

Those of you who are gifted in the munitions side of things, may get to work, immediately. Those of you women and girls, who have the brains in your head, that I am telling you that you have, had better begin to convince the men and boys in your lives, that there is a problem, that needs their attention. If they are not willing to assist you, maybe you can find other men and boys, as well as other brainally capable women and girls, who will be willing to assist you.

What Is High Blood Pressure?

High blood pressure results due to a number of reasons, but, one of the reasons is you get poisoned by stricknine, arsenic, cyanide, and other poisons in your food, or beverages.

These poisons can be found in iodized salt, pepper, mayonaise, ketchup, mustard, dijon mustard, processed ham, processed meats, pork sausage, animal meat sausage used in 'Dim Sum' or Chinese style sandwhichs, pot stickers, won ton, hot dogs, wieners, pepperoni, pizza, jellies, jams, candy, cakes, pies, chocolate, peanuts, white sugar, white flour, white rice, white bread, tap water, bottled water, 'mountain spring water', milk, yogurt, cheeses, cottage cheese, preserved fish such as salmon, crackers, breads, pastries, and other foods.

These poisons can also be found in tiny amounts in preservatives. They can also be found in every food additive or beverage additive that the Lesbianists regulate and require food manufacturers to add to foods, beverages, condiments, and other items that you use in your diet, and for your health.

Medicines contain these poisons, in trace amounts, and so do all items sold in pharmacies, and in drug stores, and in sundry products stores, convenience stores, and so forth.

If you ingest too much of these poisons, accidentally, of course, in your diet, you begin to experience the symptoms of so called 'high blood pressure'.

It is peculiar, or bizarre, that the Lesbianists blame salt as the cause for high blood pressure, when it is they, the Lesbianists, who are poisoning every thing you eat, drink, or take for your diet and health.

These poisons can also be found in your laundry detergent, play ground sand box sand, fertilizers, Ortho Grow, iodine, witch hazel, rubbing alchohol, ethyl propyl alchohol or vinegar, and in all manufactured liqours, wines, beers, and all other Dhourty brewed beverage or licensed for brewering beverages, as well as in their pipe tobaco, chewing tobaco, cigars, and cigarets.

They can also be found in your home improvement products, such as in paint, putty, plaster, wall board, wall paper, ceiling tiles, floor tiles, plastics, synthetic fibers and in even natural fibers that have all been chemically treated, for clothing, bedding, curtains, carpets, couch and sofa cloth materials, naugahide car or auto seat covers, and any thing such as nylon, rayon, polyester, or other petro chemical industry related, or chemical industry related manufactured and produced product.

Every thing you touch, even the steel bars on jail cells, automobile body metals, roofing tiles, house sideing coverings, bricks, cinder blocks, mortar, cement, sand, gravel, wood treatment products, glues, Elmer's glue, pen ink, pencil led, mascara, lip stick, face powder, under arm deodarant, soaps, shampoos, and so forth, every thing you can think of that is a manufactured item, or that is an item the Lesbianists have had any connection with the manufacturing of, they all have these and other poisons in them.

Why do the Lesbianists poison every thing? To make your life miserable. I've also explained before, several reasons for why the Lesbianists act the way they do.

Litter, Bodies, Body Parts, Brains, Brains Parts Scattered Everywhere

Every rock, every sand partical, every grain of earth and dust, on this planet and in my universe, carries these poisons animals along with them. The Lesbianists have been up to their mischief, for so long in my universe, they have spread their poisons animals friends thouroughly throughout every cubic inch of territory in my universe, repeatedly.

I have lots of very tiny animals, and every one of them is feeding on even tinier animals. How small do you think the animals are in the poisons that the Lesbianists use?

If we consider that there are 600 million cosms from our living environment down to the so called, molecular level living environment, as I've explained about, previously, and from there, if you consider the 900 billion cosms, or living environments, down to the very difficult to live in, cosms, that are not very populated, below the 900 billion cosms, there are animals either related to these poisons animals, or cousins of these poisons animals, or descendants of these poisons animals, or incendants of these poisons animals or preceeding family members on the family lineage line, living in each of the total 900 billion, 600 million cosms, and even down below those. Incendents are those who come before us, or before some one else, or before a particular plant, or animal. Lots of your family members, your incendants, are still out in our universe, floating around, drifting around, and they have not yet checked into the Epcot Center, or other facility I use for having people get checked and marked, and then data with regards to their life and actvities is recorded and stored.

Marked means, we check them in, and we make sure every thing is doing well, or kosher, in their lives, and that nothing is out of order, or in any way abnormally out of balance, and so forth, in their lives. It's a karmic markups checking station proceedure, and we check for many other things, as well as karmic markups, such as the body condition, the health condition, the animals organs conditions, and many other miscellaneous things.

In other words, any way you look at it, nearly every living environement that we can find my worker animals in, just about every environment has been tainted with these poisons animals, or other poisons animals released by the Lesbianists. That means, that every thing you touch has poisons in it.

ARE YOU LISTENING TO ME SOLDIER? GOOD!

In any event, there is just about nearly nothing in my universe, that does not have in it, the poisons animals that the Lesbianists have released into my universe. My universe is thouroughly saturated, from one end to the other, and from top to bottom with the trash, garbage, poisons of the Lesbianists.

The present, yet missing and unaccounted for, former friends, lovers, parents, family members, and others, can be found, as well, from one end of my universe, to the other, from one side to the other side, from front to back, and from top to bottom.

My universe was originally much larger than it is now, as I've mentioned about, before. Some of the areas outside our universe, in the areas beyond the boundaries walls, may not be as densely contaminated and littered with the bodies of the lost and missing, present yet unaccounted for, friends, lovers, family, and so on, as other areas, but much of that area, is littered with the debris and rubble of the antics of the Lesbianists, and as well, by the present, living, yet unaccounted for brains, bodies, or brains and bodies of your old time friends, family members, and others, who have not yet checked in.

Karmic Energies

Every one has karmic energies. Karmic energies tell us the health and mental status, as well as the life status, and many other statuses, about the person whose karmic energies we are in the process of checking.

Our checking stations checks on a persons karmic energies, and each person is given an update, on who that person's karmic energies are.

Each person has his or her own unique pattern of karmic energies. Some people may have similar karmic energies patterns, but they are never identical, and there are dissimilarities every where, as well, even in person's karmic energies patterns that seem relatively similar to some one else's karmic energy patterns.

Why is this important to know about? When we first came out here, into my universe, we were all very holy, pure, and unblemished, and our karmic energies patterns were all pretty much the same. We all shared a wide variety of interests with each other. We slowly, over time, became less and less simllar, as our behavior began to determine a rise in a difference in a karmic pattern that was peculiar, or unique to ourselves, and different from all other persons' karmic patterns.

This leads to incompatibilities between people. It also leads to trouble, and distractions of many kinds. Over time, people begin to become more and more diverse, and they share fewer and fewer interests in common with each other, because of the differences in karmic energies patterns that arise over time.

We presently have such diverse karmic energies patterns, that it is a fictional notion that there is a mister right guy waiting for me, if you are a girl, or a ms. right girl waiting for me, some where, if you are a boy.

Love and romance notions such as these, are fictional, and are not in any way associated or based on principles with regards to the realities of our lives, and to the realities of our associations with others.

There is no perfect family for some one, and there is no perfect home life for some one, or for some group of people. Every one has such diverse karmic energies patterns, it is a wonder there is any one even talking to each other, is another way of looking at it. It may sound a stretch to say that, or as if it is some thing made up, but it is true.

How come we do have friends, if this is true, I have to ask?

There are karmic associations in every one's life, and those karmic associations pull people together to and with each other. Those people can not escape from their karmic associations with each other, and they all go happily down the trail, until some one drops off, or is shoved off, and does not return, or until some one gets pulled away, off into another direction, due to a stronger or heavier karmic association with some one else, or with some other persons.

There fore, what? There fore, you are all stuck together, and glued together, and you are not going to escape from one and another, and where ever we left some one off, at a bus terminal for the missing in action, present yet not accounted for, we will eventually pick up each and every one of our missing passengers, as we recover my universe from its current distress. Current distress means, the present distressing situation. It might also refer to the over whelming misery of every one in my universe, who is together, sharing this karmic distress with each other, despite what it might look like, on the outside of our lives, in our every day lives, family lives, work lives, and so on.

This means, no matter how much you may wish some one else where not around you, and no matter how much you wish that there was a way to eliminate the problem of a pesky person, or a group of pesky persons, there is no possibily of ever, in the near to distant future, relatively distant future, anyway, of ever releasing some one from a karmic association with you, if that karmic association is strong enough.

That means, the people around you, the people that you see from day to day, the people that you see on the city streets living in your neighborhood areas, the people that you see living on your planet, the people that you see in the movies, or on television, or in the temple, or churches, or in the synagogues, or in the wars between countries, no matter who they are, all of them have karmic associations with each other, and no matter how many times you destroy each other, it is only after a very long period of time, that the karmic energies patterns, and the karmic energies bonds, or bondings, and the karmic energies associations, that are a part of the karmic energies bonds, and patterns, as well, will slowly diminish, or change hue, color, form, texture, amperage, wave signatures - which is a high level concept or understanding you can learn about, from some one else, as it is too long to explain, and too difficult to explain about for me - or other characteristics.

People go around killing each other, thinking they will get rid of each other, and they are only fooling them selves. They can no more get rid of some one they are karmically bonded with, than can they get rid of their thumb, elbow, jaw, neck, and so on. You can not be born with out all the basic requirements, generally speaking, unless your karmic energies patterns determines that your form be such.

These Lesbianists get a kick out of tearing people apart, piece by piece, and they get a kick out of torturing people. They generally dislike every one, including people in their own organization. That is normal, given the fact that every one is so dissimilar in karmic energies patterns, and in karmic energies this's and that's, i.e., karmic energies tings and dings. They dislike every one in their organization, and they even dislike themselves, as they know they are really messed up, karmically, and they are not happy with how they feel.

When you are not happy with how you feel, you go around blaming other people for your problems, often, and you are unable to see it is not in other people, so much, in some instances, but it is in you, your self, that there is a problem, and you sense that problem, but in your brain, you are not ready to recognize that problem, for one reason or for another.

Anyway, we can say, we all hate each other, and we all hate ourselves, as well, and that is not a lie, and that is not fiction, but that is fact, and that is something that you are all going to have to learn about, and accept, as you begin to prepare your selves, for working in my universe, for ever, with each other.

Do you understand this? I wonder. Not many people will want to believe this is true, but it is true, and until you understand that it is true, you will not want to believe it is true. If you do not want to understand or believe that it is true, than you will simply not understand or believe that it is true.

It is very simple, isn't it. In any case, you are stuck with each other, and until we force these Lesbianists to give up their game, we have a hard war to finish, until we have defeated them, entirely.

That means, it is alright to kill and destroy as many of the Lesbianists as you like, and it is okay to toruture, or threaten with torture, as many of them as you like.

DO YOU UNDERSTAND THIS, SOLDIER? I HOPE SO, BECAUSE I AM NOT GOING TO REPEAT MYSELF!

We are in a war with these Lesbianists, the Dhourities, and until every last one of them is either killed and sent to my Epcot Center or to one of my checking stations, or until they give up, and surrender, and apply to repleat, there will be no cessation in hostilities, by me, against them, and if you are on my side, there will be no cessation of hostilities, by you, either, unless you are just simply tired of fighting them, and you need a break.

Those of you who do not wish to fight, had better move out of the way, as you will, or might, become a casualty of war.

IS THAT UNDERSTOOD, MATE? I HOPE SO, AS I AM NOT GOING TO REPEAT MYSELF!

A War Deaf Hero

A mate is a war deaf hero. A war deaf hero is a coward, and a non combatant. War deaf heros, are chickens, and they only go around acting tough, and speaking tough, and when it comes to getting their asses burned, in a pinch, they are going to go, buck, buck, buck, buck, I don't know why I am doing this. I do not want to do this. I want out of this. Let me out of this. Please let me out of this, and they begin to pee in their pants, and then run and hide.

Do you see what I am saying. I suspect some of you do. This is going to be a serious confrontation, and a lot of people are going to die.

Now, if you are not man enough, or not woman enough to handle this, than go and run for the mountains, as we do not want to find your body among the walking wounded, or partially missing in action, or among the lists of missing in action.

Do you see what I am saying? I think there are a lot of people who are not happy with the present circumstances, and until we find a way to resolve this, you are not going to interfere with my plans, as I am GOD, and I am not going to let you interefere.

That means, it is okay to kill you, and it is okay to leave your sorry ass in the bushes, amoung the wounded, and soon to be dead.

HAVE YOU GOT IT YET? I HOPE YOU DO, MATE, BECAUSE I AM NOT GOING TO REPEAT MYASELF FOR YOU, AGAIN. YOU ARE GOING TO DIE, IF YOU DO NOT WISH TO PARTICIPATE, IS ANOTHER WAY OF SAYING IT, AS WE WILL NOT GIVE A SHIT IF YOU ARE WARNED IN ADVANCE OR NOT OF A COMING ATTACK ON AN ENEMY POSITION.

That means, if you get your ass blown to shit, than that is your problem, not mine, and not any body elses.

You are all my kids, and you are all stuck and glued together with each other, and you can not get rid of each other, permanently, for a very long time, so in the mean time, if you happen to experience a failure, such as your body and limbs are shattered to pieces in a very large explosion, than that is just too bad, isn't it.

Well, I hope you will understand the reality of the situation, by now, and if you do not, then there is no hope for you, and we will be seeing you after we are finished blowing and exploding the shit out of the Lesbianists' defensive positions.

I do not have to make my self clear on that one, as I have listed many of them, repeatedly. Now if you are willing to fight, you will see your loved ones, again, no matter what happens, and that is a certain fact. There may be persons, who have lost a friend, or a family member, already, but the worst of this is yet to come, as we are far from reaching an agreeement with the Lesbianists for a one two three strike, you're it, annoucement. That means, a one, two, three, and if you do not answer me with a "Yes! I will surrender!", than that is it, and you will have your brains blown out of your head, into fifty million pieces. In other words, until the Lesbianists give up, and surrender, every single one of them, than this war will continue, until the last Lesbianist to surrender or die, is accounted for.

Huuuup Toooittt!

That means, get your action loaded, and get out of your bunks, and beds, and get out of your trousers, and get yourselves moving, sexaling with each other.

What is an action? It is your dick or vagina. To load an action, means to get your dicks up, and get your vaginas up, and ready for combat, or sexaling with each other.

That is an order to my combat troops who are preparing with their men, women, girls, and boys, who are all fighting in this war with us.

That's a strange order, isn't it.

No, not really, as I've already told you how we are going to win this war.

Now. We have a game plan, a war plan, as I've already related to you, on the bulletin board, where you can read my notes. Please follow it, and when you are ready, please take action.

Now, get to your posts, and get ready for war. It is going to be a long one, and it will take us a while to wipe out the enemy. They are every where in my universe, nearly, and we have a lot of people to kill, and account for. Unless they surrender, they face execution, either by me, or by one of my soldiers.

When I say by me, I mean, I will some how manage to get that person killed or put out of commision, and out of the way, due to infirmry, such as a broken body, broken head, tortured body, or tortured, brain. It does not matter how we kill them and how we get them to surrender. We will get them to surrender, all of them, eventually.

CARRY ON!

That means, to my soldiers in the field, or in their tents listening to me, my soldiers know that we mean business, and they know we are not finished with this campaign to get the Lesbianists to halt their activities, immediately, and it is now time to continue with your planning and strategies activities, and events.

DISMISSED!

To start, extensive studies of where ratings listening takes place show that very little listening to AM stations in metro areas takes placce outside of the 10 mv/m contour. This type of analysis is possible because every ratings participant fills in "where" listening takes place for every incident of listening. Such data is available by ZIP code for at home and at work listening in every ratings diary and can be plotted against coverage contours quite easily.

In some metros, like LA, there is essentially no listening in the metro outside of the 15 miv/m contours of the local stations. because such a "big" signal is needed to overcome man-made interference.

> patiently awaiting the next barrage of commercial 'messages' so their HD
> will render full fidelity, or more likely trying to ignore commercials,
> fidelity or not?

Actually, nearly all audience for AMs is concentrated in talk formats that are all news, nwes/talk or sports. There is very little listening to anything else. And in the areas wehre the new electronic Portable People Meter is in yuse shows listeners are less likely to tune out an AM over commercials than over a boring subject or a bad phone call, just as a bad song will do it much faster on FM that a commercial break.

> ...and I certainly didn't drop 5 kilobucks on any single receiver

I believe I was addressing Mr. Telamon, who mentions incessantly having a TenTec 340, which is around that price.

MB - Seems have been "Radium-ized" ~ RHF
.
FWIW - "What is the highest radio frequency used
for astronomy? Is it 3,438 GHz?" - Has nothing to do
with Shortwave Radio" - But so far Radium has gotten
30+ Off-Topic Cross-Posts on this Thread to the
Rec.Radio.Shortwave newgroup.
.
OBTW - Currently Listening to Radio Habana Cuba
on 9550 kHz @ 06:20 UTC en Ingles with Fair Audio
http://www.radiohc.org/Distributions/freqtable.html
and some very good Latin Music -cause- That's what I
do as a Shortwave Listener (SWL) and I report it
here on a Shortwave Radio Newgroup.
.
Guess I will have to change the Subject Line Again
to Reflex the Change {Evolution} of the Topic to some
thing On-Topic for the Rec.Radio.Shortwave newgroup.
.

Message-ID: <1188818970.483470.202170@50g2000hsm.googlegroups.com>
Source record: 122385

I've toyed with the idea of picking up a Zenith Transoceanic. I'd like to have a nice, old tube radio in my living room for listening to my favorite AM stations. However, I'm deterred by the fact that the 1L6 vacuum tube is relatively rare and very expensive.

What the normal life span of a 1L6 in a Transoceanic?

Steve

People under 50 to 55 will just not listen to the quality of AM radio.

Whether this is due to current receivers or to NRSC is a moot point... they
will not listne.

When the "AM formats" like news or talk or sports are moved to FM, the same
programming jumps in 35-54 ratings, just because it is on FM. This has been
demonstrated in markets like Phoenix, SLC, Jackisonville, Dayton,
Philadelphia, New Orleans, Charleston, and Washington, DC where AM takers
have come on, moved to or swimulcast with FM... in every case, the salable
35-54 numbers have expanded dramatically.

> Do those buzzing sound effects on KNX traffic reports
> actually sound that much better?

I listen to KNX quite a bit, but it's on my factory installed HD radio in my
car. It sounds great in HD. Much clearer, greater presence, more "human"
sounding voice.

And it is notoriously difficult to maintain the jump in numbers
without accompanying changes in programming. You've been in
broadcasting for a long time, so you know this.

If you spend a lot of time around people with throat conditions that
generate a lot of 'hash', I suppose it would.

Just the move of an established news or newtalk format is enough to jump the 25-54 and keep it up. KSL in SLC began a year and a half ago an AM FM simulcast, It immediately jumped about 25% in 25-54, and has, since then, held the numbers consistently (n/t stations wobble a lot due to how strong the "goings on" politically are, so one just has to index...) as a part of the overall listenership. In fact, since the move, the numbers have been consistedntly higher than any time in the last decade.

Same for KTAR in Phoenix, which moved from AM to FM... much higher 25-54 consistently. And WTOP in DC now has a very big 35-54 complonent, which they were losing when AM only. No programming change at all, either.

All the cases I mentioned are typical traditional news talkers, with Rush, Dr. Laura and other syndicated fare... and all have done very well. The best example is the FM talker in Pittsburgh, which has taken nearly all the 35-54 numbers from KDKA, leaving that old AM with mostly 55+ listeners and hugely declining revenue.

All it takes is putting the SAME format on FM and the 25-54 jumps. No need to do anything else differently.

The HD audio sounds quite listenable... vastly more listenable than analog
AM.

You've confused me with Edweenie.

2774. Amateur's question regarding gain and squelch

Newsgroup: rec.radio.shortwave
Date: 2007-09-03 16:32:12 UTC
From: Monty <dale.schmitz@offutt.af.mil>
Message-ID: <1188837132.235424.209980@k79g2000hse.googlegroups.com>
Source record: 122408

I hope this is the correct forum for this question. If not, could some one direct me to a better one?

I'm looking for a layman's definition of the differences between squelch and gain. I ask this because I've recently purchased a new aviation headset which doesn't impress me with its performance, but I'm new at this so I'm pretty sure I have to mess with the headset's gain (it's adjustable) and the radio's squelch. The intercom that the headset gets connected to is voice activated, but I can't seem to get things set where the microphone doesn't pick up the background noise. Plus, the sound is very muted, although that might simply be a function of how close the mike is to my mouth. I believe squelch could be set to the proper level of voice activation, but where does the gain figure in?

Could I get some pointers on this?

Thanks

Quite the contrary. It has been known by broadcasters for some time that there is no way to get any significant number of listeners under 55 to tune to AM, and the average age of AM listeners is increasing each year as a consequence.

Some AMs have moved to FM. Others are simulcasting. Others have no FM to move to, and are slowly losing revenue.

Those AMs have, perhaps, some chance to survive via HD. Otherwise, AM will be pretty much a thing of the past and only relevant or viable for very niche formats or in some rural areas where there are no local FMs. Of course, this is not an immediate do or die type thing; HD can develop over the next few years and AMs can attempt to restore some interest among under-55s via the improved quality.

Lol. You are such a throw back. You will never lure young people away
their iPods, their cellphones and their myspace pages. I suggest you
quickly return your head to it's usual, sandy resting place. You're
fighting a battle that was lost twenty years ago.

In the case of AM news and talk programming, the potential audience is
almost entirely 35 and over; AM is losing the 35-50 year olds due to the
dreadful sound quality, ambient noise levels in big cities, directional AMs
that "go away" at night in many parts of metros, etc.

These listeners will use the news and talk formats if delivered in a better
quality... FM or HD.

As to youth, 96% of 12-24 year olds use radio. Less than before? Yes. But radio is still a very viable means to reach young adult demographics.

"Quite the contrary" to what you said my thought process is.

I now see HD as perhaps the _only_ hope for AM radio to survive.

INSIDERADIO: "INSIDE STORY: News/Talk/Sports: Radio's Last Bastion"

"Music FMs of any flavor are utterly screwed... Which is why News/Talk/
Sports is radio's last bastion... Right now -- while FMs are losing
the music audience to new media -- satellite radio is offering more
News/Talk/Sports programming than we can fit on AM radio...
Accordingly, I urge owners of AM/FM clusters which include a News/Talk/
Sports AM to drop an FM music format and simulcast the News/Talk/
Sports AM... Imagine how smart you will look if -- suddenly -- your
entire market can now hear the News/Talk/Sports assets which are
radio's most-Sales-friendly programming..."

http://ftp.media.radcity.net/ZMST/daily/IS031005.htm

Claiming that AM radio is dying, when the music FMs are screwed - yea,
IBOC, with its jamming and poor coverage, is going to same AM ! You
are nothing more than an IBOC shill-parrot !

Well, if your aren't able to bring AM back, see what you can do about
the horse and buggy. I think that if you just put a better suspension
in some of those old buggys, people would start using them again.
Young people won't tolerate poor suspensions.

OK, genius... how do you suggest that AM radio stations reverse the downtrend in total listening and the fact that only people over 50 use them, for the most part? I'm sure you have a plan, or you would not so brashly dismiss people actually in the business who are working to preserve the viability of AM.

Yeah, by messing up the band with failed technology.

Now that is Frackeltonian Thinking!

That quote is from an interview (probably with Walt Sabo or Holland Cooke) with a consultant who wants to sell stations services that involve converting FMs to talk. It is not the opinion of Inside Radio. Man, even your quotes are misquoted. Of course that person is going to dismiss music radio, as he sells talk radio services.

The fact is that FMs playing music are not screwed... those with good content and good music will work no matter what the distribution method is... FM, WiMax, etc. The ones that are jukeboxes with an antennas will not do as well, although there will be a market for free radio for many many years if not decades.

HD jams little or nothing that is actually relevant or being listened to. HD digital coverage is as good as the analog "usable" coverage of an AM (around 10 mv/m in metros) and the newer chipsets perform much better than the pretty dreadful first generation radios that came out in the first wave. In fact, on my third generation car radio I get LA's KNX in HD to beyond its 5 mv/m contour... where the analog signal is subject to lots of noise, the HD is clear. But don't let facts mess with your agenda.

The band is already "messed up" by the FCC licensing too many stations that have never been viable. You do know, I hope, that during the entire period that data was available, from the mid-50's to the mid-90's, half of all US radio stations did not make money?

Today, there are few AMs that can survive for long... mostly the big high power or non-directional metro stations, or rural AMs in underserved communities.

Making jokes about "failed" technologies that are, in fact, at the very beginning of their development helps in no conceivable way.

Well, it is failed technology no matter how much you are paid to hype it.

Please, run along, and practice your toe tapping code.

No, but they are responsible for the placement of most of the $21 billion
dollars in radio advertising each year.

www.arbitron.com

"Cleverness" about record albums (still a term of the trade used by "record
companies" to refer to their product) will not change the fact that all the
recognized data about radio usage today contradicts your totally
un-supported opinions.

But it doesn't hurt in any conceivable way either, does it? Well,
except for people, like you, who are out to make money off of HD.

I think it could actually be a great thing if AM stations die. Think
how fascinating it will be to see what springs up in their place on
the MW band. Pirates, perhaps? New utilities? The possibilities are
endless.

Please don't stand in the way of this Golden Age.

Please stop living in the past.

Please stop trying to block progress.

And please keep your feet to yourself in the men's room stalls.

A person can not pretend to be of a cultural group. For example, many second generation US Hispanics are bicultural, and have elements of both "American" culture and Hispanic culture. In many cases, such people are really of a third, distinct culture, which is based on being bilingual and speaking a "special" language that is a mix of English and Spanish.

In any case, culture is acquired by the individual by exposure... anyone who is nearly 100% immersed in a culture from an early age is going to be of that culture about 99%.

Since you are unemployed, you might take some time to study cultural anthropology and sociology. It would benefit you greatly; I've seldom encountered an international DXer with such a mean and horrible cultural bias and such a total lack of understanding of any language but American English. Burdick and Lederer were writing about you and those like you.

The current programming is the only thing that still works on AM. Talk on
the other side of the spectrum has failed miserably in many, many markets...

What else do you suggest (and i can probably count the hundreds of times it
has been tried and failed for you).

> and drains their wallets.

Unlike communication with God, Arbitron and Nielsen are audited by a committee of researchers and statisticians named by the advertising industry which has a vested interest in the outcome of ratings. The methodology has to be extensively proven (6 years of field tests for the People Meter) to get approval, and every year an extensive audit of the sample, themethodology and the processing is done.

For the diary-based survey, all subscribers can actually see the completed diaries for each market and check every page. This has been true for 4 decades, and Arbitron has a suite of 10 offices where one can perform as many checks as they want.

The fact that nobody in the ad business questions the surveys would indicate that each person has satisfied all these "conspiracy" questions long ago.

Since this is a shortwave group, I'm not sure when it starts is of any
interest to us. It's when it peaks is what matters. :-)

This will be buried inside a completely unrelated thread, but there
are lots of "low power",
Part 15 100mW, devices in the MW band. There is a Military Graveyard
just about 15
miles south of me that has such a transmitter for "self guided
tours". I have seen/received
several "talking houses" including a solar powered one that I was very
tempted to visit
under the cover of dark and appropriate for my own use.

I have seen a few billboards with these also. Down toward Tennessee
the big firworks
outlets tended to use them about 8 years ago. I don't know if they are
still in use cause
I don't get down there these days.

Regarding my hunt for the UNID 1640 station rebroadcasting A NOAA
weather stream,

I had assumed by content it was at or near Cave Run Lake, near Morehead KY. But we visited there Friday and no signal. I talked to the Corp of Engineers and they suggested we check in Jackson. So off we went. As we approached Jackson it was clear it was not there. But I decided to check the Jackson Airport/NOAA office to see what they knew.

They were aware of the TIS stations in Winchester and Richmond that carried NOAA and were for use in the event of a nerve agent leak from the Blue Grass Army Depot in Richmond, but they knew of no station on 1640. They gave me a list of towns where there are low powered NOAA WX transmitters to check and it wasn't in any of them. On a lark we went to Richmond Yesterday and the TIS on 1610 is still only receivable right next the the emergency center. But there was a different station on 1640. This one is clearly connected with the Nerve Agent program and may be in Berea.

Sooner then later I hope to locate both 1640 transmitters.

I will post the main body of this under a new thread.

Terry

2813. 1640KHz saga continues

Newsgroup: rec.radio.shortwave

I can find no listing in any reference for TIS or any other non
commercial station
in KY.

Regarding my hunt for the UNID 1640 station rebroadcasting A NOAA
weather stream, I had assumed by content it was at or near Cave Run
Lake, near Morehead KY. But we visited there Friday and no signal. I
talked to the Corp of Engineers and they suggested we check in
Jackson. So off we went. As we approached Jackson it was clear it was
not there. But I decided to check the Jackson Airport/NOAA office to
see what they knew.

They were aware of the TIS stations in Winchester and Richmond that
carried NOAA and were for use in the event of a nerve agent leak from
the Blue Grass Army Depot in Richmond, but they knew of no station on
1640. They gave me a list of towns where there are low powered NOAA WX
transmitters to check and it wasn't in any of them. On a lark we went
to Richmond Yesterday and the TIS on 1610 is still only receivable
right next the the emergency center. But there was a different station
on 1640. This one is clearly connected with the Nerve Agent program
and may be in Berea, or it may originate on the depot proper and have
a very poor antenna/feedline/transmitter.Due to time constraints we
could go further south then the bypass in Richmond.

Sooner then later I hope to locate both 1640 transmitters.

You see, what you fail to grasp is that it is not working. AM is
rapidly dying. It is losing every demographic except perhaps those who
are 50+. You really need to face facts and stop living in the past.
You sound like you're still in 1943.

I suggest doing absolutely nothing. AM is dying. Let it die. Stop
living in the past. Embrace the future. Accept progress because it is
inevitable. You have to realize that time does not stand still for
anyone, not even Ibiquity's stockholders.

The sample size is published in each ratings report. The socioeconomic levels match the market, the ages match, the ethnicity matches, the geography matches.

And we can see every diary for every market that we are licensed for... I have been looking at them for 37 years, and never spotted "missing diaries" or any other irregularity.

Every market has a diary target, and the targets are met within a few percent every time (or the report is cancelled, like New Orleans at the time of Katrina).

The reason you hear these and the reason why you think them funny is that
infomercials and brokered slots are what sustain a large percentage of AM
stations today.

I have already stated that nearly all AM audience is over 45, and a majority
over 55. That is the problem; the only fix is to broaden the appeal of AM
via HD because under-55's will listen to the existing content but will not
listen to AM quality.

Sounds like you should go into a new business recycling all of these
diaries. At least then you'd be in a business with a future.

You're never going to talk people out of progress. Time marches on.
Deal with it.

Yes, but the point obviously hasn't taken hold of you yet because you
still insist on living in the past. AM is dead, so let it go and
embrace newer technologies. I don't think you appreciate the sorry
state of AM programming today.

iBiquity has only about 8 or 10 shareholders... and "they are us" to some
extent. Many larger radio companies helped finance the establishment of
iBiquity based on the the AT&T / Lucent wpork and patents. The reason, over
10 years ago, was to find a way to offer digital services on band for AM and
FM. Separate AM solutions had been proven not to work back with C Quam AM
stereo, so the decision was reached that AM, already in decline, would only
have a chance if it rode on a technology that FM would push... the problem
with AM is the audio quality and analog noise, and HD fixes that quite
handsomely.

The reason this type of programming sustains a large percentage of AM
stations today is because AM has lost practically all of its listeners
who are below the age of 50. The younger listeners are no longer there
and this is a fact whether you accept it or not.

KPFK had no guaranteed or protected coverage in San Diego county, by US or
any other law. Grandfathered stations are protected to the extent of a
compliant Class B in Los Angeles, and that means to about San Juan
Capistrano in Orange County, so XHLNC is totally legal... and was founded
and owned by a member of Mexico's most liberal party at the time... the PRI.

KPFK hardly has any listeners in LA, and did not register any in San Diego
prior to XHLNC going on.

A retired person is not employed. So you are unemployed.

Obviously, the classes you took did no good if they were in any of the
social sciences or languages.

They are already recycled. They are scanned and saved electroincally, and
the paper is recycled. Has been this way for aobut a decade or more.
>

That is why we have electronic measurement now, totally devoid of paper.

The AMs with good signals are not dead, and can be enhanced by technology. The ones with bad signals are, for the moment, surviving in many cases with brokered or religious shows. And in many rural markets, AMs are quite viable. But, in the near future, something has to be done to "modernize" the audio of AMs on the same band the stations are on now; some inferior stations may die, but AM can be viable for some time with change.

I made a very good DF loop out of a square copper pipe loop a foot on
each side and my Wellbrook ALA100 amp. I tried a larger loop (2ft per
side) and the null was not very sharp. Perhaps it interacted with my
body since I did this handheld.

Anyway, DFing AM BCB is pretty trivial.

No, the agencies don't pay to begin with. Radio pays, as it is a sales tool.

> That circular logic is like vodoun, only works if you believe it,
> and even then failures are just written off as 'not enough faith'.

You don't understand the purpose of ratings. It is to sell advertising by providing a metric. Radio or TV provide ratings, newspapers and magazines provide audited circulation. This data is given to advertisers to facilitate the evaluation of the media.

That is essentially my point. But the programming, if transported to FM with better quality, leaps upwards in 35-54 listeners, proving that the main difficulty of AM is the audio, a problem HD fixes for stations with decent signals.

Wait until this happens - you'll be eating your words:

"HD Radio - Wherefore Art Thou?"

"Just contemplate that thought for a second before moving on, because there's something around the corner that may cripple HD Radio far worse than lackluster consumer interest, or inability to get the product on store shelves. Second's up. If the push to make broadcast radio pay the same exorbitant fees for "performance royalties" that internet radio is facing wins, every side-channel that's in this rush to HD will be included in the invoice. How's that for an HD Radio killer?"

http://www.audiographics.com/agd/080207-1.htm

"House Judiciary Committee Hearing on Broadcast Performance Right - No Breaks for the Broadcasters"

"Congressman Howard Berman chairs the subcommittee, and he opened the hearing with a summary of the issues - indicating that he expected that the committee would move legislation this year to impose a performance royalty on broadcasters."

"HD Radio vs. Internet Radio - Which is Radio's Future?"

"Of those who were "Very or Somewhat Interested" in owning HD radio,
3% were "very interested". However, with these respondents, we

followed up with the question "Would you buy an HD radio in the next two months?" only 1.0% responded "yes". Asked if they ever visited a retail store to look at or try an HD radio receiver, 30 members of our sample of 3179 said they had. That is less than 1%."

"According to John Blackledge analyst with JP Morgan, Internet radio advertising is estimated at $500M this year (2007). Bridge Ratings estimates that by 2020 Internet radio is projected to generate revenues equal those terrestrial radio acheived in 2006."

http://www.bridgeratings.com/press_08.08.07.HDvsInternet.htm

I wish I could make the world's young consumers throw away their ipods
and develop a keen interest in colloidal silver, but I can't. No one
can. I'm sorry, but it's time to modernize.

I'm afraid you're wanting to apply bandaids to serious wounds. Perhaps
you just don't appreciate the seriousness of the problem. My guess is
you don't believe me when I say that AM has lost nearly all of its
listeners how are younger than 50, but it is a fact. Verify it for
yourself. Young people are interested in ipods, myspace and cell
phones. They're not interested in your colloidal silver and "Amazing
HGH". Whether you like it or not, it's time to modernize.

No it doesn't. A person can retire from one occupation and still be
actively engaged in another.

Digital has totally different properties than analog. I have seen plenty of data showing the HD signal, on a 3rd generation receiver, is robust beyond the "usable" signal range of analog AM or FM, which is the 10 mv/m AM curve and the 64 dbu FM contour.

It irritates you to be unemployed? Students, for the most part, are
unemployed. So are stay-at home moms, or invalids. You either work or do not
work. Those who do not work are unemployed.

Actually, I have the real ratings data and you do not.

And the AM issue is one of quality, not of listeners per se. FM has solid listening, over 95% usage per week, from age 12 up to over 65. What we have here is a challenge to improve AM quality, and the only way is a system that is compatible with FM digital. And that is HD.

I doubt it... our stations are doing just fine, with increases in revenue in
a year where most broadcasters are flat.

If you have the data, why won't you read it and take it to heart? You
can't breathe new life into the horse-drawn carriage by putting shiny

new wheels on it. I appreciate that you probably have an emotional investment in AM that makes it hard to acknowledge the challenges it faces, but it will be easier to confront the facts now than later.

Seriously, I wish things were different. I wish I could convince young people not to buy ipods or iphones. I wish I could convince them to stay away from myspace and facebook, but I can't. No one can. The sooner you face this fact that better.

I'm glad you had a good year, but what you fail to understand is that
your good fortune cannot continue as it has up until now. While you
probably don't want to believe this, it is a fact that AM has lost
virtually all of its listeners under the age of 50. Were you aware of
this? Please think about what this means, for it suggests that, as the
years go by, your audience is shrinking. You can bury your head in the
sand and entertain yourself with a short term fix here or a dose of
colloidal silver there, but time is running out.

Ol' Edweenie certainly needs a dose of something just a bit stronger than
colloidal silver!

If he were honorably retired, he would be living off some kind earned
income, not welfare. That could be savings, or deferred income in the
form of an earned annuity. Someone getting disability payments is
receiving welfare, taking advantage of the productive members of
society. That makes him just another welfare queen.

>From his hostile attitude, you should realize the he is not
employable, so maybe he does not qualify as unemployed. It is
obvious that he does have a mental disability.

So solly cholly, I'm receiving Social Security, not welfare. I also receive my pension from the Union, and next year I'll get my pension from the Company. I also have about $180,000 invested that I can tap into as well.

Try again, 'tard boy!

Given that my right arm is currently immobile, I am rather limited in
the equipment I can use.

We, my wife drives and I man the radio, have been using my DX398's
loop to some effect.
I have some plot lines, but they don't agree. For example from one
location we got a heading of 180 degress.
>From a spot in a straight line 10 miles away the reading is 150. But
when you go to the supposed X the reading is still 180 degrees.

The signals are just too weak for this to work. Next week end we are
planning on making a loop around the northeastern transmitter with
a portable wire antenna that we can string out and get some signal
strength readings to narrow down the area.

Sadly the signal strength is too low to receive on my phasing array at
home. This must be a 10W signal so it just can't be that far away.

Terry

Huh -- The old Flight of The Phoenix (1965) starred Jimmy Stewart
http://www.imdb.com/title/tt0059183/

The new one (2004) starred Dennis Quaid
http://www.imdb.com/title/tt0377062/

Durung the 1965 filming, famous racing/stunt/movie pilot and collector of
warplanes, Paul Mantz was flying the Tallmantz Phoenix P-1, the machine that
was "made of the wreckage", in a low level pass in front of the cameras when
he caught a skid on a hillock. The movie model crashed and broke apart,
killing Mantz and seriously injuring a stunt man onboard.[1]

There are 430 AM stations billing over $1,000,000 a year, and ten billing
over $33 million. 2523 AMs are in the top 10 in billing in the rated
markets. 15 of the top 50 billing stations in America are AM.

AM is not dead yet, but the number of viable stations is low; all of those
high billing 15 stations are stations that fully cover their markets,
although not all are 50 kw clear channel stations.

The problem is that the programming on those stations works, but the appeal
to the generations that grew up on FM is lessened by the quality of AM
sound. Put the same format on FM, and it literally explodes in younger
demos. The answer is to fixs the sound, not to give up on billions of
dollars in assets and many tens of thousands of jobs.

Various studies show that iPod users are greater consumers of radio than
non-users of iPods. The other things you mention are no different than the
completion from 45 rpm records, 8 Tracks, cassettes, video games, etc. There
are lots of entertainment choices, and always have been. In the 50's, TV was
going to kill radio... it just made radio change for the better. HD is one
of the changes that could improve AM radio; it certainly opens up many
opportunities for FMs to provide more formats and services in better

quality.

Actually, using our LA AM as an example, we have an average age of 41. That means about half our listeners are 40 or under, in fact.

Or KTCK, The Ticket in Dallas... average age is 43. And that is a top 10 radio station there, and #2 in overall billing in Dallas, right behind WBAP (an AM) and right before KRLD (another AM). None of these stations is dead.

The average age for AM listening is just under 50, so half the listeners are UNDER 50 at present. Your statement is totally wrong, in fact.

Radio as an industry knows, however, that the under 50 or under 55 listenership is decreasing. The average age of AM listeners increases by 1 year every 18 months. This is not a good trend, since advertisers have little or no interest in listeners over 50. So there is concern, and a desire to do something before the listening becomes predominantly 55+, and sales start decreasing. Many big AMs are, in fact, showing flat or slightly weaker sales... but we are talking about market leading stations with huge revenues.

SO before you call for the piper and a nice dirge, note that radio is anticipating a problem, not living one.

You might not like it, but it's a fact. The AM audience is getting
older by the minute. Just about all of the listeners younger than 50
have already left. Soon no one will be listening. You must modernize
or you will soon be out of business. Those are the facts. You must
live with them.

Until you come to grips with the reality confronting you, and stop
clinging to decades old technology, you have no chance of surviving.

You must stop clinging to the past and get serious about the problems facing you.

Seems like there is very little else that is ever broadcast on AM, so you
don't have any choice of what to listen to.

"A Station Owner's View of HD Radio Industry"

"We were told back in the beginning that the HD coverage would be
equal to the analog signal. Unfortunately, the industry is now finding
out this is not the case, that the HD coverage is considerably less,
something like 60% of the analog coverage. We've also found that even
in a strong HD signal area, a dipole antenna is required. We were also
told that the HD would lessen interference with adjacent channel
signals. That also appears not to be the case. This is really very
discouraging and is leading us to wonder why we should bother to
promote HD. To do so will only disappoint, and, perhaps, antagonize a
significant segment of the audience who finds that the system doesn't
deliver."

The term "unemployed" per the Oxford American Dictionary means, simply,
"without a job." The Encarta dictionary says, "jobless."

Both of those fit your status.

You're damned straight it's low, and it will get lower if you refuse
to face reality. AM must modernize, and I don't mean a quick, digital
paint job...I mean a real overhaul. Otherwise you will soon be out of
a job.

This is where you talk yourself into believing that the problems confronting AM are not real. This is really where you need to work. The problems facing you now are serious, and urgent. You must face them and deal with them. You must modernize.

Thus speaks David "Pollyanna" Eduardo. Fine. Just let AM go one just as it always has. Let the audience continue aging while not attracting any new blood, and see where it gets you. Soon you'll be running infomercials about cemetery plots.

Eduardo,

Your math is faulty. You are not factoring in the human lifespan, the
average of which is currently about 73 years, outside forces
notwithstanding. There are far more people UNDER 50 years old than OVER 50
years old. So, if your average age is 50, that brings your minimum age up
considerably, since you have far fewer over 50 than under.

>

As stated previously, I actually built the first FM station in Ecuador from scratch, including transmitter, studio gear and antenna. I certainly know what the terms of field strength mean. I think anyone who can build an FM exciter from scratch probably can understand voltages pretty well.

I have also lugged field strength meters around various FCC jurisdictions while working on directional antenna patterns ranging from WEEL to WQII to KTNQ.

The minimum contour for FM stations to get significant listening is the 64 dbu, roughly 1.5 mv/m. For AM in metros, it is about 10 mv/m. Both AM and FM are measurements of the strength of the EMF from a transmitter at some point of distance from it dBu used to be called dBv but got confused with dBV, and was changed. It's a decibel measurement of voltage.... as my equivalency shows.

The whole point here is that the average listener... about 96% to 97% of them, in fact, will not listen to a signal below a certain level and all but three to four percent of stationary AM and FM listening in rated metros comes from areas within the 10 vv/m and 64 dbu contours of AM and FM stations.

You know what it would take to make terrestrial commercial radio extinct?
If XM and Sirius both had a non-pay basic tier that was commercially funded,
that would pretty much do it. Nearly universal coverage, and now they have
walkman-sized personal portables.

Then explain why, nationally, the average age for AM listening is UNDER 50,
per Arbitron.

>Soon no one will be listening. You must modernize
> or you will soon be out of business. Those are the facts. You must
> live with them.

There are many years left, and many more if AM develops HD to its benefit.

"Whatever?" That's your answer when it can be conclusively shown that AM
listening is not virtually all over 50 as you said.... in fact, it is mostly
UNDER 50.

Vicious circle... nothing else works for mass audiences, although there are
as many religious AMs as talkers, and as many ethnic AMs as well.

The HD signal is good in the same contours where about 96% to 97% of all AM
and FM listening occur... in fact, it is good beyond those contours.

Are you telling me that AM currently has the most profitable
demographic groups under its thumb? If you are telling me this, you're
mistaken. If you are not telling me this, your evading the real issue
here.

Sure there are. And soon the 8 track tape is going to make a huge
comeback.

The terms Arbitron uses, which they call "average" are actually medians. The median age of AM listeners is under 50. The problem is that most people do not deal well with mean, median and average in normal discourse.

The distribution of AM listening is mostly between 35 and 75, with the median point changing in each market... in some places, like Phoenix, it is around 46. In rust belt markets, over 50.

Over 50...really? That's not good Davy, that's not good at all. You
people had better get with the program and quick.

Those portables only work well in areas with terrestrial repeaters. They
suck elsewhere. I bought one to travel with, and in 9 place out of 10, the
signal is not listenable. And it cost $300.

The most profitable demos are 18-49 and 25-54. AM reaches 35-54 pretty well, and 45-54 quite well today. However, each market has only a couple of good, viable AMs at best, while all have a dozen or more viable FMs. So in most rated markets, there are few if any AMs that cover the whole market that can do a good job of audience delivery.

3 of the top 6 billing stations in the US are AM, in fact.

You'd better focus on your problems, not on someone else's. Everytime
you make an irrelevant post, another segment of your listener base
expires.

There are currently more AM listeners under 50 than over 50. That is per Arbitron. The issue is that only 20% of all radio listening is to AM, because in the rated markets there are so few good AM facilities that can compete. The ones that can, get great ratings and huge billing.

The median age of all 75 of our stations is around 33 to 34, including the
AMs that average around 38 to 39. I don't think I have much to be concerned
about demographically.

Fine. Deny that AM faces any challenges. The facts will teach you
otherwise.

This must be the "Desperation Weekend" for IBOC/HD, elsewise they wouldn't have their #1 shill up and running at warp speed.

The people in trouble are those with AMs with bad signals. Since we only
have about a dozen AMs (including 7 with 50 kw) they are not a major part of
the business. Our FMs do just fine, too.

Yes but when you're part of an entire industry in decline, it's going
to catch up with you sooner or later. Maybe you should post your
resume on hotjobs or something.

The radio industry is in slow growth, not decline. 2006 ended higher than
any year in the past, and since 1950, radio has grown every year but tow
(2001 and a recession year in the 70's) and you can find a chart of this at
the RAB website.

Certain sectors of radio have sustained double digit growth for the last 20
or so years, and I am in one of those sectors; we were up 12% in revenue in
Q2 of 2007 when the rest of the industry was down about 2%.

I am not going to be spending much time on a resume, methinks.

Slow growth is just as good as decline if it's slow enough.

You think that AM as it currently exists faces no serious challenges.
Well, the facts will teach you otherwise.

Steve-the-toe-tapper-in-the-men's-room is trying to obfuscate. (And
Larry Craig rejected him with a "QLF?") If the payments from the
Social Security Administrtaion are for disability, and not a pension,
they are welfare. In fact, anything he receives from SSA above and
beyond what he paid in (plus interest) is welfare. If he were an
honest conservative, he would recognize that.

He may not be collecting unemployment benefits because, to collect,
you have to be able to demonstrate that you are willing and able to
contribute to society.

The Crystal Ship is on the air tonight (local Monday evening),
broadcasting to North America on 6875 kHz and on 3275 kHz.

Transmitters are both Johnson Viking Valiants with modified audio, fed
with computer processed audio.

Time is currently 0040 UTC. We expect to be on the air for quite a
while tonight.

Happy Labor Day, all!

They can also offer a reliable solid state replacement that requires
no modification of the radio, a drop-in, that replaces 1l6.

There are such replacements for other T/O tubes, as well.

dBuV is not the same thing as dBV. Care to try again.

While you are at it explain how 1.5 mV/m equates to either 64dBuV or
64dBV.

You mentioned these voltage numbers are in decibels so does that
mean a change from 32 to 64 is twice as much?

And just what does 1.5mV/m mean anyway to a person reading this post?

> The whole point here is that the average listener... about 96% to 97%

My radio needs 10V/m to receive a station decently? My God no wonder you
didn't believe my posts on the signal strength of local stations. I'm
glad we finally figured that out.

I think that is a false hope.

A lot of the examples, here have been about AM sound quality. That
under 55 demos will not make the attempt, due to bad sound quality. That
the move to FM boosts prime demo performance without change of
programming. The move to FM alone is all that matters. And that appears
to be true. But the reasons given are always involve sound quality, when
it's been demostrated for decades, that content, not sound quality drive
listening. You've quoted them, yourself. But this is now the decisive
factor when a move to FM boosts younger demos.

There is another factor that's not been mentioned, that will far
outweigh sound quality as the razor between AM and FM listening.

Consider that when WNIB was on the air, it was playing classical
music against WFMT, also playing classical music. It was widely
recognized, acknowledged and even discussed that WFMT had superior sound
quality to WNIB. And expecially to WNIZ, in Zion, simulcasting WNIB off

an NAD tuner at 96.9. (WNIB was at 97.1)

WNIB routinely beat WFMT in the ratings. Widely acknowledged poorer audio. Same format. So....what was the difference? The content. WNIB played 'the hits.' WFMT played much deeper longhair. The playlists overlapped considerably. But WNIB, with poorer audio quality, beat WFMT in listenership. And in listener loyalty.

Content drives listening. You've said it yourself.

So, the ratings boost after moving an AM to FM may have less to do with audio quality than it does with a much more important factor....the cache associated with FM.

Even as far back in my high school days, AM stations were struggling against FM penetration. Not once did I hear 'audio quality' spoken of when I heard someone discussing FM superiority. But I did hear, 'You still listen to AM? OK, Grandpa. Stay in the 30's;' and many other derisive comments about the fact that FM was now, AM was your father's radio station. Listening to AM for whatever reason, meant you were out of touch. Even though KMOX still dominated the market, and KXOK was the St Louis music station. WLS had a 20 share and WGN was coming on. But the talk was of The Loop. And ABC's FM du jour. The era of FM penetration was on...driven as much by the hipness of a 'new' fad as it was by the quality of a new technology.

Now, everyone knows now, as they did then, that FM has more compelling sound than AM. And the conventional wisdom holds that AM has never, could never, and can never sound as good. Or be as listenable. Even though in it's native, unprocessed form, AM can be quieter and cleaner than FM. And some of us fossillized curmudgeons know it. More than you will ever realize. Or admit.

But AM is yesterday's news. AM is a Packard. AM is a Zenith console. AM is simply not intrinsically hip enough to face the competition and reclaim it's crown. Not incapable of performance. Just not possessed of the cache other alternatives are revelling in.

And then, AM has Rush. Granted he's not Howard Stern. Not quite the youth appeal of an iPod full of Rilo Kiley and Plain White T's. But there is listening. And it IS broader than typical local AM. Which indicates content does matter. And it DOES make a difference.

So, while FM has come to dominate listening in so many areas, through, yes, audio quality...Stereo... (though Dolby FM and Quad were busts--what does THAT tell you?) what's keeping listeners away from AM is the fact that it's not hip. It's not happ'nin'. For two generations, now, FM has had the cache while AM radios have gotted horrible. The younger demos haven't even given AM a real sampling. Because everyone THEY know...only listens to FM. And that's where they do their listening. Old habits, and all that.

David, they're not listening to AM because it's AM. They haven't even GOTTEN to the sound quality, yet.

In that context, OF COURSE moving AM to FM is going to make a difference in the demo spread. The younger demos are discovering the content where they listen. Some, for the first time. And some are going to stay. But going digital on AM....won't make the difference. Especially when the interstation noise is so dramatically much louder than that on FM. And so much of the band is trashed with hash.

HD Radio isn't going to change AM's perception, nor is it going to flag FM's cache. Because you're not going to get younger demos to sample AM. Not even give it a serious attempt. Audio quality alone cannot make any difference. Because that's not what drives listening. They may hear AM HD and think it's ok. But that's not where they listen. And, absent any compelling change in content to get them to sample something new, they're not going to try. All you're doing is trashing the band. And hastening what you believe is inevitable. While blaming AM technology for being substandard.

AM stereo went nowhere. There's a reason for that. Several, actually. Dolby FM went nowhere. There's a reason for that. Quad and FMX went nowhere. There are all improvements in audio quality...well, FMX wasn't really, but go with me, here...if audio quality really mattered, we wouldn't be able to count the number of DOLBY FM, Quad stations with FMX. And you'd have to have a second car, just to contain all the sound. But we don't. The public didn't see the value in each of these technologies, because audio quality doesn't drive listening. (KMOX-FM even had a Sunday afternoon Quad program that got fewer listeners than police radios.) Content matters. Get that wrong, and you've got a pig in a party dress. As cute as she may be, she's still a pig. You won't get anyone to get close enough to dance with her. They won't even GET to the smell.

And if you really want a pointed nail, here...2/3's of all FM listening is done in mono. Even among listeners to FM stereo stations on FM stereo receivers. Because of the blend circuit that engages out of prime signal conditions (not just level within the prime contour, but actual conditions of reception). 2/3 of all FM listening is in mono. You don't hear anyone bitching.

Try this once. Take one of your FM's mono. But leave the pilot on. Write down the names of everyone who complains. If you fill a Post-it, I'll buy you dinner at the 95th. You and a guest.

Try it. I dare you.

Why? Because audio quality doesn't drive listening.

The reason AM isn't being listened to by the younger demos isn't really about audio...it's about the fact that its AM.

HD Radio will not change that.

As the dismal monthly reports about the adoption of HD demonstrate.

Let me know when you're coming for dinner.

And with a total revenue share of 100 in any market, that isn't going
to change. Consolidation can move that red line a few positions
deeper, but all the technology in the world, all the cost cutting in the
world, will not change the fact that there is only a 100 revenue share
in any market, and not all stations can survive.

That sounds like the one I bought. It goes with me everywhere. And I
rarely have a signal outage....except for under bridges in rural areas.

Everywhere I go, I can listen to what I enjoy via satellite.

Those IBOC receivers only work well in areas with 50,000 watt stations. They
suck elsewhere. :)

That would only be a couple of blocks around the 50K station antenna
with Eduardo's 10V/meter contour. Whatever that means.

Here is a movie on the discovery that sound waves transport energy from
the Suns interior to the corona. Who would have thought this would be
the mechanism.

Call Bob DuTriel, the associate of Ron Rackley (the formost authority on
directional AM antennas in the US) in Florida and ask about me. I assisted
Bob while he rebuilt the WQII directional when I decided to reengineer the
station.
>
>> The minimum contour for FM stations to get significant listening is

>
> dBuV is not the same thing as dBV. Care to try again.

I said that, historically, the tem was changed from dBv to dBu because folks
were confusing dBv and dBV... that was the origin of the "u" in dBu... which
bagan with a lower case "v."
>
> While you are at it explain how 1.5 mV/m equates to either 64dBuV or
> 64dBV.

Equivalent field strength expressed in with a different scale. Even my
speedometer has two different scales, and they have equivalents all the way
along, just as a metric tape and a yardstick do.
>
> My radio needs 10V/m to receive a station decently? My God no wonder you
> didn't believe my posts on the signal strength of local stations. I'm
> glad we finally figured that out.

I don't care what your $5 thousand dollar radio needs.

The fact is that after examining thousands and thousands of diary mentions
for at home and at work by ZIP code, it has been found in several different
studies that 80% of all FM listening takes place in the 70 dBu contour and
15% to 17% more takes place between the 70 and the 64 dBu contours. There is
nearly no listening outside the 64 dBu contour. So, most of us actually
running radio stations or involved in programming know that there is pretty
much no potential for listener growth outside the 64 dBu contour as it is
apparent from empirical evidence across a variety of markets and ratings
periods that listeners do not listen to relatively weak signals.

The same studies, on AM, showed that in and in the environs of the Top 100 metros, there is pretty much no listening outside the 10 mv/m contour. This corresponds with more anecdotal evidence that shows that below 10 mv/m the signals are so subject to man-made interference from everything from computers to traffic light controllers that they are annoying to listen to. In some metros the minimum level seems to match neatly the 15 mv/m contour or points in between, probably indicating greater noise levels in the market in general.

Again, it is not about whether a station can be received. It is about whether listeners, in any significant quantity, are able to enjoyably listen to a station. And it has been proven that a pretty intense signal is necessary for a station to get audience in the rated metro areas (where about 75% of the US population lives)

And, as I said before, the data, the methodology and the tabulations are
audited each year by a team of researchers named by the Media Research
Council, formed by the advertisers and agencies that use media research such
as Nielsen and Arbitron.

Glendale, CA, in hilly area... no signal at all.. La Quinta, CA to Palm Desert (my bicycle route) spotty signal, dropouts at least twice in any 5 minute time in motion. Prescott, AZ, no signal at all in area I live. Waste of $300-.

This evening, I locked on KNX in HD around Rialto on the 210 fwy, and
carried it to near Dodger Stadium without a dropout. Rialto has something
like a 3 mv/m signal for kNX whose 5 mv/m ends just a tad to the east of
Pomona and before Ontario.

You guys throw a lot of listnership away if you're requiring 1.5mV/m.. since even cheap POS radios have FM sensitivity down in the low hundreds of microvolts, and good ones (home and car stereos) are good down to 5-15 microvolts.. you're almost a full order of magnitude higher than the average car stereo... (order of magnitude = 1x10E3)

I had an XM Eno (it went the way of the dumpster) and in the Hassayampa area
of Prescott, there is no signal anywhere. I am pretty convinced at this
point that the portables need to be near terrestrial repeaters and can't
really see the satellites.

Don't bother him with facts. Only 50,000 watt stations can be heard within a
10mV/m contour. The rest may as well shut down and let the big boys splatter
the band with their noisy IBOC subcarriers. Corporate media will only be
happy when they have complete and total control over everything we see, hear
and think. They already tell us what kind of music and entertainment we
like, and what we will use to access it.

that I announce my re-election to the Presidency of the Gay, Lesbian and Transgendered Shortwave Club. It is truly an honor to be elected to lead the GLT SW Club into the 21st century!

For those unable to attend our very successful and productive Labor Day gathering in Sioux City I provide the following list of resolutions voted upon:

Endorsement of legalization of gay marriage & Full Legal Partner Rights:
PASSED IN FAVOR

Endorsement of Stronger Gun Control Measures:
PASSED IN FAVOR

Endorsement of Digital Radio:
PASSED IN FAVOR

Endorsement of Broad Band Broadcasting:
PASSED IN FAVOR

Endorsement of Open Borders (Immigration):
FAILED to obtain majority vote

Endorsement of Reinstatement of Fairness In Broadcasting Doctrine:
PASSED IN FAVOR

Establish Annual Dues at $120.00
FAILED to obtain majority vote

Establish Annual Dues at $100.00
PASSED IN FAVOR

Establish Term of Elected Officers At 4 Years:
PASSED IN FAVOR

Establish Sioux City, Iowa As Annual Meeting Site
FAILED to obtain majority vote

Allocate $500 Annually for Official Club Stationery and Postage:
PASSED IN FAVOR

The official stationery has been ordered and I assure you that your President will be VERY busy writing Congress and other politically important decision makers to establish our presence and advance our agenda.

As promised my Administration is going to be very proactive and I guarantee all that the GLT Shortwave Club will be a force to be reckon

with sooner rather than later!

A.W.S.
President
GLT Shortwave Club

We are talking exclusively of home and workplace reception, as there is no way to track the ZIP of in-car listening. Since in home and at work account for 70% of all listening, this is more than adequate for study.

Listeners, not stations, make the decision of what stations they will listen to. And listeners do not listen to signals weaker than 64 dbu in 96% to 97% of the time spent listening to radio. In other words, if the signal is not above a certain strength, listeners.... whether in Miami, LA, McAllen or New York, to name a few... do not use them.

Stations are not "throwing away a lot of listenership" because listeners do not like weak signals and won't listen to them.

Well, that simply isn't true. Now, they do often need an external
antenna...the built-in can be pretty limited. But if you go into the
menu you can find the antenna aiming page...it will tell you if you're
listening to a repeater or a satellite. I get direct satellite reception
all over the backwater and backwoods locations I travel. And my
colleagues do the same.

I even get reception, indoors, on a MyFi in White Lake, Wisconsin.
Where the nearest repeater is more than 5 hours away.

Sounds like either you got a bad receiver, or you got a bad external
antenna. That does happen. I had a bad portable antenna out of the box.
Once replaced...never a problem. I can mow the lawn listening to Fine
Tuning, without so much as a glitch in the North Woods of Wisconsin.

2969. Congratulations!

The Eno is market to be worn on a wristband, and is positioned as not
needing an antena. I tried an antena that had a wire up the sleve and
clipped to my helmet, and it helped only slightly... the listening was
frequenly plagued by dropouts.
>

In LA, away from mountains, it worked. Of course, this is where there are
several dozen terrestrial repeaters.

Considering the radio is sold as a wrist or belt strap one, for jogging,
biking or such, not much of an exterior antenna is possible... the radio is
the size of an iPod.

I'd verify performance with another radio. Sounds like you have a dud.

That would require 'em to think in terms of long-term gain over
short-term profitability. For that reason, I can't see it happening.

The sad fact is that by the time the whole thing comes crashing down,
he will have retired with his pot of money and no one outside the
industry will know his name. It's the "I've Got Mine" syndrome.

I made the loop myself so round isn't as easy as square. However, if the nulls are sharper, I would make the effort. Anywhere on the net I can read about the difference between round and square loops.

Note the newest Wellbrook design is using a triangular loop.

My friend Pat on the Oregon coast (one of the top DX'ers in the states, with walls full of QSL's to prove it) was using a triangle shaped loop back in the 70's. Damn good performer. Don't know if he's still using loops. I do know he has two Beverage antennas and a couple EWE's. Lucky bugger is in a great location for DX, basically an open area away from a lot of other homes and other noise sources (and he won't let in CATV or broadband).

Loop Antennas : Relative Size and Ease of Construction

Circular (Round) Loops about the size of a big Hula Hoop
* Stretch out your Arms - The distance between your Hands.

Vertical Square-Rectangle Two Vertical Support-Points
* Single narrow footprint along the Ground.
* Height being the main Limiting Factor.

Vertical Triangle One High Vertical Support-Point
* Single narrow footprint along the Ground.
* Height being the main Limiting Factor.
* The two Slopping Sides of the Triangle are
Angled to Face the incoming Sky-Waves along
the Plane of the Triangle the K9AY Loop Antenna
takes advantage of the Triangle Shape and uses
Termination to switch the Front-to-Back Sides.

Horizontal Square-Rectangle Four Vertical Support-Points
* Four narrow footprints along the Ground.
* Land being the main Limiting Factor.

that's how i see it ~ RHF

I read on hte Web that the FCC hates broadcast radio and that they may
have let IBOC loose so that it would destroy the broadcast bands, so
that they could auction off the bands off at a later date.

True - just as with iBiquity, this HD Radio scam will make a few very
rich, then the whole thing will come crashing down, but they will be
gone including that jackal Bobby Struble.

Four (4) Ranges of 'portable' Radio Sizes :
.
1 - Pocket Size
* Sangean DT200VX "Pocket" Radio
* Sony ICF-S10MK2 "Pocket" Radio
* Grundig Mini World 100 PE Radio
.
2 - Paperback {Small Book} Size
* Sony ICF-SW7600 Radio
* Sangean ATS-909 Radio
* Grundig G5 / Etón E5 Radio
.
3 - Hardcover {Large Book} Size
* Redsun RP2100 Radio
* Etón / Grundig S350 DL Radio
* Sony ICF-2010 Radio
.
4 - Binder {11" x 8.5"} Size
* Panasonic RF-2600 Radio
* GE Superadio III Radio
* Etón E1 Radio
.
.

2994. RDFing with a DX398/AT909

Newsgroup: rec.radio.shortwave
Date: 2007-09-04 11:16:41 UTC
From: r2000swler@hotmail.com
Message-ID: <1188904601.633436.102090@d55g2000hsg.googlegroups.com>
Source record: 122728

Yesterday we had lunch with some non radio friends. Their daughters, a smart set of 16 year twins taking
all sorts of AP courses in school volunteered to check my methodology of using a DX398 as a RDF unit.

They both have had AP Physics so have some understanding of EM waves. I demonstrated how to null a
known local station and after lunch the were off. I had to work yesterday afternoon. I sicked them on the
Winchester 1610 TIS with no hints. They were on telephone with my wife when I got home all excited. They
live in Paris KY which is about 20 miles north west of Winchester. After some false starts they got the hang
of it and found the station in about 45 minutes.

The 1640 signals are just too weak, I am going to the the grid search as suggested and when it is strong
enough then do some RDFing.

I have a McKayDymek DA5 that I have loaned to a neighbor and it doesn't have enough gain to receive
anything on 1640.

I am starting to get irritated now.

Terry

2995. Dx program on Radio Exterior de Espana

The new BIN price, which is probably also the reserve price is still
too high. Looks like an early retirement plan has been put on hold.

Roadie,

Seller states "the reserve on this had to be set
at what I consider to be a more than reasonable
level ABOVE $600."

Open Bid $400 > Reserve Price $600+ > BIN $800

~ RHF
.

Lots of DX Programs listed here:

http://www.worldofradio.com/dxpgms.html

Note this regarding Spain: Spain: RADIO WAVES. [Usually consists of a couple of
``radio songs`` with an occasional mention of
some aspect of shortwave listening; never any DX news.]

XM pretty much confirmed when I cancelled. They even offered to give me a
different radio.and said that "some areas are not suitable for an "ultra"
portable device... they also offered a free year subscription. I got the
idea this was not a new issue with them.

The math is more likely: Open bid = $400 < BIN Price $800 = Reserve
price

If his new reserve price is $800 that would certainly be ABOVE $600

But the point is still that a Kenwood R5000 with an extremely limited
coverage VHF adaptor is not worth much more than the price of the
receiver with the optional AM wide filter installed.

Makes sense... that was the Census definition, although generally Arbitron
MSA's are not exactly the same as the census MSA or CMSA of today.

In order to survive, AM must be open to change and innovation. You
have to realize that you can't go on clinging to the past.

AM doesn't need to do anything at all. If the commercial stations can't make a go of it as it is, then they should relinquish the band to those that will use it (current pirates and other LP stations).

If they want a digital system, they should assign a band to that service and leave the current 500 million or more perfectly usable radios and their owners alone. Personally, I think digital radio bytes (and I run two netcasts that have much higher resolution than IBOC-AM). "Standard" resolution digital television is totally nasty, with it's pixellization and artifacts that can be seen from a distance even on a relatively small screen.. radio is scarely better. At least netcasts can use ongoing error correction instead of hoping for the best with FEC (which tends to fail a lot in marginal signal areas).

The comment of course has nothing to do with a retirement plan, but is
a way of pointing out that "DXACE1" is looking for an unrealistic
price. A VHF adapter with such limited coverage really adds litle to
the value.

Then why have you, on several occasions, mentioned "retirement plan", eh?

My advice still stands!

J.C. Bose used dielectric lenses at 90 GHz back at the end of 19th
century (that is, in the late 1800s) when doing his experiments in Calcutta.

Optical techniques have been used in radio for a very, very long time.

"HD Radio Effort Undermined by Weak Tuners in Expensive Radios"

"Each of the HD radios had their external antennas leads connected and
extended out, while my own radios worked off of their internal leads.
I started with the FM band, so the Zenith was not part of this test.
WCBS-FM came in clear as a bell on my car radio. Second best was the
Sony shower radio, which picked the station up well. The results were
less than stellar for the three HD radios. Not only were the results
worse than the Sony, none of them could tap into an HD signal at
ground level."

http://www.mp3newswire.net/stories/7002/hd-radio2.html

See folks, Eduardo doesn't let himself get upset with attempts at
insults - I could even say that his bastard Mother is a whore, that
the best part of him ran down his whoring Mother's legs, that his
Father sexually abused him while his Mother watched, that Eduardo used
to fuck his slutty sister while his bastard parents gave instructions,
that IBOC is a crock, that spicks are nothing but lazy-ass mother
fuckers waiting for handouts, that the US Government is shortly going
to open its boarders to all those greazy, smelly Mexican truck
drivers, that his wife left him for another woman, that his wife left
him for his trolling 24/7, and that his wife stopped fucking him years

ago !

See, Eduardo doesn't care:

Is that really true? My 15 year old has the choice of radio (AM &
FM), Cds, Internet streams and his MP3 player. He hardly ever
listens (or has on) the radio, he streams when he is at the
computer, plays CDs when he is relaxing and uses his mp3 player when
he is on the move. I checked and he reports that his mates have
similar listening habits. I thinks it's more likely that, whatever
format, the next generation of kids won't bother with radios - it'll
just be something that comes with a car if they have one.

As someone said earlier, the mainstream broadcasters are fighting a
battle in a war that is over. Like the record companies they have
not got their heads around the listening choices that we have today.

As to the form of modulation that you are obsessed by it is the most
technically ridiculous concept ever dreamed up. No decent RF
engineer would have come up with this load of crock unless there was
a bunch of suits looking over his shoulders. Anyways, we in the UK
have not been so silly as to put our digital radio on the Medium Wave.

Charlie.

The Shadow Knows
During WWII, in June 1941 Romania abandoned neutrality and joined the Axis, By 1942 the refineries at Ploesti were producing nearly a million tons of oil a month, accounting for 40 per cent of Romania's total exports. Most of that oil, as well as the highest-quality 90-octane aviation fuel in Europe, went to the Axis war effort. Ploesti provided nearly a third of the petrol that fueled Hitler's tanks, battleships, submarines, and aircraft. In return, Germany occupied Romania and protected her natural resources--more specifically, German gunners guarded the multiple refining and storage plants that ringed Ploesti.

Thanks to its relative remoteness from airfields, Ploiesti was spared Allied attack until 1943, when the United States Army Air Forces mounted Operation Tidal Wave from North Africa on August 1, bombing the refineries in a massive low altitude strike by 178 B-24 Liberator bombers. It was the most bombarded city in Romania in World War II. Although the raid inflicted heavy damage on the ground, much of the damage was soon fixed. In April 1944, the Allies launched decisive attacks from captured airbases in Italy. Finally, the city was captured by Soviet troops in August 1944.

The program is called "amigos de la onda corta" (the program is
Spanish spoken). Download the .pdf via this link:
http://www.rtve.es/archivos/70-2721-FICHERO/Progra_01.pdf and search
for "amigos" you will find the schedule for all continents.

Yes "HD" FM Radio does not deliever a good strong
signal beyond the 54-60 dBu Contour an many areas
with-in it too.

Oops IBOC Crock - I am Agreeing with you. ;-{

In time when the Digital "HD" Signal goes from
1% to 4% of the Analog ERP : "HD" FM Radio
in the FM Band will have as Good of coverage
as the Analog 'Stereo' signal does now.
- - - IMHO 8% would be better.

What I Hear on the FM Band with the Kitchen
"Family" Radio in Twain Harte, CA. :

Radi-osophy HD100 Radio
http://www.radiosophy.com/index.html
{The Kitchen "Family" Radio}

I can get great Analog FM Radio Stereo signals from
33 FM Radio Stations in the California Central Valley
and beyond; out of 41 FM Radio Stations received here.

Note - This is the Count between 88 MHz and 98 Mhz
with a possible 50 FM Radio Channels.

One of these is KQED-FM on 88.5 MHz coming all the
way from Mount San Bruno south of San Franciso with
a very good FM Stereo signal and on an occasional
Blinking Blue Light {indicating an IBOC "HD" Signal}.
http://www.fcc.gov/fcc-bin/fmq?list=0&facid=35501
Distance to me about 120 Miles.

The only FM "HD" Radio signal that I get a Solid Blue
Light On {HD Signal Lock} is a KOSO 93.1 MHz and
it has a HD-2 Co-Channel KOSO is listed as being
located in Patterson, CA with the Transmitter up in
the Hills west of town
http://www.fcc.gov/fcc-bin/fmq?list=0&facid=35426
Distance to me about 60 Miles.

Note - Again these statements only related to the
FM Radio Station Channels between 88 and 98 Mhz.

all i see is the blinking blue light ~ RHF
{ life beyond the 10mv/m contour }
.

In simple terms:
Gain corresponds to volume control. Loudness can be set.
Squelch is a feature that prevents signal from being sent unless it exceeds
a certain level. It is used to avoid listening to noise when only weak
signals are present.

It seems very difficult now to find a good purveyor of AM/FM/Shortwave radios. I am open to suggestions.

I have seen the Eton E% get some pretty good, although possibly biased, marks. That would fall in my price range. It is extremely difficult for me to find clear technical specifications. For example, I sure would like to know tuning resolution. I would like information on intermediate frequencies and the ability to handle weak signals in the presence of strong interference. I would appreciate being pointed toward sources of such information.

Roadie,

Please Don't Read Into Something that is NOT THERE !

Seller states "the reserve on this had to be set
at what I consider to be a more than reasonable
level ABOVE $600."

Open Bid $400 > Reserve Price $600+ > BIN $800

$800 Buy-It-Now Price
$400 Opening Bib

$200 Difference
1/3 of the Difference

$67
$600

$667 Reserve Price

"reasonable level ABOVE $600." :
Means over $600 but less than $700

Around $600 means close to $600 : $575~$625

Mid-$600s means Around $650 : $630~$670

High $600s means close to $700 : $675~$699

$800 BIN Means $800

MFJ-956 Shortwave Radio Pre-Selector [Rear]
http://www.rffun.com/catalog/preamps/2964rear.jpg

MFJ-956 Shortwave Radio Pre-Selector [Bands]
http://www.rffun.com/catalog/preamps/2964band.jpg

FWIW - What I like about the MFJ-956 Pre-Selector
is the Extra Features on the Band Selector Switch :
* BYP = "Bypass" for a Direct Connection not
using the Pre-Selector.
*GRD = "Grounded" for Grounding-Out the
Shortwave Antenna when it is not-in-use.

3056. OT: Can Vets Salute The Flag ?

Newsgroup: rec.radio.shortwave
Date: 2007-09-05 00:46:31 UTC
From: The Shadow <Cranston@CobaltClub.com>
Message-ID: <Q%mDi.156825$zz2.84569@newsfe12.phx>
Source record: 122640

Have often wondered why we never were allowed to salute.

http://www.govtrack.us/congress/bill.xpd?bill=s110-1877

WASHINGTON , D.C. - U.S. Senator Jim Inhofe (R-Okla..) today praised the passage by unanimous consent of his bill (S.1877) clarifying U.S. law to allow veterans and servicemen not in uniform to salute the flag. Current law (US Code Title 4, Chapter 1) states that veterans and servicemen not in uniform should place their hand over their heart without clarifying whether they can or should salute the flag.

"The salute is a form of honor and respect, representing pride in one's military service," Senator Inhofe said. "Veterans and service members continue representing the military services even when not in uniform.

"Unfortunately, current U.S. law leaves confusion as to whether veterans and service members out of uniform can or should salute the flag. My legislation will clarify this regulation, allowing veterans and servicemen alike to salute the flag, whether they are in uniform or not.

"I look forward to seeing those who have served saluting proudly at baseball games, parades, and formal events. I believe this is an appropriate way to honor and recognize the 25 million veterans in the United States who have served in the military and remain as role models to others citizens. Those who are currently serving or have served in the military have earned this right, and their recognition will be an inspiration to others."

This Bill was passed July 25, 2007. Let your veteran friends know about the Passage of this Bill.

I often explain squelch as the "listening distance" knob.
When you turn it up, you only hear the louder (read stronger) signals.
It is also useful to quieting some static/atmospheric noise that is in
the distance.

That is not an explanation. This shows you do not know what the terms
mean.

> > My radio needs 10V/m to receive a station decently? My God no wonder you
> > didn't believe my posts on the signal strength of local stations. I'm
> > glad we finally figured that out.
>
> I don't care what your $5 thousand dollar radio needs.

Nobody believes what you think it takes to get good reception. Clearly
you do not understand the terms you use.

< Snip marketing baloney >

So try again marketing hack. Explain the terms you use to express what
it takes for good reception.

Well,

Even though its getting on in the evening, I'm not going to send
everyone to an early sleep with a lengthy dissertation as to why I
feel the way I do on this divisive but important subject. That has
been expressed many times by others more eloquently than I can. I
don't expect at this point to change anyone's mind on the subject;
conversely, I doubt any one will alter my
convictions either. The basic fact for us down here is for the past 82
years we have, and still, derive significant revenue from our sky-wave
coverage area and we are committed to protecting that tradition.

I do look forward to the discourse after September 14th when the
evidence and data is documented. I also look forward to working with
our coalition of broadcasters whether it is to find solutions or seek
damages.

Best regards,

Watt Hairston
WSM-AM, Grand Ole Opry, LLC.

I highly recommend reading Eric Hoffer's masterpiece THE TRUE BELIEVER to help you understand the mentality of these, well "true believers", so prevalent in this newsgroup.

Hoffer was among the first to recognize the central importance of self-esteem to psychological well-being. Instead of focusing on the benefits of high self-esteem Hoffer studied the consequences of low self-esteem.

He discovered that fanaticism (e.g. religion or patriotism) and self-righteousness are rooted in self-hatred, self-doubt, and insecurity. As he describes in The True Believer, a passionate obsession with the outside world or one's country or with the private lives of other people is merely a craven attempt to compensate for a lack of meaning in one's own life.

A core principle in the book is Hoffer's insight that mass movements are interchangeable; he notes fanatical Nazis later becoming fanatical Communists, fanatical Communists later becoming fanatical anti-Communists, and Saul, persecutor of Christians, becoming Paul, a fanatical Christian himself. For the true believer the substance of the mass movement isn't so important as that he or she is part of that movement. Hoffer furthermore suggests that it is possible to head off the rise of an undesirable mass movement by substituting a benign mass movement, which will give those prone to joining movements an outlet for their insecurities.

Studying the postings of the American "true believers", or "patriots", who dominate this newsgroup (and shortwave/amateur radio for that matter) Hoffer's insights are remarkably accurate and clearly validated.

Well, I guess we will have to wait until tomorrow for the paid shill Eduardo to post on Usenet during working hours. He won't do it on his on time.

Eduardo is full of crap using technical terms for broadcast coverage he does not understand so what is his opinion worth... nothing!

Is that better?

August 16, 2007
by Phil Rockstroh
http://www.netscape.com/viewstory/2007/07/30/the-coming-american-reichstag-fire/?url=http%3A%2F%2Fwww.populistamerica.com%2Fthe_coming_american_reichstag_fire&frame=true

Given the nation's tottering infrastructure, imperial overreach abroad and vandalized constitutional process by a lawless executive branch, what will it take to scare the general public, mainstream press and political classes into immediate action to bring about meaningful change? At this twilight hour of the American republic, there must come a paradigm shift of seismic proportions or else the republic will perish.

I'm less than optimistic. Insomuch as, I suspect, that if, during a rare press conference, George W. Bush's face were to suddenly shed its skin, right on camera, live on national television, on all channels, broadcast and cable, to reveal the countenance of a Gila Monster -- the elitist beltway punditry would begin to catalog the merits of his reptilian single-mindedness. Then proceed to an interview with an "expert" from a right-wing funded, zoological think tank, "The American Institute for the Advancement of Predatory Policy," who would assure us that: "...in an era when evil is as proliferate as flies around the stinking dumpster of the world, Americans will be kept safe by a lizard-faced leader who eats flies for breakfast." And the general public would only be concerned because the broadcast happened to preempt the finals of American Idol.

To survive as a republic, a great many American idols will have to topple, and not only those inane, fame-obsessed clowns and crooners sharp-elbowing each other on the Fox Network's televised exercises in Pop Stardom for Dummies. As far as idolatry goes, by far the most pervasive, ruinous, and in need of toppling is the position of unquestioning worship the US military holds in American life. One would think that after the Götterdämmerung of macho folly we've witnessed over the past half-decade that the country would have had its fill of self-proclaimed alpha male posturing and adolescent-minded, military hagiography.

The media is rife with right-wing fantasist nonsense about the "feminized" American male, when, in fact, the country has grown outright psychotic from testosterone-induced toxicity (TIT). In the 1960s, hippies were ridiculed for their naive assumptions that life on earth could be magically transformed into an egalitarian paradise of free love, good dope, waterbeds and Lava Lamps for all, if "the straights" could simply be induced to "raise their consciousness" by

the engagement in and the utilization of the erotic acts, illicit substances and goofy, counterculture accouterment mentioned above. Accordingly, the current fantasy -- that all US soldiers are good, righteous and brave, standing ever vigilant against all threats to the Homeland -- could be regarded as a kind of Woodstock Militarism.

Thus, this puerile glorification of American servicemen and women is a view of human nature that is every bit as naive as the hash-pipe dreams of Sixties idealists involving peace, love and flower power -- and one that can't be blamed on a communal use of L.S.D. Excuse me, but why should the military establishment and its foot soldiers hold a position of being beyond scrutiny or even reproach?

The last I looked "our troops" were being used as mindless instruments of our country's imperialist aggression. Moreover, the perpetually pimp-slapped and habitually on-their-knees before Bush's macho-narcissistic bluster, congressional Democrats, who gained a legislative majority on the strength of the anti-war vote, are up to their lickspittle lips in the legalized mass murder being perpetrated in the name of our nation. It is time to see through and reject the right-wing propaganda and liberal paternalism of viewing the soldiers of the US military as victims ... Oh cry me a river of Iraqi blood ... When the truth is: We are a nation of people possessed of Bronze Age minds, who are armed with 21st Century weapons. Ergo, our soldiers are the delivery system of said weaponry.

This is the reason the American military machine exists on such a massive scale: Our leaders wish to establish, by force, if necessary, global hegemony. Accordingly, what do platitudes such as, "I support the troops" translate to when those troops are engaged in an illegal and immoral occupation of a foreign land, invaded under false pretenses? Where is the line to be drawn between having empathy for an army comprised to a large degree of economic conscripts and giving tacit approval to the war crimes they commit?

Since the enacting of the Nuremberg Laws, the claim of "I was only following orders" has been ruled an inadmissible defense. Shouldn't the plea of "I couldn't get a good job after high school, so I joined the military, was shipped off to Iraq, where I grew so scared, frustrated and angry, that, every once in a while, I lit-up a few Haji civilians, with my M16, turning them into twitching jellyfish" be regarded as equally inadmissible?

To bestow unquestioning and unilateral support for the soldiers of a ruthless empire's immoral invasion of a sovereign nation is a recipe for war crimes and atrocities. Soldiers represent a cross-section of a nation's population, evincing a mix of human traits and characteristics, some admirable and worthy of support and others reprehensible and deserving of condemnation and contempt. Accordingly, many soldiers are not heroes and all heroes need not be soldiers. Resistance and the refusal to fight immoral wars constitutes bravery as well.

This most recent version of the proto-fascist glorification of the military has its origins in the rightist revisionist history of the Vietnam War. Over the decades, the right has deftly and dishonestly framed the narrative and succeeded in foisting its mythos of unquestioning loyalty to all things military upon the history-bereft, reality-resistant American populace.

At its dark and deceitful heart, this is a fantasy that is as fact free as it is invidious. Accordingly, the public of the United States was bilked into believing conservative propaganda such as the preposterous urban legend involving hippies spitting on returning Vietnam vets. Yep, that sounds plausible: scrawny hippies, afflicted with pot-induced cotton mouth, expectorating on trained killers, just returned from the killing zones of Southeast Asia. If you believe that nonsense, I'll sell you, on Ebay, the Stairway To Heaven -- the very one that inspired the Led Zeppelin song.

Almost every utterance on the subject by conservatives is either bullshit or an outright lie. The biggest of the Big Lies was and remains roughly as follows: The Vietnam War was lost, not during the battles and skirmishes fought in that country's emerald jungles and muddy rice paddies, but in the privileged confines of college campuses and in the sun-drenched enclaves of Hollywood liberals. To hear conservatives tell it, the North Vietnamese Army and Vietcong guerillas were all but on their knees, beaten, on the verge of surrender, when Jane Fonda flew to their side, rallying their flagging spirits with the succor of her American troop-hating, commie-suckling sedition, hence rallying them on to final victory.

Next, under the influence of that cultural laughing gas known as Reaganism, Hollywood created a Vietnam mythos even more preposterous than the one chronicled above. Whereby, in the nineteen eighties, Chuck Norris and Sylvester Stallone refought the Vietnam War and won. In these epics of testosterone-poisoned kitsch, Norris and Stallone, freed of government restraint and hippie bad mojo, reaped revenge on the godless, yellow hordes, by deploying the terrible weaponry of their male pheromonal musk defoliates and hairstyling jell napalm.

It would seem, from the POV of these movies, that the Vietnamese communists were brought to heel with prop automatic assault weapons and blow dryers. On the screen of suburban cineplexes, Asian extras, costumed as Vietnamese soldiers, fell before Norris' and Stallone's barrage of blanks like Hollywood Indians of old.

Once again, the world had been set right; those runty, upstart, Southeast Asian bastards had been put in their place. The United States was victorious. Of course, not in historical truth -- but in the only place that mattered to us -- in our Cold War fevered minds, a place where Americans believed that the "Evil Empire" plotted to invade our post-war, consumer paradise, because the commie hordes lusted to collectivize our Buicks, our blondes, our pool furniture and our lawn statuary. All in the same insane way, we hallucinate, at present, that "Islamo-Fascists" scheme to invade us and put Lindsey

Lohan in a Burka.

In truth, the only place the people of Vietnam ever constituted a threat to the United States was within the toxic mindscapes of paranoid cold warriors. This death-enamored realm -- where the most psychotic is king -- is the place (and only place) where Iraq's weapons of mass destruction existed, and is where, at present, Iran's threat to the United States looms.

Resultantly, we have erected this walled and fortified domain of delusion, this heavily armed Disneyland of militant ignorance, with all its attendant, noxious myths of the sacrifices of its noble warriors, for a less than noble reason and purpose. The purpose of this jingoistic blarney is to shield the general public from the ugly reality of how and why an empire's armies exist; because an empire's armies are mustered -- not to protect the Homeland -- but to secure plunder for its ruling elite and provide mollifying bribes for its hoi polloi.

By necessity, the fantasy must be large and all pervasive. Within it, a frightened citizenry must believe that all its potential leaders must embody the traits of a bona-fide, baptized in blood, warrior king. Ergo, the gun-caressing, bible-clutching, dog-baiting, "the-ruling-class-took-everything-leaving-me-with-nothing-but-my-masculine-pride" crowd is never going to accept the junior senator from the state of New York, currently vying for the throne -- even if she has re-branded herself as Hillary W. Bush.

At this point, it is imperative that we let the world in on a dirty, little secret that many naive liberals have managed to lockout of their minds: (Bill) Clintonism was a continuation of Reaganism, sans the Grecian Formula and pomade. Furthermore, Bill Clinton was the diametric opposite of FDR, not in personal style -- but in his administration's domestic policies and social priorities. While Roosevelt was accused of being a "traitor to his class," for betraying his aristocratic ilk, by the enacting of The New Deal, Bill Clinton, also, proved to be a traitor to his class, by betraying those who shared his laboring class beginnings, by means of his ruinous neo-liberal trade policies and his anything-for-the-boys-on-Wall-Street economics.

As far as his relationship with the nation's military/industrial complex, Clinton, because he had avoided military service during the Vietnam War, had to prove he wasn't a patchouli-reeking peacenik by constantly kowtowing to the Pentagon establishment. Withal, the situation will be worse with Hillary, who, time and time again, will have to establish her macho credentials by bombing somebody, anybody, anytime and anywhere.

In this way, due to his charm, intelligence and his almost preternatural talent to feign empathy -- Bill Clinton was more dangerous than George W. Bush -- because Bush, at least, reveals to

the world the true face of empire. Although, at present, most Americans are unwilling or unable to face our true face. Accordingly, the crack-brained narrative of the present moment goes: to be viable as commander-in-chief, Hillary must prove her toughness, preferably, in some he-man display of resolute stupidity. Since the flight-suit on the deck of an aircraft carrier gambit has been played-out, perhaps her handlers could set-up a photo-op involving the masculine iconography of the World Wrestling Federation. It should be arranged that she wrestle and then body slam two midget wrestlers portraying Dennis Kusinich and Ron Paul. Such an act of political stagecraft could prove to be Hillary Clinton's so-called "Sister Souljah moment."

Sarcasm, you say? Barely. Our collective mindset regarding the nation's pernicious militarism rises to about the level of thoughtful insight and searching introspection that is on display in the realm of professional wrestling. Furthermore, at least, the wrestlers themselves (and most of their audience) know the violence of the sport is staged. Unfortunately -- while the political theatre of US politics is fake as well -- in Iraq, the blood isn't.

No, just simply stating the facts from tens of thousands of Arbitron diaries
and ZIP code analysis of multiple markets... most listening to AM is inside
the 10 mv/m contour. Outside, there is nearly no listening at all.

Nope, it was much larger, and defeated the purpose of having the little one.

And metro area FMs get essentially no analog listening beyond the 64 dBu
contour.

> it takes for good reception.

"Good reception" is a perception of the listener, not a technical term. However, based on an enormous amount of data over many many years it can be seen that outside the 10 mv/m contours of an AM or outside the 64 dBu contours of an FM, listeners are not interested in tuning in to any station... there is very close to no reported listening, in fact.

A good example, which obviates "well, at the fringe of a metro, there are less people to listen" is to take stations that do not fully cover the most densely populated parts of a metro. On FM, we have looked at over 30 survey periods in LA with a total sample of over 7000 persons per survey and plotted the returns for KRCD and KRCV, which are class A FMs. There is nearly no listening at home or at work outside the 64 dBu contours during the last 8 years, despite the stations frequently being in the top 10 (simulcast) in LA... all the listening is in a very small area.

Years ago, we looked at the same thing for AMs in general, and found that the 10 mv/m was the barrier to sustained listening, and, of recent, perhaps the 15 mv/m is the limit where listeners consider a station listenable.

People listen if the signal is strong, easy to tune, and free of nose, fading, etc. It's totally subjective, but can be easily quantified.

One station. There are 4800 AM stations, About 5 make money from skywave
coverage, and most of the rest have reduced coverage at night due to
interference.

Since WSM ranks 22nd in billing in Nashville, with revenues that are less
than 1/15th those of the number one station, I really doubt that WSM makes
"significant" revenue from skywave coverage. What they may have made 50 or
80 years ago is irrelevant... There is a gospel AM daytimer that bills twice
as much.

AM filings at the FCC... for example, proofs of directional systems, have readings expressed in mV/m, and they are kept consistent even if the readings, such as on radials close to the array, are over 1000 mV/m. The criteria for licensing, in fact, used to be that the station had to put a 25 mV/m signal over the city of license.

I'm not in the U.S., but isn't that false advertising? If it is listed
with a minimum bid of $400, if I bid $400 and was the only bidder,
will I get the radio?

If not, IMHO that's false advertising. Since there is a hidden reserve,
you can't read his ad and determine the price. What if you went into a
store and they had the same deal? His ad states that you can bid $400
and have a chance of owning the radio, which is not true.

I know it's an eBay standard. But is it legal?

Someone in the U.S. should complain to the Federal Trade Commission,
and the consumer action groups.

Geoff.

3094. Tecsun 1994 limited edition

Newsgroup: rec.radio.shortwave
Date: 2007-09-05 05:59:43 UTC
From: "spwan9@gmail.com" <spwan9@gmail.com>
Message-ID: <1188971983.760790.96170@19g2000hsx.googlegroups.com>
Source record: 122777

Tecsun released a limited commemorative radio - "Model 1994" three weeks ago, pictures are available on Tescun website:

http://www.tecsun.com.cn/IMAGES/1994-1page.jpg

This model is mainly made for Tecsun internal staff, one hundred sets were available on Tecsun BBS for radio fans. After they receive it, majority of buyers are very satisfied with the sound of 1994. Some people missed the chance to buy one, they became upset and vent their frustration on Tecsun BBS. The BBS was hacked yesterday, no one knows if this is linked to the 1994 issue but a lot of people suspect this is the case.

http://bbs.leowood.net/web/leowood/forum/incomefiles/20079/513512229233.JPG

Tecsun has restored part of the BBS database, it is trying to make more 1994 available on the BBS, by reducing supply to its internal staff.

The Tecsun model 1994 is an OEM model of VAL R-301S with a vintage style and very good sound, you can find more information about this radio in the Yahoo VAL group

http://groups.yahoo.com/group/Valradios/

Roadie,

FYI- The Kenwood VC-20 VHF Converter is
a hard-to-find and sought-after Accessory for
some Kenwood R-5000 Receiver owners.

To the extent that some of the Kenwood VC-20
VHF Converters have sold for $200+ on eBay.

Also some 'like new' Kenwood R-5000 Receivers
with the original Box have sold for $500+ on eBay.

Plus the Kenwood YK88A-1 6kHz AM Filter usually
goes for $100 on eBay.

$200+ Kenwood VC-20 VHF Converter
$500+ Kenwood R-5000 Receiver
$100+ Kenwood YK88A-1 6kHz AM Filter

$800+ All-in-One-Package - Priceless ! :o)

~ RHF

About like all of your posts exactly on topic of shortwave radio. For all the posts you have in here constantly, I would suspect you are either on government assistance or something else.

By the way, arsehole this post isn't about shortwave but for the previous posters article, you might not have the right to listen to shortwave for information if the above happens.

I guess that never occurred to your feeble mind though.

3109. Legend of WOWO dies

Newsgroup: rec.radio.shortwave
Date: 2007-09-05 09:27:41 UTC
From: dxAce <dxAce@milestones.com>
Message-ID: <46DE768D.3D65F82C@milestones.com>
Source record: 122792

For those that follow medium wave and are familar with either WOWO or Bob Sievers, the following may be of interest.

Legendary WOWO Radio Announcer Bob Sievers dies

Former WOWO morning host Bob Sievers has died at the age of 90. According to friends of the Sievers family, he was taken to the Emergency Room and died at around 7 AM Monday morning. Sievers hosted the Little Red Barn morning show on WOWO for decades, and has been on the air in one way or the other for over seventy years. You can read stories and memories from Bob's closest friends and co-workers throughout the day onTuesday on Newstalk 1190 WOWO.

I have also posted a partial article about him on my blog.
Thanks for your time.
Gayle Van Horn W4GVH
Teak Publishing, Brasstown, NC
World QSL Book
Shortwave Central Blog: http://mt-shortwave.blogspot.com/
Monitoring Times: SW Guide Frequency Manager
Broadcast Logs/QSL Report Columnist
(Gayle Van Horn via HCDX)

I'm very sad to hear this. When I was 12 or 13 got to sit in the studio with Bob as he did his program, and later saw him at the FT. Wayne Hamfest on occasion.

He was also a ham, holding the call W9FJT (Fifty Jumping Tigers)
RIP Bob.
